 Longview, WA 98632

The Weyerhaeuser Company submitted a request for a Section 401 Water Quality Certification (WQC) under the federal Clean Water Act to the Department of Ecology (Ecology) for the Weyerhaeuser Longview Maintenance Dredging at DMMU-7, Cowlitz County, Washington. The following processing dates are referenced below:

- On March 30, 2022, Ecology received a request for Clean Water Section 401 Water Quality Certification
- On July 13, 2022, the U.S. Army Corps of Engineers (Corps) and Ecology issued a joint public notice for the project.

The proposed dredging area at Weyerhaeuser's Log Export Dock (previously defined as DMMU 7) is located at River Mile (RM) 65.5. DMMU 7 is proposed to be dredged to an elevation of -40 ft CRD plus 2 feet of allowable overdepth for deep draft shipping. To achieve a design depth of -40 feet CRD with a 2-foot overdredge allowance, it is anticipated that up to 10,000 cubic yards (cy) will be dredged annually (100,000 cy over the 10-year permit period). Dredging and dredge material disposal will occur over two to three weeks per year. Dredging will be accomplished using clamshell dredging methods. Dredged material disposal for this permit will be in the federal navigation channel of the Columbia River between RM 61.3 and 62.5, or at alternative disposal lane as approved by the Portland District Corps of Engineers.

The project site is located at RM 65.5, Columbia River, Cowlitz County, Washington, ¼ Section NW, Section 8, Township 7N., Range 2W., within Water Resource Inventory Area (WRIA) 25 (Grays-Elochoman).

AUTHORITIES
