Hello Wade:

Thank you for submitting the *Workplan for Subsurface Assessment and Tier I Soil Vapor Investigation*, dated September 8, 2023, and prepared by the Antea Group. Ecology is sending this email to document concurrence with the proposed workplan, to facilitate initiation and completion of the drilling, sampling, and laboratory analysis components of the work.

Ecology appreciates the efforts of ARCO Remediation Management Services Company in continuing progress towards Site cleanup in the Voluntary Cleanup Program.

Mike

Mike, the workplan for 11060 we discussed on Friday is attached. We were able to get the drilling scheduled for later this month, assuming you have no issues with this plan. I know that's short notice, but scheduling drillers is getting farther and farther out, so we went ahead and booked. We can try to rebook if needed, but the plan is pretty straightforward. We're looking to button down some extent issues, test the effectiveness on the SVE, and resolve onsite vapor to current standards (if you recall, we did vapor back in 2003 but it was missing a few constituents that are needed now so we'll do it again).

Please take a look and let me now if you have any issues…

Thank you…

Wade
