Cleanup Site ID 10346

Dear Tom Sroufe, Mac McInnis, Carol Wiseman, and Monica Leers:

The Washington State Department of Ecology (Ecology) is writing to inform you that the above referenced property was subject to a site hazard assessment (SHA) as required under the Model Toxics Control Act, on 8/20/2021. The site was determined to be contaminated with petroleum hydrocarbons, PCBs, PAHs, and phenols. The site's hazard ranking, an estimation of the potential threat to human health and/or the environment relative to all other Washington state sites assessed at this time, has been determined by Ecology to be a 1, where a 1 represents the highest relative risk and 5 the lowest.

For your information, Ecology will be publishing ranking of this, and other recently assessed sites, in the August 2021 Special Issue of the Site Register. The hazard ranking will be used in conjunction with other considerations in determining Ecology's priority for future action at this site.

Tom Sroufe, Mac McInnis, Carol Wiseman, and Monica Leers

Page 2

This report is available on Ecology's [Weyerhaeuser Snoqualmie Mill](#) webpage. To view the documentation Ecology has available electronically; on the right-hand side of the web-page, click on View Electronic Documents.

As part of the SHA, Ecology has determined that the two cleanup sites (CSID 2049 & 10346) should be combined into one site, keeping CSID 10346. More details can be found on page 2 of the SHA report.

For inquiries regarding what may occur with your site now that it is on Ecology's Hazardous Sites List please contact me at (206) 594-0105 or donna.musa@ecy.wa.gov.

Sincerely,

Donna Musa
