Re: Coastal Zone Management Federal Consistency Decision for Quileute Marina Dock and Piling Repair and Dredging (Corps No. 202100456), Quillayute River Estuary and Pacific Ocean, La Push, Clallam County, Washington

Dear Annie Foster:

On June 21, 2023, the Department of Ecology (Ecology) received a Certification of Consistency with the Washington State Coastal Zone Management Program (CZMP) for the above project. Pursuant to Section 307(c)(3) of the Coastal Zone Management Act of 1972 as amended, Ecology concurs with the Quileute Tribe's determination that the proposed work is consistent with Washington's CZMP.

The proposed work includes sediment removal dredging in the Quileute Marina to restore a design depth of -10-ft. plus 2 ft. of over depth to -12-ft. (MLLW), and the replacement of damaged piers and fingers and creosote-treated piling due to aging of the structures and winter storm damage in 2020. All pilings would be replaced with steel and driven using a vibratory hammer. All floats and piers would be replaced with grated decking instead of solid decking and remain within the same size as original except where width is increased for safety and ADA compliance. The Quileute Marina would be dredged by hydraulic dredge with placement on Quillayute Spit for beneficial beach nourishment. The removal of sunken debris would also occur.

This activity occurs within the Quillayute River Estuary and Pacific Ocean at the Quileute Marina within the Quileute Reservation, La Push, Clallam County, Washington.
