Hi Elisabeth:

Ecology concurs with this approach. Thanks for collaborating on the evaluation of data from monitoring well MW-14V.

Mike

Mike – thanks for calling – its always nice to catch-up! Per our conversation, we will sample the deep well GW-14V another time, in the 4th Qtr. 2022, to confirm the observed trends in this well. If concentrations remain below cleanup levels, and do not show a significant increasing trend, we will reach back out to see if its ok to decommission the well.

Thanks again - Elisabeth

Hi Mike – I was wondering, since we were able to confirm in 2 successive events there is vertical delineation of groundwater, would it be ok if we decommission the deep well GW-14V? Its constructed using triple casing, but I would still like to avoid ant conduits to the regional aquifer, if possible.

Thank you – and I hope you have a wonderful thanksgiving weekend!

Hi Mike - Please see the attached 2Q2022 GWM report for the Burien, WA site, for your files.

Please let us know if you have any questions.

Thank you - Elisabeth
