RE: Rio Tinto Holden Mine Reclamation/Remediation

Please find enclosed sample receipt documentation and analytical results for samples from the project referenced above.

Sample analyses were performed according to ARI's Quality Assurance Plan and any provided project specific Quality Assurance Plan. Each analytical section of this report has been approved and reviewed by an analytical peer, the appropriate Laboratory Supervisor or qualified substitute, and a technical reviewer.

Should you have any questions or problems, please feel free to contact us at your convenience.

Associated Work Order(s)	Associated SDG ID(s)
21F0130	N/A

I certify that this data package is in compliance with the terms and conditions of the contract, both technically and for completeness, for other than the conditions detailed in the enclose Narrative. ARI, an accredited laboratory, certifies that the report results for which ARI is accredited meets all the requirements of the accrediting body. A list of certified analyses, accreditations, and expiration dates is included in this report.

Release of the data contained in this hardcopy data package has been authorized by the Laboratory Manager or his/her designee, as verified by the following signature.

Analytical Resources, Inc.

The results in this report apply to the samples analyzed in accordance with the chain of custody document. This analytical report must be reproduced in its entirety.

Comments/Special Instructions

- Metals by E6020A include Al, Cd, Cu, Fe, Pb, Zn, Mn, Ca, K, Mg, Na
- Anions: Chloride, sulfate and nitrate
- DOC and dissolved metals field filtered (FF) at 0.45 micron.
- If Cadmium is non-detect, run low-level analysis to PQL of 0.02 ug/L.
- Alkalinity: report total, carbonate, bicarbonate and hydroxide.

Date & Time:	6/8/21	6/9/21 1240		

Limits of Liability: ARI will perform all requested services in accordance with appropriate methodology following ARI Standard Operating Procedures and the ARI Quality Assurance Program. This program meets standards for the industry. The total liability of ARI, its officers, agents, employees, or successors, arising out of or in connection with the requested services, shall not exceed the invoiced amount for said services. The acceptance by the client of a proposal for services by ARI release ARI from any liability in excess thereof, not withstanding any provision to the contrary in any contract, purchase order or co-signed agreement between ARI and the Client.

Sample Retention Policy: Unless specified by workorder or contract, all water/soil samples submitted to ARI will be discarded or returned, no sooner than 90 days after receipt or 60 days after submission of hardcopy data, whichever is longer. Sediment samples submitted under PSDDA/PSEP/SMS protocol will be stored frozen for up to one year and then discarded.

Limits of Liability: *ARI will perform all requested services in accordance with appropriate methodology following ARI Standard Operating Procedures and the ARI Quality Assurance Program. This program meets standards for the industry. The total liability of ARI, its officers, agents, employees, or successors, arising out of or in connection with the requested services, shall not exceed the invoiced amount for said services. The acceptance by the client of a proposal for services by ARI release ARI from any liability in excess thereof, not withstanding any provision to the contrary in any contract, purchase order or co-signed agreement between ARI and the Client.*

Sample Retention Policy: Unless specified by workorder or contract, all water/soil samples submitted to ARI will be discarded or returned, no sooner than 90 days after receipt or 60 days after submission of hardcopy data, whichever is longer. Sediment samples submitted under PSDDA/PSEP/SMS protocol will be stored frozen for up to one year and then discarded.

Work Order Case Narrative

Total and Dissolved Metals - EPA Method 6020B

The sample(s) were digested and analyzed within the recommended holding times.

Initial and continuing calibrations were within method requirements.

The method blank(s) were clean at the reporting limits.

The blank spike (BS/LCS) percent recoveries were within control limits.

The matrix spike (MS) percent recoveries and the duplicate (DUP) relative percent difference (RPD) were within advisory control limits with the exception of analytes flagged on the associated forms.

Wet Chemistry

The sample(s) were prepared and analyzed within the recommended holding times with the exception of nitrate which was sent to the lab outside of the holding time. All associated samples have been flagged with an "H" qualifer.

Initial and continuing calibrations were within method requirements.

The method blank(s) were clean at the reporting limits.

The blank spike (BS/LCS) percent recoveries were within control limits.

The reference material (SRM) percent recoveries were within control limits.

The matrix spike (MS) percent recoveries and the duplicate (DUP) relative percent difference (RPD) were within advisory control limits.

Cooler Receipt Form

ARI Client: Floyd Snider

Project Name: RT - Holden

COC No(s): (NA)

Delivered by: Fed-Ex UPS Courier Hand Delivered Other:

Assigned ARI Job No: 21F0130

Tracking No: (NA)

Preliminary Examination Phase:

Were intact, properly signed and dated custody seals attached to the outside of the cooler?	YES	(NO)
Were custody papers included with the cooler?	(YES)	NO
Were custody papers properly filled out (ink, signed, etc.)	(YES)	NO

Temperature of Cooler(s) (°C) (recommended 2.0-6.0 °C for chemistry)

Time 1240 0.3 3.4 4.3 3.9 1.2 4.2 4.3 5.8 2.1 2.5 1.4 3.3

If cooler temperature is out of compliance fill out form 00070F

Temp Gun ID#: D00520G

Cooler Accepted by: KP Date: 6/8/21 Time: 1240

Complete custody forms and attach all shipping documents

Log-In Phase:

Was a temperature blank included in the cooler?		YES	(NO)
What kind of packing material was used?	Bubble Wrap (Wet Ice) Gel Packs (Baggies) Foam Block Paper Other:		
Was sufficient ice used (if appropriate)?	NA	(YES)	NO
How were bottles sealed in plastic bags?	Individually	(Grouped)	Not
Did all bottles arrive in good condition (unbroken)?		(YES)	NO
Were all bottle labels complete and legible?		(YES)	NO
Did the number of containers listed on COC match with the number of containers received?		(YES)	NO
Did all bottle labels and tags agree with custody papers?		(YES)	NO
Were all bottles used correct for the requested analyses?		(YES)	NO
Do any of the analyses (bottles) require preservation? (attach preservation sheet, excluding VOCs)	NA	(YES)	NO
Were all VOC vials free of air bubbles?	(NA)	YES	NO
Was sufficient amount of sample sent in each bottle?		(YES)	NO
Date VOC Trip Blank was made at ARI	(NA)		

Were the sample(s) split by ARI? (NA) YES Date/Time: Equipment: Split by:

Samples Logged by: JJ Date: 06/08/2021 Time: 1331 Labels checked by: JJ

Notes and Definitions

*	Flagged value is not within established control limits.
B	This analyte was detected in the method blank.
D	The reported value is from a dilution
E	The analyte concentration exceeds the upper limit of the calibration range of the instrument established by the initial calibration (ICAL)
H	Hold time violation - Hold time was exceeded.
HC	The natural concentration of the spiked analyte is so much greater than the concentration spiked that an accurate determination of spike recovery is not possible
J	Estimated concentration value detected below the reporting limit.
L	Analyte concentration is <=5 times the reporting limit and the replicate control limit defaults to +/- RL instead of 20% RPD
U	This analyte is not detected above the reporting limit (RL) or if noted, not detected above the limit of detection (LOD).
Y1	Raised reporting limit due to interference
DET	Analyte DETECTED
ND	Analyte NOT DETECTED at or above the reporting limit
NR	Not Reported
dry	Sample results reported on a dry weight basis
RPD	Relative Percent Difference
[2C]	Indicates this result was quantified on the second column on a dual column analysis.

RE: Rio Tinto Holden Mine Reclamation/Remediation

Please find enclosed sample receipt documentation and analytical results for samples from the project referenced above.

Sample analyses were performed according to ARI's Quality Assurance Plan and any provided project specific Quality Assurance Plan. Each analytical section of this report has been approved and reviewed by an analytical peer, the appropriate Laboratory Supervisor or qualified substitute, and a technical reviewer.

Should you have any questions or problems, please feel free to contact us at your convenience.

Associated Work Order(s)	Associated SDG ID(s)
21F0196	N/A

I certify that this data package is in compliance with the terms and conditions of the contract, both technically and for completeness, for other than the conditions detailed in the enclose Narrative. ARI, an accredited laboratory, certifies that the report results for which ARI is accredited meets all the requirements of the accrediting body. A list of certified analyses, accreditations, and expiration dates is included in this report.

Release of the data contained in this hardcopy data package has been authorized by the Laboratory Manager or his/her designee, as verified by the following signature.

Analytical Resources, Inc.

The results in this report apply to the samples analyzed in accordance with the chain of custody document. This analytical report must be reproduced in its entirety.

Comments/Special Instructions
- Metals by E6020A include Al, Cd, Cu, Fe, Pb, Zn, Mn, Ca, K, Mg, Na
- Anions: Chloride, sulfate and nitrate
- DOC and dissolved metals field filtered (FF) at 0.45 micron.
- If Cadmium is non-detect, run low-level analysis to PQL of 0.02 ug/L.
- Alkalinity: report total, carbonate, bicarbonate and hydroxide.

Work Order Case Narrative

Total and Dissolved Metals - EPA Method 6020B

The sample(s) were digested and analyzed within the recommended holding times.

Initial and continuing calibrations were within method requirements.

The method blank(s) were clean at the reporting limits.

The blank spike (BS/LCS) percent recoveries were within control limits.

The matrix spike (MS) percent recoveries and the duplicate (DUP) relative percent difference (RPD) were within advisory control limits.

Wet Chemistry

The sample(s) were prepared and analyzed within the recommended holding times with the exception of nitrate, TDS, TSS and the re-analysis of sulfate. Nitrate arrived at the lab outside of the holding time for several samples and due to the amount of TDS and TSS analyses for this project samples were not analyzed within the method holding times . All associated samples have been flagged with an "H" qualifer. The initial calibration for sulfate failed and per ARI PM the samples were re-analyzed outside of the holding time and both sets of sata were reported for your review.

Initial and continuing calibrations were within method requirements.

The method blank(s) were clean at the reporting limits.

The blank spike (BS/LCS) percent recoveries were within control limits.

The reference material (SRM) percent recoveries were within control limits.

The matrix spike (MS) percent recoveries and the duplicate (DUP) relative percent difference (RPD) were within advisory control limits.

The results in this report apply to the samples analyzed in accordance with the chain of custody document. This analytical report must be reproduced in its entirety.

Cooler Receipt Form

ARI Client: Floyd Snider Project Name: Holden Mine

COC No(s): _____ (NA) Delivered by: Fed-Ex UPS Courier Hand Delivered Other: _____

Assigned ARI Job No: 21F0196 Tracking No: _____ (NA)

Preliminary Examination Phase:

Were intact, properly signed and dated custody seals attached to the outside of the cooler?	YES	(NO)
Were custody papers included with the cooler?	(YES)	NO
Were custody papers properly filled out (ink, signed, etc.)	(YES)	NO

Temperature of Cooler(s) (°C) (recommended 2.0-6.0 °C for chemistry)

Time 1515 0.4 1.3 3.6 0.3 4.1 1.2 2.1 3.5 4.4 5.2

If cooler temperature is out of compliance fill out form 00070F Temp Gun ID#: D00 2565

Cooler Accepted by: JS Date: 06/11/2021 Time: 1515

Complete custody forms and attach all shipping documents

Log-In Phase:

