RE: 2101 BURWELL PLACE, SILVERDALE WA 98383

Dear Mr. Ric Bearbower:

The Kitsap Public Health District writing to inform you that the property at 2101 Burwell Place, Washington was subject to a site hazard assessment (SHA) as required under the Model Toxics Control Act, in January, 2013. The site was determined to be contaminated with Total Petroleum Hydrocarbons. The site's hazard ranking, an estimation of the potential threat to human health and/or the environment relative to all other Washington state sites assessed at this time, has been determined by the Department of Ecology to be a 5, where a 1 represents the highest relative risk and 5 the lowest.

For your information, Ecology will be publishing the ranking of this, and other recently assessed sites, in February, 2013, Special Issue of the Site Register. The hazard ranking will be used in conjunction with other considerations in determining Ecology's priority for future action at this site.

For inquiries regarding what may occur with your site now that it is on Ecology's Hazardous Sites List please call Donna Musa at (425) 649-7136.

Sincerely,

Richard Bazzell
