RE: Water Quality Certification Order No. **20855** for Corps Reference No. **200901225**,
Heckes Oyster Company – C137, Pacific County, Washington

Dear John Heckes:

On October 12, 2021, Heckes Clams Inc. submitted a request for a Section 401 Water Quality Certification (WQC) under the federal Clean Water Act for the Heckes Oyster Company – C137 located on tidelands within Willapa Bay, near Nahcotta, Pacific County, Washington.

On behalf of the state of Washington, the Department of Ecology certifies that the work described in the Joint Aquatic Resource Permit Application (JARPA) and the public notice complies with applicable provisions of Sections 301, 302, 303, 306, and 307 of the Clean Water Act, as amended, and applicable state laws. This certification is subject to the conditions contained in the enclosed Order.

Please ensure that anyone doing work under this Order has read, is familiar with, and is able to follow all of the provisions within the attached Order.

If you have any questions about this decision, please contact Marco Pinchot by e-mail at marco.pinchot@ecy.wa.gov. The enclosed Order may be appealed by following the procedures described within the Order.

Sincerely,

Brenden McFarland, Section Manager
Environmental Review and Transportation Section
Shorelands and Environmental Assistance Program

IN THE MATTER OF GRANTING A)	ORDER No. 20855
WATER QUALITY)	Corps Reference No. 200901225
CERTIFICATION TO)	Heckes Oyster Company – C137 located on
Heckes Clams Inc.)	tidelands within Willapa Bay, near Nahotta,
pursuant to 33 U.S.C. 1341 (FWPCA)	Pacific County, Washington
§ 401), RCW 90.48.120, RCW 90.48.260)	
and Chapter 173-201A WAC)	

Heckes Clams Inc.
 Attn: John Heckes
 PO Box 1657
 Ocean Park, WA 98640

On October 12, 2021, Heckes Clams Inc. submitted a request for a Section 401 Water Quality Certification (WQC) under the federal Clean Water Act for the Heckes Oyster Company – C137, Pacific County, Washington. The Department of Ecology (Ecology) issued a public notice for the project on October 13, 2021.

This project proposes to continue commercial cultivation of Pacific oysters (*Crassostrea gigas*) and add Kumamoto Oyster (*Crassostrea sikamea*), Geoduck clam (*Panopea generosa*) and Manila clams (*Venerupis philippinarum*) on 54 acres of privately owned tidelands in Willapa bay. Pacific oysters, Manila Clams and Geoducks will be grown directly on the substrate between -4.0 to +1.5 feet. Pacific and Kumamoto Oyster may be suspended off bottom.

Manila Clam Culture

Manila clams will be grown in areas with suitable cultivation conditions. There are currently 0 acres in Manila clam cultivation, and the number of acres in clam cultivation is expected to vary from time to time based on environmental, market, and other conditions. The maximum area anticipated to be under Manila clam cultivation at any given time is 20 acres. Shell or gravel may be applied to enhance the substrate (no more than 1 inch per year). Clams may recruit naturally to the bed, but if there is no or inadequate natural recruitment, seed may be placed. Some or all of the acreage under Manila clam cultivation may be covered with predator exclusion netting. The mesh size of Manila clam nets is 1/4 inch. Nets are typically maintained throughout the culture cycle and are secured to the substrate with rebar. Manila clams are harvested by hand at low tide with rakes after 2-3 years.

Oyster Bottom Culture

Oysters will be grown directly on the substrate in areas with suitable cultivation conditions. There are currently 44.9 acres in oyster bottom cultivation, and the number of acres in oyster bottom cultivation is expected to vary from time to time based on environmental, market, and other conditions. The maximum area anticipated to be under oyster bottom cultivation at any given time is 44.9 acres. Oysters may naturally set on the bed or may be seeded by hand or from a vessel. Shell may be spread for catching naturally recruiting larvae. Oysters may be transplanted

during grow-out to fattening beds. Oyster beds may be harrowed during grow-out to move the oysters back to the sediment surface. Oysters will be harvested by hand during low tide or by dredge after 3-4 years, depending on site conditions.

Oyster Off-Bottom Culture

Oysters will be grown off the bottom of the substrate, utilizing the longline and/or the tumble bag methods. There are currently 0 acres in oyster off-bottom cultivation, and the number of acres in oyster off-bottom cultivation is expected to vary from time to time based on environmental, market, and other conditions. The maximum area anticipated to be under oyster off-bottom cultivation at any given time is 10 acres. The longline method involves inserting pipes into the substrate, and placing seeded cultch onto a rope suspended off the bottom by the pipes. The tumble bag method involves placing oysters in bags or baskets off the bottom, and attaching a float to the bag that tumbles the oysters. The oysters will be harvested by hand or mechanical means, either at high tide or at low tide.

