MATRIX SPIKE DUPLICATE

Lab Sample ID: PB350

QC Report No: PB35-ENVIROMENTAL SCIENCE CORP.

LIMS ID: 09-12731

Project: JELD-WEN NORD DOOR

Matrix: Sediment

Event: NA

Data Release Authorized: 

Date Sampled: 06/03/09

Reported: 06/17/09

Date Received: 06/03/09

Date Extracted: 06/08/09

Sample Amount: 16.6 g-dry-wt

Date Analyzed: 06/13/09 14:42

Final Extract Volume: 1.0 mL

Instrument/Analyst: NT2/PK

Dilution Factor: 1.00

GPC Cleanup: Yes

Percent Moisture: 34.0%

Silica Gel Cleanup: No

Alumina Cleanup: No

CAS Number	Analyte	RL	Result
53-70-3	Dibenz (a, h) anthracene	6.0	---
106-46-7	1,4-Dichlorobenzene	6.0	---
120-82-1	1,2,4-Trichlorobenzene	6.0	---

Notes to the Testing:

1. Organic matter was not removed prior to testing, thus the reported values are the "apparent" grain size distribution. See narrative for discussion of the testing.

RE: Project: JELD-WEN Nord Door
ARI Job No: PB44

Dear Mr. Willis:

Please find enclosed the Chain-of-Custody (COC) records, sample receipt documentation, and the final data package for samples from the project referenced above.

Sample receipt and details of the analyses are discussed in the Case Narrative.

An electronic copy of this data and associated raw data will be kept on file with ARI. Should you have any questions or problems, please feel free to contact me at any time.

Sincerely,

ANALYTICAL RESOURCES, INC.

Cooler Receipt Form

ARI Client: SLR International
 COC No(s): _____ (NA)
 Assigned ARI Job No: PB44

Project Name: JEID-WEN
 Delivered by: Fed-Ex UPS Courier Hand Delivered Other: _____
 Tracking No: _____ (NA)

Preliminary Examination Phase:

Were intact, properly signed and dated custody seals attached to the outside of to cooler? YES NO
 Were custody papers included with the cooler? YES NO
 Were custody papers properly filled out (ink, signed, etc.) YES NO
 Temperature of Cooler(s) (°C) (recommended 2.0-6.0 °C for chemistry) 5.6 5.2
 If cooler temperature is out of compliance fill out form 00070F
 Cooler Accepted by: MM Date: 6/4/09 Time: 1018 Temp Gun ID#: 101880
Complete custody forms and attach all shipping documents

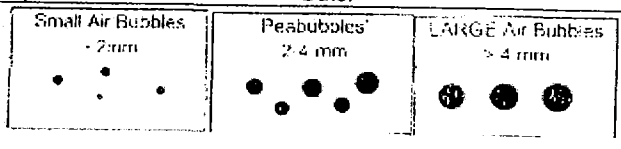

Log-In Phase:

Was a temperature blank included in the cooler? YES NO
 What kind of packing material was used? ... Bubble Wrap Wet Ice Gel Packs Baggies Foam Block Paper Other: _____
 Was sufficient ice used (if appropriate)? NA YES NO
 Were all bottles sealed in individual plastic bags? YES NO
 Did all bottles arrive in good condition (unbroken)? YES NO
 Were all bottle labels complete and legible? YES NO
 Did the number of containers listed on COC match with the number of containers received? YES NO
 Did all bottle labels and tags agree with custody papers? YES NO
 Were all bottles used correct for the requested analyses? YES NO
 Do any of the analyses (bottles) require preservation? (attach preservation sheet, excluding VOCs)... NA YES NO
 Were all VOC vials free of air bubbles? NA YES NO
 Was sufficient amount of sample sent in each bottle? YES NO
 Samples Logged by: AV Date: 6/5/09 Time: 841
**** Notify Project Manager of discrepancies or concerns ****

Case Narrative

Client: Environmental Science Corp.
Project: JELD-WEN Nord Door
Matrix: Sediment
ARI Job No.: PB44

Sample receipt

Fifteen sediment samples were received June 4, 2009, under ARI Job PB44. The cooler temperatures measured by IR thermometer following ARI SOP were 5.2 and 5.6° C. For further details regarding sample receipt, please refer to the Cooler Receipt Form.

