Slight mistake that NWS-2022-625 will be a NWP 14. The Corps has determined that this project meets the programmatic WQC requirements for this NWP. Therefore, an individual WQC is not required.

Right now my access database is not working so I am having to send the ARC via email.

Anna,

I recently spoke to Evan Carnes with US Army Corps of Engineers and have copied Evan to the email for introductions.

To my understanding the project managers at the Corps are a bit loaded with projects at this time. However Evan has offered support to answer any questions you may have regarding the status of your project.

Ecology has already received a Pre-Filing Meeting Request(s) (PFMR) on August 9, 2022. At this time all Ecology needs is an agency request for comments (ARC) from the Corps.

Please let me know if you have any questions.
Thank you for your time.

Sincerely,

Alicia Schulz, PLA

Good morning Alicia,

I believe this means USACE is taking the project? I do not know what he means by a pre-filling with Ecology. Is that covered by my submittal to the DOE Federal Permit Unit (ecyrefedpermits@ecy.wa.gov) email, which triggered communication with you?

Thank you for all of your help.

Anna

Thanks. I will pass on to Seattle so they can set up the file. Is this a project you are trying to do this year or next? Have you filed a pre-filling with Ecology?

I also have the SEPA determination and the tribal consultation letters for DAHP consultation if you would like those as well.

Thank you
Anna

Just the JARPA and project drawings and any ESA or tribal concurrence you may already have.

If you have questions give a call any time after 7:30 am

Good morning,

Alicia from WA DOE left me a message saying she spoke to you about the project in Okanogan County on Salmon Creek. She said you needed some forms from me so you could look at our project. Please let me know what forms to submit and I can have them to you hopefully today.

Thank you
