**Re: Request for Information on Status of VCP Project for the following Site:**

- **Site Name:** BJs Deli 166
- **Site Address:** 19090 Highway 2, Monroe, Washington 98272
- **Facility/Site No.:** 18164419
- **Cleanup Site No.:** 5633
- **VCP Project No.:** NW2394

Dear Laura Skow:

The Department of Ecology (Ecology) appreciates your decision to clean up the BJs Deli 166 facility (Site) independently. This letter is a reminder about the project and that Ecology is committed to assisting you in reaching site closure. In order to do that, we are requesting information on the status of your cleanup and your continued interest in the Voluntary Cleanup Program (VCP).

Due to the high volume of interest in the program, Ecology has made a few changes to ensure our resources are aligned with current VCP project needs. Ecology is requiring that VCP sites are actively conducting remedial actions and that a request for an opinion on current work is pending. Also, we are requiring that a schedule of planned Site cleanup milestones is submitted, showing a committed interest to remain in the VCP to continue receiving Ecology assistance in the near future.

Our records indicate that we have no information on remedial actions that were conducted during the past year at your Site. The last information Ecology received was your *Work Plan for Off-Property Soil Borings and Additional Monitoring Well Installation, the Fourth Quarter 2018 Ground Water Monitoring Report, and the First Quarter 2019 Ground Water Monitoring Report* for the BJs Deli facility. Ecology's most recent opinion letter was issued on August 13, 2019.

Ecology electronically issued a status update request letter on June 10, 2021. At this time, no response has been received.

### **Request for Information**

Please submit the following information to Ecology within 30 days of the date of this letter so we are able to continue to assist you on this project:

1. **Cleanup status report.**
2. **Any reports documenting the cleanup or other associated activities.** Please use Ecology's Remedial Investigation Checklist or other appropriate checklist for cleanup reports submitted. This ensures that all the required information will be included. The checklists are located at:  
<http://www.ecy.wa.gov/programs/tcp/vcp/Vcpmain.htm>
3. **A work plan and schedule for completing the cleanup.** The schedule for completing cleanup actions must be included with your response and should include significant milestones, such as remedial investigation results, quarterly ground water compliance monitoring events, feasibility study evaluations, and anticipated submittal of documents and requests for Ecology opinions. Contingencies and alternative approaches should be identified if the cleanup is not progressing within the expected time frame.
4. **A VCP "Change of Contact Form" for each of the following VCP project contacts, if applicable:** project manager, project billing contact, project consultant, project attorney, or property owner. A dated form should be submitted for each contact for which these project roles has changed. The form is located at:  
<https://fortress.wa.gov/ecy/publications/SummaryPages/ecy070218.html>.  
Please note that any change in the VCP Customer organization (a representative of which signs the VCP Agreement) requires termination of the existing Agreement and completion of a new VCP application and agreement.

### **Next Steps**

Based on your response, Ecology may contact you to discuss whether continuing participation in the VCP is warranted at this time. If the VCP is terminated, you can always re-apply in the future when more remedial activities have occurred or a request for opinion is needed. Ecology's decision to terminate participation will be provided in writing. **Please note that if no response is received within 30 days of the date of this letter, Ecology may close the VCP Agreement governing this project.**
