RE: Water Quality Certification Order No. **20079** for Corps Reference No. **201200608**,
Goose Point Oyster Rhoades Lease, Pacific County, Washington

Dear Kathleen Nisbet Moncy:

On April 26, 2021, Goose Point Oyster Company submitted a request for a Section 401 Water Quality Certification (WQC) under the federal Clean Water Act for the Goose Point Oyster Rhoades Lease located on tidelands within Willapa Bay, near Bay Center, Pacific County, Washington.

On behalf of the state of Washington, the Department of Ecology certifies that the work described in the Joint Aquatic Resource Permit Application (JARPA) and the public notice complies with applicable provisions of Sections 301, 302, 303, 306, and 307 of the Clean Water Act, as amended, and applicable state laws. This certification is subject to the conditions contained in the enclosed Order.

Please ensure that anyone doing work under this Order has read, is familiar with, and is able to follow all of the provisions within the attached Order.

If you have any questions about this decision, please contact Teresa Pucylowski by e-mail at teressa.pucylowski@ecy.wa.gov. The enclosed Order may be appealed by following the procedures described within the Order.

Sincerely,

Brenden McFarland, Section Manager
Environmental Review and Transportation Section
Shorelands and Environmental Assistance Program

IN THE MATTER OF GRANTING A) ORDER No. 20079
WATER QUALITY) Corps Reference No. 201200608
CERTIFICATION TO) Goose Point Oyster Rhoades Lease located on
Goose Point Oyster Company) tidelands within Willapa Bay, near Bay Center,
pursuant to 33 U.S.C. 1341 (FWPCA) Pacific County, Washington
§ 401), RCW 90.48.120, RCW 90.48.260)
and Chapter 173-201A WAC)

Goose Point Oyster Company
Attn: Kathleen Nisbet Moncy
7081 Niawiakum State Hwy #101
Bay Center, WA 98527

On April 26, 2021, Goose Point Oyster Company submitted a request for a Section 401 Water Quality Certification (WQC) under the federal Clean Water Act for the Goose Point Oyster Rhoades Lease, Pacific County, Washington. The Department of Ecology (Ecology) issued a public notice for the project on April 27, 2021.

This project will continue to commercially cultivate up to 12-acres of on-bottom Pacific oysters on privately-owned tidelands from -1.0 feet to +0.5 feet Mean Lower Low Water (MLLW) tidal elevations. The proposed project is located 1,582 feet waterward from the approximate Mean High Water (MHW) shoreline and extends a maximum of 1,588 feet waterward of the approximate MHW shoreline. No permanent corner markers will be used. Access to the site will be by boat from the Tokeland Marina or the Bay Center Processing Facility vessel staging area. The project area is comprised of eelgrass cover ranging from dense to dense patches to sparse to bare. Both *Z. marina* and *Z. japonica* are present.

The planting, maintenance and cultivation of on-bottom Pacific Oysters will include the following: on-bottom oysters will be evenly scattered onto the substrate at high tide from the deck of an oyster scow. After the oysters are planted they will require very little maintenance. The grow-out period of the oysters is 2-3 years. Harvest takes place during daylight tide hours over a period of 4-8 weeks. Oysters are harvested by hand at low tide into tubs by crews of 7-10 people. Tubs are then retrieved by dredge at high tide the same day. The duration of low tide harvest is up to 4 hours. To complete harvest on high tide is an additional 2-3 hours.

Dredge harvest of oysters takes place on a periodic basis of about every 3 years. Annual dredge acres do not exceed 2 acres. Dredging occurs on high-mid tide and is done by skimming the surface of the substrate to minimize turbidity. Dredge harvest lasts approximately 4 hours at a time and occurs intermittently for harvest of mature oysters.

There is a single-oysters nursery on 5 acres of the project area above 0' MLLW and consists of an off-bottom rack and cage system which is planted and harvested by hand. Racks range from 21" high to 4' high and run west to east. Spacing between rows is 3' with rows spaced 20' to allow for vessel maintenance at the site at high water.

The project site is located on tidelands within Willapa Bay, on parcel numbers 79001001087 and 79001001092, near Bay Center, Pacific County, Washington; Section 4, Township 13 North; Range 10 West; WRIA 24, Willapa Watershed.

With this Order, Ecology is granting Goose Point Oyster Company's request for a Section 401 Water Quality Certification for the Goose Point Oyster Rhoades Lease project, provided that the activity is conducted in accordance with the Section 401 Water Quality Certification request and attachments Ecology received on April 26, 2021.

Based on the information submitted, Ecology has determined that the discharge from the project will comply with state water quality requirements. Prior to undertaking any changes that materially alter the project, Goose Point Oyster Company must contact Ecology to determine whether a new Section 401 Water Quality Certification is required.

Issuance of this Section 401 Water Quality Certification for this proposal does not authorize Goose Point Oyster Company to exceed applicable state water quality standards (Chapter 173-201A WAC), ground water quality standards (Chapter 173-200 WAC) or sediment quality standards (Chapter 173-204 WAC). Furthermore, nothing in this Section 401 Water Quality Certification absolves the Applicant from liability for contamination and any subsequent cleanup of surface waters, ground waters, or sediments resulting from project construction or operations.

Special Condition:

Any work that causes distressed or dying fish or discharges of oil, fuel, or other chemicals into state waters or onto land with a potential for entry into state waters is prohibited¹. If such work, conditions, or discharges occur, immediately notify² Ecology's Regional Spill Response Office at 360-407-6300 and the Washington State Department of Fish & Wildlife with the nature and details of the problem, any actions taken to correct the problem, and any proposed changes in operation to prevent further problems. You will also need to notify the Washington Emergency Management Division³ at 1-800-258-5990, for actual spills to water only. This condition is necessary to prevent oil and hazardous materials spills from causing environmental damage and to ensure compliance with water quality requirements. The sooner a spill is reported, the quicker it can be addressed, resulting in less harm.

In view of the foregoing and in accordance with 33 U.S.C. §1341, RCW 90.48.120, RCW 90.48.260 Chapter 173-200 WAC and Chapter 173-201A WAC, this WQC is granted to the Goose Point Oyster Company, Goose Point Oyster Rhoades Lease project.

This Certification is not effective until the U.S. Corps of Engineers (Corps) Seattle District issues an individual Department of the Army (DA) permit for this project. Order No. **20079** will remain

¹ RCW 90.48

² WAC 173-303-145

³ RCW 90.56.280

valid for the duration of the associated DA permit. Goose Point Oyster Company should send a copy of the final DA permit to fednotification@ecy.wa.gov within two weeks of receiving it.

YOUR RIGHT TO APPEAL

You have a right to appeal this Order to the Pollution Control Hearing Board (PCHB) within 30 days of the date of receipt of this Order. The appeal process is governed by Chapter 43.21B RCW and Chapter 371-08 WAC. "Date of receipt" is defined in RCW 43.21B.001(2).

To appeal you must do both of the following within 30 days of the date of receipt of this Order:

- File your appeal and a copy of this Order with the PCHB (see addresses below). Filing means actual receipt by the PCHB during regular business hours.
- Serve a copy of your appeal and this Order on Ecology in paper form by mail or in person. (See addresses below.) E-mail is not accepted.

You must also comply with other applicable requirements in Chapter 43.21B RCW and Chapter 371-08 WAC.
