RE: Coastal Zone Consistency for Corps Reference No. **200701261**,  
Taylor Shellfish Chapmans Cove Tidelands, Mason County, Washington

Dear Erin Ewald:

On May 7, 2020, the Department of Ecology received a Certification of Consistency with the Washington State Coastal Zone Management Program (CZMP) for the above project. October 27, 2020, Ecology and Taylor Shellfish Farms agreed to stay the CZM request to allow time for Taylor Shellfish to obtain a Section 401 Water Quality Certification. February 25, 2021, Taylor Shellfish and Ecology agreed to extend the stay again. The current stay expires on April 1, 2021.

This determination is for the proposed project to commercially cultivate up to 90 acres of clams and oysters between +5 foot (ft.) and -4.5 ft. Mean Lower Low Water (MLLW) tidal elevation on parcel number 320151080160. Access to tidelands is by boat and uplands off of Sunset Road.

Clam seed is broadcasted by hand into the intertidal area. Some areas are netted, and some are not. Harvest takes place manually by hand at low tide by using rakes to loosen the sediment and clams are collected. The grower may also use a mechanical clam digger, which is powered by a small engine that propels a blade to loosen the soil and collect clams. The clams are collected by a rake under the machine that gathers them onto a conveyor belt and placed in a tub for sorting by staff. Once the clams are harvest they are placed into sacks for pick up by boat. Littleneck and butter clams may be harvested incidentally when seeded clams are harvested.

The cultivation of oysters for commercial production are grown in bags, near bottom, and on-bottom as both singles and clusters. Harvest takes place manually by hand during low tide and oysters are placed into tubs and sacks for pick up and transfer. Bags are harvested by pulling and emptying oysters onto barges for transfer. Bags are reused and hatchery seed is used.

Gravelling is proposed for this site. The gravel is sourced from local providers and is cleaned and washed. In any given year Taylor may use 5,000 cubic yards of gravel throughout the entire project area.

The project site is located on tidelands within Oakland Bay, on parcel number 320151080160, near Shelton, Mason County, Washington; Section 15, Township 20 North, Range 3 West; WRIA 14, Kennedy-Goldsborough Watershed.

Pursuant to Section 307(c)(3) of the Coastal Zone Management Act of 1972 as amended, Ecology concurs with Taylor Shellfish Farms determination that the proposed work is consistent with Washington's CZMP.

If you have any questions regarding Ecology's consistency decision, please contact Jennifer Riedmayer at [Jennifer.Riedmayer@ecy.wa.gov](mailto:Jennifer.Riedmayer@ecy.wa.gov).

### **YOUR RIGHT TO APPEAL**

You have a right to appeal this decision to the Pollution Control Hearing Board (PCHB) within 30 days of the date of receipt of this decision. The appeal process is governed by Chapter 43.21B RCW and Chapter 371-08 WAC. "Date of receipt" is defined in RCW 43.21B.001(2).

To appeal you must do all of the following within 30 days of the date of receipt of this decision:

- File your appeal and a copy of this decision with the PCHB (see addresses below). Filing means actual receipt by the PCHB during regular business hours.
- Serve a copy of your appeal and this decision on Ecology in paper form - by mail or in person. (See addresses below.) E-mail is not accepted.

You must also comply with other applicable requirements in Chapter 43.21B RCW and Chapter 371-08 WAC.
