Parametrix No. 553-1550-067

Mr. Jerome Cruz, Project Manager  
Washington State Department of Ecology  
Toxics Cleanup Program  
3190 160th Avenue SE  
Bellevue, Washington 98008-5452

Re: South Park Landfill December 2021 Progress Report

Dear Jerome:

This letter report provides an explanation of actions taken during the referenced period.

#### General Activities During December

- The old South Transfer Station seep area (compactor shed) is fenced off and locked and all safeguards are still in place.
- Solid Waste Operations and Household Hazardous Waste Collection continues on the SPU old South Transfer Station property.
- Recently the Seattle Fire Department has requested the use of the old transfer station site to park some of their large 40-foot response trailers. This possible use is consistent with current SPU operations at the site which includes trailer parking.
- SPU submitted a draft Engineering Design Report (EDR), EDR and associated 30% design for the remedial work on the SPU parcel in early December.
- The current tenants First Student and Amazon vehicle parking are active on SPPD property.
- The 2021 fourth quarter compliance monitoring was conducted the week of November 15, 2021. Lab data for groundwater sampling was received in December. Lab results are included with this status report.
- Gas exceedances above the 5% by volume lower explosive limit (LEL) at GP-29 and GP-33 on the perimeter of SPPD property triggered contingent actions outlined in the Landfill Post-Closure Operations, Maintenance, and Monitoring Plan. SPPD made adjustments to the gas system on their property until the probes returned to protectiveness levels. GP-33 dropped below the LEL on December 1, 2021, and was then monitored weekly in December. GP-29 was monitored daily, excluding some weekends, until control was established the week of December 27, 2021. GP-29 continues to be monitored on a weekly basis, ending the week of January 17, 2022.
- A Corrective Action Plan for the SPPD property landfill gas collection and control system was prepared by Farallon Consulting. It is under review and will be finalized in January. The short-term corrective actions identified in the plan were completed in December.

*inspired people. inspired solutions. making a difference.*

SENT VIA EMAIL

### Deviations from Samples, Required Tasks, CAP, or Schedule

There are no deviations to report.

### Data Summary

The groundwater wells were monitored November 16 through 17, 2021. The monitoring samples were analyzed by Analytical Resources, Incorporated. Data validation is complete and a concentration trigger assessment for vinyl chloride was performed. A draft data summary table, updated time-series plots, and the final lab reports are included as attachments to this progress report.

Data management is complete for the 2021 fourth quarter compliance monitoring event.

Perimeter gas probes GP-29 and GP-33 were monitored following contingent actions outlined in the flowchart in the Landfill Gas Monitoring and Contingency Plan (Appendix A.2 of the Cleanup Action Plan). A table summarizing the monitoring data and a time series plot is attached.

### Upcoming Activities

- Ongoing weekly monitoring of probe GP-29 through the week of January 17, 2022.
- The Corrective Action Plan for the SPPD property landfill gas collection and control system will be finalized at the end of the review period.
- Ongoing weekly inspections of the SPPD gas system.
- The report summarizing the 2021 annual cap inspection is under review by SPPD. A final report will be submitted to Ecology after property owner review is complete.
- A report summarizing the October rain inspection of the cap will be submitted to the property owners for review. A final report will be submitted to Ecology after property owner review is complete.
- Gas probe GP-09 and groundwater wells MW-10 and MW-25 are located in a right-of-way that is frequently occupied by urban campers. The City of Seattle Homelessness Outreach and Provider Ecosystem (HOPE) team worked with the homeless individuals residing in the area next to the monitoring location to relocate and then cleared the debris obstructing access to the monitoring wells. The southern portion of the right-of-way remains occupied. Firearms continue to be observed in possession of occupants and visitors to the location. SPU is working on a plan to establish safe access for ongoing quarterly monitoring.
- SPU is waiting for all Ecology comments on the draft EDR and 30% design drawings.

**Notes:**

<sup>1</sup> MW-30 and MW-31 monitor the former Glitsa property and are not CPOC wells.

<sup>2</sup> MW-27, a downdgradient A-Zone well across SR 99 consistently has arsenic at concentrations greater than the CUL due to a cement kiln dust deposit that is across the street from the Settlement Area. MW-27 is not a CPOC well for arsenic.

<sup>3</sup> MW-18 is completed in refuse along the downdgradient edge of the Landfill; MW-32 and MW-33 are completed beneath refuse along the downdgradient edge.

= Exceeds cleanup level for CPOC wells

-- = Not sampled

U = The analyte was analyzed for but was not detected above the reported sample quantitation limit.

Units were converted from lab reports for iron (µg/L to mg/L), manganese (µg/L to mg/L), and vinyl chloride (ng/L to µg/L) to maintain consistency with the Final Cleanup Action Plan - Amended 2021

J - The result is an estimated quantity, but the result may be biased low. The associated numerical value is the approximate concentration of the analyte in the sample.