Semivolatiles by SW8270

The samples were initially screened to determine if there was a response that would require modification of the extraction process. Based on the screen, extraction weights were reduced for samples 3SED3-A, 3SED3-B, 3SED3-C, and 3SED7-A. The samples and associated laboratory QC were extracted and analyzed within method recommended holding times.

Initial and continuing calibrations were within method requirements. Internal standard areas were within limits.

The surrogate percent recoveries were within control limits.

The method blank was clean at the reporting limits. The LCS percent recoveries were within control limits.

The matrix spike and matrix spike duplicate percent recoveries were within advisory control limits.

SIM Semivolatiles by SW8270

The samples and associated laboratory QC were extracted and analyzed within method recommended holding times.

Initial and continuing calibrations were within method requirements.

The internal standard areas of Perylene-d12 were outside the control limit low for several samples. The samples were re-analyzed at a three fold dilution and the internal standard areas were comparable to the original analysis. Both sets of data have been included in this data package for review. No further corrective action was required.

The internal standard areas of Chrysene-d12 fell outside the control limit low for samples **3SED7-A**, **3SED7-C**, **3SED9-A**, and **3SED9-C**. The samples were re-analyzed at a three fold dilution and the internal standard areas of Chrysene-d12 were within control limits. Both sets of data have been included in this package for review. No further corrective action was required.

The surrogate percent recoveries of d14-p-Terphenyl were outside the control limits high for several samples. The samples were re-analyzed at a dilution and all surrogate percent recoveries were within control limits. Both sets of data have been included in this package for review. No further corrective action was required.

The surrogate percent recovery of d14-p-Terphenyl was outside the control limits high for the matrix spike duplicate of sample **3SED6-B**. No corrective action is required for matrix QC.

The method blank was clean at the reporting limits.

The LCS percent recovery of Benzyl Alcohol fell outside the control limits low for **LCS-060909**. The outlier was allowed as a marginal exceedance. No corrective action was required.

The matrix spike and matrix spike percent recoveries were within advisory control limits.

Aroclor PCBs by 8082

The samples were initially screened to determine if there was a response that would require modification of the extraction process. Based on the screen, no sample modifications were required. The samples and associated laboratory QC were extracted and analyzed within method recommended holding times.

Initial and continuing calibrations were within method requirements. Internal standard areas were within limits.

The surrogate percent recoveries were within control limits.

The method blank was clean at the reporting limit. The LCS percent recoveries were within control limits.

The matrix spike and matrix spike percent recoveries were within advisory control limits.

Total Metals

The samples and associated QC were digested and analyzed within method recommended holding times.

The method blank was clean at the reporting limits. The LCS percent recoveries were within control limits.

The matrix spike percent recoveries were within control limits.

The duplicate RPDs of chromium, lead, and zinc were outside the control limit for sample 3SED4-A. All relevant data have been flagged with an "*" qualifier on the appropriate Form VI's. No further corrective action was required.

Conventional Parameters

The samples and associated laboratory QC were prepared and analyzed within method recommended holding times.

The method blanks were clean at the reporting limits. The LCS percent recoveries were within control limits.

The SRM percent recoveries were within control limits.

The matrix spike percent recoveries and replicate RPDs were within control limits.

Geotechnical Parameters

A laboratory-specific narrative follows.

Client: Environmental Science Corp.

