RE: Coastal Zone Consistency for Corps Reference #NWS-2021-1185,
Oak Harbor Marina Salmon Rearing Program Project, Oak Harbor,
Island County, Washington

Dear Christopher Raine Sublet:

On February 28, 2022, the Department of Ecology received a Certification of Consistency with the Washington State Coastal Zone Management Program (CZMP) for the above project.

This decision is for rearing up to 30,000 salmon (Coho or Chinook) in two approximately 30- by 15-foot pens made of untreated lumber, stainless steel fasteners, and plastic barrel floats. A nylon, knotless net will contain the salmon within the pens, and will be approximately 8 feet deep. The net pens would be secured within marina slips. After approximately five months, or once salmon reach the desired size, they would be released into Oak Harbor Bay. The net pens would be stored ashore when salmon are not present and they are not in use. The project would serve as an outdoor classroom for nearby students and increase salmon abundance to provide food for orcas and revive the local salmon fishery.

The project site is located at the Oak Harbor Marina, 1401 SE Catalina Drive, Oak Harbor Bay, in Oak Harbor, Washington, in Island County.

Pursuant to Section 307(c)(3) of the Coastal Zone Management Act of 1972 as amended, Ecology concurs with City of Oak Harbor Marina's determination that the proposed work is consistent with Washington's CZMP.

If you have any questions regarding Ecology's consistency decision please contact Rebekah Padgett at (425) 365-6571.