**Abbreviations:**

µg/L Micrograms per liter

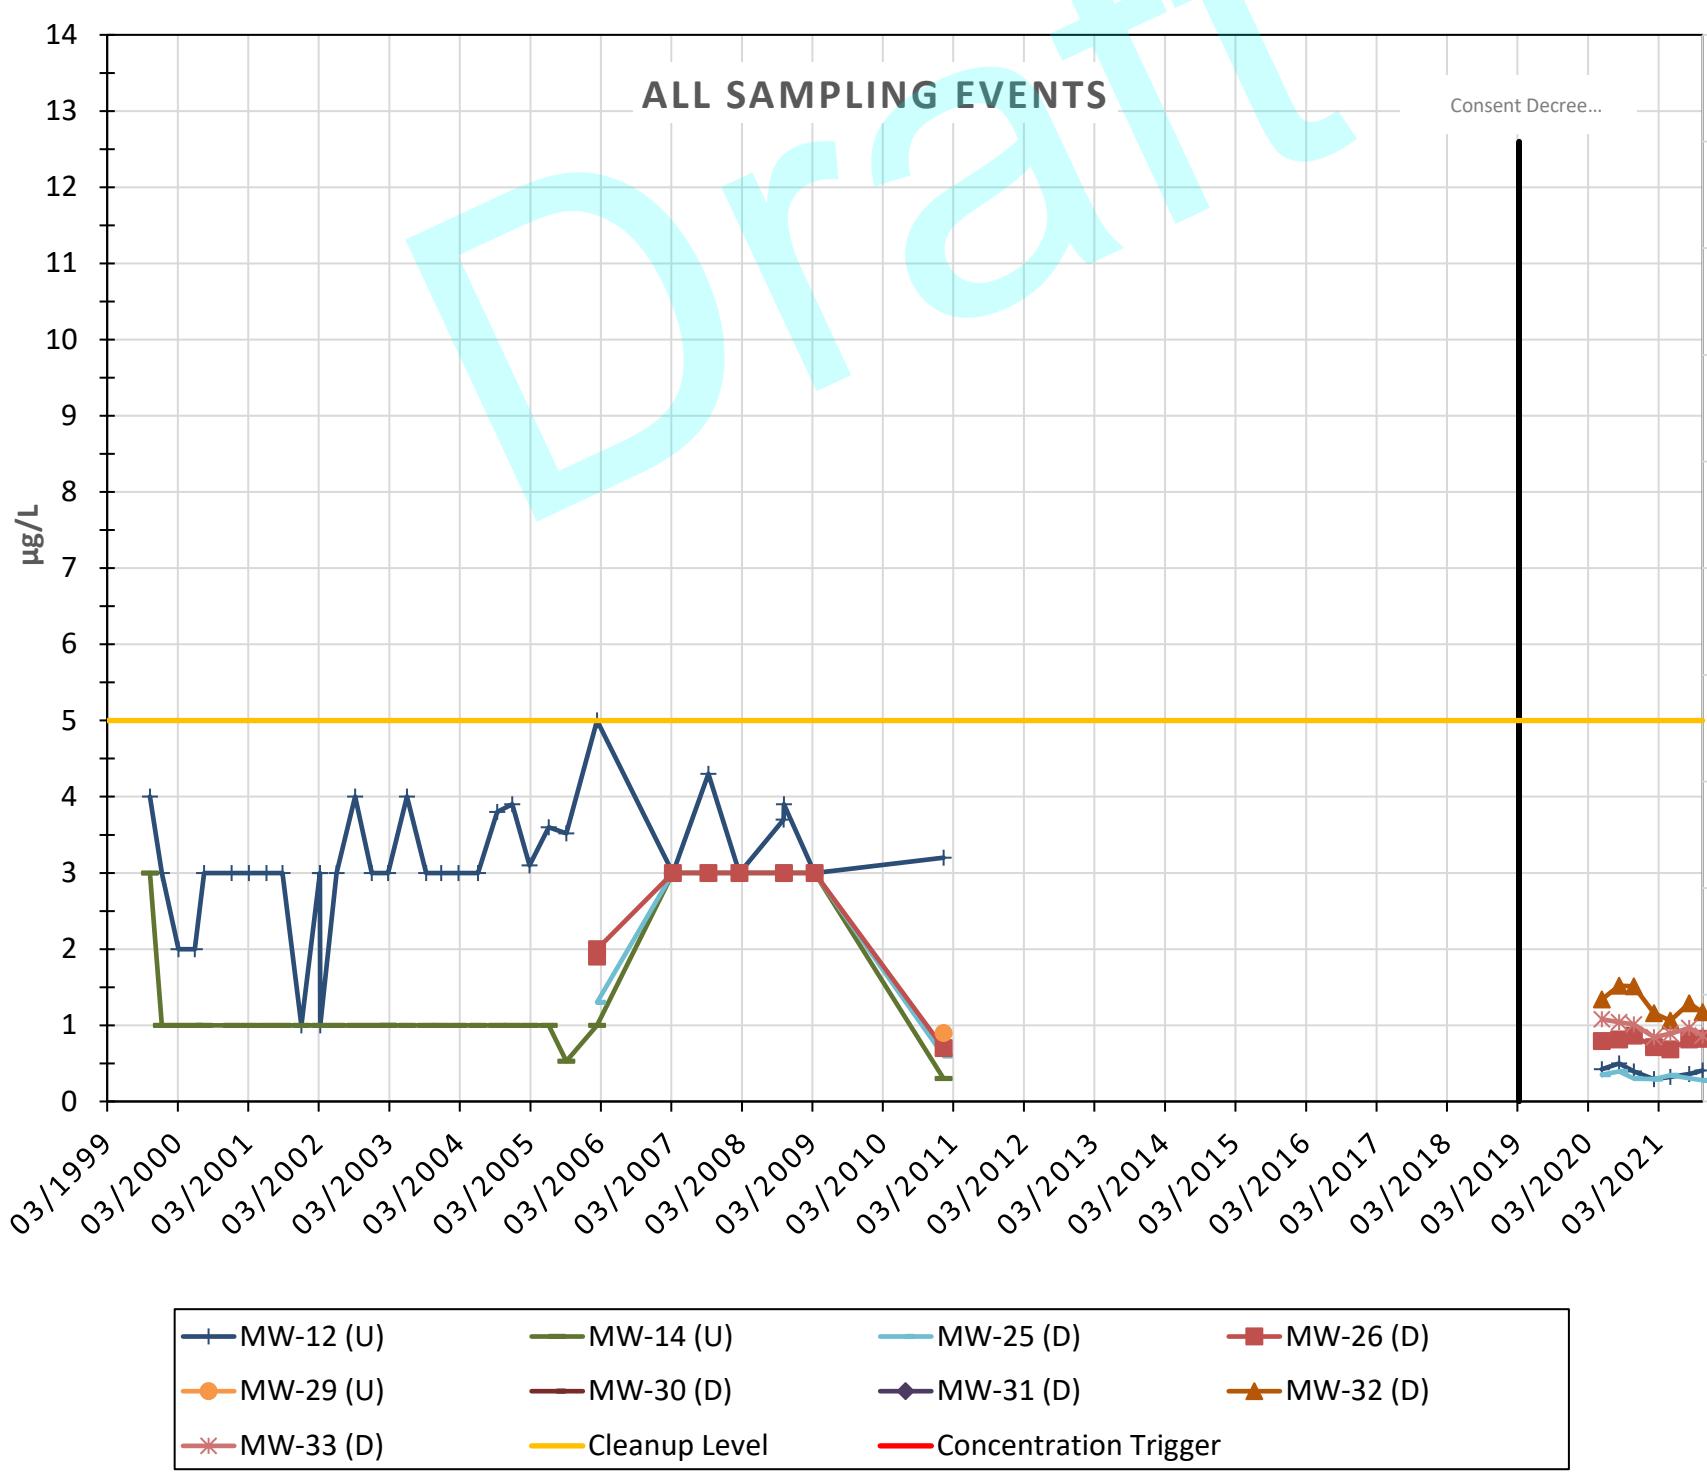

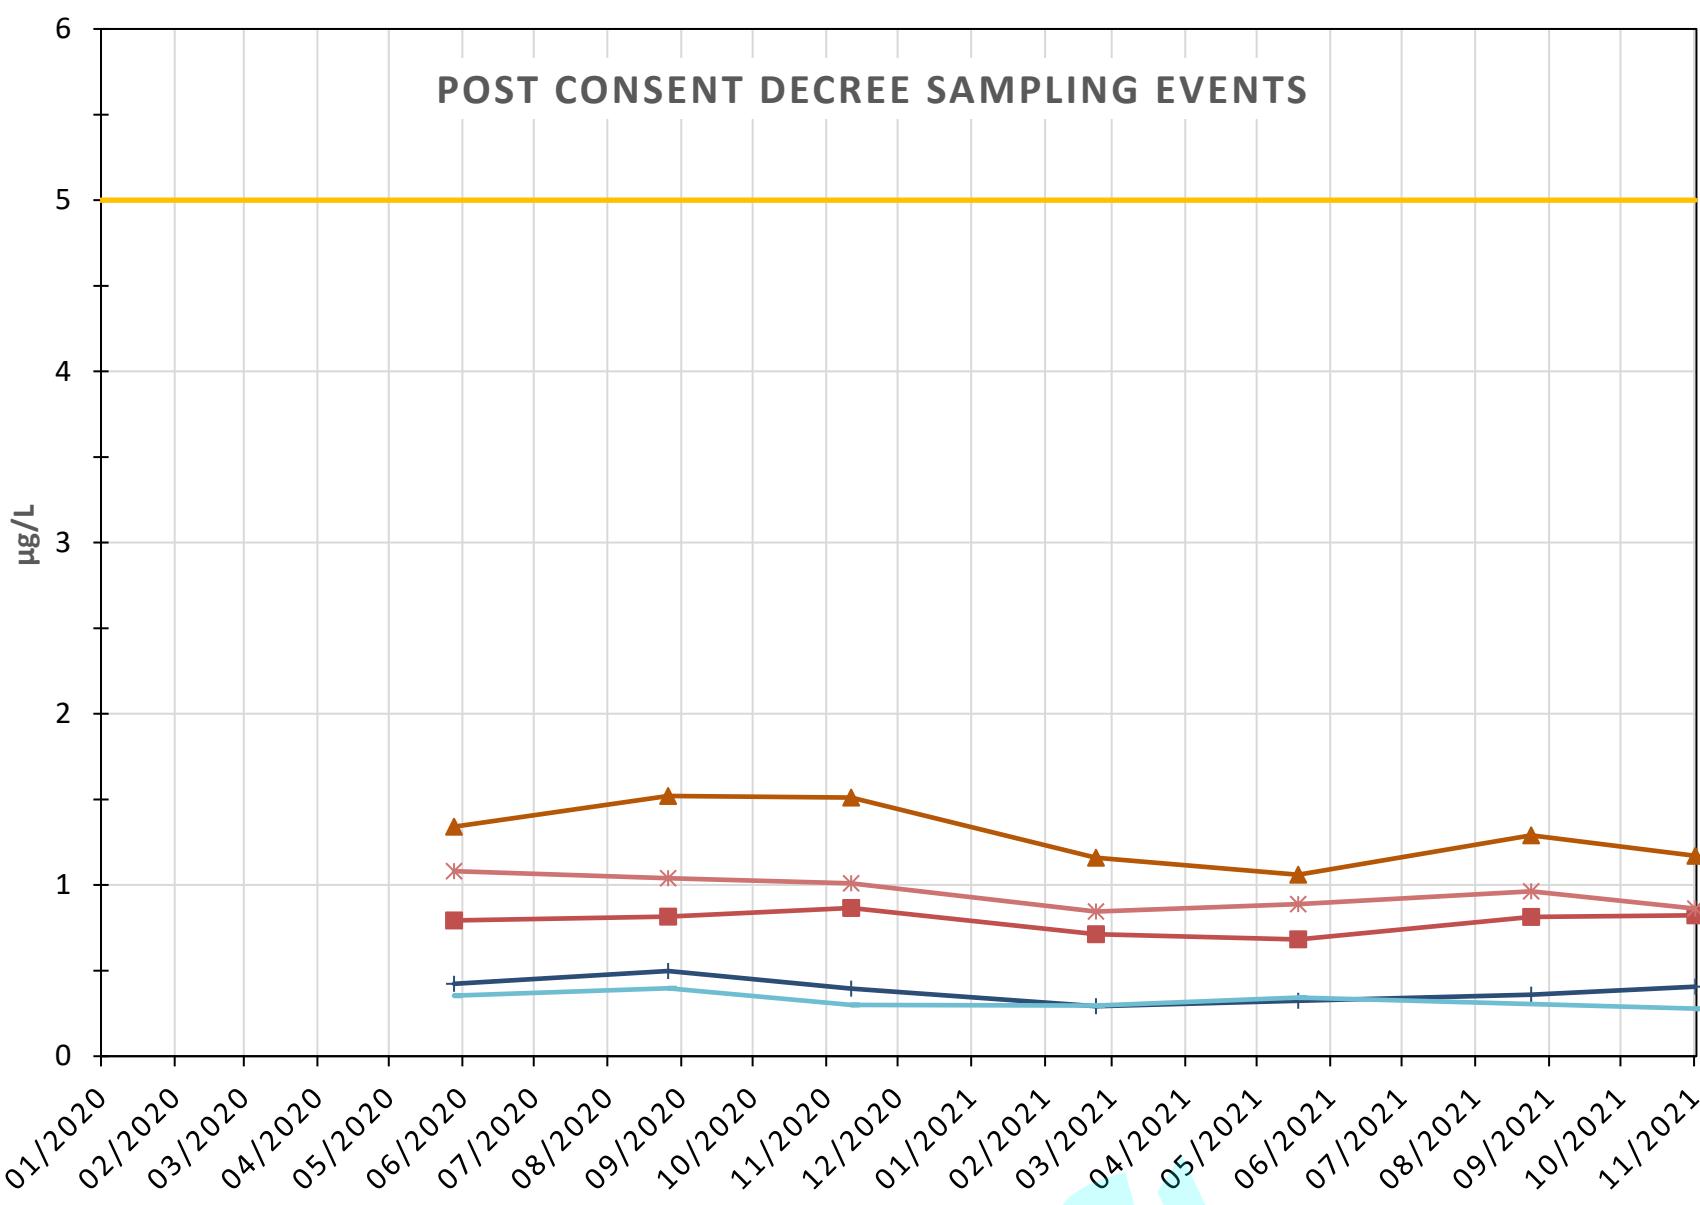

mg/L Milligrams per liter

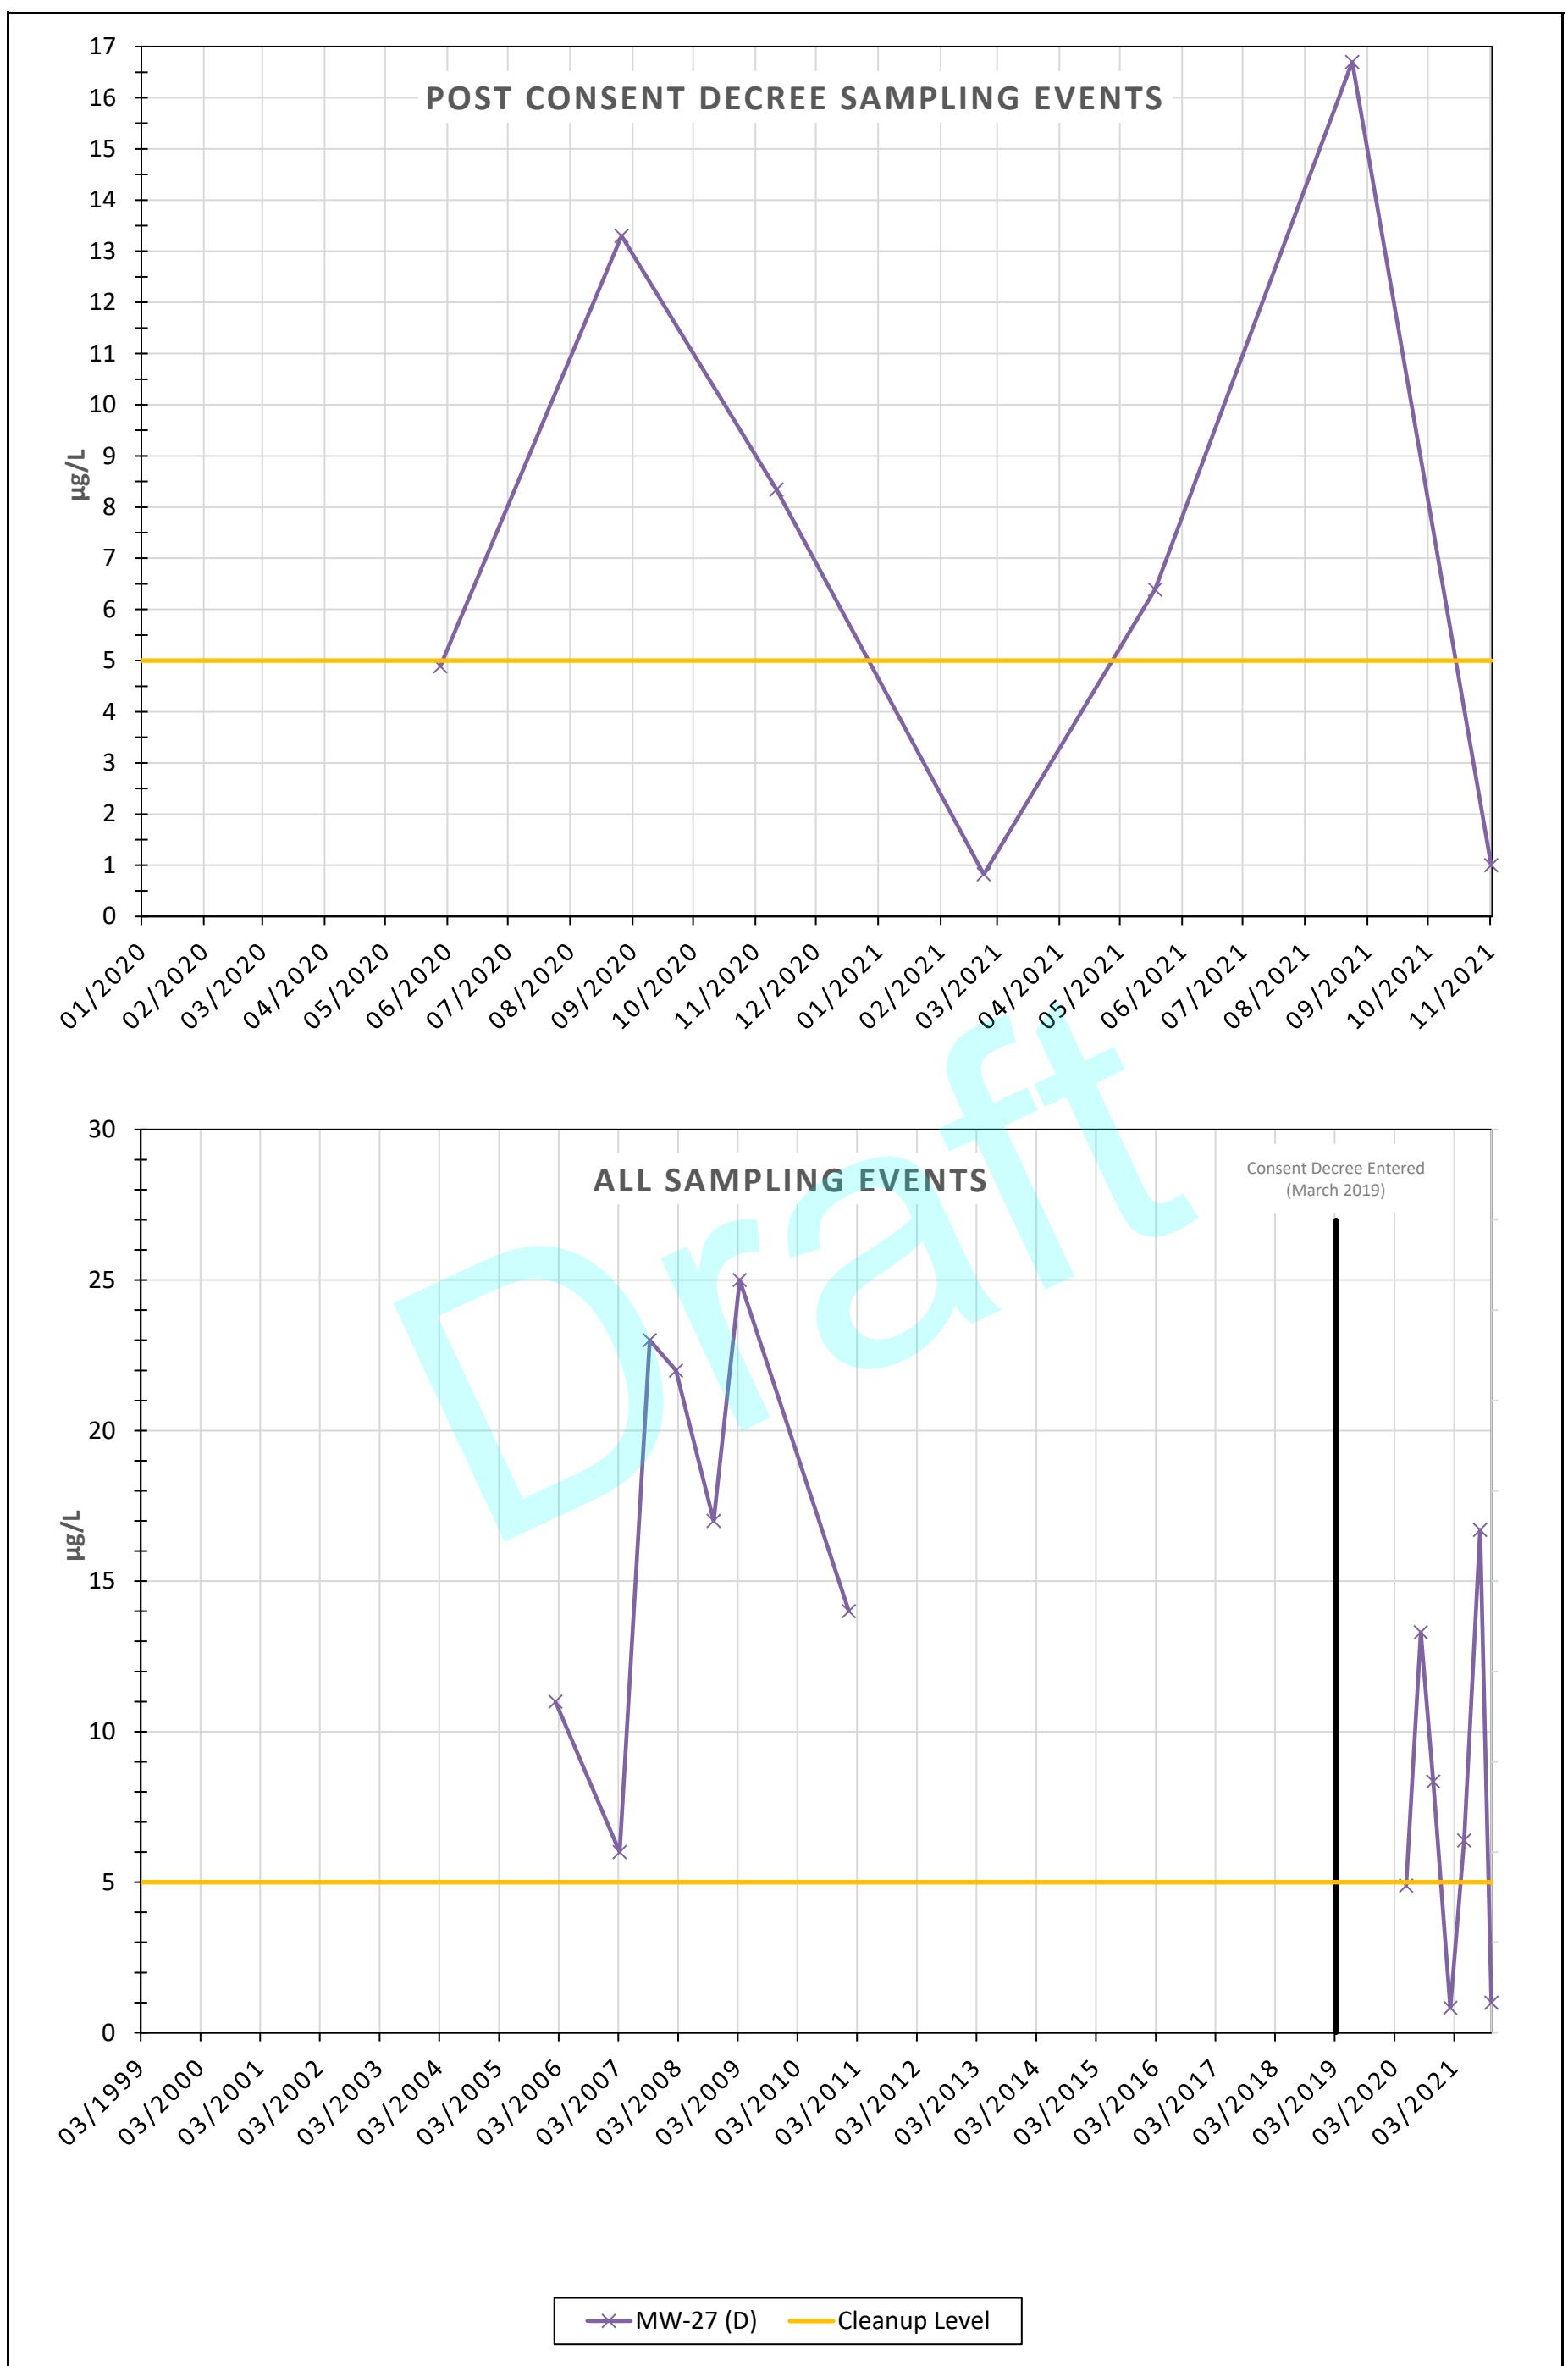

ng/L nanograms per liter

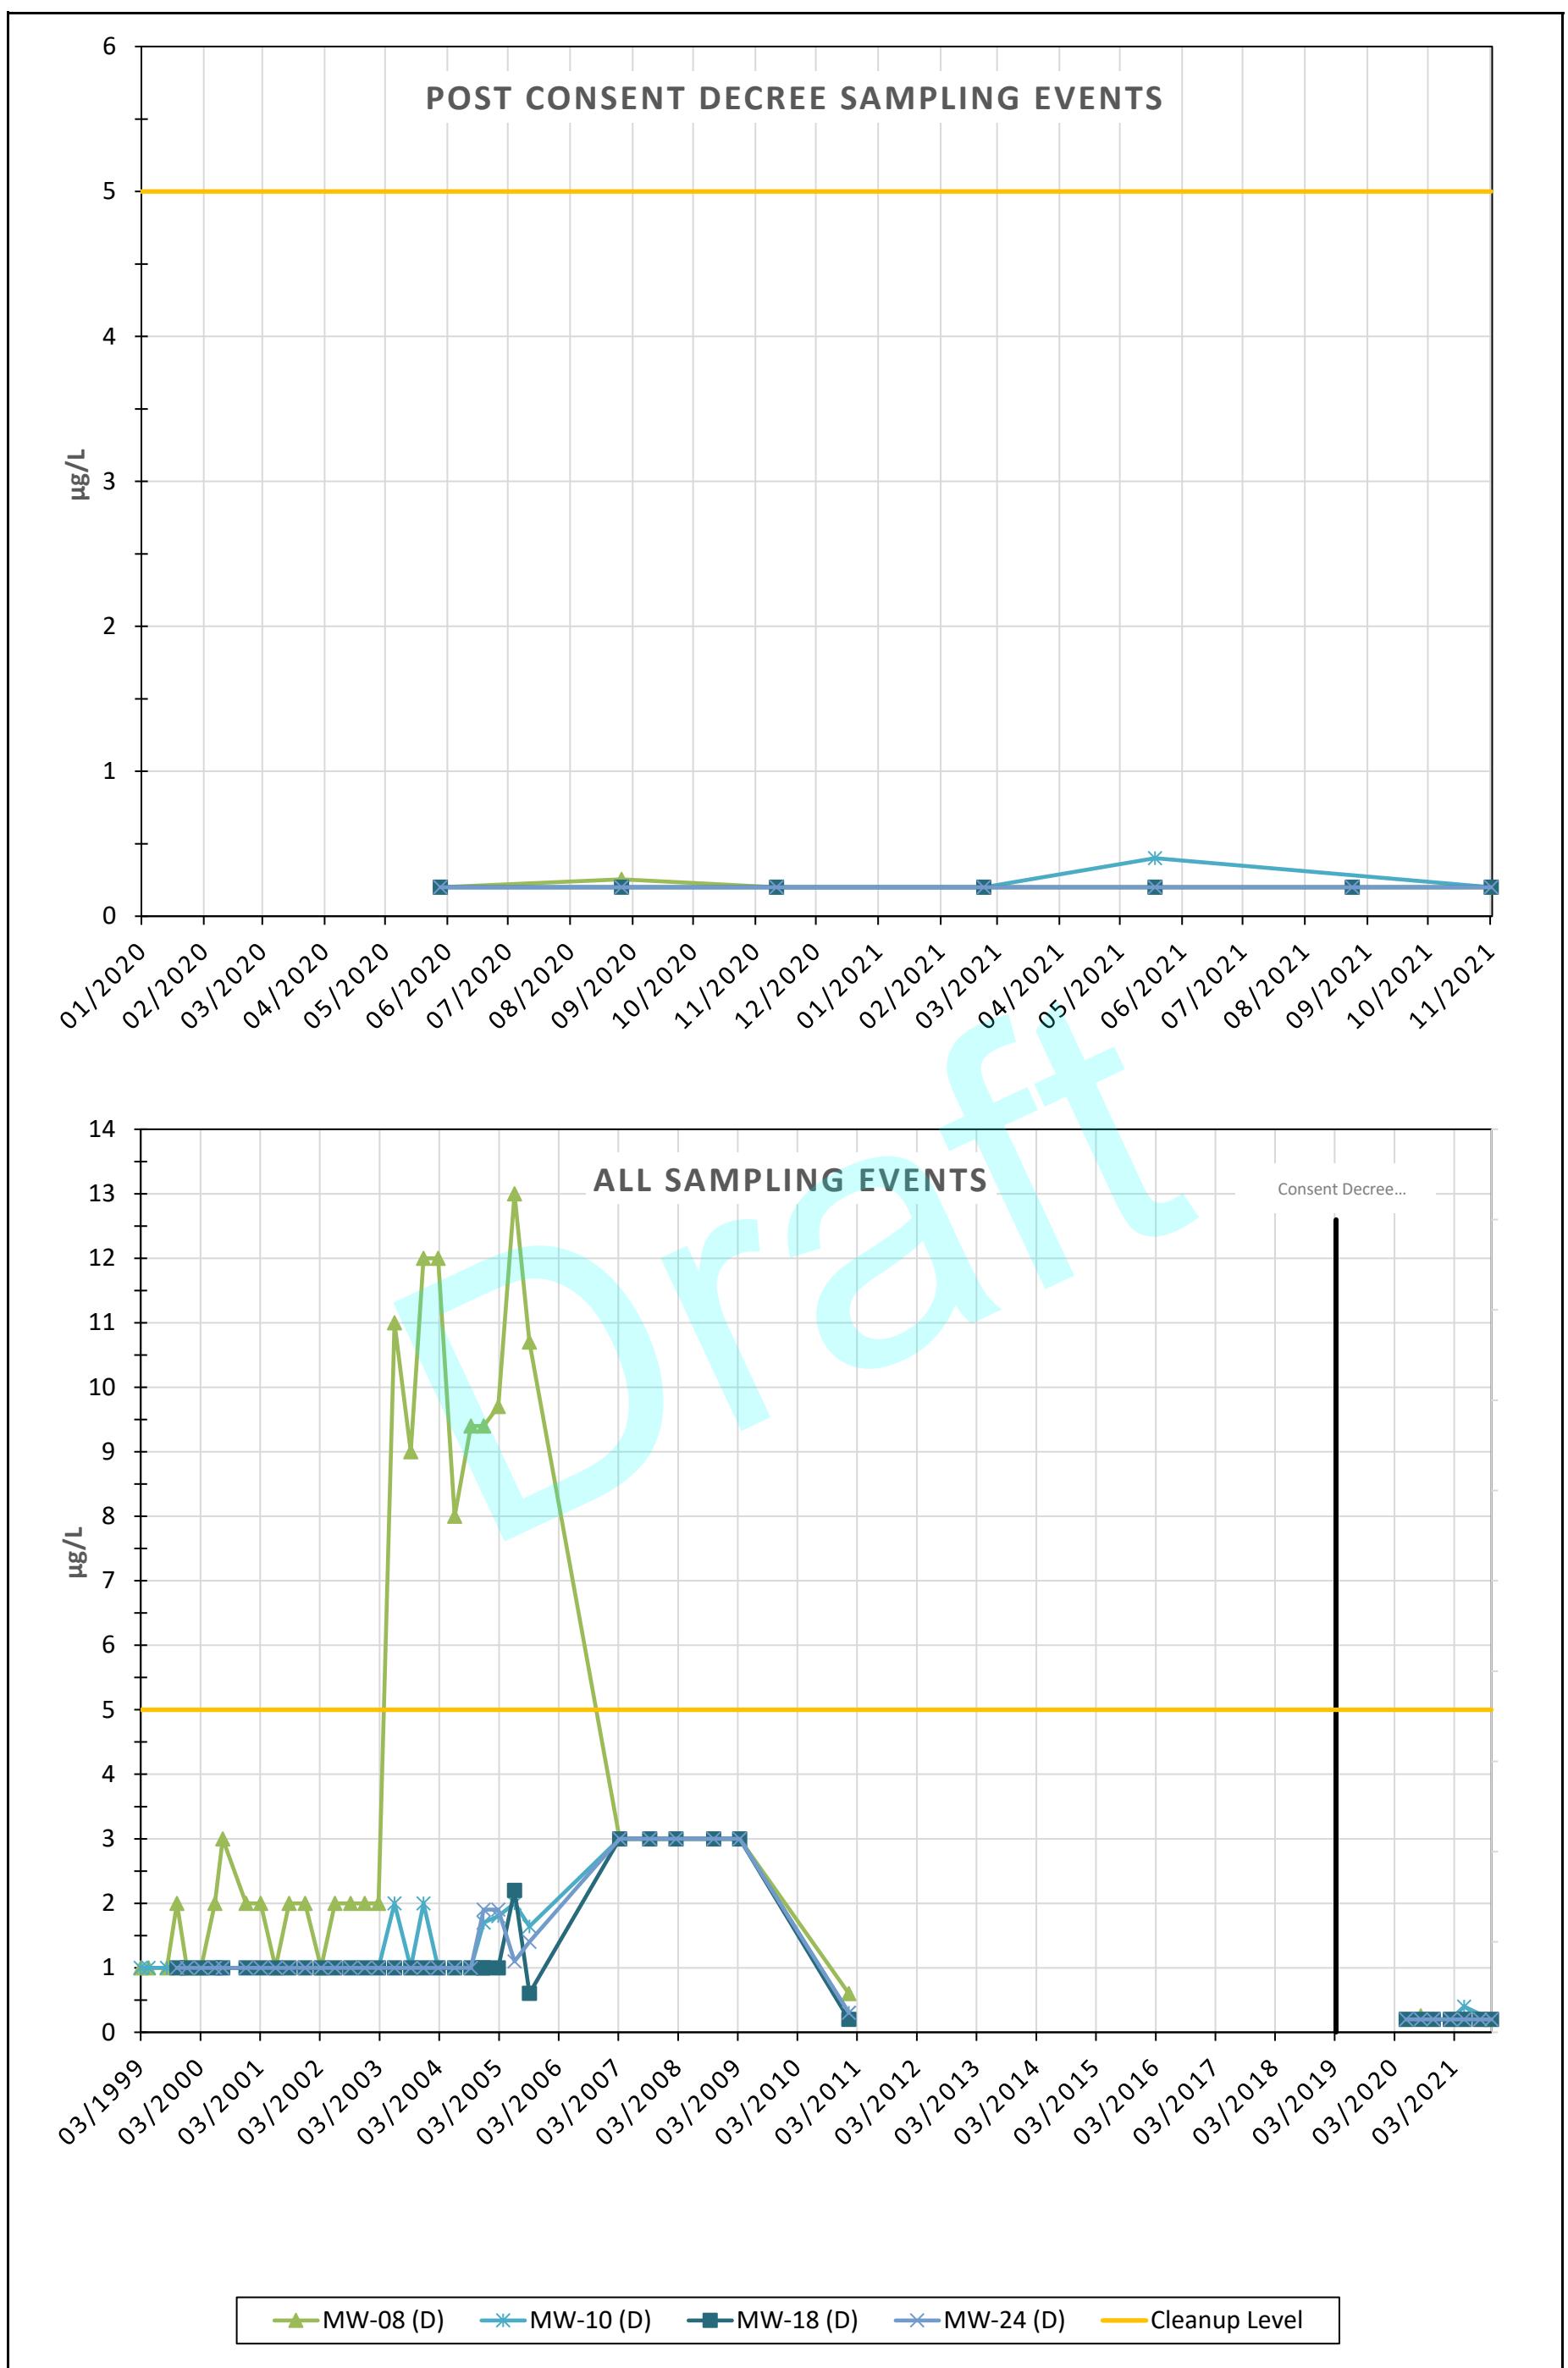

µS/cm microsiemens per centimeter

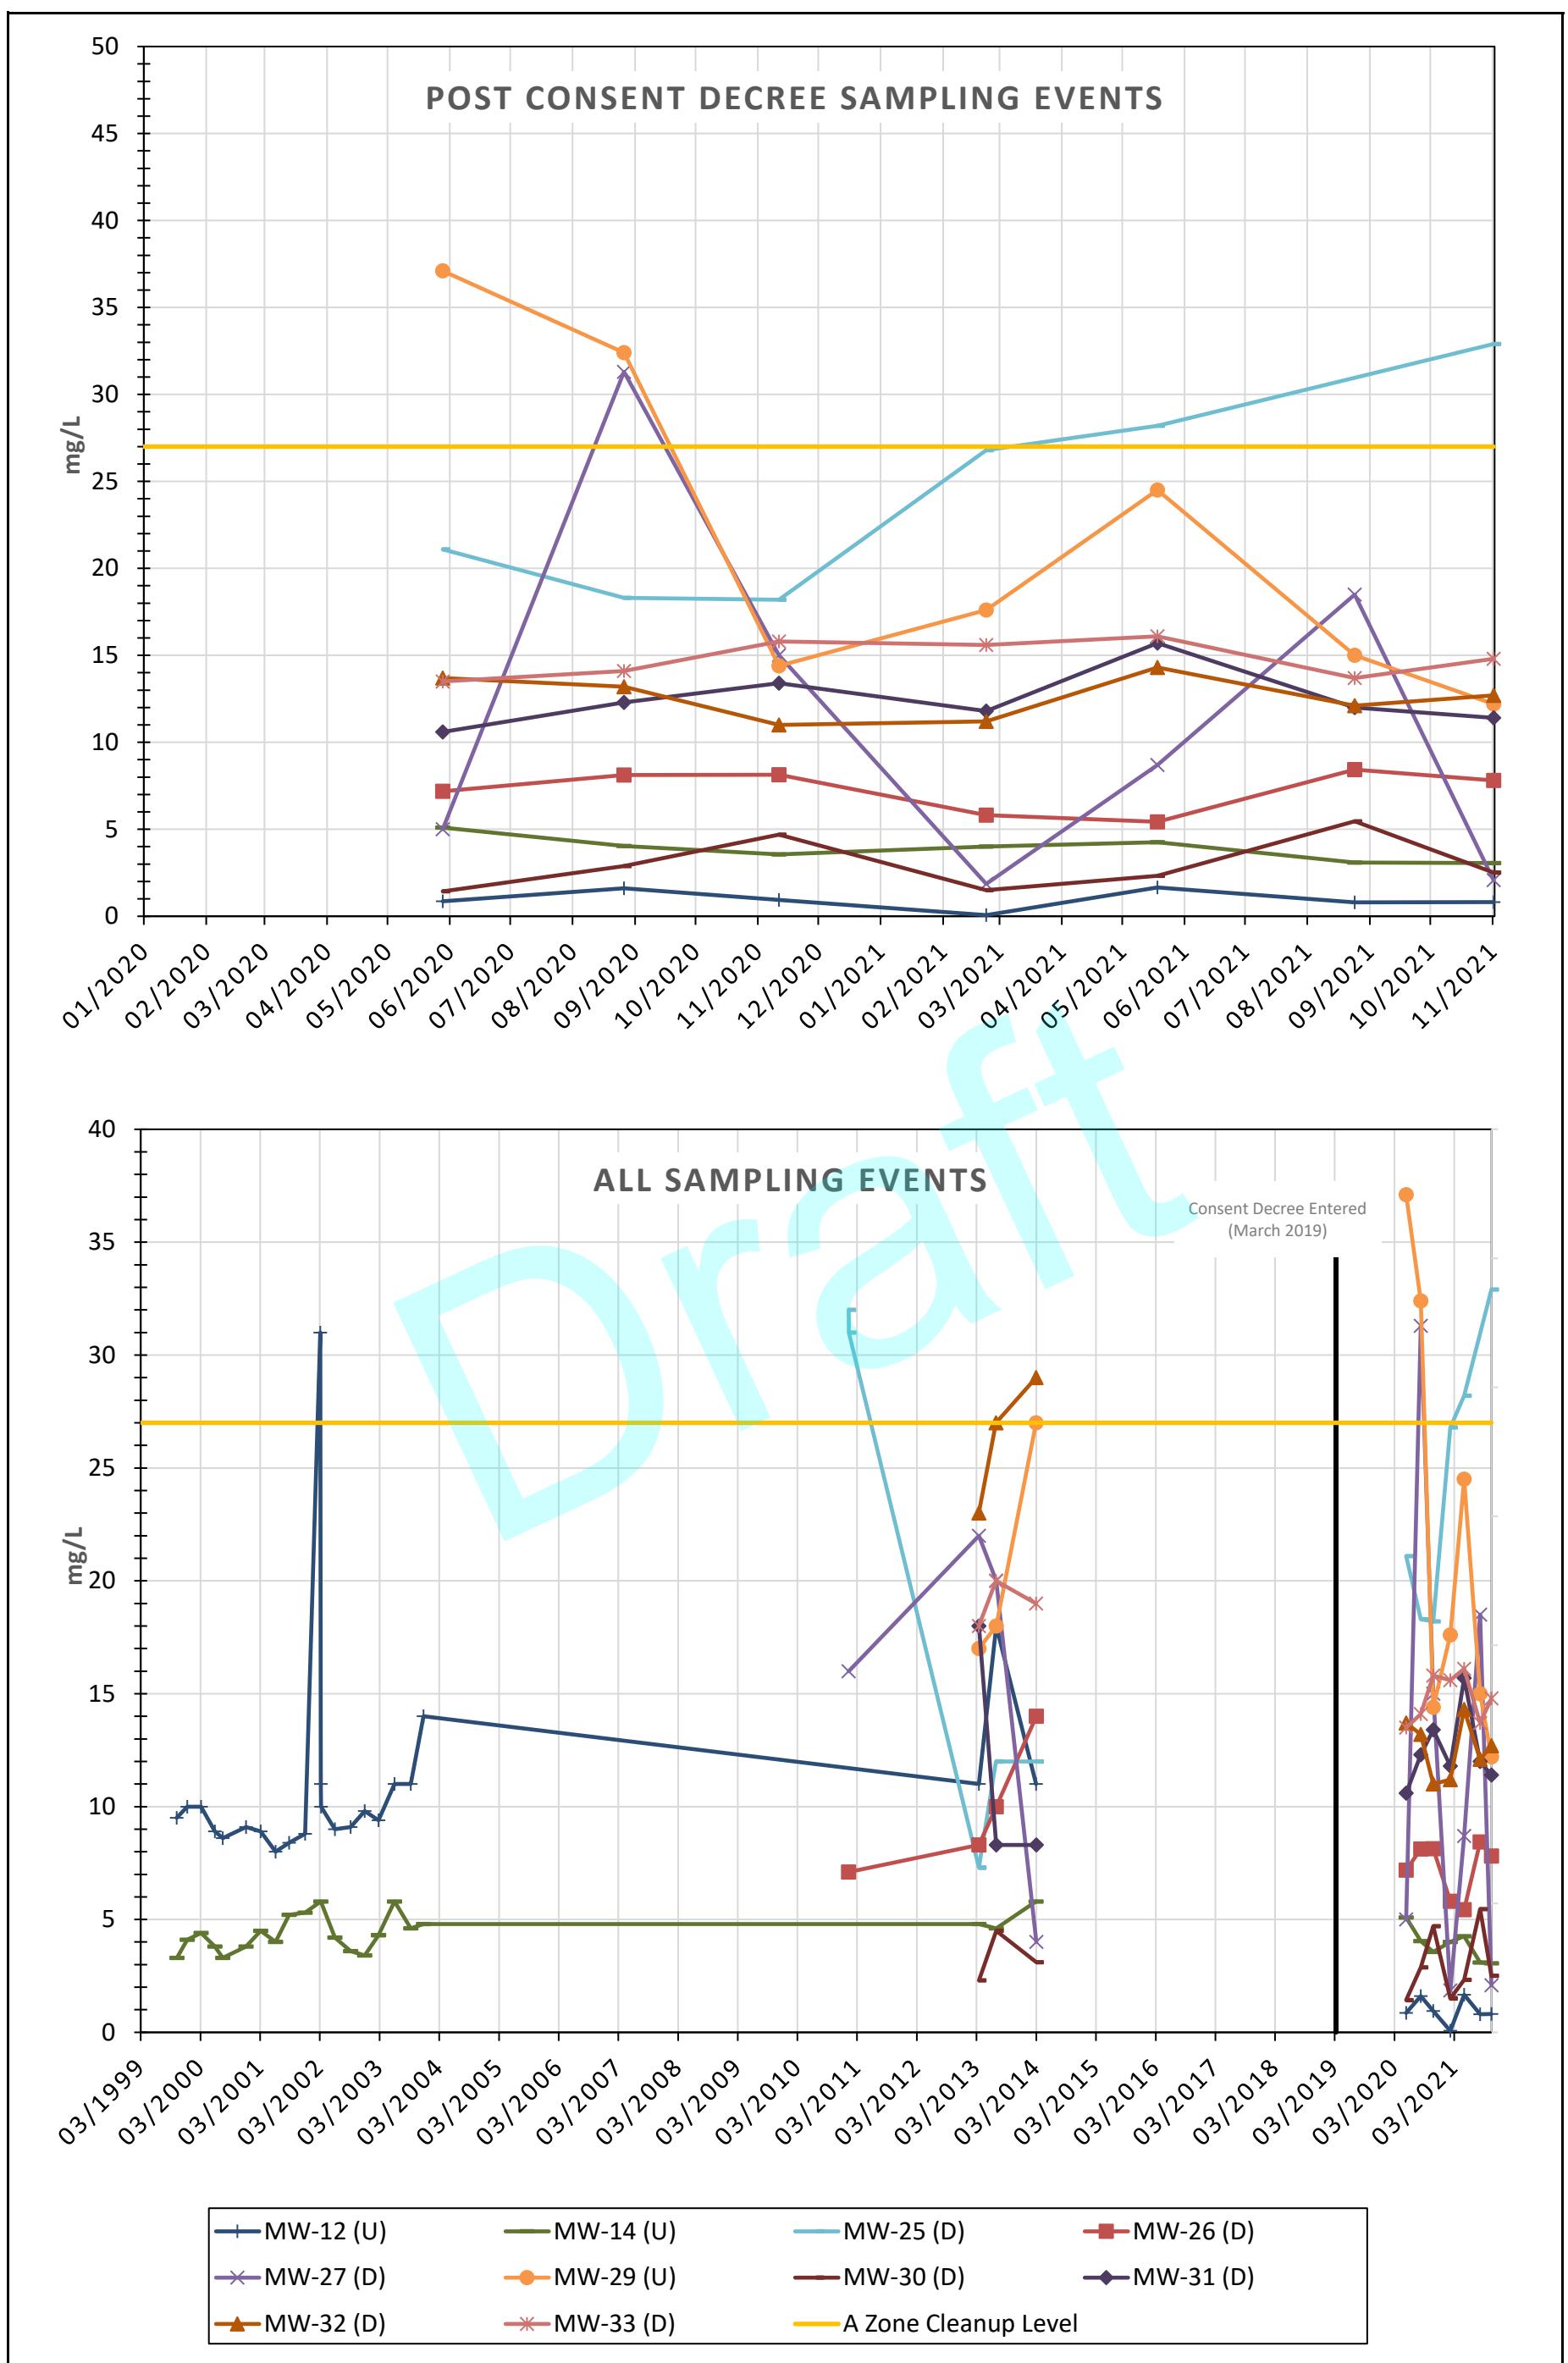

NTU Nephelometric Turbidity unit

