**RE: Bonneville Power Administration's Negative Determination: Olympia-Grand Coulee Insulator Replacement and Access Road on Federal Forest Lands, King County**

Dear Laura Roberts:

On June 4, 2020, the Washington Department of Ecology (Ecology) received the Bonneville Power Administration's (BPA) Negative Determination for the above project. The proposed federal activity is a transmission line insulator replacement and access road improvement project, which involves the reconstruction of a ford along BPA's Olympia-Grand Coulee Transmission Line. The ford reconstruction would occur within Sunday Creek in King County, Washington.

Ecology has reviewed the BPA's Negative Determination for the project and concurs that the project will have no effects to Washington's coastal zone resources and uses. Thus, the project does not trigger any of the CZMP's enforceable policies that are found in the Shoreline Management Act, the Water Pollution Control Act, Washington's Clean Air Act, the Ocean Resource Management Act, and the Marine Spatial Plan for Washington.

Pursuant to Section 307(c)(3) of the Coastal Zone Management Act of 1972 as amended, Ecology concurs with the BPA's determination that the proposed project is consistent to the maximum extent practicable with the Washington CZMP.
