WQC Order No.	22561, First Amendment
Corps Reference No.	NWS-2022-729
Site Location	Bulkhead Segment E Replacement and Wharf Repair, located within Port Gardner and Lower Snohomish River, Everett, Snohomish County, Washington.

The Port of Everett submitted a request for a Section 401 Water Quality Certification (WQC) under the federal Clean Water Act to the Department of Ecology (Ecology) for the Bulkhead Segment E Replacement and Wharf Repair, Snohomish County, Washington. The following processing dates are listed below:

- On 10/10/2022, the Port of Everett submitted a pre-filing meeting request.
- On 11/27/2023, Ecology received a request for Clean Water Section 401 Water Quality Certification.
- Ecology's "Reasonable Period of Time" for this project has been established as 11/24/2024.
- On 2/15/2024, Ecology issued a public notice for the project.

The project proposes to reconstruct the existing Segment E bulkhead and wharf. The existing 165 linear feet (LF) creosote timber bulkhead will be replaced with a new 165 LF vertical steel sheet pile bulkhead along the entire water frontage. The existing timber wharf (piles and deck) will be removed in its entirety. This includes demolition of 75 wharf and fender timber piles (sixty-five (65) - 12-in. dia. creosote timber piles and ten (10) - 12-in. dia. steel piles). The existing wharf will be replaced with a wharf consisting of thirteen (13) - 24-inch-diameter steel pipe piles supporting steel pile caps, timber stringers, and a timber deck.

The project site is located north of 1600 West Marine View Drive, Port Gardner and the Lower Snohomish River, Snohomish County, Washington, Section 18, Township 29 N., Range 05 E., within Water Resource Inventory Area (WRIA) 7.

Authorities

1. Conformance with applicable water quality-based, technology-based, and toxic or pretreatment effluent limitations as provided under 33 U.S.C. §§1311, 1312, 1313, 1316, and 1317.
2. Conformance with the state water quality standards contained in Chapter 173-201A WAC and authorized by 33 U.S.C. §1313 and by Chapter 90.48 RCW, and with other applicable state laws; and
3. Conformance with the provision of using all known, available and reasonable methods to prevent and control pollution of state waters as required by RCW 90.48.010.
4. Conformance with Washington’s prohibition on discharges that cause or tend to cause pollution of waters of the state of Washington. RCW 90.48.080.
5. The Project Proponent of the project authorized is responsible for obtaining all other permits, licenses, and certifications that may be required by federal, state, local or tribal authorities.

With this Water Quality Certification Order (WQC Order), Ecology is granting with conditions the Port of Everett’s request for a Section 401 Water Quality Certification for the Bulkhead Segment E Replacement and Wharf Repair, Port Gardner and Lower Snohomish River, located in Snohomish County. Ecology has determined that the proposed discharges will comply with all applicable state water quality and other appropriate requirements of State law, provided the project is conducted in accordance with the WQC request that Ecology received on 11/27/2023, the supporting documents referenced in Table 1 below, **and the conditions of this WQC Order.**

4. Work causing distressed or dying fish and discharges of oil, fuel, or chemicals into state waters or onto land with a potential for entry into state waters is prohibited. If such work, conditions, or discharges occur, the Project Proponent shall notify Ecology's Federal Permit Manager, per condition A2, and immediately take the following actions:
 - a. Cease operations at the location of the non-compliance.
 - b. Assess the cause of the water quality problem and take appropriate measures to correct the problem and prevent further environmental damage.
 - c. In the event of a discharge of oil, fuel, or chemicals into state waters, or onto land with a potential for entry into state waters, containment and cleanup efforts shall begin immediately and be completed as soon as possible, taking precedence over normal work. Cleanup shall include proper disposal of any spilled material and used cleanup materials.
 - d. Immediately notify Ecology's Regional Spill Response Office and the Washington State Department of Fish and Wildlife with the nature and details of the problem, any actions taken to correct the problem, and any proposed changes in operation to prevent further problems.
 - e. Immediately notify the National Response Center at 1-800-424-8802, for actual spills to water only.
 - Justification - This condition is necessary to prevent oil and hazardous materials spills from causing environmental damage and to ensure compliance with water quality requirements. The sooner a spill is reported, the quicker it can be addressed, resulting in less harm. Ecology must protect waters of the state from all discharges and potential discharges of pollution that can affect water quality to protect aquatic life and beneficial uses.