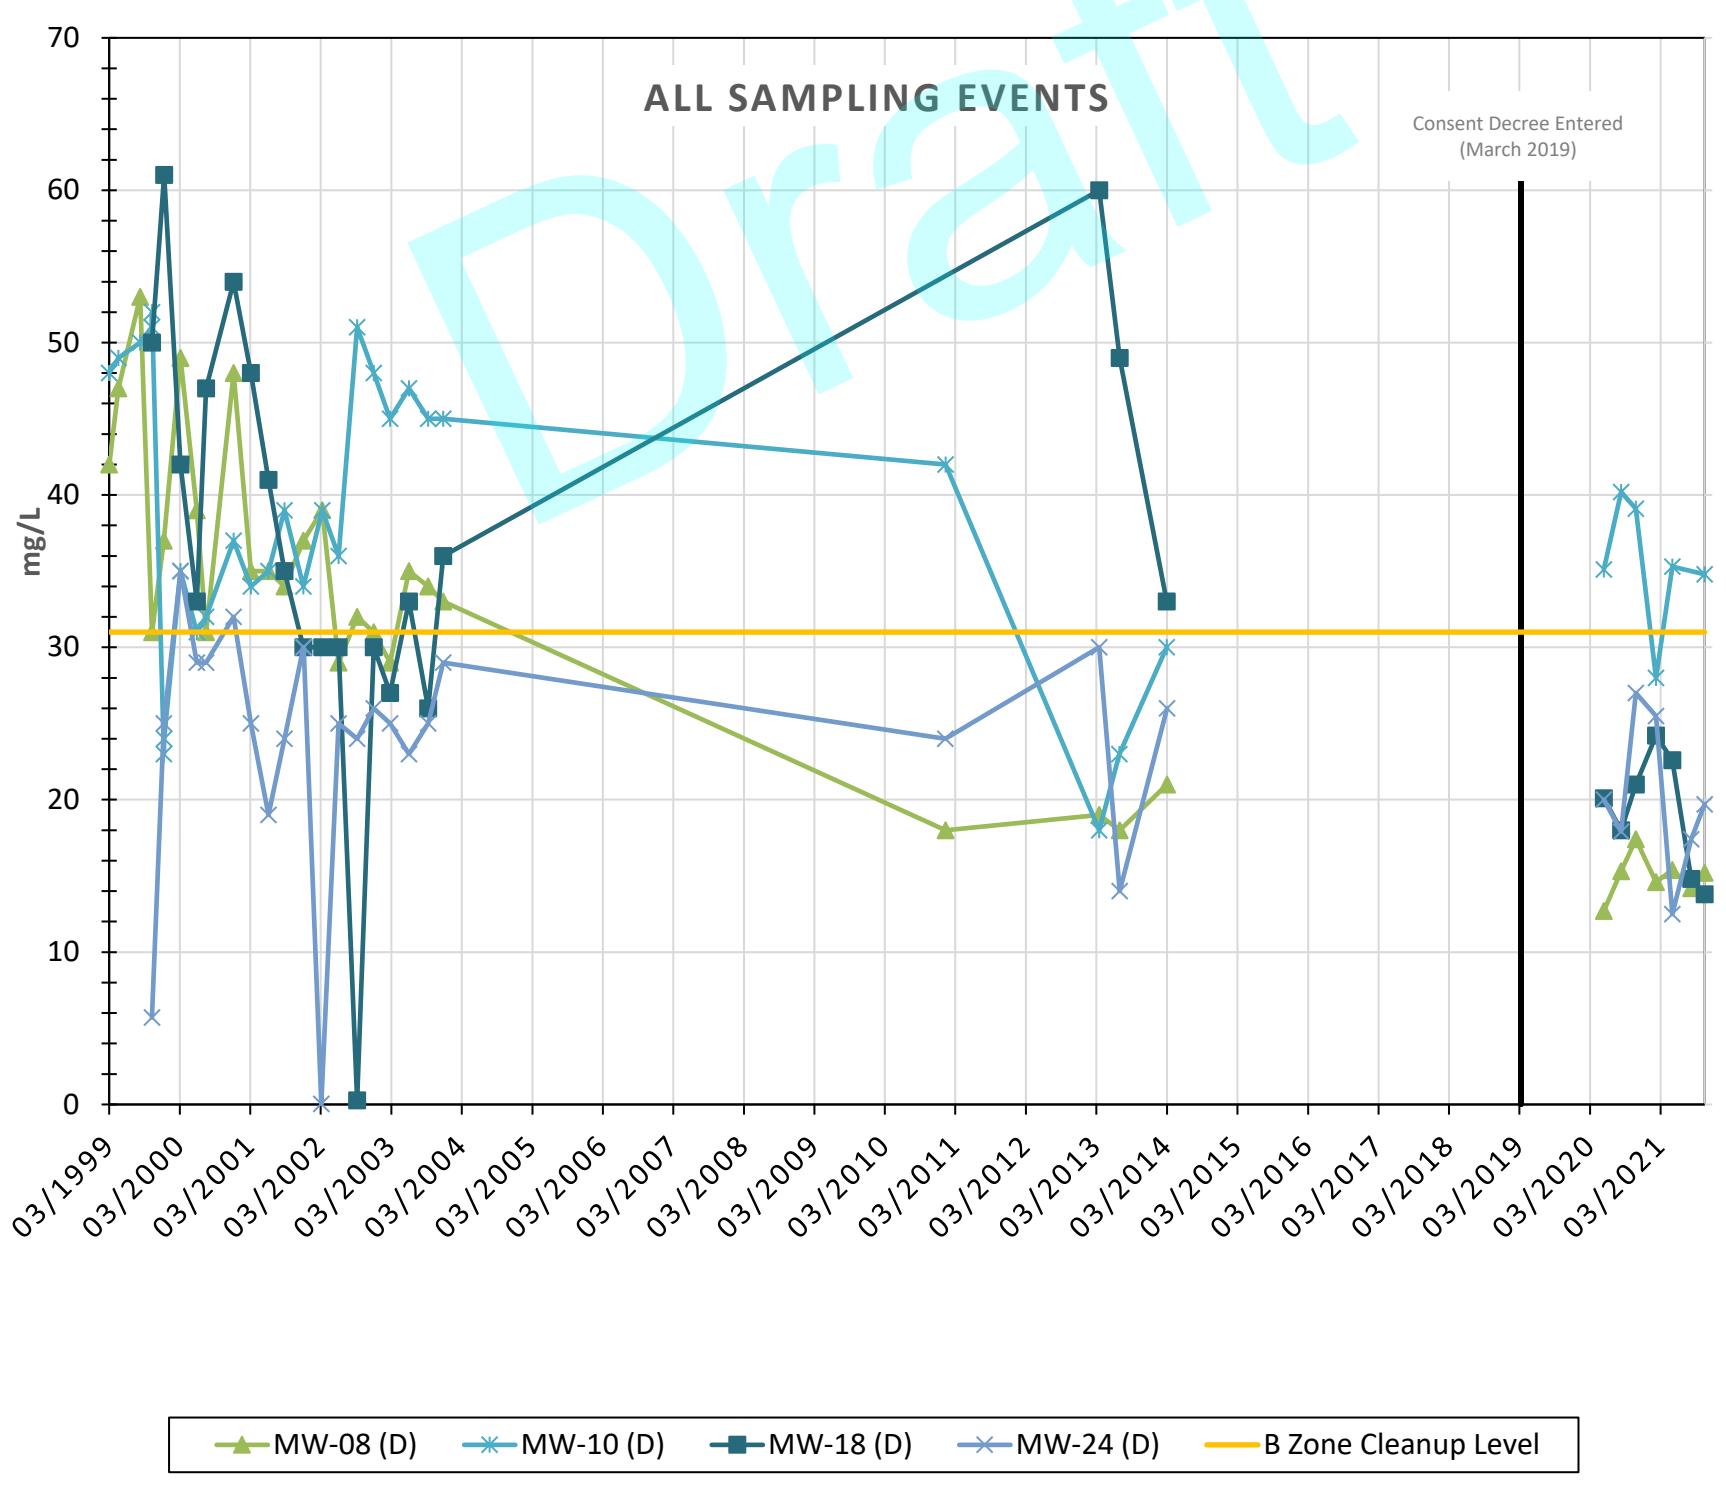

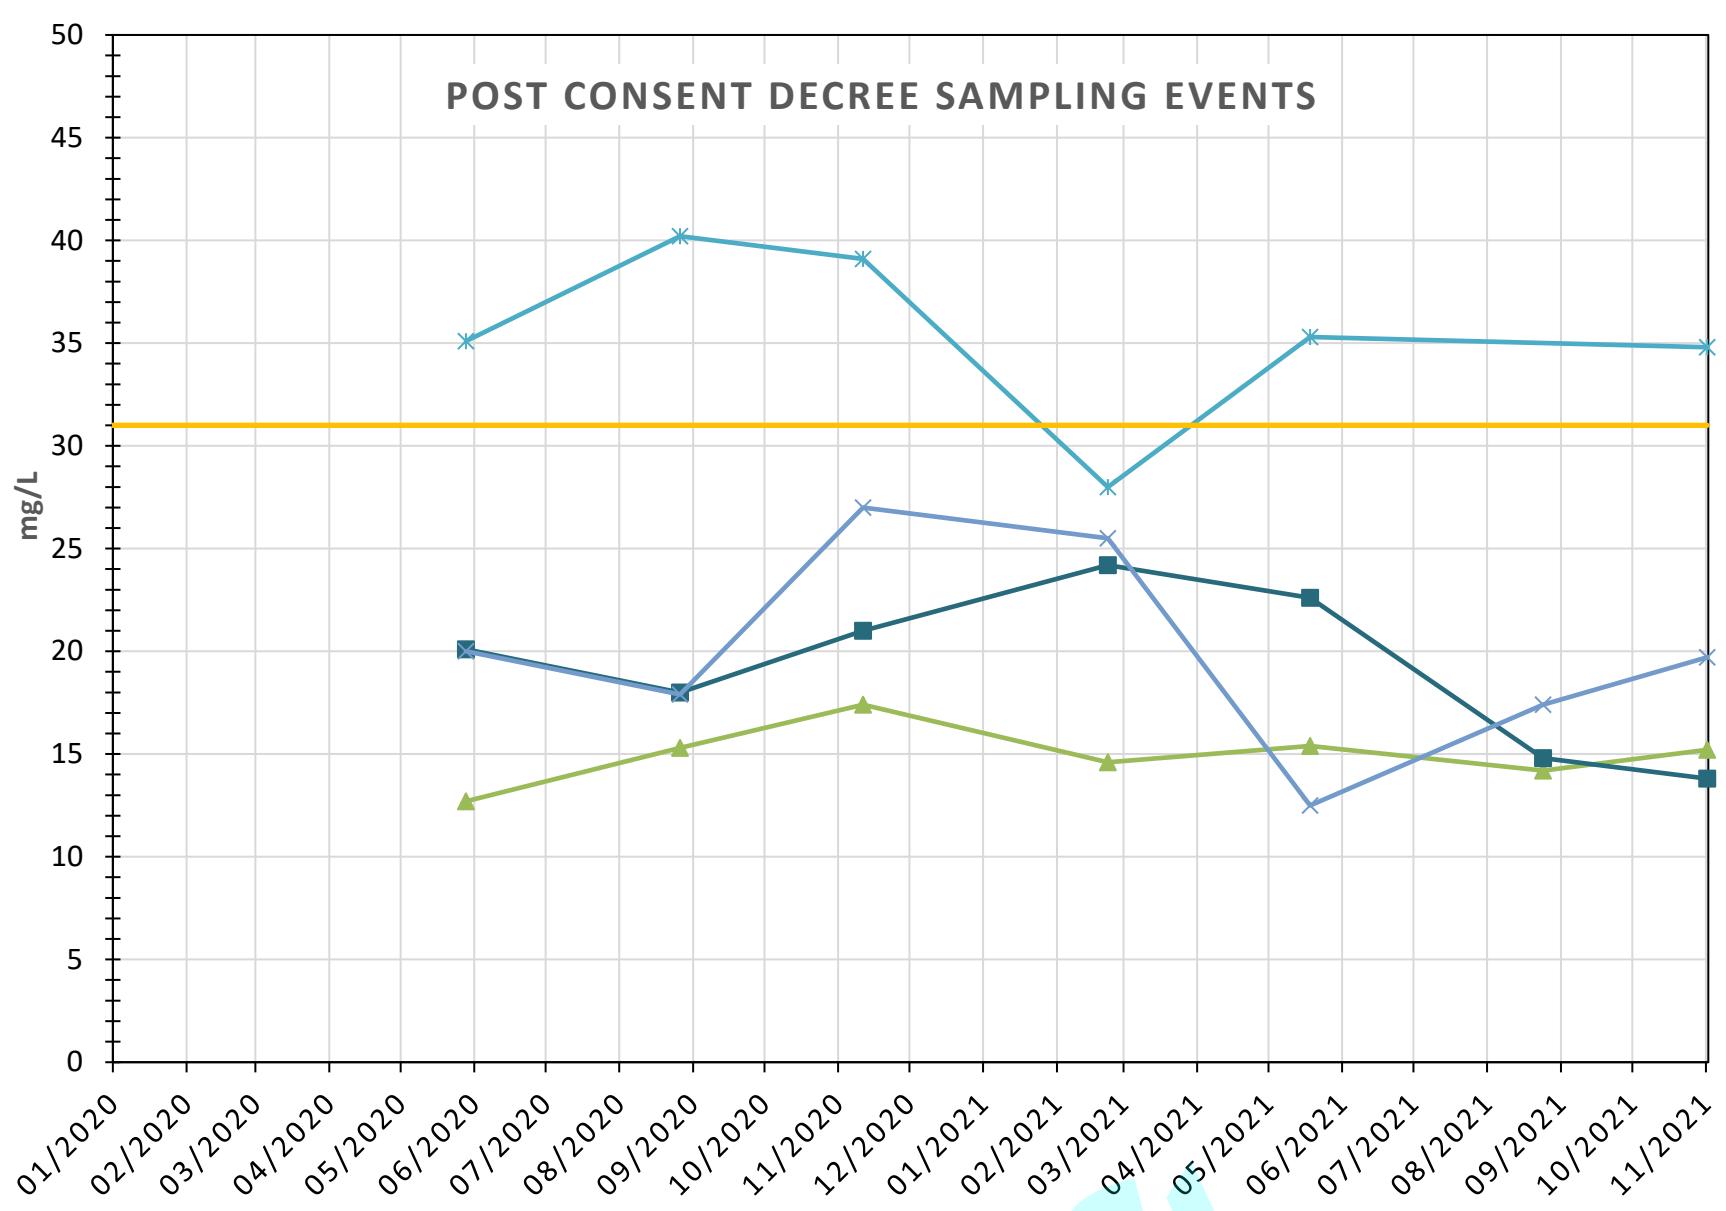

CPOC Conditional point of compliance

RE: South Park Landfill -Parametrix Water

Please find enclosed sample receipt documentation and analytical results for samples from the project referenced above.

Sample analyses were performed according to ARI's Quality Assurance Plan and any provided project specific Quality Assurance Plan. Each analytical section of this report has been approved and reviewed by an analytical peer, the appropriate Laboratory Supervisor or qualified substitute, and a technical reviewer.

Should you have any questions or problems, please feel free to contact us at your convenience.

## Work Order Case Narrative

**Client:** Seattle Public Utilities

**Project:** South Park Landfill -Parametrix Water

**Work Order:** 21K0307

### Sample receipt

Samples as listed on the preceding page were received 16-Nov-2021 16:00 under ARI work order 21K0307. For details regarding sample receipt, please refer to the Cooler Receipt Form.

### Volatiles - EPA Method SW8260D

The sample(s) were analyzed within the recommended holding times.

Initial and continuing calibrations were within method requirements.

Internal standard areas were within limits.

The surrogate percent recoveries were within control limits.

The method blank(s) were clean at the reporting limits.

The blank spike and blank spike duplicate (BS/LCS and BSD/LCSD) spike recoveries and relative percent difference (RPD) were within control limits.

### Volatiles - EPA Method 8260D-SIM (Selected Ion Monitoring)

The sample(s) were analyzed within the recommended holding times.

Initial and continuing calibrations were within method requirements.

Internal standard areas were within limits.

The surrogate percent recoveries were within control limits.

