RE: Water Quality Certification Order No. **20956** for Corps Reference No. **200901355**,  
Nationwide Permit (NWP) 48, Long Island Oyster Company - Parcel 79005002238,  
Pacific County, Washington

Dear James L. Kemmer:

Long Island Oyster Company notified the Department of Ecology (Ecology) that they have requested a Nationwide Permit (NWP) 48 authorization from the US Army Corps of Engineers (Corps) for the Long Island Oyster Company - Parcel 79005002238 located on tidelands within Willapa Bay, near Oysterville, Pacific County, Washington. Because the Corps Seattle District has notified Ecology that individual Section 401 Water Quality Certifications (WQC) are required for all NWP 48's, Long Island Oyster Company submitted a request for a WQC on December 29, 2021.

On behalf of the state of Washington, the Department of Ecology certifies that the work described in the Joint Aquatic Resource Permit Application (JARPA) and the public notice complies with applicable provisions of Sections 301, 302, 303, 306, and 307 of the Clean Water Act, as amended, and applicable state laws. This certification is subject to the conditions contained in the enclosed Order.

Please ensure that anyone doing work under this Order has read, is familiar with, and is able to follow all of the provisions within the attached Order.

If you have any questions about this decision, please contact Marco Pinchot by e-mail at [marco.pinchot@ecy.wa.gov](mailto:marco.pinchot@ecy.wa.gov). The enclosed Order may be appealed by following the procedures described within the Order.

Sincerely,

Brenden McFarland, Section Manager  
Environmental Review and Transportation Section  
Shorelands and Environmental Assistance Program

Long Island Oyster Co.  
 Attn: James L. Kemmer  
 PO Box 1054  
 Long Beach, WA 98631

Long Island Oyster Company notified the Department of Ecology (Ecology) that they have requested a Nationwide Permit (NWP) 48 authorization from the US Army Corps of Engineers (Corps) for the Long Island Oyster Company - Parcel 79005002238, located on tidelands within Willapa Bay, near Oysterville, Pacific County, Washington. Because the Corps Seattle District has notified Ecology that individual Section 401 Water Quality Certifications (WQC) are required for all NWP 48's, Long Island Oyster Company submitted a request for a WQC On December 29, 2021. A public notice for the project was issued on November 4, 2021.

This project proposes to continue to cultivate Pacific Oyster (*Crassostrea gigas*) on 17.45 acres of privately owned tidelands in Willapa Bay. Pacific Oysters will be grown directly on the substrate -0.5 ft MLLW. The farm area includes seed beds for Pacific oysters with secondary crops from natural set.

**PACIFIC OYSTER CULTURE – SEED BEDS**

Pacific oysters are grown directly on the beach substrate. Prior to planting, shellfish beds will be prepared by removing debris by hand. Seeding will occur by using oyster cultch – setting out and securing bags of washed, aged oyster shell to collect natural set on-site. These sites will also be seeded with hatchery oyster seed. Oysters are put on the seed bed as small seed and left to grow for 2 years. They are then mechanically moved to a fattening bed (see description below). This area (17.45 acres) is primarily hand-picked with a few acres where mechanical harvest methods are used every other year. When putting out seed, dense eelgrass areas are avoided to the extent practical. During hand harvest, workers use hand tools or hand-pick oysters and place them into various sized containers placed on the bed. Larger containers may be equipped with ropes and buoys that can be lifted with a boom crane onto the deck of a barge at high tide. Smaller containers are placed or dumped on decks of scows for retrieval at high tide or are carried off the beach at low tide. Mechanical (dredge) harvest occurs by use of a harvest bag that is lowered from a barge or boat by boom crane or hydraulic winch at high tide and pulled along the bottom to scoop up or 'dredge' the oysters. The dredge bags have a leading edge (blade) consisting of a steel frame with teeth and a steel mesh collection bag attached to the frame. As the dredge bags are towed across the substrate, the oysters are loosened and guided into the bags. The bag is then hoisted onto the boat deck, emptied, and then redeployed. Two dredge bags may be towed

simultaneously off each side of the boat. Dredge equipment can typically be adjusted so that the correct depth is dredged as tide levels change. Harrowing may occur between the 2 successive dredge events in order to increase recovery of oysters. Depth of substrate disturbance is approximately 1 to 2 inches.

