**RE: Ecology comments on the DRAFT Temple Interim Action Workplan**

- **Site Name:** Temple Distributing Carson Oil
- **Site Address:** 808 South Columbus Avenue, Goldendale
- **Facility/Site ID No.:** 95474961
- **Cleanup Site ID No.:** 11985
- **Enforcement Order:** DE 14134

The Washington State Department of Ecology (Ecology) has reviewed the Draft Interim Action Work Plan (IAWP) for the Temple Distributing Carson Oil Site prepared by Aracadis, dated May 7, 2021.

**General Comments**

Please add ethylene dibromide (EDB) to the list of contaminants of concern (COCs) for soil sampling. Although EDB has not been detected above regulatory levels in the groundwater at this site, it remains unclear whether the soil actually contains concentrations of EDB that are above the Model Toxics Control Act cleanup level for soils. Therefore, the inhalation and ingestion risk to all receptors is still in question.

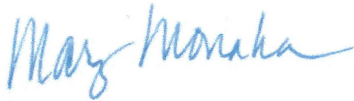

**Next Steps**

Ecology appreciates the thoroughness of this draft IAWP, and looks forward to receiving the draft sampling and analysis plan (SAP) as well as the draft quality assurance project plan (QAPP) in order to continue moving forward with this important cleanup project.
