RE: Client Project: Chinook
ARI Job No. KG57

Dear Kristin:

Please find enclosed the original chain of custody documentation and the final data package for samples from the project referenced above.

Problems associated with these analyses are discussed in the Case Narrative.

An electronic copy of this package will remain on file with ARI. Should you have any questions or problems, please feel free to contact me at your convenience.

Sincerely,

ANALYTICAL RESOURCES, INC.

Susan Dunnihoo

Limits of Liability: *ARI will perform all requested services in accordance with appropriate methodology following ARI Standard Operating Procedures and the ARI Quality Assurance Program. This program meets standards for the industry. The total liability of ARI, its officers, agents, employees, or successors, arising out of or in connection with the requested services, shall not exceed the Invoiced amount for said services. The acceptance by the client of a proposal for services by ARI release ARI from any liability in excess thereof, not withstanding any provision to the contrary in any contract, purchase order or co-signed agreement between ARI and the Client.*

Sample Retention Policy: All samples submitted to ARI will be appropriately discarded no sooner than 90 days after receipt or 60 days after submission of hardcopy data, whichever is longer, unless alternate retention schedules have been established by work-order or contract.

Tracking NO.: _____ Date: 11/21/06

ARI Job No.: KG57 Lims NO.: _____

Preliminary Examination Phase:

1. Were intact, properly signed and dated custody seals attached
   To the outside of the cooler? ..... YES (NO)
2. Were custody papers included with the cooler ..... (YES) NO
3. Were custody papers properly filled out (ink, signed etc.)? ..... (YES) NO
4. Complete custody forms and attach all shipping documents ..... (OK) NA

Cooler Accepted BY: EO Date: 11/21/06 Time: 1750

Log-IN Phase:

5. Was a temperature blank include in the cooler? ..... YES NO
6. Record Cooler Temperature..... 6 °C
7. What kind of packing material was used? ..... BLU
8. Was sufficient ice used (if appropriate)? ..... (YES) NO
9. Were all bottles sealed in separate plastic bags? ..... (YES) NO
10. Did all bottles arrive in good condition (unbroken)? ..... (YES) NO
11. Were all bottle labels complete and legible? ..... (YES) NO
12. Did all bottle labels and tags agree with custody papers? ..... (YES) NO
13. Were all bottles used correct for the requested analyses? ..... (YES) NO
14. Do any of the analyses (bottles) require preservative?
    (If so, Preservation checklist must be attached) ..... (YES) NO
15. Were all VOA vials free of air bubbles? ..... (YES) NO
16. Was sufficient amount of sample sent in each bottle? ..... (YES) NO
17. Notify Project Manager of any discrepancies or concerns..... (OK) NA

Cooler Opened By: EO Date: 11/21/06 Time 1750

Explain any discrepancies or negative responses:

– VIALS NOT PRESERVED –

Case Narrative

Client: Anchor Environmental
Project: Chinook
Matrix: Water
ARI Job Nos. KG57

Sample receipt

Two water samples were received on November 21, 2006 under ARI Job KG57. Samples were well-iced and the cooler temperature measured by IR thermometer following ARI SOP was 6.0° C. Samples were received in good condition with no discrepancies in paperwork.

Volatiles by SW8260

Samples were analyzed within recommended holding times for unpreserved samples.

Initial and continuing calibrations were within method requirements with acceptable marginal exceedences for Acrolein at 26% and 1,2-Dibromo-3-chloropropane at 34%.

The method blank was clean at the reporting limit and Laboratory Control Sample recoveries and RPDs were within limits.

Surrogates recoveries were within ARI control limits with the exception of sample **RLSW2-112106**. The sample was reanalyzed with acceptable recoveries. Results from both analyses have been included here.

Internal standard areas were within method limits.

There were no other incidents of note.

Semivolatiles by SW8270

Samples were extracted and extracts analyzed within recommended holding times.

Initial and continuing calibrations were within method requirements.

The method blank was clean at the reporting limit and Laboratory Control Sample recoveries were within limits, with the exception of Benzoic Acid. As Benzoic Acid is known to be problematic, no corrective action was taken.

Surrogates recoveries were within limits.

Internal standard areas were within method limits.

There were no other incidents of note.

Low Level PAH by SW8270-SIM

Samples were extracted using methods modified for low level analysis and extracts analyzed within recommended holding times.

Initial and continuing calibrations were within method requirements.

The method blank was clean at the reporting limit. Laboratory Control Sample recoveries were within advisory limits, with the exception of Benzo(a)pyrene. As LCS control limits for this method are currently advisory, no further corrective action was taken.

Surrogates recoveries were within limits.

Internal standard areas were within method limits.

There were no other incidents of note.

Pesticides by 8081A

Samples were extracted and extracts analyzed using internal standard methods, within recommended holding times.

Initial and continuing calibrations were within method requirements.

The method blank was clean at the reporting limit and Laboratory Control Sample recoveries were within limits.

Surrogates recoveries were within limits.

Internal standard areas were within method limits.

There were no incidents of note.

Aroclor PCBs by 8082

Samples were extracted using modifications for low level analysis, and extracts analyzed using internal standard methods, within recommended holding times.

Initial and continuing calibrations were within method requirements.

The method blank was clean at the reporting limit and Laboratory Control Sample recoveries were within limits.

Surrogates recoveries were within limits.

Internal standard areas were within method limits.

The undetected result for **GS2-112106** was raised and "Y"-flagged due to interference.

There were no incidents of note.

Dissolved Metals

Samples were clear and did not precipitate upon acidification; therefore samples were run raw without digesting.

The method blank was clean at the reporting limit and LCS recoveries were within limits.

Duplicate RPDs were within limits and matrix spike recoveries were within limits.