The method blank(s) were clean at the reporting limits.

The blank spike and blank spike duplicate (BS/LCS and BSD/LCSD) spike recoveries and relative percent difference (RPD) were within control limits.

### Total and Dissolved Metals - EPA Method 6020B

The sample(s) were digested and analyzed within the recommended holding times.

# Cooler Receipt Form

ARI Client: Parametrix / SPU

COC No(s): 21K030F NA

Assigned ARI Job No: 21K030F

Project Name: South Park Landfill

Delivered by: Fed-Ex UPS Courier Hand Delivered Other:

Tracking No: \_\_\_\_\_ NA

## Preliminary Examination Phase:

Were intact, properly signed and dated custody seals attached to the outside of the cooler? YES  NO

Were custody papers included with the cooler? YES  NO

Were custody papers properly filled out (ink, signed, etc.) YES  NO

Temperature of Cooler(s) (°C) (recommended 2.0-6.0 °C for chemistry)

Time 1600

5.7

Temp Gun ID#: D00-3009708

If cooler temperature is out of compliance fill out form 00070F

Cooler Accepted by: RB Date: 11/16/21 Time: 1600

**Complete custody forms and attach all shipping documents**

## Log-In Phase:

Was a temperature blank included in the cooler? YES  NO

What kind of packing material was used? ... Bubble Wrap Wet Ice Gel Packs Baggies Foam Block Paper Other: \_\_\_\_\_

Was sufficient ice used (if appropriate)? NA YES  NO

How were bottles sealed in plastic bags? Individually YES  NO

Did all bottles arrive in good condition (unbroken)? YES  NO

Were all bottle labels complete and legible? YES  NO

Did the number of containers listed on COC match with the number of containers received? YES  NO

Did all bottle labels and tags agree with custody papers? YES  NO

Were all bottles used correct for the requested analyses? YES  NO

Do any of the analyses (bottles) require preservation? (attach preservation sheet, excluding VOCs) ... NA YES  NO

Were all VOC vials free of air bubbles? NA YES  NO

Was sufficient amount of sample sent in each bottle? NA YES  NO

Date VOC Trip Blank was made at ARI: NA YES  NO

Were the sample(s) split by ARI? NA YES  Date/Time: \_\_\_\_\_ Equipment: \_\_\_\_\_ Split by: \_\_\_\_\_

Samples Logged by: RB Date: 11/16/21 Time: 9:37 Labels checked by: \_\_\_\_\_

### **Notes and Definitions**

- B This analyte was detected in the method blank.
- D The reported value is from a dilution
- E The analyte concentration exceeds the upper limit of the calibration range of the instrument established by the initial calibration (ICAL)
- J Estimated concentration value detected below the reporting limit.
- U This analyte is not detected above the reporting limit (RL) or if noted, not detected above the limit of detection (LOD).
- DET Analyte DETECTED
- ND Analyte NOT DETECTED at or above the reporting limit
- NR Not Reported
- dry Sample results reported on a dry weight basis
- RPD Relative Percent Difference
- [2C] Indicates this result was quantified on the second column on a dual column analysis.

RE: South Park Landfill -Parametrix Water

Please find enclosed sample receipt documentation and analytical results for samples from the project referenced above.

Sample analyses were performed according to ARI's Quality Assurance Plan and any provided project specific Quality Assurance Plan. Each analytical section of this report has been approved and reviewed by an analytical peer, the appropriate Laboratory Supervisor or qualified substitute, and a technical reviewer.

Should you have any questions or problems, please feel free to contact us at your convenience.

**Limits of Liability:** ARI will perform all requested services in accordance with appropriate methodology following ARI Standard Operating Procedures and the ARI Quality Assurance Program. This program meets standards for the industry. The total liability of ARI, its officers, agents, employees, or successors, arising out of or in connection with the requested services, shall not exceed the Invoiced amount for said services. The acceptance by the client of a proposal for services by ARI release ARI from any liability in excess thereof, notwithstanding any provision to the contrary in any contract, purchase order or co-signed agreement between ARI and the Client.

**Sample Retention Policy:** Unless specified by work order or contract, all water/soil samples submitted to ARI will be discarded or returned, no sooner than 90 days after receipt or 60 days after submission of hardcopy data, whichever is longer. Sediment samples submitted under PSDDA/PSEP/SMS protocol will be stored frozen for up to one year and then discarded.

## Work Order Case Narrative

**Client:** Seattle Public Utilities

**Project:** South Park Landfill -Parametrix Water

**Work Order:** 21K0331

### Sample receipt

Samples as listed on the preceding page were received 17-Nov-2021 16:45 under ARI work order 21K0331. For details regarding sample receipt, please refer to the Cooler Receipt Form.

### Volatiles - EPA Method SW8260D

The sample(s) were analyzed within the recommended holding times.

Initial and continuing calibrations were within method requirements.

Internal standard areas were within limits.

The surrogate percent recoveries were within control limits.

The method blank(s) were clean at the reporting limits.

The blank spike and blank spike duplicate (BS/LCS and BSD/LCSD) spike recoveries and relative percent difference (RPD) were within control limits.

Sample specific QC was performed in association with samples 21K0331-08 and 21K0331-15 in batch BJK0622. The matrix spike/matrix spike duplicate (MS/MSD) spike recoveries and relative percent difference (RPD) were within advisory control limits.

### Volatiles - EPA Method 8260D-SIM (Selected Ion Monitoring)

The sample(s) were analyzed within the recommended holding times.

The instrument malfunctioned in original run. Samples 21K0331-13, 21K0331-17 and 21K0331-19 were reanalyzed. All unpreserved vials for 21K0331-19 were compromised after injects and was analyzed out of an preserved vial.

Initial and continuing calibrations were within method requirements.

Internal standard areas were within limits.

The surrogate percent recoveries were within control limits.

The method blank(s) were clean at the reporting limits.

Project: South Park Landfill -Parametrix Water

Project Number: 553-155-067  
Project Manager: Jeff Neuner

**Reported:**  
04-Dec-2021 12:02

The blank spike and blank spike duplicate (BS/LCS and BSD/LCSD) spike recoveries and relative percent difference (RPD) were within control limits.

Sample specific QC was performed in association with samples 21K0331-08 and 21K0331-15 in batch BJK0588. The matrix spike/matrix spike duplicate (MS/MSD) percent recoveries and relative percent difference (RPD) were within advisory control limits.

**Total and Dissolved Metals - EPA Method 6020B**

The sample(s) were digested and analyzed within the recommended holding times.

Initial and continuing calibrations were within method requirements.

The method blank(s) were clean at the reporting limits.

The blank spike (BS/LCS) percent recoveries were within control limits.

Sample specific QC was performed in association with samples 21K0331-08 and 21K0331-15 in Total Metals batch BJL0028 and in association with samples 21K0331-09 and 21K0331-16 in Dissolved Arsenic batch BJL0029. The duplicate (DUP) relative percent difference (RPD) were within advisory control limits. The matrix spike/matrix spike duplicate (MS/MSD) percent recoveries and relative percent difference (RPD) were within advisory control limits except Total Iron which was out of control low in the MS/MSD (BKL0028-MS1, BKL0028-MS2, BKL0028-MSD1 and BKL0028-MSD2). Deviations have been flagged.

WORK ORDER

# Cooler Receipt Form

ARI Client: SPU

COC No(s): \_\_\_\_\_ NA

Assigned ARI Job No: 21K0331

Project Name: South Park Landfill

Delivered by: Fed-Ex UPS Courier Hand Delivered Other: \_\_\_\_\_

Tracking No: \_\_\_\_\_ NA

## Preliminary Examination Phase:

Were intact, properly signed and dated custody seals attached to the outside of the cooler? YES NO

Were custody papers included with the cooler? ..... YES NO

Were custody papers properly filled out (ink, signed, etc.) ..... YES NO

Temperature of Cooler(s) (°C) (recommended 2.0-6.0 °C for chemistry)

Time 16 45

3.9

Temp Gun ID#: D00 2565

If cooler temperature is out of compliance fill out form 00070F

Cooler Accepted by: AP Date: 11/17/21 Time: 16 45

**Complete custody forms and attach all shipping documents**

## Log-In Phase:

Was a temperature blank included in the cooler? ..... YES NO

What kind of packing material was used? ... Bubble Wrap Wet Ice Gel Packs Baggies Foam Block Paper Other: \_\_\_\_\_

Was sufficient ice used (if appropriate)? ..... NA YES NO

How were bottles sealed in plastic bags? ..... Individually Grouped Not

Did all bottles arrive in good condition (unbroken)? ..... YES NO

Were all bottle labels complete and legible? ..... YES NO

Did the number of containers listed on COC match with the number of containers received? ..... YES NO

Did all bottle labels and tags agree with custody papers? ..... YES NO

Were all bottles used correct for the requested analyses? ..... YES NO

Do any of the analyses (bottles) require preservation? (attach preservation sheet, excluding VOCs) ... NA YES NO

Were all VOC vials free of air bubbles? ..... NA YES NO

Was sufficient amount of sample sent in each bottle? ..... YES NO

Date VOC Trip Blank was made at ARI..... NA \_\_\_\_\_

Were the sample(s) split by ARI? NA YES Date/Time: \_\_\_\_\_ Equipment: \_\_\_\_\_ Split by: \_\_\_\_\_

Samples Logged by: BB Date: 11/19/21 Time: 1013 Labels checked by: \_\_\_\_\_

#### **Notes and Definitions**

- \* Flagged value is not within established control limits.
- B This analyte was detected in the method blank.
- D The reported value is from a dilution
- E The analyte concentration exceeds the upper limit of the calibration range of the instrument established by the initial calibration (ICAL)
- HC The natural concentration of the spiked analyte is so much greater than the concentration spiked that an accurate determination of spike recovery is not possible
- J Estimated concentration value detected below the reporting limit.
- U This analyte is not detected above the reporting limit (RL) or if noted, not detected above the limit of detection (LOD).
- DET Analyte DETECTED
- ND Analyte NOT DETECTED at or above the reporting limit
- NR Not Reported
- dry Sample results reported on a dry weight basis
- RPD Relative Percent Difference
- [2C] Indicates this result was quantified on the second column on a dual column analysis.
