condition E.19, see page 15.

Port of Vancouver USA submitted a request for a Section 401 Water Quality Certification (WQC) under the federal Clean Water Act to the Department of Ecology (Ecology) for the Terminal 1 Dock Replacement Project located in Clark County, Washington. The following processing dates are referenced below:

- On April 18, 2022, the U.S. Army Corps of Engineers (Corps) issued a public notice for the project.
- On May 12, 2022, the Port of Vancouver USA submitted a pre-filing meeting request.
- On June 17, 2022, Ecology received a request for Clean Water Section 401 Water Quality Certification.
- On August 12, 2022, Ecology issued a public notice for the project.

The project proposes to replace the aging Terminal 1 Dock with a new dock in the same footprint. The replacement dock will support a future marketplace building that would house a variety of retail establishments. Project elements include:

- Overwater demolition of existing dock superstructure, including timber catwalks, timber pile caps, and utilities;
- Removal of creosote-treated support piles, fender piles, and debris diversion system
- Removal of shotcrete and rubble revetment along shoreline slope;
- Regrading of shoreline slope and placement of fish mix along regraded shoreline slope;
- Installation of steel support, fender piles, and debris diversion system;
- Overwater construction of replacement dock, including pre-cast concrete panels, formed cast-in-place closure pours between concrete panels, and decking; and,
- Installation of stormwater improvements, including deck drains and two new outfalls.

The project site is located at 100 Columbia Street, Vancouver, Columbia River, River Mile (RM) 106, Vancouver, Clark County, Washington, Southwest Quarter, Section 51, Township 2 North, Range 1 East; within Water Resource Inventory Area (WRIA) 28, Salmon-Washougal Watershed.
