Re: Coastal Zone Management Federal Consistency Decision for Kenmore Berth
Maintenance Dredging Project (Corps No. NWS-2022-934), Lake Washington, Kenmore,
King County, Washington

Dear Pete Stoltz:

On July 29, 2024, the Department of Ecology (Ecology) received a Certification of Consistency with the Washington State Coastal Zone Management Program (CZMP) for the above project. Pursuant to Section 307(c)(3) of the Coastal Zone Management Act of 1972 as amended, Ecology concurs with the Glacier Northwest's determination that the proposed work is consistent with Washington's CZMP.

The proposed work includes dredging approximately 800 cubic yards (cy) of sand, gravel, and sediment material within the existing approximately 16,000-square-foot berth area in Lake Washington. Maintenance dredging would target a depth of +4.47 feet (USACE Kenmore Datum) to the top of the existing toe protection surface. Waterward of the existing toe protection surface, dredging would occur to +3.5 feet and would be backfilled with a clean sand layer to form a cap with a minimum thickness of 1 foot (totaling 215 cubic yards). One grab sample from the surface of the dredge cut outside of the toe protection layer would be collected after dredging is complete, but before the clean sand layer is placed

This activity will occur in Lake Washington, Kenmore Berth, Kenmore, King County, Washington.

If you have any questions regarding Ecology's decision, please contact Laura Inouye at 360-515-8213.
