RE: Water Quality Certification Order No. **20835** for Corps Reference No. **201201233**,  
Goodro Shellfish Smith Property, Mason County, Washington

Dear Joe Schreiber:

On October 13, 2021, Goodro Shellfish submitted a request for a Section 401 Water Quality Certification (WQC) under the federal Clean Water Act for the Goodro Shellfish Smith Property located on tidelands within Hammersley Inlet, near Shelton, Mason County, Washington.

On behalf of the state of Washington, the Department of Ecology certifies that the work described in the Joint Aquatic Resource Permit Application (JARPA) and the public notice complies with applicable provisions of Sections 301, 302, 303, 306, and 307 of the Clean Water Act, as amended, and applicable state laws. This certification is subject to the conditions contained in the enclosed Order.

Please ensure that anyone doing work under this Order has read, is familiar with, and is able to follow all of the provisions within the attached Order.

If you have any questions about this decision, please contact Jennifer Riedmayer by e-mail at [Jennifer.Riedmayer@ecy.wa.gov](mailto:Jennifer.Riedmayer@ecy.wa.gov). The enclosed Order may be appealed by following the procedures described within the Order.

Sincerely,

Brenden McFarland, Section Manager  
Environmental Review and Transportation Section  
Shorelands and Environmental Assistance Program

**IN THE MATTER OF GRANTING A ) ORDER No. 20835**  
**WATER QUALITY ) Corps Reference No. 201201233**  
**CERTIFICATION TO ) Goodro Shellfish Smith Property located on**  
Goodro Shellfish ) tidelands within Hammersely Inlet, near Shelton,  
pursuant to 33 U.S.C. 1341 (FWPCA ) Mason County, Washington  
§ 401), RCW 90.48.120, RCW 90.48.260 )  
and Chapter 173-201A WAC )

Goodro Shellfish  
Attn: Joseph Schreiber  
PO Box 12551  
Olympia, WA 98508

On October 13, 2021, Goodro Shellfish submitted a request for a Section 401 Water Quality Certification (WQC) under the federal Clean Water Act for the Goodro Shellfish Smith Property, Mason County, Washington. The Department of Ecology (Ecology) issued a public notice for the project on October 19, 2021.

This project proposes to commercially cultivate up to 0.8 acres of Pacific oyster (*Crassostrea gigas*) and Manila clams (*Venerupis philippinarium*) between +7.0 ft. and -4.0 ft. Mean Lower Low Water (MLLW) on parcel number 32024-44-00020. Access to tidelands is by boat.

Below is the cultivation and harvesting methods for this site location:

**Manila Clams:**

Juvenile seed will be dispersed onto the intertidal sediment once every couple of years and allowed to grow under clam nets. The clam harvest and seeding area is approximately 50 ft. in width and 900 ft. in length. Within this area, clam nets will be used to protect freshly seeded areas. The clam nets are 50 ft. by 15 ft. and will be placed in two rows (30ft width total) where seed are planted. The nets will be secured along the perimeter with rebar hooks that do not protrude the sediment surface. The subsequent adults will be harvested by hand and placed in plastic mesh bags, which are carried by hand to the boat for removal to Goodro Shellfish upland shop in Shelton. In addition, naturally occurring manila clams will be harvested by hand using clam forks and placed in plastic mesh bags so they can be carried by hand to the boat for removal and processing.

**Pacific Oysters (Ground Culture Method):**

Juvenile seed will be dispersed onto the intertidal sediment and allowed to grow. The subsequent adults will be harvested by hand and placed in plastic mesh bags, which are then carried by hand to the boat for removal to Goodro Shellfish upland shop in Shelton.

**Pacific Oysters (Pillow Bag Culture Method):**

Oyster seed are placed into a black plastic mesh bag (approx. ¼ mesh) offsite. The seeded bags are then transported by boat to the property and are laid flat onto the beach. The bags are then secured by wires to ropes already laid on the beach. Ropes are secured to metal fence posts already on beach. When the oysters are ready to be harvested, the bags are untied from the rope, and oysters are unbagged onto the beach. Oysters are hand counted and loaded onto the boat, along with the used mesh bags. The boat then transports materials to the Goodro Shellfish upland shop in Shelton.

**Pacific Oysters (Rope Bag Culture Method):**

Oyster seed are placed into a black plastic mesh bag offsite. The seeded bags are transported by boat to the property and are secured by wire to rope. The rope is attached to T posts approximately 1 ½ inch wide by 5 feet long, made of steel, and are secured in the sediment with 2 feet exposed. There is approximately 50 feet between posts. When the oysters are ready for harvest, the bags are untied from the rope by hand and oysters are dumped onto the beach and counted. Subsequent product is then bagged and removed by boat to the Goodro Shellfish upland shop in Shelton.

