Q LUBE - U V. 11485
Seattle
RELEASE # 361399

October 13, 2008

Mr. John Bails
Northwest Regional Office
Washington Department of Ecology
3190 160th Avenue SE
Bellevue, WA 98008-5452

Re: **Site Investigation Report**
Jiffy Lube Service Station
4902 25th Ave. NE
Seattle, Washington
SAP No. 171156
Incident No. 97605414
Ecology ID No. 41675877

Dear Mr. Bails:

Conestoga-Rovers & Associates, Inc. (CRA) presents this report on behalf of Equilon Enterprises LLC (Equilon) dba Shell Oil Products US (Shell) to document the recent site investigation activities at the above referenced site. This investigation further defines the extent of impacted soil and groundwater associated with the Jiffy Lube Service Station building. Four monitoring wells were installed on the adjacent property owned by Office Depot within the parking lot driveway entrance.

EXECUTIVE SUMMARY

- CRA supervised the drilling and installation of four groundwater monitoring wells to further characterize the extent of impacted soil and groundwater downgradient of the site.
- Concentrations of petroleum hydrocarbons and related constituents in soil samples collected/are all below/ Washington State Department of Ecology Model Toxics Control Act (MTCA) Method A cleanup levels.

SITE DESCRIPTION AND BACKGROUND

The Jiffy Lube facility located at 4902 25th Ave NE in Seattle, Washington (site; Figure 1), consists of a two-story split level structure. The Jiffy Lube site boundaries are a residential apartment complex to the north, a road 25th Ave NE to the west, a parking lot

Mr. John Bails
August 6, 2008

**CONESTOGA-ROVERS
& ASSOCIATES**

down ramp to the south, and an Office Depot parking lot to the east. The Jiffy Lube service bays are located in the upper level of the building and a storage room for above-ground storage tanks (ASTs) is located in the lower-level. The east backdoor of the storage room opens to an Office Depot parking lot. The lower-level of the building is also occupied by La Escuelita Bilingual School Daycare (Figure 2). The groundwater flow direction is believed to be to the southeast towards Lake Washington.

A summary of previous work performed at the site and site background is contained in Attachment A.

INVESTIGATION RESULTS

- Drilling Dates:** May 5, 2008
- Drilling Company:** Boart Longyear Company
- Personnel:** Bryan Palmer, Tim Mullin and Isabelle Leclerc-Morin of CRA directed the drilling activities under the supervision of Justin Foslien (Washington State Licensed Geologist #2540).
- Drilling Method:** Air-Knife / Hollow-stem auger
- Number of Borings:** During investigation, four borings were drilled by hollow-stem auger and completed as monitoring wells MW-1 through MW-4. The well specifications and soil types are described on the boring logs contained in Attachment B. The borings and well locations are shown on Figure 2.
- Boring Depths:** Monitoring well MW-1, MW-2, and MW-3 was drilled to 8.0 feet below ground surface (bgs). Monitoring well MW-4 was drilled to 13.0 feet bgs.
- Groundwater Depths:** Depth to groundwater was approximately 3.0 to 5.0 feet bgs.

Mr. John Bails
August 6, 2008

Soil Disposal:

Soil and construction debris generated from drilling were placed into six 55-gallon drums. The drums were sampled and profiled prior to transport and disposal by Phillip Services Corporation, Inc. Waste disposal manifests are included in Attachment C.

FINDINGS

Soil: The soil chemical analytical data are summarized in Table 1 and Table 2. Laboratory analytical reports are presented in Attachment D.

- ✗ ***Groundwater:*** No groundwater samples were collected during the installation of the monitoring wells.

Discussion

CRA observed shallow groundwater in the installed monitoring wells ranging from 3 to 5 feet bgs. The shallow water table correlates with the statement from Stewart Christensen, the Office Depot manager, who stated the Office Depot parking lot on the east site boundary of the Jiffy Lube was constructed on a former stream tributary.

Concentrations of all analytes within the soil samples collected are below MTCA Method A cleanup levels.

RECOMMENDATIONS

Quarterly monitoring of groundwater has been initiated to evaluate the extent of subsurface contamination within the groundwater beneath the site. / Results of the monitoring will be discussed in quarterly groundwater monitoring reports.

CLOSING

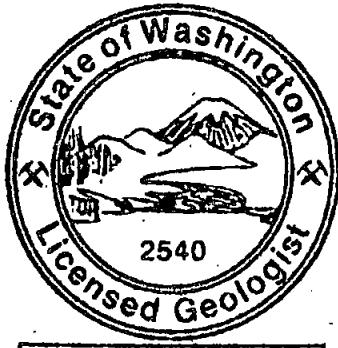

If you have any questions regarding the contents of this document, please call Justin Foslien at (425) 212-5111.

Mr. John Bails
August 6, 2008

Sincerely,
Conestoga-Rovers & Associates, Inc.

Justin Foslien, LG
Project Geologist

Justin Francis Foslien

Site Background

SITE BACKGROUND

The Jiffy Lube facility located at 4902 25th Ave NE in Seattle, Washington (Figure 1), consisting of a two-story split level structure. The Jiffy Lube site boundaries are a residential apartment complex to the north, a road 25th Ave NE to the west, a parking lot down ramp to the south, and an Office Depot parking lot to the east. The Jiffy Lube service bays are located in the upper level of the building and a storage room for above-ground storage tanks (ASTs) is located in the lower-level. The east backdoor of the storage room opens to an Office Depot parking lot. The lower-level of the building is also occupied by La Escuelita Bilingual School Daycare (Figure 2). The Office Depot parking lot on the east site boundary was constructed on a former stream tributary. Evidence of high water volume at shallow depths during onsite purging of the new wells (MW-1 through MW-4) confirm a possible underground ground water stream. The groundwater flow direction is believed to be to the southeast towards Lake Washington.

1995 University Village Q Lube UST Closure Site Assessment: Nowicki & Associates conducted compliance sampling during the removal of one 3,000-gallon, new-oil underground storage tank (UST) and the in-place closure of a 500-gallon used-oil UST by APS services on March 29, 1995. Soil samples for the 3,000-gallon UST were below MTCA Method A cleanup levels. Soil samples SB-1 and SB-3 collected beneath the 500-gallon UST were above MTCA Method A cleanup levels for oil range petroleum hydrocarbons.

2006 Phase I Environmental Site Assessment: FINEenvironmental, Inc., completed a Phase I Environmental Site Assessment at the site on March 20, 2006. The assessment indicated that recognized environmental conditions existed at the site.

2006 Site Investigation: CRA formerly Cambria Environmental Technology, Inc. supervised the drilling of six soil borings (SB-6 through SB-11) on November 14, 2006. Soil samples SB-6 and SB-7 were above MTCA Method A cleanup levels for gasoline range petroleum hydrocarbons.

2007 Site Investigation: CRA supervised the drilling and installation of four groundwater monitoring wells MW-1 through MW-4 in order to further characterize the extent of impacted soil and groundwater down-gradient of the

Results are reported on a wet weight basis unless dry-weight correction is denoted in the units field on the analytical report (" mg/kg-dry " or " ug/kg-dry ").

Your sample "MW4 @ 4.5" (SPL ID: 08050386-01) was analyzed for the presence of Volatile Organics using SW846 Method 8260. The concentrations of some target analytes in this sample required that multiple dilutions and analysis of the sample be performed. In order to provide the lowest possible reporting limits for other target analytes, the Acetone concentrations on this sample is reported with an " E " qualifier indicating that the reported concentration is above the concentration of the highest point on the instrument calibration curve.

Matrix spike (MS) and matrix spike duplicate (MSD) samples are chosen and tested at random from an analytical batch of "like" matrix to check for possible matrix effect. The MS and MSD will provide site specific matrix data only for those samples which are spiked by the laboratory. Since the MS and MSD are chosen at random from an analytical batch, the sample chosen for spike purposes may or may not have been a sample submitted in this sample delivery group. The validity of the analytical procedures for which data is reported in this analytical report is determined by the Laboratory Control Sample (LCS) and the Method Blank (MB). The Laboratory Control Sample (LCS) and the Method Blank (MB) are processed with the samples and the MS/MSD to ensure method criteria are achieved throughout the entire analytical process.