Was a temperature blank included in the cooler?		(YES)	NO
What kind of packing material was used?	Bubble Wrap Wet Ice Gel Packs Baggies Foam Block Paper Other: _____		
Was sufficient ice used (if appropriate)?	NA	(YES)	NO
How were bottles sealed in plastic bags?	Individually	(Grouped)	Not
Did all bottles arrive in good condition (unbroken)?		(YES)	NO
Were all bottle labels complete and legible?		(YES)	NO
Did the number of containers listed on COC match with the number of containers received?		(YES)	NO
Did all bottle labels and tags agree with custody papers?		(YES)	NO
Were all bottles used correct for the requested analyses?		(YES)	NO
Do any of the analyses (bottles) require preservation? (attach preservation sheet, excluding VOCs)	NA	(YES)	NO
Were all VOC vials free of air bubbles?	(NA)	YES	NO
Was sufficient amount of sample sent in each bottle?		(YES)	NO
Date VOC Trip Blank was made at ARI	(NA)		

Were the sample(s) split by ARI? (NA) YES Date/Time: _____ Equipment: _____ Split by: _____

Samples Logged by: SC Date: 6/12/21 Time: 0915 Labels checked by: SC

*** Notify Project Manager of discrepancies or concerns ***

Sample ID on Bottle	Sample ID on COC	Sample ID on Bottle	Sample ID on COC

Notes and Definitions

*	Flagged value is not within established control limits.
B	This analyte was detected in the method blank.
D	The reported value is from a dilution
E	The analyte concentration exceeds the upper limit of the calibration range of the instrument established by the initial calibration (ICAL)
H	Hold time violation - Hold time was exceeded.
J	Estimated concentration value detected below the reporting limit.
L	Analyte concentration is <=5 times the reporting limit and the replicate control limit defaults to +/- RL instead of 20% RPD
U	This analyte is not detected above the reporting limit (RL) or if noted, not detected above the limit of detection (LOD).
DET	Analyte DETECTED
ND	Analyte NOT DETECTED at or above the reporting limit
NR	Not Reported
dry	Sample results reported on a dry weight basis
RPD	Relative Percent Difference
[2C]	Indicates this result was quantified on the second column on a dual column analysis.

Notes:

Red/Bold Detected exceedance of applicable criteria (refer to Tables 2.1, 3.9, 3.10, 3.11, 3.12, 3.12, 3.13, and 4.1 and Floyd|Snider's 2019 Annual Compliance Assessment Report, Floyd|Snider's 2020 Annual Compliance Assessment Report for applicable criteria). Surface water, well points, porewater, seeps, and wetlands surface water results are compared to surface water-based criteria that are adjusted for hardness where applicable. Sample-specific hardness-adjusted criteria are not shown on this table; refer to the annual spring data reports or annual compliance assessment reports. Monitoring wells are compared to drinking water-based criteria by default, and potentially applicable ROD surface water criteria are shown for reference.

* Indicates dissolved metals results presented for this sampling date.

1 Total metals results presented, except dissolved results shown where turbidity was measured to be 5 NTU or greater.

2 Drinking water criteria given in Tables 2 and 11 of the ROD.

3 Surface water criteria given in Tables 3 and 11 of the ROD. Criteria from the ROD for cadmium, copper, lead, and zinc are adjusted based on a hardness of 9 mg/L.

4 Background sample location.

Abbreviations:

CAS Chemical Abstracts Service
COC Contaminant of concern
mg/L Milligrams per liter
NTU Nephelometric turbidity units
ROD Record of Decision
µg/L Micrograms per liter

Qualifiers:

J Analyte was detected, concentration is considered to be an estimate.
JQ Analyte was detected between the method detection limit and reporting limit, concentration is considered to be an estimate.
U Analyte was not detected at the given reporting limit.
UJ Analyte was not detected at the given reporting limit, which is considered to be an estimate.