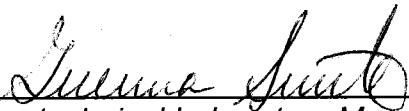

ARI Project No.: PB44

Client Project: JELD-WEN NORD DOOR

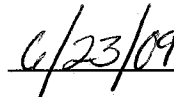

Case Narrative

1. Fifteen samples were submitted for grain size analysis according to Puget Sound Estuary Protocol (PSEP) methodology on June 4, 2009.
2. The samples were run in a single batch and one sample from this job, 3SED7-C, was chosen for triplicate analysis. The triplicate data is reported on the QA summary.
3. Samples 3SED7-A, 3SED9-A, 3SED9-B, 3SED9-C and 3SED3-B contained woody or other organic matter, which may have broken down during the sieving process, affecting grain size analysis.
4. Sample 3SED7-C, 3SED4-A, 3SED6-B, 3SED6-C, AND 3SED7-A contained shell fragments.
5. The data is provided in summary tables and plots.
6. There were no other noted anomalies in this project.

Approved by:

Geotechnical Laboratory Manager

Date:

Data Reporting Qualifiers

Effective 12/28/04

Inorganic Data

- U Indicates that the target analyte was not detected at the reported concentration
- * Duplicate RPD is not within established control limits
- B Reported value is less than the CRDL but \geq the Reporting Limit
- N Matrix Spike recovery not within established control limits
- NA Not Applicable, analyte not spiked
- H The natural concentration of the spiked element is so much greater than the concentration spiked that an accurate determination of spike recovery is not possible
- L Analyte concentration is ≤ 5 times the Reporting Limit and the replicate control limit defaults to ± 1 RL instead of the normal 20% RPD

Organic Data

- U Indicates that the target analyte was not detected at the reported concentration
- * Flagged value is not within established control limits
- B Analyte detected in an associated Method Blank at a concentration greater than one-half of ARI's Reporting Limit or 5% of the regulatory limit or 5% of the analyte concentration in the sample.
- J Estimated concentration when the value is less than ARI's established reporting limits
- D The spiked compound was not detected due to sample extract dilution
- NR Spiked compound recovery is not reported due to chromatographic interference
- E Estimated concentration calculated for an analyte response above the valid instrument calibration range. A dilution is required to obtain an accurate quantification of the analyte.
- S Indicates an analyte response that has saturated the detector. The calculated concentration is not valid; a dilution is required to obtain valid quantification of the analyte
- NA The flagged analyte was not analyzed for

- NS The flagged analyte was not spiked into the sample
- M Estimated value for an analyte detected and confirmed by an analyst but with low spectral match parameters. This flag is used only for GC-MS analyses
- M2 The sample contains PCB congeners that do not match any standard Aroclor pattern. The PCBs are identified and quantified as the Aroclor whose pattern most closely matches that of the sample. The reported value is an estimate.
- N The analysis indicates the presence of an analyte for which there is presumptive evidence to make a "tentative identification"
- Y The analyte is not detected at or above the reported concentration. The reporting limit is raised due to chromatographic interference. The Y flag is equivalent to the U flag with a raised reporting limit.
- C The analyte was positively identified on only one of two chromatographic columns. Chromatographic interference prevented a positive identification on the second column
- P The analyte was detected on both chromatographic columns but the quantified values differ by $\geq 40\%$ RPD with no obvious chromatographic interference

Geotechnical Data

- A The total of all fines fractions. This flag is used to report total fines when only sieve analysis is requested and balances total grain size with sample weight.
- F Samples were frozen prior to particle size determination
- SM Sample matrix was not appropriate for the requested analysis. This normally refers to samples contaminated with an organic product that interferes with the sieving process and/or moisture content, porosity and saturation calculations
- SS Sample did not contain the proportion of "fines" required to perform the pipette portion of the grain size analysis
- W Weight of sample in some pipette aliquots was below the level required for accurate weighting

