Re: Water Quality Certification Order No. 21450, Corps No. NWS-2020-1158-DOT,
SR 9 Marsh Road to 2nd Street Vicinity Widening, Snohomish County, Washington

Dear John Maas:

On March 23, 2022, the Washington Department of Transportation (WSDOT) submitted a request for a Section 401 Water Quality Certification (WQC) under the federal Clean Water Act for the SR 9 Marsh Road to 2nd Street Vicinity Widening in Snohomish County, Washington.

The project will construct new southbound lanes between Marsh Road and 2nd Street Interchange to reduce congestion in the area. Two new bridges will be needed to span the Snohomish River and an existing wetland in the Snohomish River Floodplain.

On behalf of the state of Washington, the Department of Ecology certifies that the work described in the Water Quality Certification Request and supplemental documents complies with applicable provisions of Sections 301, 302, 303, 306, and 307 of the Clean Water Act, as amended, and applicable state laws. This certification is subject to the enclosed Water Quality Certification Order (WQC Order).

Please ensure that anyone doing work under this WQC Order has read, is familiar with, and is able to follow all of the provisions within the attached WQC Order.

If you have any questions about this decision, please contact Penny Kelley at 360-280-8856. The enclosed WQC Order may be appealed by following the procedures described within.

On March 23, 2022, the Washington Department of Transportation (WSDOT) submitted a request for a Section 401 Water Quality Certification (WQC) under the federal Clean Water Act to the Department of Ecology (Ecology) for the State Route 9 Marsh Road to 2nd Street Vicinity Widening project in Snohomish County, Washington. The following processing dates are referenced below:

- On January 15, 2021, WSDOT submitted a pre-filing meeting request.
- On April 13, 2022, the U.S. Army Corps of Engineers (Corps) sent a permit notification to Ecology that indicated that they are processing the project under Nationwide Permit (NWP) No. 14
- On April 18, 2022, Ecology issued a public notice for the project.

The project proposes to construct new southbound lanes between Marsh Road and 2nd Street Interchange to reduce congestion in the area. Two new bridges will be needed to span the Snohomish River and an existing wetland in the Snohomish River Floodplain which is considered an overflow area for the river. The new lanes will have guardrail with shoulders and no median, but a gap will exist between the existing bridges (northbound lanes) and new bridges (southbound lanes). The new bridges will be located west of the existing bridges. Any new piers and columns in the river and wetland will line up with the existing piers and columns to allow better flow through of the river. To build the new bridges over the river, a temporary work trestle will be constructed. Two existing stormwater culverts will be replaced with new culverts and will result in temporary impacts to wetlands. Ground improvements will be needed to construct the new bridge spanning the overflow wetland area. The ground improvement will result in permanent impacts to existing wetlands which will be mitigated for at the Snohomish Basin Mitigation Bank. All temporary impacts to wetlands will be restored on site.

The project site is located on SR 9 between milepost 8.41 and milepost 9.68, crossing the Snohomish River, in Snohomish County, Washington, Section 24 and 13, Township 28N., Range 5E., within Water Resource Inventory Area (WRIA) 7, Snohomish.
