RE: Water Quality Certification Order No. **18252** for Corps Public Notice No. **NWS-2019-01049**, Maintenance dredge at Pacific Fishermen Shipyard, King County, Washington

Dear Frank Hofmeister:

On February 18, 2020, Pacific Fishermen Shipyard and Electric, LLC submitted a request for a Section 401 Water Quality Certification (401 Certification) to the Department of Ecology (Ecology) for Pacific Fishermen Shipyard, King County, Washington.

The proposed project includes maintenance dredging Pacific Fishermen Terminal, with upland disposal. The project also includes placement of a minimum 2 foot clean sand cover.

On behalf of the State of Washington, Ecology certifies that the work described in the JARPA and the public notice complies with applicable provisions of Sections 301, 302, 303, 306, and 307 of the Clean Water Act, as amended and applicable state laws. This certification is subject to the conditions contained in the enclosed Order.

If you have any questions, please contact Laura Inouye at (360) 407-6165. The enclosed Order may be appealed by following the procedures described in the Order.

Sincerely,

A handwritten signature in blue ink, appearing to read "Brenden", is written over a horizontal line.

Brenden McFarland, Section Manager

**IN THE MATTER OF GRANTING A ) ORDER # 18252**  
**WATER QUALITY ) Corps Reference No. NWS-2019-01049**  
**CERTIFICATION TO ) Maintenance dredge at Pacific Fishermen**  
**Pacific Fishermen Shipyard ) Shipyard, Seattle, King County, Washington.**  
in accordance with 33 U.S.C. 1341 )  
(FWPCA § 401), RCW 90.48.120, RCW )  
90.48.260 and Chapter 173-201A WAC )

Pacific Fishermen Shipyard and Electric, LLC  
Attn: E. Frank Hofmeister  
1416 NW Norcross Way  
Seattle, WA 98177-5238

On February 18, 2020, the Department of Ecology (Ecology) received a request from the Pacific Fishermen Shipyard and Electric, LLC for a Section 401 Water Quality Certification (WQC) for maintenance dredging at Pacific Fishermen Shipyard, with upland disposal and sand cover placement. The U.S. Army Corps of Engineers (Corps) issued a joint public notice (JPN) for the project on July 23, 2020.

Maintenance dredging of approximately 2,000 cubic yards of sediment under the Screw Lift Dry Dock, and placement of minimum 2 foot clean sand cover.

This project is located in section SW11, township 25N, range 03E in WRIA 8, Washington Ship Canal.

## **AUTHORITIES**

In exercising authority under 33 U.S.C. § 1341, RCW 90.48.120, and RCW 90.48.260, Ecology has reviewed this application pursuant to the following:

1. Conformance with applicable water quality-based, technology-based, and toxic or pretreatment effluent limitations as provided under 33 U.S.C. §§1311, 1312, 1313, 1316, and 1317 (FWPCA §§ 301, 302, 303, 306 and 307);
2. Conformance with the state water quality standards contained in Chapter 173-201A WAC and authorized by 33 U.S.C. §1313 and by Chapter 90.48 RCW, and with other applicable state laws; and
3. Conformance with the provision of using all known, available and reasonable methods to prevent and control pollution of state waters as required by RCW 90.48.010.

## **WATER QUALITY CERTIFICATION CONDITIONS**

Through issuance of this Order, Ecology certifies that it has reasonable assurance that the activity as proposed and conditioned will be conducted in a manner that will comply with applicable water

quality standards and other appropriate requirements of state law. In view of the foregoing and in accordance with 33 U.S.C. §1341, RCW 90.48.120, RCW 90.48.260 Chapter 173-200 WAC and Chapter 173-201A WAC, water quality certification is granted to the Applicant subject to the conditions within this Order.

Certification of this proposal does not authorize the Pacific Fishermen Shipyard and Electric, LLC to exceed applicable state water quality standards (Chapter 173-201A WAC), ground water quality standards (Chapter 173-200 WAC) or sediment quality standards (Chapter 173-204 WAC). Furthermore, nothing in this certification absolves Applicant from liability for contamination and any subsequent cleanup of surface waters, ground waters or sediments resulting from project construction or operations.

