RE: Coastal Zone Consistency for Corps Reference No. **202100576**,
Station House Oyster Company Project 8, Pacific County, Washington

Dear James J. Kemmer:

On November 10, 2021, The Department of Ecology received a Certification of Consistency with the Washington State Coastal Zone Management Program (CZMP) for the above project.

This determination is for the proposed project to continue to cultivate Manila clam (*Venerupis philippinarum*) and Pacific oysters (*Crassostrea gigas*) on a total of 321.3 acres of private intertidal land, from 0.0ft to +2.0ft Mean Lower Low Water (MLLW) tidal elevation. There are currently 28.5 acres of fallow ground within the project area. Both native and non-native eelgrass are present within the project site, and areas with eelgrass are avoided during the seeding process.

Pacific oyster cultivation

Pacific oysters are grown directly on the beach substrate. Prior to planting, shellfish beds will be prepared by removing debris by hand. Seeding will occur by using oyster cultch or hatchery oyster seed. Oysters are put on the seed bed as small seed and left to grow for 2 years. They are then moved to a fattening bed, which is used on a rotational basis. Most seed beds are hand-picked with a few acres mechanically harvested every other year.

Oysters are either harvested by hand or by using a mechanical dredge. During hand harvest, workers use hand tools or hand-pick oysters and place them into various sized containers placed on the bed, which are later retrieved at high tide or are carried off the beach at low tide. Mechanical (dredge) harvest occurs by use of a harvest bag that is lowered from a barge or boat by boom crane or hydraulic winch at high tide and pulled along the bottom to scoop up or 'dredge' the oysters. The dredge bags have a leading edge (blade) consisting of a steel frame with teeth and a steel mesh collection bag attached to

the frame. As the dredge bags are towed across the substrate, the oysters are loosened and guided into the bags. The bag is then hoisted onto the boat deck, emptied, and then redeployed. Two dredge bags may be towed simultaneously off each side of the boat. Dredge equipment can typically be adjusted so that the correct depth is dredged as tide levels change. Harrowing may occur between the 2 successive dredge events in order to increase recovery of oysters. Depth of substrate disturbance is approximately 1 to 2 inches.

Manila clam cultivation

Naturel set clams are hand-harvested every 2-3 years during low tide, using a clam rake, shovel or other hand-operated tool. Market-size clams are selectively harvested, placed in buckets, bagged, tagged, and removed. Undersized clams are returned to hummocks for future harvests. Since a given clam bed may contain multiple year classes of clams, it may be harvested on a regular schedule to harvest individual year classes of clams.

The project site is located on tidelands within Willapa Bay, on parcel numbers 79004000031-B (OB-D031B), 79004000031-A (OB-D031), 79004000021 (OB-D021), and 79004000019 (OB-D019 Pacific 1), near Long Beach, Pacific County, Washington; Sections 13, 22, 23, 24, 26, and 27, Township 11 North, Range 11 West; WRIA 24, Willapa Watershed.

Pursuant to Section 307(c)(3) of the Coastal Zone Management Act of 1972 as amended, Ecology concurs with Station House Oyster Company's determination that the proposed work is consistent with Washington's CZMP.

If you have any questions regarding Ecology's consistency determination please contact Marco Pinchot at marco.pinchot@ecy.wa.gov.

YOUR RIGHT TO APPEAL

You have a right to appeal this decision to the Pollution Control Hearing Board (PCHB) within 30 days of the date of receipt of this decision. The appeal process is governed by Chapter 43.21B RCW and Chapter 371-08 WAC. "Date of receipt" is defined in RCW 43.21B.001(2).

To appeal you must do all of the following within 30 days of the date of receipt of this decision:

- File your appeal and a copy of this decision with the PCHB (see addresses below). Filing means actual receipt by the PCHB during regular business hours.
- Serve a copy of your appeal and this decision on Ecology in paper form - by mail or in person. (See addresses below.) E-mail is not accepted.

You must also comply with other applicable requirements in Chapter 43.21B RCW and Chapter 371-08 WAC.

Address and location information.

Filing an appeal with the PCHB:

Mailing Address:

Pollution Control Hearings Board
PO Box 40903
Olympia, WA 98504-0903

Street Address:
