RE: Coastal Zone Consistency for Corps Reference # NWS-2019-607-DOT
I-5 NB Marine View Drive to SR 529 Corridor and Interchange Improvements Project
in Snohomish County, Washington

Dear Ruth Park:

On June 3, 2020, The Department of Ecology received a Certification of Consistency with the Washington State Coastal Zone Management Program (CZMP) for the above project. On December 2, 2020, the Washington Department of Transportation and the Department of Ecology agreed to stay the CZM review period allowing for review and issuance of required shoreline permits

This determination is for a project proposal to address traffic congestion between Everett and Marysville at the I-5/SR 529 Interchange. The project will add a northbound high occupancy vehicle lane by restriping I-5 between Marine View Drive exit and SR 529 and construct new on and off ramps connecting SR 529 to I-5. The ground in selected areas around each of the ramp locations will need soil densification. An existing culvert under southbound SR 529 will be removed and replaced with a new culvert located approximately 100 feet south of its current location. Existing stormwater facilities will be replaced with a new conveyance system and treatment facilities. The project is located on I-5 between milepost 194.49 and milepost 199.06 between the cities of Everett and Marysville in Snohomish County, WA.

Pursuant to Section 307(c)(3) of the Coastal Zone Management Act of 1972 as amended, Ecology concurs with determination that the proposed work is consistent with Washington's CZMP.

If you have any questions regarding Ecology's consistency determination please contact Caroline Corcoran at 425-457-3378.