#### **A. General Conditions**

1. In this Order, the term “Applicant” shall mean the Pacific Fishermen Shipyard and Electric, LLC and its agents, assignees, and contractors.
2. All submittals required by this Order shall be sent to Ecology Headquarters Office, Attn: Federal Permit Manager, PO Box 67600, Olympia, Washington 98504-7600, or via e-mail to [fednotification@ecy.wa.gov](mailto:fednotification@ecy.wa.gov) and cc to [laura.inouye@ecy.wa.gov](mailto:laura.inouye@ecy.wa.gov). The submittals shall be identified with Order 18252 and include the Applicant name, project name, project contact, and the contact phone number.
3. Work authorized by this Order is limited to the work described in the JARPA received by Ecology on February 18, 2020.
4. The Applicant shall obtain Ecology review and approval before undertaking any changes to the proposed project that might significantly and adversely affect water quality, other than those project changes required by this Order.
5. Within 30 days of receipt of any updated information, Ecology will determine if the revised project requires a new public notice and Water Quality Certification or if a modification to this Order is required.
6. This Order shall be rescinded if the Corps does not issue a permit for this project.
7. The Applicant shall send (per A.2.) a copy of the final Corps permits (404/10) to Ecology’s Federal Permit Manager within two weeks of receiving it.
8. The Applicant shall keep copies of this Order on the job site and readily available for reference by Ecology personnel, the construction superintendent, construction managers and lead workers, and state and local government inspectors.

9. The Applicant shall provide access to the project site and all mitigation sites upon request by Ecology personnel for site inspections, monitoring, and/or necessary data collection, to ensure that conditions of this Order are being met.
10. Nothing in this Order waives Ecology's authority to issue additional orders if Ecology determines that further actions are necessary to implement the water quality laws of the state. Further, Ecology retains continuing jurisdiction to make modifications hereto through supplemental order, if additional impacts due to project construction or operation are identified (*e.g.*, violations of water quality standards, downstream erosion, etc.), or if additional conditions are necessary to further protect water quality.
11. In the event of changes or amendments to the state water quality, ground water quality, or sediment standards, or changes in or amendments to the state Water Pollution Control Act (RCW 90.48) or the federal Clean Water Act, Ecology may issue an amendment to this Order to incorporate any such changes or amendments applicable to this project.
12. The Applicant shall ensure that all project engineers, contractors, and other workers at the project site with authority to direct work have read and understand relevant conditions of this Order and all permits, approvals, and documents referenced in this Order. The Applicant shall provide Ecology a signed statement (see Attachment A for an example) from each signatory that s/he has read and understands the conditions of this Order and the above-referenced permits, plans, documents and approvals. These statements shall be provided to Ecology before construction begins.
13. This Order does not authorize direct, indirect, permanent, or temporary impacts to waters of the state or related aquatic resources, except as specifically provided for in conditions of this Order.
14. Failure of any person or entity to comply with the Order may result in the issuance of civil penalties or other actions, whether administrative or judicial, to enforce the terms of this Order.
15. This Order will automatically transfer to a new owner or operator if:
  - a. A written agreement between the Applicant and new owner or operator with the specific transfer date of the Order's obligations, coverage, and liability is submitted to Ecology per condition A.2.;
  - b. A copy of this Order is provided to the new owner or operator; and
  - c. If Ecology does not notify the new Applicant that this Order must be modified to complete the transfer.

## **B. Notification Requirements**

1. The following notification shall be made via phone or e-mail (e-mail is preferred) to Ecology's Federal Permit Manager via e-mail to [fednotification@ecy.wa.gov](mailto:fednotification@ecy.wa.gov) and cc to

[laura.inouye@ecy.wa.gov](mailto:laura.inouye@ecy.wa.gov). Notifications shall be identified with Order No. 18252 and include the Applicants name, project name, project location, project contact and the contact's phone number.

- a. Immediately following a violation of state water quality standards or when the project is out of compliance with any of this Orders conditions.
  1. In addition to the phone or e-mail notification, the Applicant shall submit a detailed written report to Ecology within five (5) days that describes the nature of the event, corrective action taken and/or planned, steps to be taken to prevent a recurrence, results of any samples taken, and any other pertinent information.
- b. At least ten (10) days prior to all pre-construction meetings
- c. At least ten (10) days prior to conducting initial in-water work activities for each in-water work window.
- d. At least seven (7) days within project completion of each dredging cycle.

### **C. Timing**

1. This Order shall remain in effect for a period of five (5) years from the date of issuance of the Corps permit.
2. In-water work shall be conducted between September 15 and April 15 of any year, unless otherwise approved by Ecology.
3. Any project change that requires a new or revised Hydraulic Project Approval (HPA) from the Department of Fish and Wildlife should be sent to Ecology for review.

### **D. Water Quality Monitoring & Criteria**

1. Washington Ship Canal is categorized core summer salmonid habitat, and the criteria of the categorization apply as described in WAC 173-201A-200 (1), except as specifically modified by this Order.
2. The Applicant shall conduct water quality monitoring as described in the approved Water Quality Monitoring Plan (hereafter referred to as the WQMP) prepared by Hart Crowser as Appendix B of the Dredging and Disposal Quality Control Plan, submitted and approved on August 14, 2020.
3. The Applicant must provide, in writing, any changes or additions to the WQMP and obtain approval from Ecology's Federal Permit Manager prior to implementation of the changes or additions.
4. Monitoring results shall be submitted weekly to the Ecology Federal Permit Manager, per condition A.2.

