**Re: Quarterly Progress Report – October Through December 2021
SeaTac Development Site, SeaTac, Washington**

Dear Dr. Cruz:

In accordance with the requirements of the Consent Decree, dated June 21, 2012, for the SeaTac Development Site, SLR International Corporation (SLR), on behalf of SeaTac Investments, LLC and Scarsella Bros., Inc., has prepared this quarterly progress report for the above-referenced site. This report summarizes the work performed from October through December 2021 and details the results of the work; describes the planned activities for January through March 2022; and identifies any problems or delays encountered or anticipated.

Work Conducted During This Reporting Period

- Conducted the annual asphalt cap monitoring on October 19th and submitted the results to Ecology in an email dated October 27th.

Results of Sampling, Tests, and Other Data Received from October through December 2021

The results of the asphalt cap inspection showed that the cap is in good condition with no new significant cracks since last year's inspection. Also, there are no unusual depressions in the cap. There are many linear cracks in the cap that have previously been sealed with tar. A few of those sealed cracks have shallow cracks in the tar that are up to approximately 1/8-inch wide. These shallow cracks will be monitored, and if they deepen, they will be re-sealed.

Community Relations

During the reporting period, there were no contacts with representatives of the local community, public interest groups, press, or federal, state, or tribal governments.

Work to be Conducted from January through March 2022

SLR anticipates that the following activities will occur from January through March 2022 to meet the requirements of the Consent Decree.

- Conduct the first semiannual confirmational groundwater monitoring event in late January.

- Prepare a Confirmational Groundwater Monitoring Report for the January sampling event and submit it to Ecology.

Problems Encountered, Anticipated Delays, and Solutions

During the reporting period, there were no deviations from the approved scope of work or schedule.

If you have any questions, please contact me at (425) 471-0479 or mstaton@slrconsulting.com.

Sincerely,

SLR International Corporation