Geoduck Culture

Geoducks will be grown in the substrate areas suitable for cultivation conditions. There are currently 0 acres in geoduck test plot cultivation. The number of acres in geoduck cultivation is expected to vary from time to time based on environmental, market, and other conditions. The maximum area anticipated to be under geoduck cultivation is 10 acres. Seed is planted in PVC tubes which are removed after 2 years and the geoducks are harvested by hand with a water jet after 5-6 years.

The project site is located on tidelands within Willapa Bay, on parcel number 79003000137, near Nahcotta, Pacific County, Washington; Section 13, Township 12 North, Range 11 West; WRIA 24, Willapa Watershed.

With this Order, Ecology is granting Heckes Clams Inc.'s request for a Section 401 Water Quality Certification for the Heckes Oyster Company – C137 project, provided that the activity is conducted in accordance with the Section 401 Water Quality Certification request and attachments Ecology received on October 12, 2021, and supplemental information received on November 17, 2021, and the following supporting documentation:

1. E-mail letter to Ecology dated October 12, 2021, regarding the project's compliance with the conservation measures associated with the "Programmatic Biological Opinions for Shellfish Activities in Washington State Inland Marine Waters" (U.S. Fish and Wildlife Service (USFWS) Reference Number 01EWF00-2016-F-0121, National Marine Fisheries Service (NMFS) Reference Number WCR-2014-1502). This email also includes a description of Heckes Clams Inc. water quality monitoring plan, and Heckes Clams Inc. commitment to follow the 2019 Puget Sound Shellfish Growers Association Environmental Codes of Practice for Shellfish Aquaculture.

Based on the information submitted, Ecology has determined that the discharge from the project will comply with state water quality requirements. Prior to undertaking any changes that materially alter the project, Heckes Clams Inc. must contact Ecology to determine whether a new Section 401 Water Quality Certification is required.

Issuance of this Section 401 Water Quality Certification for this proposal does not authorize Heckes Clams Inc. to exceed applicable state water quality standards (Chapter 173-201A WAC), ground water quality standards (Chapter 173-200 WAC) or sediment quality standards (Chapter 173-204 WAC). Furthermore, nothing in this Section 401 Water Quality Certification absolves the Applicant from liability for contamination and any subsequent cleanup of surface waters, ground waters, or sediments resulting from project construction or operations.

Special Condition:

Any work that causes distressed or dying fish or discharges of oil, fuel, or other chemicals into state waters or onto land with a potential for entry into state waters is prohibited. If such work, conditions, or discharges occur, immediately notify Ecology’s Regional Spill Response Office at 360-407-6300 and the Washington State Department of Fish & Wildlife with the nature and details of the problem, any actions taken to correct the problem, and any proposed changes in operation to prevent further problems. You will also need to notify the Washington Emergency Management Division at 1-800-258-5990, for actual spills to water only. This condition is necessary to prevent oil and hazardous materials spills from causing environmental damage and to ensure compliance with water quality requirements. The sooner a spill is reported, the quicker it can be addressed, resulting in less harm.

In view of the foregoing and in accordance with 33 U.S.C. §1341, RCW 90.48.120, RCW 90.48.260 Chapter 173-200 WAC and Chapter 173-201A WAC, this WQC is granted to the Heckes Clams Inc., Heckes Oyster Company – C137 project.

This Certification is not effective until the U.S. Corps of Engineers (Corps) Seattle District issues an individual Department of the Army (DA) permit for this project. Order No. **20855** will remain valid for the duration of the associated DA permit. Heckes Clams Inc. should send a copy of the final DA permit to fednotification@ecy.wa.gov within two weeks of receiving it.

YOUR RIGHT TO APPEAL

You have a right to appeal this Order to the Pollution Control Hearing Board (PCHB) within 30 days of the date of receipt of this Order. The appeal process is governed by Chapter 43.21B RCW and Chapter 371-08 WAC. “Date of receipt” is defined in RCW 43.21B.001(2).

To appeal you must do both of the following within 30 days of the date of receipt of this Order:

- File your appeal and a copy of this Order with the PCHB (see addresses below). Filing means actual receipt by the PCHB during regular business hours.

- Serve a copy of your appeal and this Order on Ecology in paper form by mail or in person. (See addresses below.) E-mail is not accepted.

You must also comply with other applicable requirements in Chapter 43.21B RCW and Chapter 371-08 WAC.

Address and location information

Filing an appeal with the PCHB:

Mailing Address:

Pollution Control Hearings Board
PO Box 40903
Olympia, WA 98504-0903

Street Address:

Pollution Control Hearings Board
1111 Israel RD SW
