Re: Coastal Zone Management Federal Consistency Decision for the Westport Seafood Retaining Wall Replacement Project, Corps No. NWS-2021-0792, Westport, Gray Harbor County, Washington

Dear Josh Franzke:

On November 28, 2022, the Department of Ecology (Ecology) received a Certification of Consistency with the Washington State Coastal Zone Management Program (CZMP) for the above project.

This determination is for the replacement of approximately 200 linear feet of existing seawall on property owned and operated by Westport Seafood. The existing seawall is comprised of timber pilings and a timber wall. The new seawall will be comprised of a soldier pile wall consisting 26 steel piles and pre-cast concrete wall sections between each steel piling. Twenty six creosote pilings and approximately 2,000 square feet of creosote timbers associated with the existing seawall will be removed. The new seawall will have weep holes for water to leave the landward side of the seawall to prevent erosion. To maintain drainage from behind the seawall, approximately 240 cubic yards of sand and aggregate will be removed and replaced with equivalent volume of clean free-draining backfill. The approximate 1,080 square foot area of backfill will be restored with area of maintained grass similar to existing conditions. Additionally, the project will be removing asphalt and concrete debris that extends approximately 10 feet from the shoreline waterward of the seawall.

The project site is located within Grays Harbor at 609 Neddie Rose Drive, Westport, Grays Harbor County, Washington; SE Section 36, Township 17 N., Range 12W., within Water Resource Inventory Area (WRIA) 22, Lower Chehalis Watershed.

Pursuant to Section 307(c)(3) of the Coastal Zone Management Act of 1972 as amended, Ecology concurs with Brumfield Construction, Inc.'s determination that the proposed work is consistent with Washington's CZMP.

If you have any questions regarding Ecology's consistency determination, please contact Lori Kingsbury at Lori.kingsbury@ecy.wa.gov.