5. Mitigation and/or additional monitoring may be required if the monitoring results indicate that the water quality standards have not been met.
6. If water quality exceedances for turbidity are observed outside the point of compliance, work shall cease immediately and the Applicant or the contractor shall assess the cause of the water quality problem and take immediate action to stop, contain, and correct the problem and prevent further water quality turbidity exceedances.
7. Visible turbidity anywhere beyond the temporary area of mixing (point of compliance) from the activity shall be considered an exceedance of the standard.

#### **E. Dredging and Disposal**

1. All dredging is to be conducted using a mechanical dredge. **Use of any other type of dredge requires preapproval from Ecology.**
2. Disposal of dredge material is not approved for in-water disposal and must be taken to an approved upland site.
3. Dredging operations shall be conducted in a manner that minimizes the disturbance and siltation of adjacent waters and prevents the accidental discharge of petroleum products, chemicals or other toxic or deleterious substances into state waters.
4. Dredged material shall not be temporarily or permanently stockpiled below the OHWM.
5. All debris larger than two (2) feet in any dimension floating in the dredging area shall be removed.
6. Barges shall not be allowed to ground-out during in-water construction.
7. Barges are not allowed to dewater during transit.
8. Barges shall be kept free of material that could be blown into water.
9. Post-dredge bathymetric surveys and dredge volumes shall be reported to Ecology within 30 days of completion of each dredging season.
10. A pre-dredge meeting is required to be convened prior to the start of each dredging cycle. The Dredge and Disposal Quality Control Plan submitted to Ecology on August 14, 2020 and approved on August 14, 2020 shall be implemented. Any changes must be submitted to Ecology as per Condition A2, and must be reviewed and approved by Ecology prior to implementation.
11. Dredging shall be confined to the existing footprint, except as modified by this Order.

## **F. Sand Cover**

1. A minimum 2 foot clean cover shall be placed over the sediments exposed by dredging.

## **G. Emergency/Contingency Measures**

1. The Applicant shall develop and implement a spill prevention and containment plan for this project.
2. The Applicant shall have adequate and appropriate spill cleanup material available on site at all times during construction.
3. The Applicant shall have adequate and appropriate spill response materials on hand to respond to emergency release of petroleum products or any other material into waters of the state.
4. Fuel hoses, oil drums, oil or fuel transfer valves and fittings, etc., shall be checked regularly for drips or leaks, and shall be maintained and stored properly to prevent spills into state waters.
5. Work causing distressed or dying fish, discharges of oil, fuel, or chemicals into state waters or onto land with a potential for entry into state waters, is prohibited. If such work, conditions, or discharges occur, the Applicant shall notify the Ecology Federal Permit Manager per condition B.1. and immediately take the following actions:
  - a. Cease operations at the location of the non-compliance.
  - b. Assess the cause of the water quality problem and take appropriate measures to correct the problem and/or prevent further environmental damage.
  - c. In the event of a discharge of oil, fuel, or chemicals into state waters, or onto land with a potential for entry into state waters, containment and cleanup efforts shall begin immediately and be completed as soon as possible, taking precedence over normal work. Cleanup shall include proper disposal of any spilled material and used cleanup materials.
  - d. Immediately notify Ecology's Regional Spill Response Office and the Washington State Department of Fish & Wildlife with the nature and details of the problem, any actions taken to correct the problem, and any proposed changes in operation to prevent further problems.
  - e. Immediately notify the National Response Center at 1-800-424-8802, for actual spills to water only.

6. Notify Ecology's Regional Spill Response Office immediately if chemical containers (e.g. drums) are discovered on-site or any conditions present indicating disposal or burial of chemicals on-site that may impact surface water or ground water.

#### **YOUR RIGHT TO APPEAL**

You have a right to appeal this Order to the Pollution Control Hearing Board (PCHB) within 30 days of the date of receipt of this Order. The appeal process is governed by Chapter 43.21B RCW and Chapter 371-08 WAC. "Date of receipt" is defined in RCW 43.21B.001(2).

To appeal you must do both of the following within 30 days of the date of receipt of this Order:

- File your appeal and a copy of this Order with the PCHB (see addresses below). Filing means actual receipt by the PCHB during regular business hours.
- Serve a copy of your appeal and this Order on Ecology in paper form - by mail or in person. (See addresses below.) E-mail is not accepted.

You must also comply with other applicable requirements in Chapter 43.21B RCW and Chapter 371-08 WAC.