There were no incidents of note.

General Chemistry Parameters

Cyanide/WAD Cyanide

Samples were prepared and analyzed within the recommended holding time.

The method blank was clean and SRM recoveries within limits.

The replicate had RPDs within limits and matrix spike recoveries were acceptable.

There were no incidents of note.

Data Reporting Qualifiers

Effective 12/28/04

Inorganic Data

U	Indicates that the target analyte was not detected at the reported concentration
*	Duplicate RPD is not within established control limits
B	Reported value is less than the CRDL but ≥ the Reporting Limit
N	Matrix Spike recovery not within established control limits
NA	Not Applicable, analyte not spiked
H	The natural concentration of the spiked element is so much greater than the concentration spiked that an accurate determination of spike recovery is not possible
L	Analyte concentration is ≤5 times the Reporting Limit and the replicate control limit defaults to ±1 RL instead of the normal 20% RPD

Organic Data

U	Indicates that the target analyte was not detected at the reported concentration
*	Flagged value is not within established control limits
B	Analyte detected in an associated Method Blank at a concentration greater than one-half of ARI's Reporting Limit or 5% of the regulatory limit or 5% of the analyte concentration in the sample.
J	Estimated concentration when the value is less than ARI's established reporting limits
D	The spiked compound was not detected due to sample extract dilution
NR	Spiked compound recovery is not reported due to chromatographic interference
E	Estimated concentration calculated for an analyte response above the valid instrument calibration range. A dilution is required to obtain an accurate quantification of the analyte.
S	Indicates an analyte response that has saturated the detector. The calculated concentration is not valid; a dilution is required to obtain valid quantification of the analyte
NA	The flagged analyte was not analyzed for

NS The flagged analyte was not spiked into the sample

M Estimated value for an analyte detected and confirmed by an analyst but with low spectral match parameters. This flag is used only for GC-MS analyses

N The analysis indicates the presence of an analyte for which there is presumptive evidence to make a "tentative identification"

Y The analyte is not detected at or above the reported concentration. The reporting limit is raised due to chromatographic interference. The Y flag is equivalent to the U flag with a raised reporting limit.

C The analyte was positively identified on only one of two chromatographic columns. Chromatographic interference prevented a positive identification on the second column

P The analyte was detected on both chromatographic columns but the quantified values differ by ≥40% RPD with no obvious chromatographic interference

Geotechnical Data

A The total of all fines fractions. This flag is used to report total fines when only sieve analysis is requested and balances total grain size with sample weight.

F Samples were frozen prior to particle size determination

SM Sample matrix was not appropriate for the requested analysis. This normally refers to samples contaminated with an organic product that interferes with the sieving process and/or moisture content, porosity and saturation calculations

SS Sample did not contain the proportion of "fines" required to perform the pipette portion of the grain size analysis

W Weight of sample in some pipette aliquots was below the level required for accurate weighting

Analytical Resources Inc.
Average Percent RSD Report*

* Pursuant to EPA Method 8000B (Rev2, Dec 1996) section 7.5.1.2, an initial calibration is acceptable (and the average response factors may be used for quantitation) if the mean RSD for all analytes is less than or equal to 15%. If this option is used, there is no limit on the number of analytes with RSD values > 15%. Nor is there a limit on any single RSD value.

SEMIVOLATILE ORGANIC INSTRUMENT PERFORMANCE CHECK
DECAFLUOROTRIPHENYLPHOSPHINE (DFTPP)

Lab Name: ANALYTICAL RESOURCES, INC Client: ANCHOR

Instrument ID: NT6 Project: CHINOOK

DFTPP Injection Date: 12/01/06 DFTPP Injection Time: 0948

m/e	ION ABUNDANCE CRITERIA	% RELATIVE ABUNDANCE
51	30.0 - 80.0% of mass 198	38.6
68	Less than 2.0% of mass 69	0.0 (0.0)1
69	Mass 69 relative abundance	54.5
70	Less than 2.0% of mass 69	0.1 (0.3)1
127	25.0 - 75.0% of mass 198	56.5
197	Less than 1.0% of mass 198	0.0
198	Base Peak, 100% relative abundance	100.0
199	5.0 to 9.0% of mass 198	7.2
275	10.0 - 30.0% of mass 198	22.5
365	Greater than 0.75% of mass 198	2.48
441	Present, but less than mass 443	9.8
442	40.0 - 110.0% of mass 198	67.5
443	15.0 - 24.0% of mass 442	13.0 (19.3)2

1-Value is % mass 69 2-Value is % mass 442

THIS CHECK APPLIES TO THE FOLLOWING SAMPLES, MS, MSD, BLANKS, AND STANDARDS:

Criteria Flagged

ARI Project No.: K657 Client Name: ANCHOR

Date of Out-of-Control Event: 12/1/06 Method/Element: CYANIDE (WAD)

Unacceptable Blank	
Unacceptable Duplicate	✓
Unacceptable Spike	
Unacceptable Reference	

Prep Code: _____

Other: _____

Details of Problem/Recommended Corrective Action: SAMPLE BOILED OVER W/ VACUUM FLUCTUATION. RPD FAILED AT 54 %. THE HIGHER CONCENTRATION IS MOST LIKELY DUE TO AMENABLE CYANIDE CARRY OVER. DUPLICATE HAD GOOD DISTILLATION WITH NO PROBLEMS. DISCUSSED WITH MANAGER AND DUPLICATE WILL BE REPORTED WITHOUT ORIGINAL.

Samples Affected: K657 A

Corrective Action Taken: NO REANALYSIS SINCE DUP WILL BE REPORTED.

Analyst: [signature] Supervisor: [signature]

Date: 12/1/06 Date: 12-1-06
