Olympia, WA 98512

RE: Water Quality Certification Order No. **19816** for Corps Reference No. **200701377**
Northwest Shellfish Cole Lease within Eld Inlet, Thurston County.

Dear Linda Schaffel:

On February 2, 2021, Northwest Shellfish Company, Inc. submitted a request for a Section 401 Water Quality Certification (WQC) under the federal Clean Water Act for the Northwest Shellfish Cole Lease located on marine tidelands within Eld Inlet, near Olympia, Thurston County, Washington.

On behalf of the state of Washington, the Department of Ecology certifies that the work described in the Joint Aquatic Resource Permit Application (JARPA) and the public notice complies with applicable provisions of Sections 301, 302, 303, 306, and 307 of the Clean Water Act, as amended, and applicable state laws. This certification is subject to the conditions contained in the enclosed Order.

Please ensure that anyone doing work under this Order has read, is familiar with, and is able to follow all of the provisions within the attached Order.

If you have any questions about this decision, please contact Loree' Randall by e-mail at loreer.randall@ecy.wa.gov. The enclosed Order may be appealed by following the procedures described within the Order.

Sincerely,

Brenden McFarland, Section Manager
Environmental Review and Transportation Section
Shorelands and Environmental Assistance Program

IN THE MATTER OF GRANTING A)	ORDER No. 19816
WATER QUALITY)	Corps Reference No. 200701377
CERTIFICATION TO)	Northwest Shellfish Cole Lease located on
Northwest Shellfish Company, Inc.)	marine tidelands within Eld Inlet, near Thurston
pursuant to 33 U.S.C. 1341 (FWPCA)	County, Washington
§ 401), RCW 90.48.120, RCW 90.48.260)	
and Chapter 173-201A WAC)	

Northwest Shellfish Company, Inc.
 Attn: Linda Schaffel
 6812 Munson Rd SW
 Olympia, WA 98512

On February 2, 2021, Northwest Shellfish Company, Inc. submitted a request for a Section 401 Water Quality Certification (WQC) under the federal Clean Water Act for the Northwest Shellfish Cole Lease located on tidelands within Eld Inlet, near Thurston County, Washington. The Department of Ecology (Ecology) issued a public notice for the project on February 17, 2021.

Northwest Shellfish currently farms this beach with geoduck and manila clams. Juvenile geoducks will be planted in the substrate by hand between the subtidal property boundary (-3 ft) and +5 ft MLLW. No site preparation of substrate is used. Four-inch diameter PVC tubes (approximately 10.75 inch length) will be manually placed in the substrate at a depth of about 7 inches and a density of one tube per square foot. About three geoduck "seed," are then placed in each tube and the individual tube is netted for protection from predators. The nets are held in place by a rubber band. After approximately 12-24 months, the tubes and nets are removed. The tubes are then reused during the next rotation. Northwest Shellfish will frequently patrol the site and adjacent beach to help ensure no related materials such as nets, tubes, or rubber bands escape the project site. Harvest will be hydraulically using a high volume, low pressure water hose. Individual geoducks are manually removed from the beach and packed for transportation. Harvest may be during low tide or by divers. Following harvest, the area will be replanted with geoducks for another cycle. Northwest Shellfish does not intend to plant anymore Manila clams at this farm. Maintenance and harvest involves anti-predator cover nets over entire 14'x20' bed. Net is staked down with rebar. Clams remain under nets for approximately 2- 4 years. Harvest is by clam rake. All equipment remaining on the beach is marked with company contact information. There is no eelgrass present or adjacent. No pesticides are used. Site may be accessed from 5507 Countryside uplands or by boat. The number of employees varies by activity but may be from 1 to 12 people, with an average of 4. There will be no motor vehicles used on the beach. Activities occurring at night will be supported by individuals wearing headlamps.

The project site is located in Eld Inlet on marine tidelands adjacent to 5507 Countryside Beach Rd NW, Olympia, parcel 42900000900. The approximate project coordinates are 47.111331 N Lat/ -122.937809 W Long.

With this Order, Ecology is granting Northwest Shellfish Company, Inc.'s request for a Section 401 Water Quality Certification for the Northwest Shellfish Cole Lease project, provided that the activity is conducted in accordance with the Section 401 Water Quality Certification request and attachments Ecology received on February 2, 2021.

Based on the information submitted, Ecology has determined that the discharge from the project will comply with state water quality requirements. Prior to undertaking any changes that materially alter the project, Northwest Shellfish Company, Inc. must contact Ecology to determine whether a new Section 401 Water Quality Certification is required.

Issuance of this Section 401 Water Quality Certification for this proposal does not authorize Northwest Shellfish Company, Inc. to exceed applicable state water quality standards (Chapter 173-201A WAC), ground water quality standards (Chapter 173-200 WAC) or sediment quality standards (Chapter 173-204 WAC). Furthermore, nothing in this Section 401 Water Quality Certification absolves the Applicant from liability for contamination and any subsequent cleanup of surface waters, ground waters, or sediments resulting from project construction or operations.

Any work that causes distressed or dying fish or discharges of oil, fuel, or other chemicals into state waters or onto land with a potential for entry into state waters is prohibited¹. If such work, conditions, or discharges occur, immediately notify² Ecology's Regional Spill Response Office at 360-407-6300 and the Washington State Department of Fish & Wildlife with the nature and details of the problem, any actions taken to correct the problem, and any proposed changes in operation to prevent further problems. You will also need to notify the Washington Emergency Management Division³ at 1-800-258-5990, for actual spills to water only. This condition is necessary to prevent oil and hazardous materials spills from causing environmental damage and to ensure compliance with water quality requirements. The sooner a spill is reported, the quicker it can be addressed, resulting in less harm.

In view of the foregoing and in accordance with 33 U.S.C. §1341, RCW 90.48.120, RCW 90.48.260 Chapter 173-200 WAC and Chapter 173-201A WAC, this WQC is granted to the Northwest Shellfish Company, Inc., Northwest Shellfish Cole Lease project.

This Certification is not effective until the U.S. Corps of Engineers (Corps) Seattle District issues an individual Department of the Army (DA) permit for this project. Order No. **19816** will remain valid for the duration of the associated DA permit. Northwest Shellfish Company, Inc. should send a copy of the final DA permit to fednotification@ecy.wa.gov within two weeks of receiving it.

¹ RCW 90.48

² WAC 173-303-145

³ RCW 90.56.280

YOUR RIGHT TO APPEAL

You have a right to appeal this Order to the Pollution Control Hearing Board (PCHB) within 30 days of the date of receipt of this Order. The appeal process is governed by Chapter 43.21B RCW and Chapter 371-08 WAC. "Date of receipt" is defined in RCW 43.21B.001(2).

To appeal you must do both of the following within 30 days of the date of receipt of this Order:

- File your appeal and a copy of this Order with the PCHB (see addresses below). Filing means actual receipt by the PCHB during regular business hours.
- Serve a copy of your appeal and this Order on Ecology in paper form by mail or in person. (See addresses below.) E-mail is not accepted.

You must also comply with other applicable requirements in Chapter 43.21B RCW and Chapter 371-08 WAC.