Graveling is proposed at this location. Washed pea gravel will be added to enhance setting substrate on the upper parts of the beach between +5.0 ft. to +1 ft. as well as to some soft areas on the beach to improve oyster ground between +1.0 ft. to -4.0 ft. This will be done in sections approximately 900 ft. by 50 ft. at a gravel depth of one inch, which totals to approximately 140 yards of gravel. The area may have gravel added piecework over the course of a few years. Small sections may have gravel added more than once, but not more than 1 inch per year.

The project site is located on tidelands within Hammersley Inlet, on parcel number 32024-44-00020, adjacent to East 840 Libby Road near Shelton, Mason County, Washington; Section 24, Township 20 North, Range 3 West; WRIA 14, Kennedy-Goldsborough Watershed.

With this Order, Ecology is granting Goodro Shellfish's request for a Section 401 Water Quality Certification for the Goodro Shellfish Smith Property project, provided that the activity is conducted in accordance with the Section 401 Water Quality Certification request and attachments Ecology received on October 13, 2021, and the following supporting documentation:

1. E-mail letter to Ecology dated October 13, 2021, regarding the project's compliance with the conservation measures associated with the "Programmatic Biological Opinions for Shellfish Activities in Washington State Inland Marine Waters" (U.S. Fish and Wildlife Service (USFWS) Reference Number 01EWF00-2016-F-0121, National Marine Fisheries Service (NMFS) Reference Number WCR-2014-1502). This email also includes a description of Goodro Shellfish water quality monitoring plan, and Goodro Shellfish commitment to follow

the 2019 Puget Sound Shellfish Growers Association Environmental Codes of Practice for Shellfish Aquaculture.

Based on the information submitted, Ecology has determined that the discharge from the project will comply with state water quality requirements. Prior to undertaking any changes that materially alter the project, Goodro Shellfish must contact Ecology to determine whether a new Section 401 Water Quality Certification is required.

Issuance of this Section 401 Water Quality Certification for this proposal does not authorize Goodro Shellfish to exceed applicable state water quality standards (Chapter 173-201A WAC), ground water quality standards (Chapter 173-200 WAC) or sediment quality standards (Chapter 173-204 WAC). Furthermore, nothing in this Section 401 Water Quality Certification absolves the Applicant from liability for contamination and any subsequent cleanup of surface waters, ground waters, or sediments resulting from project construction or operations.

**Special Condition:**

Any work that causes distressed or dying fish or discharges of oil, fuel, or other chemicals into state waters or onto land with a potential for entry into state waters is prohibited. If such work, conditions, or discharges occur, immediately notify Ecology's Regional Spill Response Office at 360-407-6300 and the Washington State Department of Fish & Wildlife with the nature and details of the problem, any actions taken to correct the problem, and any proposed changes in operation to prevent further problems. You will also need to notify the Washington Emergency Management Division at 1-800-258-5990, for actual spills to water only. This condition is necessary to prevent oil and hazardous materials spills from causing environmental damage and to ensure compliance with water quality requirements. The sooner a spill is reported, the quicker it can be addressed, resulting in less harm.

In view of the foregoing and in accordance with 33 U.S.C. §1341, RCW 90.48.120, RCW 90.48.260 Chapter 173-200 WAC and Chapter 173-201A WAC, this WQC is granted to the Goodro Shellfish, Goodro Shellfish Smith Property project.

This Certification is not effective until the U.S. Corps of Engineers (Corps) Seattle District issues an individual Department of the Army (DA) permit for this project. Order No. **20835** will remain valid for the duration of the associated DA permit. Goodro Shellfish should send a copy of the final DA permit to [fednotification@ecy.wa.gov](mailto:fednotification@ecy.wa.gov) within two weeks of receiving it.

**YOUR RIGHT TO APPEAL**

You have a right to appeal this Order to the Pollution Control Hearing Board (PCHB) within 30 days of the date of receipt of this Order. The appeal process is governed by Chapter 43.21B RCW and Chapter 371-08 WAC. "Date of receipt" is defined in RCW 43.21B.001(2).

To appeal you must do both of the following within 30 days of the date of receipt of this Order:

- File your appeal and a copy of this Order with the PCHB (see addresses below). Filing means actual receipt by the PCHB during regular business hours.
- Serve a copy of your appeal and this Order on Ecology in paper form by mail or in person. (See addresses below.) E-mail is not accepted.

You must also comply with other applicable requirements in Chapter 43.21B RCW and Chapter 371-08 WAC.

Address and location information.