Due to limited sample volume, a Matrix Spike (MS) or Matrix Spike Duplicate (MSD) was not analyzed with Batch IDs: R237191 & R237784 for the Volatile Organics analysis by SW846 Method SW8260B. A Laboratory Control Sample (LCS) and a Laboratory Control Sample Duplicate (LCSD) were extracted with the analytical batch and serve as the batch quality control (QC). The LCS and LCSD recovered acceptably and precision criteria were met.

Some of the percent recoveries and RPD's on the QC report for the MS/MSD may be different than the calculated recoveries and RPD's using the sample result and the MS/MSD results that appear on the report because, the actual raw result is used to perform the calculations for percent recovery and RPD.

Any other exceptions associated with this report will be footnoted in the analytical result page(s) or the quality control summary page(s).

Please do not hesitate to contact us if you have any questions or comments pertaining to this data report. Please reference the above Certificate of Analysis Number.

This report shall not be reproduced except in full, without the written approval of the laboratory. The reported results are only representative of the samples submitted for testing.

SPL, Inc. is pleased to be of service to you. We anticipate working with you in fulfilling all your current and future analytical needs.

Erica Cardenas
Project Manager

Test results meet all requirements of NELAC, unless specified in the narrative.

Qualifiers: ND/U - Not Detected at the Reporting Limit
B/V - Analyte detected in the associated Method Blank
* - Surrogate Recovery Outside Advisable QC Limits
J - Estimated Value between MDL and PQL
E - Estimated Value exceeds calibration curve
TNTC - Too numerous to count

>MCL - Result Over Maximum Contamination Limit(MCL)
D - Surrogate Recovery Unreportable due to Dilution
MI - Matrix Interference

Qualifiers: ND/U - Not Detected at the Reporting Limit
B/V - Analyte detected in the associated Method Blank
* - Surrogate Recovery Outside Advisable QC Limits
J - Estimated Value between MDL and PQL
E - Estimated Value exceeds calibration curve
TNTC - Too numerous to count

>MCL - Result Over Maximum Contamination Limit(MCL)
D - Surrogate Recovery Unreportable due to Dilution
MI - Matrix Interference

Sample Receipt Checklist

| | | | |
|-------------------------|----------------------|---------------|--------------------------|
| Workorder: | 08050386 | Received By: | AE |
| Date and Time Received: | 5/6/2008 10:00:00 AM | Carrier name: | Fedex-Standard Overnight |
| Temperature: | 3.5°C | Chilled by: | Water Ice |

- | | | | |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------|----------------------------------------|-----------------------------------------------------------|
| 1. Shipping container/cooler in good condition? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | Not Present <input type="checkbox"/> |
| 2. Custody seals intact on shipping container/cooler? | Yes <input type="checkbox"/> | No <input type="checkbox"/> | Not Present <input checked="" type="checkbox"/> |
| 3. Custody seals intact on sample bottles? | Yes <input type="checkbox"/> | No <input type="checkbox"/> | Not Present <input checked="" type="checkbox"/> |
| 4. Chain of custody present? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | |
| 5. Chain of custody signed when relinquished and received? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | |
| 6. Chain of custody agrees with sample labels? 1. Did not receive terracores for MW 2 @ 2.5' as listed on chain only the 8 oz container. 2. Received 2 sets of terracores for MW1 @ 3.0' collected 5/5 11:00 not listed on chain. | Yes <input type="checkbox"/> | No <input checked="" type="checkbox"/> | |
| 7. Samples in proper container/bottle? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | |
| 8. Sample containers intact? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | |
| 9. Sufficient sample volume for indicated test? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | |
| 10. All samples received within holding time? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | |
| 11. Container/Temp Blank temperature in compliance? | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> | |
| 12. Water - VOA vials have zero headspace? | Yes <input type="checkbox"/> | No <input type="checkbox"/> | VOA Vials Not Present <input checked="" type="checkbox"/> |
| 13. Water - Preservation checked upon receipt (except VOA*)? | Yes <input type="checkbox"/> | No <input type="checkbox"/> | Not Applicable <input checked="" type="checkbox"/> |

*VOA Preservation Checked After Sample Analysis
