RE: Water Quality Certification Order No. **19623** for Corps Reference No. **201500264**,
Dibble Property Geoduck Farm, Thurston County, Washington

Dear Greg & Anne Reub:

On April 7, 2020, Geoducks Unlimited submitted a request for a Section 401 Water Quality Certification (WQC) under the federal Clean Water Act for the Dibble Property Geoduck Farm located on tidelands within Totten Inlet, near Olympia, Thurston County, Washington.

On behalf of the state of Washington, the Department of Ecology certifies that the work described in the Joint Aquatic Resource Permit Application (JARPA) and the public notice complies with applicable provisions of Sections 301, 302, 303, 306, and 307 of the Clean Water Act, as amended, and applicable state laws. This certification is subject to the conditions contained in the enclosed Order.

Please ensure that anyone doing work under this Order has read, is familiar with, and is able to follow all of the provisions within the attached Order.

If you have any questions about this decision, please contact Teresa Pucylowski by e-mail at teressa.pucylowski@ecy.wa.gov. The enclosed Order may be appealed by following the procedures described within the Order.

Sincerely,

A handwritten signature in blue ink, appearing to read "B. McFarland", is written over a horizontal line.

IN THE MATTER OF GRANTING A)	ORDER No. 19623
WATER QUALITY)	Corps Reference No. 201500264
CERTIFICATION TO)	Dibble Property Geoduck Farm located on
Geoducks Unlimited, LLC)	tidelands within Totten Inlet , near Olympia,
pursuant to 33 U.S.C. 1341 (FWPCA)	Thurston County, Washington
§ 401), RCW 90.48.120, RCW 90.48.260)	
and Chapter 173-201A WAC)	

Geoducks Unlimited LLC
Attn: Greg & Anne Reub
5039 78th Ave NW
Olympia, WA 98502

On April 7, 2020, Geoducks Unlimited submitted a request for a Section 401 Water Quality Certification (WQC) under the federal Clean Water Act for the Dibble Property Geoduck Farm, Thurston County, Washington. The Department of Ecology (Ecology) issued a public notice for the project on April 15, 2020. The U.S. Army Corps of Engineers (Corps) issued a joint public notice on July 7, 2020.

This project proposes to cultivate up to 0.49 acres of geoduck in a 0.67-acre project area in Totten Inlet. The proposed area would be located on intertidal tidelands between -4.5 ft and +2.0 ft mean low low water (MLLW). No work or storage of materials would occur between the ordinary high water mark and +2.0ft MLLW and no permanent construction would be implemented. The proposed action contains the following main activities: (1) planting and grow-out, (2) harvesting, and (3) support & maintenance.

Planting will occur over a 1-year period, and the site will be planted with geoduck seed in 4"-wide PVC culture tubes, with predator exclusion netting over each tube and a cover net over all the tubes. Tubes will be pushed into the substrate by hand or foot. The cover net will be installed to allow fishing nets (e.g. seines or drift nets) to go over the tubes without getting caught. This would involve "tucking" the margins into the substrate and securing without obstruction.

Tubes and nets will be removed after 1-2 years, once the young clams can evade predation. Harvest will occur using a hydraulic wand during low tide or at high tide by divers. The pressure at the nozzle is approximately 40 pounds per square inch and the volume is approximately 20 gallons per minute. Harvested clams will be placed in containers and transported by boat to an upland facility. For planting and harvesting activities Geoducks Unlimited would access the site by upland and by boat, and for maintenance activities Geoducks Unlimited would access the site from the upland habitat.

The project site is located on tidelands within Totten Inlet, on parcel number 39000006000, adjacent to 10221 Steamboat Island Road NW, near Olympia, Thurston County, Washington; Section 33, Township 20 North, Range 2 West; WRIA 14, Kennedy / Goldsborough Watershed.

With this Order, Ecology is granting Geoducks Unlimited's request for a Section 401 Water Quality Certification for the Dibble Property Geoduck Farm project, provided that the activity is conducted in accordance with the Section 401 Water Quality Certification request and attachments Ecology received on April 7, 2020, and the following supporting documentation:

1. E-mail letter to Ecology dated February 15, 2021, regarding the project's compliance with the conservation measures associated with the "Programmatic Biological Opinions for Shellfish Activities in Washington State Inland Marine Waters" (U.S. Fish and Wildlife Service (USFWS) Reference Number 01EWF00-2016-F-0121, National Marine Fisheries Service (NMFS) Reference Number WCR-2014-1502). This email also includes a description of Geoducks Unlimited's water quality monitoring plan and Geoduck Unlimited's commitment to follow the 2019 Puget Sound Shellfish Growers Association Environmental Codes of Practice for Shellfish Aquaculture.

Based on the information submitted, Ecology has determined that the discharge from the project will comply with state water quality requirements. Prior to undertaking any changes that materially alter the project, Geoducks Unlimited must contact Ecology to determine whether a new Section 401 Water Quality Certification is required.

Issuance of this Section 401 Water Quality Certification for this proposal does not authorize Geoducks Unlimited to exceed applicable state water quality standards (Chapter 173-201A WAC), ground water quality standards (Chapter 173-200 WAC) or sediment quality standards (Chapter 173-204 WAC). Furthermore, nothing in this Section 401 Water Quality Certification absolves the Applicant from liability for contamination and any subsequent cleanup of surface waters, ground waters, or sediments resulting from project construction or operations.

Any work that causes distressed or dying fish or discharges of oil, fuel, or other chemicals into state waters or onto land with a potential for entry into state waters is prohibited. If such work, conditions, or discharges occur, immediately notify Ecology's Regional Spill Response Office at 360-407-6300 and the Washington State Department of Fish & Wildlife with the nature and details of the problem, any actions taken to correct the problem, and any proposed changes in operation to prevent further problems. You will also need to notify the Washington Emergency Management Division at 1-800-258-5990, for actual spills to water only.

In view of the foregoing and in accordance with 33 U.S.C. §1341, RCW 90.48.120, RCW 90.48.260 Chapter 173-200 WAC and Chapter 173-201A WAC, this WQC is granted to the Geoducks Unlimited, Dibble Property Geoduck Farm project.

This Certification is not effective until the U.S. Corps of Engineers (Corps) Seattle District issues a permit for this project. Order No. 19623 will remain in effect for a period of fifteen (15) years from the issuance of the Corps permit.

YOUR RIGHT TO APPEAL

You have a right to appeal this Order to the Pollution Control Hearing Board (PCHB) within 30 days of the date of receipt of this Order. The appeal process is governed by Chapter 43.21B RCW and Chapter 371-08 WAC. "Date of receipt" is defined in RCW 43.21B.001(2).

To appeal you must do both of the following within 30 days of the date of receipt of this Order:

- File your appeal and a copy of this Order with the PCHB (see addresses below). Filing means actual receipt by the PCHB during regular business hours.
- Serve a copy of your appeal and this Order on Ecology in paper form by mail or in person. (See addresses below.) E-mail is not accepted.

You must also comply with other applicable requirements in Chapter 43.21B RCW and Chapter 371-08 WAC.