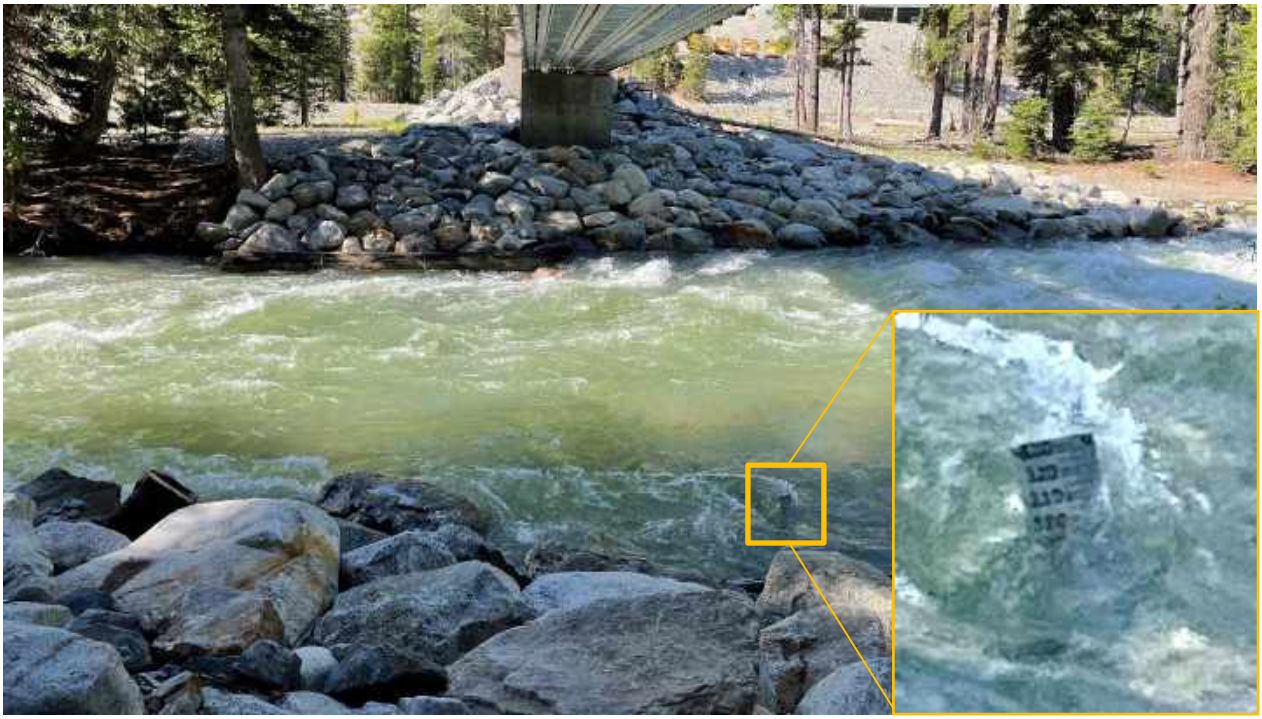
Photographs

DRAFT



Photograph 1. View to south of RC-4 staff gauge during spring freshet on 6/4/2021. Note elevated turbidity/cloudiness of Railroad Creek.

Photograph 2. View to south of RC-4 staff gauge on 6/6/2021. Note decrease in turbidity and water level relative to Photograph 1.

Photograph 3. SG-8 porewater sample station showing 6-inch and 12-inch depth sample screens (white horizontal lines to left of hose) exposed to surface water by stream bed erosion.

Photograph 4. Location of surface water sample SW-STP3 at north extent of South of Tailings Pile 3 Borrow Area diversion channel. Water from the diversion channel is conveyed to the Wetlands East of Tailings Pile 3 from this location by a 6-inch-diameter pipe. A stormwater ditch also conveys runoff from this location to the area of the Wetlands East of Tailings Pile 3 east of the bypass bridge.

Photograph 5. Historical seep SP-14A in drainage channel on west side of West Area Seeps survey area.

Photograph 6. Seep location SP-12West (photo taken above seep, looking downslope towards Railroad Creek).

Photograph 7. Seep sample location SP-42 in drainage near eastern extent of West Area Seeps survey area.

Photograph 8. Seep sample location SP-43 located in drainage near eastern extent of West Area Seeps survey zone below the Honeymoon Heights trail.
