Re: Coastal Zone Management Federal Consistency Decision for Watson Bulkhead Replacement (Corps No. NWS-2024-801), Hood Canal, Belfair, Mason County, Washington

Dear Mary Ann:

On February 12, 2025, the Department of Ecology (Ecology) received a Certification of Consistency with the Washington State Coastal Zone Management Program (CZMP) for the above project. Ecology issued a 21-day public notice on February 28, 2025. Pursuant to Section 307(c)(3) of the Coastal Zone Management Act of 1972 as amended, Ecology concurs with Mary Ann's determination that the proposed work is consistent with Washington's CZMP.

The proposed work includes the replacement of 50 linear feet of rock bulkhead across 266 square feet. The work will take place over a period of three to four weeks. A medium-sized excavator will be brought onto the beach via the adjacent boat ramp. The excavator will remove the existing rock and place it into a dump truck that will be located on the boat ramp. Rock will be hauled away and disposed of at an approved site. Materials to be used for the repair work include 2- to 3-man rock which will be stacked. Filter fabric and clean 6"-8" quarry spalls will be added behind the stacked rock. The work will be done during low tides and will happen in stages. Between each low and high tide cycle a section of old rock will be removed and new rock will be placed.

This activity is located at 17471 East State Route 106, Belfair, Hood Canal, Mason County, Washington, Section 12, Township 22 N., Range 2 W., within Water Resource Inventory Area (WRIA) 14 Kennedy/Goldsborough.

If you have any questions regarding Ecology's decision, please contact Lydia Albright at Lydia.Albright@ecy.wa.gov or 360-870-2983.
