RE: Water Quality Certification Order No. **20930** for Corps Reference No. **201700611**,  
Barry Shellfish Farm, Mason County, Washington

Dear Derek Epps:

On November 23, 2021, Seattle Shellfish, LLC submitted a request for a Section 401 Water Quality Certification (WQC) under the federal Clean Water Act for the Barry Shellfish Farm located on tidelands within Pickering Passage, near Shelton, Mason County, Washington.

On behalf of the state of Washington, the Department of Ecology certifies that the work described in the Joint Aquatic Resource Permit Application (JARPA) and the public notice complies with applicable provisions of Sections 301, 302, 303, 306, and 307 of the Clean Water Act, as amended, and applicable state laws. This certification is subject to the conditions contained in the enclosed Order.

Please ensure that anyone doing work under this Order has read, is familiar with, and is able to follow all of the provisions within the attached Order.

If you have any questions about this decision, please contact Teresa Pucylowski by e-mail at [teressa.pucylowski@ecy.wa.gov](mailto:teressa.pucylowski@ecy.wa.gov). The enclosed Order may be appealed by following the procedures described within the Order.

Sincerely,

Brenden McFarland, Section Manager  
Environmental Review and Transportation Section  
Shorelands and Environmental Assistance Program

Olympia, WA 98506

On November 23, 2021, Seattle Shellfish, LLC submitted a request for a Section 401 Water Quality Certification (WQC) under the federal Clean Water Act for the Barry Shellfish Farm, Mason County, Washington. The Department of Ecology (Ecology) issued a public notice for the project on November 30, 2021.

This project will continue to commercially cultivate up to 5.0 acres of geoduck and various species of oysters (Pacific, Kumamoto, Eastern, Olympia, and European flat oysters) and clams (littleneck, Manila, butter, Eastern soft shell, horse, and razor clams) with no fallow ground. The entire project area lies between +5.0ft Mean Lower Low Water (MLLW) and -4.5ft MLLW, or other property boundary, and within the property boundaries. There is no use of mechanical bed preparation equipment.

Single-set seed or oyster cultch are cultivated in mesh grow bags that are either secured directly to the substrate bottom or are suspended in a tide-tumbled/flip bag system. Bags are attached to the racks, stakes, or lines using reusable plastic or wire ties. Installation occurs during low tide. Oyster tumbling involves attaching a buoy and securing the bags to a horizontal crossbeam (stainless steel rod, polypropylene or nylon line, or plastic coated cable) for the hanging lines and held in place by rebar stakes or similar posts driven into the substrate. Oysters grow in the bags and are checked periodically during low tides to ensure that the bags remain secure and to remove fouling organisms and predators. Oysters are harvested by hand at low or high tide.

Clam species are seeded by hand, after which the clams are covered with area nets for protection. The nets are secured to the substrate using rebar stakes. Harvesters dig clams during low tides using clam rakes, shovels or other hand tools, then subsequently smooth the substrate.

Juvenile geoducks are planted in PVC or flexible mesh tubes, up to 6 inches in diameter and up to 13 inches in length. The tubes are inserted into the substrate such that only the top section (approximately 1/3) of the tube protrudes above the beach. Two to four seed clams are placed in each tube and tubes are typically installed at a density of about 1 tube per square foot. PVC tubes may be covered by individual and/or area netting. Individual netting consists of a small, plastic mesh net secured to the tube by a UV-resistant rubber band. Area netting is secured with rebar

stakes placed vertically into the substrate and may be installed over the PVC or flexible mesh tubes.

About two years after planting, tubes are removed while area netting may be redeployed over the bed for several months for continued predator protection. Geoduck are then harvested as much as eight years after planting. Geoducks are harvested using a hand-operated water wand, which can occur at low (beach harvest) or high (dive harvest) tide. Typically, a wand is a pipe about 18 to 24 inches long with a nozzle on the end that releases surface-supplied seawater from a hose at a pressure of approximately 40 pounds per square inch (about the same pressure as that from a standard garden hose) and a flow of 20-30 gallons per minute. Multiple divers may work in an area at one time.

The project site is located on tidelands within Pickering Passage, on parcel numbers 22004-50-00011, 22004-50-00012, 22004-50-00014, 22004-50-00015, and 22004-50-00016, near Shelton, Mason County, Washington; Section 4, Township 20 North, Range 2 West; WRIA 14, Kennedy-Goldsborough Watershed.

With this Order, Ecology is granting Seattle Shellfish, LLC's request for a Section 401 Water Quality Certification for the Barry Shellfish Farm project, provided that the activity is conducted in accordance with the Section 401 Water Quality Certification request and attachments Ecology received on November 23, 2021.

Based on the information submitted, Ecology has determined that the discharge from the project will comply with state water quality requirements. Prior to undertaking any changes that materially alter the project, Seattle Shellfish, LLC must contact Ecology to determine whether a new Section 401 Water Quality Certification is required.

Issuance of this Section 401 Water Quality Certification for this proposal does not authorize Seattle Shellfish, LLC to exceed applicable state water quality standards (Chapter 173-201A WAC), ground water quality standards (Chapter 173-200 WAC) or sediment quality standards (Chapter 173-204 WAC). Furthermore, nothing in this Section 401 Water Quality Certification absolves the Applicant from liability for contamination and any subsequent cleanup of surface waters, ground waters, or sediments resulting from project construction or operations.

**Special Condition:**

Any work that causes distressed or dying fish or discharges of oil, fuel, or other chemicals into state waters or onto land with a potential for entry into state waters is prohibited. If such work, conditions, or discharges occur, immediately notify Ecology's Regional Spill Response Office at 360-407-6300 and the Washington State Department of Fish & Wildlife with the nature and details of the problem, any actions taken to correct the problem, and any proposed changes in operation to prevent further problems. You will also need to notify the Washington Emergency Management Division at 1-800-258-5990, for actual spills to water only. This condition is necessary to prevent oil and hazardous materials spills from causing environmental damage and to ensure compliance

with water quality requirements. The sooner a spill is reported, the quicker it can be addressed, resulting in less harm.

In view of the foregoing and in accordance with 33 U.S.C. §1341, RCW 90.48.120, RCW 90.48.260 Chapter 173-200 WAC and Chapter 173-201A WAC, this WQC is granted to the Seattle Shellfish, LLC, Barry Shellfish Farm project.

This Certification is not effective until the U.S. Corps of Engineers (Corps) Seattle District issues an individual Department of the Army (DA) permit for this project. Order No. **20930** will remain valid for the duration of the associated DA permit. Seattle Shellfish, LLC should send a copy of the final DA permit to [fednotification@ecy.wa.gov](mailto:fednotification@ecy.wa.gov) within two weeks of receiving it.

### **YOUR RIGHT TO APPEAL**

You have a right to appeal this Order to the Pollution Control Hearing Board (PCHB) within 30 days of the date of receipt of this Order. The appeal process is governed by Chapter 43.21B RCW and Chapter 371-08 WAC. "Date of receipt" is defined in RCW 43.21B.001(2).

To appeal you must do both of the following within 30 days of the date of receipt of this Order:

- File your appeal and a copy of this Order with the PCHB (see addresses below). Filing means actual receipt by the PCHB during regular business hours.
- Serve a copy of your appeal and this Order on Ecology in paper form by mail or in person. (See addresses below.) E-mail is not accepted.

You must also comply with other applicable requirements in Chapter 43.21B RCW and Chapter 371-08 WAC.

Address and location information.

**Filing an appeal with the PCHB:**

**Mailing Address:**
