

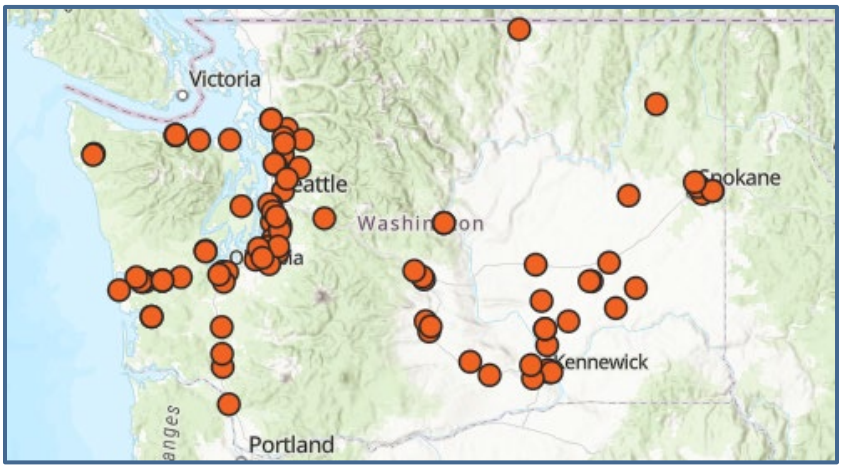
Are you a farmer? You may qualify for lower cost fuel under the Climate Commitment Act

Find CCA-exempt agricultural fuel near you

If you're a farmer, you may not be getting the lower cost fuel you're entitled to under the Climate Commitment Act (CCA). Agricultural fuel is exempt from the CCA, however some fuels sold in our state have additional surcharges that are not regulated by Washington Department of Ecology. We're working to help farmers find local suppliers that offer surcharge-free fuel.

Find a retail fuel seller near you that offers surcharge-free exempt agricultural fuel by visiting our website ecology.wa.gov/fuelforfarmers to view our online map or download a PDF of our retail fuel seller directory.



This map shows locations that offer surcharge-free exempt agricultural fuel. A complete list is available on our webpage.

Get lower cost fuel

1. Make sure you qualify.
2. Find a retail fuel seller that sells fuel, for agricultural uses, without additional surcharges by downloading our retail fuel seller list or viewing our map on our webpage ecology.wa.gov/fuelforfarmers.
3. Call the fuel location to understand the process to purchase the fuel. They may require documentation such as Ecology's exemption certificate available on our webpage.
4. Go to the retail fuel seller, let them know why you're there, and fuel up.

Assistance for fuel suppliers

By law, fuel suppliers are responsible for claiming the CCA exemption and making sure farmers have access to the fuel they need. If you're a fuel supplier and/or retail station that is not yet providing fuel without surcharges, contact us for support.

If you're already offering surcharge-free exempt agricultural fuel, contact us to be included in our directory and on our map.

Do you qualify?

By law, you qualify if:

You're a "farm fuel user," defined as a farmer or "a person who provides horticultural services for farmers, such as soil preparation services, crop cultivation services, and crop harvesting services."

AND/OR

You're fueling a truck or vehicle used for the purpose of transporting raw agricultural products on public highways, including waterways.

We're here to help

If you encounter issues getting lower cost fuel, call 360-280-2016 or email GHGReporting@ecy.wa.gov.
