Re: Amendment to Section 401 Water Quality Certification Order No. 19788 for Corps Reference No. 200901400, Ziegler Tidelands, Thurston County, Washington

Dear Ian Child:

Enclosed is an amendment to Water Quality Certification Order No. 19778, issued on May 6, 2021, for the above project. We have also included a strikeout version of the Water Quality Certification that reflects the changes made. All other conditions of Water Quality Certification No. 19788 remain in effect.

The purpose of this amendment is to include the proposal to cultivate Pacific and Olympia oysters and to increase the acreage of geoduck cultivation, all within the existing project area.

If you have any questions about this decision, please contact Teressa Pucylowski by e-mail at teressa.pucylowski@ecy.wa.gov. The enclosed Amendment may be appealed by following the procedures described in the Amendment.

Sincerely,

Brenden McFarland, Section Manager
Environmental Review and Transportation Section
Shorelands and Environmental Assistance Program

Enclosure
First Amendment to Order No. 19788
Ziegler Tidelands
Aquatics No. 139098, Corps No. 200901400

On May 6, 2021, the Washington Department of Ecology (Ecology) issued a Section 401 Water Quality Certification to Sounds Shellfish for the above-referenced project pursuant to the provisions of 33 U.S.C. 1341 (FWPCA § 401).

Ecology received a notification from the U.S. Army Corps of Engineers (Corps) stating that Sound Shellfish intended to modify their farming practices. Ecology notified the grower on February 8, 2022 that a modification to the Section 401 Water Quality Certification was required to include the proposal to cultivate Pacific and Olympia oysters and to increase the acreage of geoduck cultivation, all within the existing project area.

Order No. 19788 dated May 6, 2021 is hereby amended as follows:

I. The second paragraph, which reads:

The project will continue to cultivate 0.25 acres of geoduck clams on privately owned tidelands within 0.0ft to -3.6ft Mean Lower Low Water. Maintenance of the site would include routine inspections during low tide to ensure that equipment remains on site, and to ensure no entanglement of fish and wildlife. Access to the farm site will occur by boat or by upland.

Is replaced with:

The project will continue to cultivate 0.57 acres shellfish within a 2.0-acre project area on privately owned tidelands. This includes 0.29 acres of geoduck clams between within 0.0ft to -4.1ft Mean Lower Low Water (MLLW), and 0.28 acres of Pacific and Olympia oysters between +3.5ft and 0.0ft MLLW. Maintenance of the site would include routine inspections during low tide to ensure that equipment remains on site, and to ensure no entanglement of fish and wildlife. Access to the farm site will occur by boat or by upland. There is no eelgrass present at this site.

II. The following paragraph is added after the fourth paragraph:
Oyster seed are placed in Vexar mesh bags (18” x 3” x 3”) which are placed directly onto the tidelands in rows of ten and connected to two ropes via zip ties. The rows of bags are placed at 3ft intervals and the connecting ropes would be anchored to the tideland substrate by 24-inch-long rebar pins. After one to three years of growth, oysters will be hand-harvested during low tides. Each bag would be removed and placed into a boat for transport to a processing facility.

No other conditions or requirements of the above referenced Order are affected by this amendment.

Ecology retains continuing jurisdiction to make modifications hereto through supplemental order, if it appears necessary to further protect the public interest.

Failure to comply with this amended Order may result in the issuance of civil penalties or other actions whether administrative or judicial, to enforce the terms of this amended Order.

**YOUR RIGHT TO APPEAL**

You have a right to appeal this Order to the Pollution Control Hearing Board (PCHB) within 30 days of the date of receipt of this Order. The appeal process is governed by Chapter 43.21B RCW and Chapter 371-08 WAC. “Date of receipt” is defined in RCW 43.21B.001(2).

To appeal you must do both of the following within 30 days of the date of receipt of this Order:

- File your appeal and a copy of this Order with the PCHB (see addresses below). Filing means actual receipt by the PCHB during regular business hours.
- Serve a copy of your appeal and this Order on Ecology in paper form by mail or in person. (See addresses below.) E-mail is not accepted.

You must also comply with other applicable requirements in Chapter 43.21B RCW and Chapter 371-08 WAC.

