Re: No Further Action at the following Site:

- **Site Name:** Central Pre Mix Crestline
- **Site Address:** 8510 N. Crestline, Spokane
- **Facility Site ID number:** 83953122
- **Cleanup Site ID number:** 15439

Dear Jana McDonald:

Washington Department of Ecology's (Ecology) Toxics Cleanup Program has reviewed the following information regarding the above described facility/property:

1. Able Cleanup Technologies, Inc. Site Cleanup Report, June 17, 2021.

Based upon the above-listed information, Ecology has determined that the release(s) of gasoline, benzene, and TEX in soil does not pose a substantial threat to human health or the environment. Therefore, Ecology is issuing a No Further Action (NFA) determination under the Model Toxics Control Act (MTCA).¹

This NFA determination is only for releases identified in the independent remedial action report(s) listed above and applies to only the area(s) of the property affected by those releases. The NFA does not apply to any other release or potential release at the property, any other areas on the property, nor any other properties owned or operated by CRH Americas Materials, Inc.

¹ RCW 70A.305, <https://app.leg.wa.gov/RCW/default.aspx?cite=70A.305>

Because your actions were not conducted under a consent decree, this letter is offered as informal assistance and does not constitute a [MTCA settlement](#).²

Therefore this NFA determination is not binding on Ecology. Should additional information indicate that further action under MTCA is necessary, Ecology may re-evaluate the site. Should you have any questions regarding this decision, please contact me at (509) 329-3535.

Sincerely,

Sara Fulton
