Re: Coastal Zone Consistency for Activity Undertaken by a Federal Agency
Naval Magazine Indian Island Ammunition Wharf Piling Replacement,
Jefferson County, Washington

Dear Jarrett Schuster:

On September 1, 2022, the Department of the Navy (Navy) submitted a Certification of Consistency with the Washington State Coastal Zone Management Program (CZMP). At Ecology's request, the Navy submitted an addendum to the Consistency Determination on October 19, 2022. On October 25, 2022, Ecology requested a 15-day extension pursuant to 15 CFR 930.41(b). On October 27, 2022, Ecology and the Navy agreed to a second extension until November 18, 2022. The project is located on Ammunition Wharf at Naval Magazine Indian Island in Jefferson County, Washington.

The purpose of this project is to replace piles, perform maintenance, and conduct repair activities over a 7-year period on the Ammunition Wharf. This includes the removal and replacement of up to 120 structural concrete piles and fender piles. The number of replaced structural piles could include up to eight structural steel piles if inspections warrant steel pile replacement, and the remainder would be concrete piles. Maintenance activities include deck resurfacing and recoating various corroded metal components. Repair activities could be conducted on wetwell concrete spalling, the Ammunition Wharf pier and piles, and quay walls. Damaged or deteriorated components could be repaired or replaced, including brow floats, pile caps, safety ladders, cable straps, camel and camel connections, and lighting. The work would not change overwater coverage at the Ammunition Wharf. All pile driving would occur during the in-water work window (October 1 to January 16).

Pursuant to Section 307(c)(3) of the Coastal Zone Management Act of 1972 as amended, Ecology concurs with Navy's determination that the proposed work is consistent with Washington's CZMP.