SPECIAL INSTRUCTIONS: 1. Weigh soil/sed into 600mL or 400mL beakers. 2. Use 5g Pre-Deactivated Sodium Sulfate for Blanks. 3. Add surr/spike. 4. Add 1:1 DCM/Acetone. 5. Dry using neutral Sodium Sulfate-25g Max at first-A small amt of Additional sulfate may be needed after 10 min. or before 2nd sonication? 6. Sonicate 2X with 1:1 DCM/Acetone + 1X DCM only. 7. Collect into 500mL flask + Lg funnel with a small amount of pre-deactivated glasswool only. NO SODIUM SULFATE. 8. KD (Normal Drying Column with pre-deactivated glasswool plug+neutral Sodium Sulfate at 85-90°). (Blanks=only 5g Sodium Sulfate). 9. TurboVap. 10. GPC Optional (1:1) 11. KD (if GPC=No drying column) on 80°. 12. TurboVap. 13. Vial in DCM. A. Need Total Solids Y (N) B. Archive/Freeze Y (N)

69	Mass 69 relative abundance	74.5
70	Less than 2.0% of mass 69	0.4 (0.5)1
127	25.0 - 75.0% of mass 198	54.9
197	Less than 1.0% of mass 198	0.7
198	Base Peak, 100% relative abundance	100.0
199	5.0 to 9.0% of mass 198	6.9
275	10.0 - 30.0% of mass 198	24.9
365	Greater than 0.75% of mass 198	3.30
441	Present, but less than mass 443	11.9
442	40.0 - 110.0% of mass 198	72.0
443	15.0 - 24.0% of mass 442	13.2 (18.3)2

1-Value is % mass 69

2-Value is % mass 442

Standard	Standard ID	Volume	Expiration Date	Analyst	Witness
Diluted Surrogate	C2	100µL	3/13/14	PD	AC
Diluted Full List Spike	24	250µL	2/20/14	PD	AC
Diluted Base Spike	23	250µL	3/24/14	PD	AC
Diluted Acid Spike	14	250µL	4/14/14	PD	AC

Extraction Time: 11:50

SPECIAL INSTRUCTIONS: 1. Weigh soil/sed into 600mL or 400mL beakers. 2. Use 5g Pre-Deactivated Sodium Sulfate for Blanks. 3. Add surr/spike. 4. Add 1:1 DCM/Acetone. 5. Dry using neutral sodium sulfate-25g Max at first-A small amt of Additional sulfate may be needed after 10 min. or before 2nd sonication? 6. Sonicate 2X with 1:1 DCM/Acetone + 1X DCM only. 7. Collect into 500mL flask + Lg funnel with a small amount pre-deactivated glasswool only (NO SODIUM SULFATE). 8. KD (Small Drying Column with pre-deactivated glasswool plug+neutral Sodium Sulfate) at 85-90°. (Blanks=only 5g Sodium Sulfate. 9. TurboVap. 10. GPC Required (1:1) 11. KD (after GPC=No drying column) at 80°. 12. TurboVap. 13. Vial in DCM. A. Need Total Solids Y (N) B. Archive/Freeze Y (N)

Analytical Resources, Incorporated

Organic Extractions Laboratory Analyst Notes

ARI Job No.: PB44

Client ID: Environmental Science Corp

Parameter: SM SVOA

Client Project: Jeld-Wen North Door

SOP Number(s): 3745

No Anomalies:

List problems, concerns, corrective actions and any other pertinent information

PB44 D = one small drop of surrogate left out of sample beaker while surrogating.
Sample F = a small amount of solvent spilled out of beaker while performing the
first sonication due to the setting being a little high for a fairly small sample amount.

6/9/09 PD

EXTRACTS H, Hms, Hmsd = Hms required a GDX filter where H & Hmsd did not - used 0.45µm

6/11/09 CJZ

Hms and Hmsd chromatograms did not match 6/11/09 CJZ

Detail problems, corrective actions and/or other pertinent information below (use reverse side when necessary):

Almost all samples run 2x (1x and 3x) due to d12-perylene IS going out. Still out @ 3x.
 - presume due to addts/matrix
 - report both runs
 See Analyst (Ext) notes
