Re: Coastal Zone Management Federal Consistency Decision for Hardwick Point (Corps No. NWS-2008-0557), Sequim Bay, Sequim, Clallam County, Washington

Dear Reed Gunstone:

On October 25, 2023, the Department of Ecology (Ecology) received a Certification of Consistency with the Washington State Coastal Zone Management Program (CZMP) for the above project. Pursuant to Section 307(c)(3) of the Coastal Zone Management Act of 1972 as amended, Ecology concurs with J&G Gunstone Clams, Inc.'s determination that the proposed work is consistent with Washington's CZMP.

This project is for an existing shellfish farm with the proposed new use of a mechanical clam harvester. This shellfish farm cultivates Pacific oysters, and Manila clams, with incidental harvest of natural set Pacific littleneck clams, butter clams, eastern softshell clams, horse clams, mud clams, and cockle clams. Cultivation occurs on 4 acres of privately owned tidelands between +3.5 ft to -2.5 ft mean lower low water tidal elevations, within a 5-acre project area. Access to tidelands is by foot and ATV during low tide and occasionally by boat/public boat ramp during high tides. Patchy eelgrass is present outside of the harvest area.

Existing operations consist of 0.5-acre of Pacific oysters grown in bags on-bottom, 2.5 acres of Manila clams and Pacific oysters grown on-bottom, and 1 acre of natural set oysters and clams. Bag on-bottom oyster cultivation would involve placing single-set seed or oyster cultch in bags, which would then be secured to lines or stakes directly on the substrate until harvest. For on-bottom cultivation of both clams and oysters, seed is scattered by hand on the beach during incoming tides and covered by anti-predation netting. Cover nets will be used on 1 acre and installed with rebar cane that is 0.5-inch thick and 2-ft long. The cover nets are temporary and will be in place for a growing season, usually 2 years. Nets will be rotated in and out due to age, damage, and fouling. Generally, space will be left between cover nets, to allow for fallow areas

and for walkways. Cement blocks may be used temporarily as needed to prevent newer nets from floating and will be removed when no longer needed. Monitoring is conducted 3 or more times per week.

The proposed mechanical clam harvester is a modified tulip bulb harvester. Operation will be conducted during low tide. Pilot harvests will be conducted to see how the harvester works at the various sites, given the variation in substrate and depth of shellfish. Where there is “successful” harvest, meaning the mechanical device can move along the substrate, and where the clams are not too deep in the substrate and can therefore be accessed efficiently with minimal disturbance, then the device will be used to assist the harvesting process.

The project site is located on tidelands within Sequim Bay, on parcel numbers 033036210175, 033036500015, 033036240075, 033036240175, 033036240225, and 033036240250, near Sequim, Clallam County, Washington; Section 36, Township 30 North, Range 3 West; WRIA 17, Quilcene-Snow Watershed.

If you have any questions regarding Ecology’s decision, please contact Teresa Pucylowski at (360) 764-0546.

Your right to appeal

You have a right to appeal this decision to the Pollution Control Hearings Board (PCHB) within 30 days of the date of receipt. The appeal process is governed by Chapter 43.21B RCW and Chapter 371-08 WAC. “Date of receipt” is defined in RCW 43.21B.001(2).

To appeal, you must do all of the following within 30 days of the date of receipt of this decision:

- File your notice of appeal and a copy of this decision with the PCHB (see filing information below). “Filing” means actual receipt by the PCHB during regular business hours as defined in WAC 371-08-305 and -335. “Notice of appeal” is defined in WAC 371-08-340.
- Serve a copy of your notice of appeal and this decision on the Department of Ecology mail, in person, or by email (see addresses below).

You must also comply with other applicable requirements in Chapter 43.21B RCW and Chapter 371-08 WAC.

Filing an appeal

Filing with the PCHB
