Jennifer

Please find attached Ecology's letter of satisfaction for the Bothell Riverside TPH site.

Thank you for working with the Washington State Department of Ecology (Ecology) on the Bothell Riverside TPH site. Ecology is pleased that we were able to provide oversight Remedial Action Grants (RAG) to fund the City of Bothell (City) in investigating and cleaning up this contaminated site. Thank you also for working with Ecology in finding innovative ways to manage this site as with the other City of Bothell sites to allow investigation and cleanup to occur as the City implemented their downtown revitalization plan.

Ecology is also pleased that the City was able to work with Ecology to divide this site from the larger Bothell Riverside (TPH/HVOC) site to create the Bothell Riverside TPH and the Bothell Riverside HVOC sites. This allowed the Bothell Riverside TPH portion of the site to be addressed under the Model Toxics Control Act (MTCA) sooner so it could be put back into future use much quicker.

This letter provides written notification that the requirements of Agreed Order 16306 has been satisfactorily completed under the MTCA, Chapter 70.105D RCW. Therefore, Ecology has determined the requirements of the Order have been satisfied.

In implementation of the Governor's Stay Home, Stay Healthy Order, Ecology is looking for ways to complete this important work without delay. MTCA does not require signatures on routine correspondence regarding site status or similar, "routine" site correspondence that is sent on agency letterhead. Therefore, in implementing the Governor's Order, I am releasing the attached Letter of Satisfaction for the Bothell Riverside TPH site.

Please let me know if you have any questions or concerns.

Regards

Bob