IN THE MATTER OF GRANTING A WATER QUALITY CERTIFICATION TO

Sound Shellfish Company pursuant to 33 U.S.C. 1341 (FWPCA § 401), RCW 90.48.120, RCW 90.48.260 and Chapter 173-201A WAC

ORDER No. 19788 – First Amendment

Corps Reference No. 200901400

Ziegler Tidelands located on tidelands within Dana Passage, near Olympia, Thurston County, Washington

ORDER No. 19788 – First Amendment

Corps Reference No. 200901400

Ziegler Tidelands located on tidelands within Dana Passage, near Olympia, Thurston County, Washington

Sound Shellfish Company
Attn: Ian Child
PO Box 12475
Olympia, WA  98508

The project will continue to cultivate 0.25 0.57 acres of geoduck clams shellfish within a 2.0-acre project area on privately owned tidelands. This includes 0.29 acres of geoduck clams between within 0.0ft to -4.1ft -3.6ft Mean Lower Low Water (MLLW), and 0.28 acres of Pacific and Olympia oysters between +3.5ft and 0.0ft MLLW. Maintenance of the site would include routine inspections during low tide to ensure that equipment remains on site, and to ensure no entanglement of fish and wildlife. Access to the farm site will occur by boat or by upland. There is no eelgrass present at this site.

To protect juvenile geoduck clams from predators, geoduck seed are placed in either PVC or Vexar mesh tubes that are pushed into the substrate (by hand for PVC tubes or using a low-pressure water jet for Vexar mesh tubes) at density not to exceed one tube per square foot. The tubes are all 4” in diameter and 12-16” in length and 3-5” of the tube will remain exposed above the substrate. PVC will be capped with individual mesh netting and secured with specialized rubber bands designed to withstand UV light and saltwater; mesh tubes will be secured using zip-ties or hog rings. Area nets may be placed over the tubes and weighed down with rebar stakes. Tubes and nets are removed after about 1-2 years after planting.

Geoduck are harvested either via dive harvest or beach harvest, although both use a motorized, low pressure water pump mounted on a vessel offshore. Water is delivered to the harvester at 20-30 gallons per minute, and is similar to a garden hose at full volume. The end of the hose is equipped with a nozzle which is inserted into the substrate, softening the sand adjacent to the geoduck and allowing the clams to be removed by hand. Harvest occurs about 5-7 years after planting.

Oysters seed are placed in Vexar mesh bags (18” x 3” x 3”) which are placed directly onto the tidelands in rows of ten and connected to two ropes via zip ties. The rows of bags are placed at
3ft intervals and the connecting ropes would be anchored to the tideland substrate by 24-inch-long rebar pins. After one to three years of growth, oysters will be hand-harvested during low tides. Each bag would be removed and placed into a boat for transport to a processing facility.

The project site is located on tidelands within Dana Passage, on parcel numbers 12912240500 and 12912240600, adjacent to 8139 Zangle Road NE, near Olympia, Thurston County, Washington; Section 12, Township 19 North, Range 2 West; WRIA 13, Deschutes Watershed.

With this Order, Ecology is granting Sound Shellfish Company’s request for a Section 401 Water Quality Certification for the Ziegler Tidelands project, provided that the activity is conducted in accordance with the Section 401 Water Quality Certification request and attachments Ecology received on March 12, 2021.

Based on the information submitted, Ecology has determined that the discharge from the project will comply with state water quality requirements. Prior to undertaking any changes that materially alter the project, Sound Shellfish Company must contact Ecology to determine whether a new Section 401 Water Quality Certification is required.

Issuance of this Section 401 Water Quality Certification for this proposal does not authorize Sound Shellfish Company to exceed applicable state water quality standards (Chapter 173-201A WAC), ground water quality standards (Chapter 173-200 WAC) or sediment quality standards (Chapter 173-204 WAC). Furthermore, nothing in this Section 401 Water Quality Certification absolves the Applicant from liability for contamination and any subsequent cleanup of surface waters, ground waters, or sediments resulting from project construction or operations.

Special Condition:
Any work that causes distressed or dying fish or discharges of oil, fuel, or other chemicals into state waters or onto land with a potential for entry into state waters is prohibited1. If such work, conditions, or discharges occur, immediately notify2 Ecology’s Regional Spill Response Office at 360-407-6300 and the Washington State Department of Fish & Wildlife with the nature and details of the problem, any actions taken to correct the problem, and any proposed changes in operation to prevent further problems. You will also need to notify the Washington Emergency Management Division3 at 1-800-258-5990, for actual spills to water only. This condition is necessary to prevent oil and hazardous materials spills from causing environmental damage and to ensure compliance with water quality requirements. The sooner a spill is reported, the quicker it can be addressed, resulting in less harm.

---

1 RCW 90.48
2 WAC 173-303-145
3 RCW 90.56.280
In view of the foregoing and in accordance with 33 U.S.C. §1341, RCW 90.48.120, RCW 90.48.260 Chapter 173-200 WAC and Chapter 173-201A WAC, this WQC is granted to the Sound Shellfish Company, Ziegler Tidelands project.

This Certification is not effective until the U.S. Corps of Engineers (Corps) Seattle District issues an individual Department of the Army (DA) permit for this project. Order No. 19788 will remain valid for the duration of the associated DA permit. Sound Shellfish Company should send a copy of the final DA permit to fednotification@ecy.wa.gov within two weeks of receiving it.
