Subject: VCP NW3439 Olympic Pipeline Spill Conway - Technical Assistance Regarding Delineation of Contaminated Soil
Date: Thursday, April 23, 2026 12:59:22 PM

Hello Wade:

Ecology reviewed the *Supplemental Site Investigation Report, Area A-1, Olympic Pipeline Gasoline Spill, Conway, Washington* dated April 14, 2026. We understand that the work was performed in accordance with the previously accepted *Preliminary Site Investigation Work Plan* dated July 11, 2025.

Ecology concurs with the additional contaminated soil delineation results and the proposed soil resampling to assess the identified cleanup level exceedances. This sampling activity will be coordinated with the completion of revegetation at the Site, likely around the time the 5-year restoration is completed along the bank and the vegetation is fully reestablished.

Ecology appreciates the efforts of BP and Olympic Pipeline in continuing progress towards Site cleanup under the Voluntary Cleanup Program.

Sincerely,

Michael R. (Mike) Warfel, LG, LHG, RG
