Re: Coastal Zone Management Federal Consistency Decision for Central Marina West  
Maintenance Dredging (Corps No. 202100485), Everett, Snohomish County, Washington

Dear Laura Gurley:

On February 18, 2022, the Department of Ecology (Ecology) received a Certification of Consistency with the Washington State Coastal Zone Management Program (CZMP) for the above project. Then on August 9, 2022, the Port of Everett and Ecology agreed to stay the CZM until January 21, 2023, in order for the Applicant to complete the Section 401 Water Quality Certification process.

The project proposes maintenance dredging in the Central Marina West to continue use of the Marina facilities and maintain access to existing pier and dock structures. In total, 33,890 cubic yards of material will be dredged. DMMP sediment characterization was conducted in February 2021 and a suitability determination was issued on July 7, 2021, determining that the material is suitable for openwater disposal. Barge-based mechanical dredging will be used. Approximately 53,890 cubic yards of material will be dredged over an area of approximately 7.2 acres to a design dredge depth of -12 feet MLLW, plus 2 feet of over-dredge allowance. The dredged material will be transported to the disposal site by bottom-dump barge.

The project site is located at 14th Street and West Marine View Drive, Snohomish County, Washington, Section 18, Township 29N., Range 5E., within Water Resource Inventory Area (WRIA) 7 Snohomish Watershed.

Pursuant to Section 307(c)(3) of the Coastal Zone Management Act of 1972 as amended, Ecology concurs with Port of Everett 's determination that the proposed work is consistent with Washington's CZMP.

If you have any questions regarding Ecology's consistency determination, please contact Loree' Randall at (360) 485-2796.
