**RE: Ecology approval of Supplemental Remedial Investigation reports, Phase 1 through Phase 5, for public comment**

- **Site Name:** Chelan Chevron
- **Site Address:** 232 E. Woodin Avenue, Chelan
- **Facility Site ID No.:** 77751227
- **Cleanup Site ID No.:** 6660
- **Agreed Order No.:** DE 10629
- **Chevron No.:** 9-6590

Dear Greg Vogelpohl:

I am sending this letter to you, the agent who is acting on the behalf of Chevron. Thank you for commissioning the Supplemental Remedial Investigation Report Phase 5. I have also listed the draft documents previously submitted. Some of these reports were submitted earlier than your tenure on this project.

1. Supplemental Remedial Investigation Report – Phase 1, dated December 14, 2015
2. Supplemental Remedial Investigation Report – Phase 2, dated May 31, 2017
3. Supplemental Remedial Investigation Report – Phase 3, dated August 17, 2020
4. Supplemental Remedial Investigation Report – Phase 4, dated July 8, 2019
5. Supplemental Remedial Investigation Report – Phase 5, dated April 27, 2021

I approve these deliverables for public comment on behalf of the Washington State Department of Ecology. This approval is effective for the public comment period required before these separate reports can be deemed final.

The final approval of all of the deliverables will be issued after the completion of all phases of the Supplemental Remedial Investigation together with the submittal and acceptance of the report that summarizes the findings of all of these phases.

The primary objective is to refine the conceptual site model sufficient to design remedy alternatives to be described in the Supplemental Feasibility Study and to select a preferred remedy.

I do have comments regarding the findings from the Phase 5 investigation, which I will send under separate cover. One of the items to be discussed is whether an interim action is warranted to address the shallow soil contamination at 141 E. Woodin Avenue and/or at 221 E. Woodin Avenue.

Sincerely,

John Mefford
