Why is this Certification of Consistency Required?

The federal Coastal Zone Management Act (CZMA) authorizes states to review federal actions for consistency with the federally approved enforceable policies of state coastal management programs. The issuance of federal licenses and permits are federal actions that are subject to state review where those licenses and permits have been listed by the state as subject to review. Listed federal license or permit activities under Washington's Coastal Zone Management (CZM) Program are found on the Office for Coastal Management's [website](#). Applicants for listed authorizations in the State's coastal zone¹ must show that the proposed activity is consistent with the [enforceable policies](#) found in four state laws and their implementing regulations (the Shoreline Management Act, Clean Air Act, Water Pollution Control Act, and Ocean Resources Management Act (ORMA)), and in the Marine Spatial Plan for Washington's Pacific Coast (MSP). Examples of federal permits and licenses include U.S. Army Corps of Engineers (Corps) permits, Federal Energy Regulatory Commission (FERC) licenses, and U.S. Coast Guard bridge permits. A federal agency cannot issue a permit or license unless the Department of Ecology (Ecology) concurs that the project is consistent with Washington's enforceable policies. If the state issues a CZMA objection to a proposed federal license or permit activity, the federal agency cannot authorize the activity unless the state removes its objection or the U.S. Secretary of Commerce overrides the state objection in an appeal filed by the applicant.

The requirements for CZMA federal consistency reviews are found at 16 U.S.C. § 1456 (Section 307 of the CZMA) and the Federal Consistency regulations at 15 CFR part 930. The specific rules for the review of federal licenses and permits are found at 15 CFR part 930, subpart D. Ecology has prepared this form to help applicants demonstrate consistency with the State's CZM Program.

Next Steps:

For projects that need a Corps permit, please submit the form and supporting materials as described below to the Corps at NWS-PermitApp@usace.army.mil and it will be forwarded to Ecology for review. For projects that need other types of federal permits or licenses, please submit the form and supporting materials to fedconsistency@ecy.wa.gov.

Along with this form, please submit the following:

- A copy of the application for federal permit or license,
- Project location map,
- Site plans, and
- Supporting documentation as identified below under the enforceable policies.

Note: For projects on Washington's Pacific Coast, if ORMA and/or the MSP apply, an ORMA analysis or MSP Effects Evaluation must be included with your consistency certification; this may take considerable time to prepare.

¹ The Coastal Zone includes all areas of the following counties: Clallam, Grays Harbor, Island, Jefferson, King, Kitsap, Mason, Pacific, Pierce, San Juan, Skagit, Snohomish, Thurston, Wahkiakum, and Whatcom.

Ecology will then:

- Review your Certification of Consistency to make a Federal Consistency decision for the project.
- Publish a public notice (or this may be published by the applicable federal agency).
- Contact you if further information is needed.

Ecology has six months from receipt of the consistency certification package to issue a decision (concurrence, concurrence with conditions, or objection). If Ecology does not act within six months, the activity is presumed to be consistent with the CZM program. If additional time is needed, Ecology may contact you regarding a 'stay' of this date.

Note: Ecology cannot issue a concurrence until all of the applicable permits/authorizations are received.
