Section Manager	Date

COMMENTS

Two USTs (gas, diesel) associated product lines, and dispensers were removed from this property in 1999. Approximately 150 cy of PCS were overexcavated and landfarmed on-site. Confirmation soil samples collected from the excavation indicated that soils were ND or below MTCA for gas, BTEX, kerosene, diesel, oil, and lead. No GW was encountered during excavation. No additional info in file.