The project site is located on tidelands within Willapa Bay on parcel number 79005002238-A (OB-E238 West Half), near Oysterville, Pacific County, Washington; Section 37, Township 12 North, Range 11 West; WRIA 24, Willapa Watershed.

With this Order, Ecology is granting Long Island Oyster Company's request for a Section 401 Water Quality Certification for the Long Island Oyster Company - Parcel 79005002238 project, provided that the activity is conducted in accordance with the Section 401 Water Quality Certification request and attachments Ecology received on December 29, 2021, and the following supporting documentation:

1. E-mail letter to Ecology dated December 29, 2021, regarding the project's compliance with the conservation measures associated with the "Programmatic Biological Opinions for Shellfish Activities in Washington State Inland Marine Waters" (U.S. Fish and Wildlife Service (USFWS) Reference Number 01EWF00-2016-F-0121, National Marine Fisheries Service (NMFS) Reference Number WCR-2014-1502). This email also includes a description of Long Island Oyster Company water quality monitoring plan.

Based on the information submitted, Ecology has determined that the discharge from the project will comply with state water quality requirements. Prior to undertaking any changes that materially alter the project, Long Island Oyster Company must contact Ecology to determine whether a new Section 401 Water Quality Certification is required.

Issuance of this Section 401 Water Quality Certification for this proposal does not authorize Long Island Oyster Company to exceed applicable state water quality standards (Chapter 173-201A WAC), ground water quality standards (Chapter 173-200 WAC) or sediment quality standards (Chapter 173-204 WAC). Furthermore, nothing in this Section 401 Water Quality Certification absolves the Applicant from liability for contamination and any subsequent cleanup of surface waters, ground waters, or sediments resulting from project construction or operations.

**Special Condition:**

Any work that causes distressed or dying fish or discharges of oil, fuel, or other chemicals into state waters or onto land with a potential for entry into state waters is prohibited. If such work, conditions, or discharges occur, immediately notify Ecology's Regional Spill Response Office at 360-407-6300 and the Washington State Department of Fish & Wildlife with the nature and details of the problem, any actions taken to correct the problem, and any proposed changes in operation to prevent further problems. You will also need to notify the Washington Emergency Management Division at 1-800-258-5990, for actual spills to water only. This condition is necessary to prevent oil and hazardous materials spills from causing environmental damage and to ensure compliance

with water quality requirements. The sooner a spill is reported, the quicker it can be addressed, resulting in less harm.

In view of the foregoing and in accordance with 33 U.S.C. §1341, RCW 90.48.120, RCW 90.48.260 Chapter 173-200 WAC and Chapter 173-201A WAC, this WQC is granted to the Long Island Oyster Company, Long Island Oyster Company - Parcel 79005002238 project.

This Certification is not effective until the U.S. Corps of Engineers (Corps) Seattle District issues a Nationwide Permit 48 authorization for this project. Order No. **20956** will remain valid for the duration of the associated Nationwide permit. Long Island Oyster Company should send a copy of the final Nationwide permit to [fednotification@ecy.wa.gov](mailto:fednotification@ecy.wa.gov) within two weeks of receiving it.

### **YOUR RIGHT TO APPEAL**

You have a right to appeal this Order to the Pollution Control Hearing Board (PCHB) within 30 days of the date of receipt of this Order. The appeal process is governed by Chapter 43.21B RCW and Chapter 371-08 WAC. "Date of receipt" is defined in RCW 43.21B.001(2).

To appeal you must do both of the following within 30 days of the date of receipt of this Order:

- File your appeal and a copy of this Order with the PCHB (see addresses below). Filing means actual receipt by the PCHB during regular business hours.
- Serve a copy of your appeal and this Order on Ecology in paper form by mail or in person. (See addresses below.) E-mail is not accepted.

You must also comply with other applicable requirements in Chapter 43.21B RCW and Chapter 371-08 WAC.

Address and location information

#### **Filing an appeal with the PCHB:**

**Mailing Address:**

Pollution Control Hearings Board  
PO Box 40903  
Olympia, WA 98504-0903

**Street address:**

Pollution Control Hearings Board  
1111 Israel RD SW  
STE 301  
Tumwater, WA 98501

#### **Serving a copy of the appeal on Ecology:**

**Mailing Address:**

Department of Ecology  
Attn: Appeals Processing Desk  
PO Box 47608  
Olympia, WA 98504-7608

**Street Address:**
