1.0 INTRODUCTION

At the request of Tacoma Community Redevelopment Authority (TCRA), Landau Associates, Inc. (LAI) conducted a Phase I environmental site assessment (ESA) of six parcels currently owned by the city of Tacoma, located east of South 35th Street and Pacific Avenue in Tacoma, Washington. These six parcels (Pierce County Parcel Nos. 2086130020, 2086130030, 2085140040, 2085140070, 2086140010, and 2086140020) are referred to as the subject property (Figures 1 and 2).

LAI understands that the subject property was used as a landfill from the early 1960s through 1992 and has often been referred to as the “City of Tacoma 35th Street Landfill,” “35th Street Landfill City Fill,” or “City of Tacoma’s Former Streets and Grounds Fill Site” (GeoEngineers 2007; LAI 2008c). The subject property consists of a portion of the former landfill site but does not include 100 percent of the former landfill site’s footprint.

TCRA is considering selling the subject property to a private developer or co-partnering with a private developer to construct affordable multi-family housing units or a mixed-use complex on the subject property. TCRA has requested this Phase I ESA as part of its due diligence process to evaluate and document conditions related to the subject property that could present environmental liabilities to an owner or future owner.

| | |
|--|---|
| Property name: | South 35th Street and Pacific Avenue |
| Property parcel number(s) and address: | The subject property consists of six parcels (Pierce County Parcel Nos. 2086130020, 2086130030, 2085140040, 2085140070, 2086140010, and 2086140020) that are currently owned by the City of Tacoma (City). The parcels comprise 2.41 acres in total area. A vicinity map for the subject property is shown on Figure 1. Details of the subject and adjacent properties are shown on Figure 2. |
| Legal description (or other physical property description): | Based on information from the Pierce County PublicGIS interactive map tool (Pierce County; accessed December 29, 2020), the abbreviated legal descriptions of the subject property parcels are as follows: 2085140040: Section 09 Township 20 Range 03 Quarter 34 TACOMA LD COS 1ST L 4 THRU 9 & N 1/2 OF 10 & S 1/2 OF 13, L 14 THRU 17 B 8514 TOG/W THAT POR OF VAC S 35TH ST ABUTT L 1 THRU 10 PER ORD 26270 DC9/14/00MA 2085140070: Section 09 Township 20 Range 03 Quarter 34 : TACOMA LD COS 1ST S 1/2 OF L 10, L 11 & 12 & N 1/2 OF 13 B 8514 2086130020: Section 09 Township 20 Range 03 Quarter 34 : TACOMA LD COS 1ST L 4 THRU 8 & N 1/2 OF 9 & S 1/2 OF 11, L 12 THRU 18 B 8613 2086130030: Section 09 Township 20 Range 03 Quarter 34 : TACOMA LD COS 1ST S 1/2 OF L 9, L 10 & N 1/2 OF 11 B 8613 2086140010: Section 09 Township 20 Range 03 Quarter 34 : TACOMA LD COS 1ST L 3 THRU 8 B 8614 2086140020: Section 09 Township 20 Range 03 Quarter 34 : TACOMA LD COS 1ST L 9 & 10 B 8614 |

The purpose of this Phase I ESA was to assess and document *recognized environmental conditions*, *historical recognized environmental conditions*, and *controlled recognized environmental conditions* at the subject property that may pose a potential liability to an owner of the property.

A *recognized environmental condition* (REC) is defined as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property due to any release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment. The term includes hazardous substances or petroleum products, even under conditions in compliance with laws. The term is not intended to include *de minimis* conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of the appropriate government agencies.

An *historical recognized environmental condition* (hREC) is defined as a past release of any hazardous substances or petroleum products that has occurred in connection with a property that has been addressed to the satisfaction of the applicable regulatory authority or has met unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.

A *controlled recognized environmental condition* (cREC) is defined as a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

This Phase I ESA was conducted by the following professionals:

| Project Professionals | |
|---|---|
| Data collection, review, and reporting: | Dave Johnson, PE; Associate Engineer (Environmental Professional) Cody Laramie, Staff EIT |
| Site reconnaissance: | Dave Johnson, PE; Associate Engineer (Environmental Professional) |
| Senior professional and report reviewer: | Jeff Fellows, PE; Principal Engineer (Environmental Professional) |

1.1 Scope of Services

The scope of services performed, as established in LAI's scope of work, consisted of completing a Phase I ESA, which included a review of the history of the subject property, a review of agency information, interviews, and a site reconnaissance to visually observe current land-use activities and environmental conditions.

LAI conducted this Phase I ESA in accordance with the guidelines of ASTM International (ASTM), as identified in its *Standard Practice for Environmental Site Assessment Process*, E 1527-13. This standard, while subject to change (as are all ASTM standards), is recognized as meeting the due diligence provisions of the federal statute (Comprehensive Environmental Response, Compensation,

and Liability Act [CERCLA]; 42 United States Code [USC] 9601 [35][B]) and the Washington State Model Toxics Control Act (MTCA; Revised Code of Washington 70.105D.040) at the time this report was prepared. ASTM E 1527-13 satisfies the elements of the US Environmental Protection Agency’s (EPA’s) all appropriate inquiries (AAI) rule, which establishes requirements that purchasers must meet to limit their environmental liability under CERCLA and qualify for liability protections, including the “Innocent Purchaser,” “Bona Fide Prospective Purchaser,” and “Contiguous Property Owner” liability defenses that are provided by CERCLA.

Elements not included in ASTM E 1527-13 (e.g., identification, sampling, and analysis of asbestos, radon, lead paint, and lead in drinking water; identification of wetlands; regulatory compliance; cultural and historic resources; indoor air quality and vapor intrusion, including the potential presence of mold or other biological contaminants; industrial hygiene; health and safety; ecological resources; and endangered species) were not included in the scope of services unless specifically identified therein.

The Phase I ESA process is not a means of “finding everything there is to know about a property.” Rather, it is an effort to evaluate the environmental liabilities associated with a property based on reasonably available documentation (both oral and written) within the budget, schedule, and project-specific limitations, in accordance with the EPA’s AAI rule. Authorization to proceed with these services was provided by Felicia Medlen of TCRA on December 1, 2020.

1.2 Limitations and Exceptions

The following summarizes exceptions, limitations, and restrictions to the scope of services:

| | |
|--|-------|
| Exceptions to, or deletions from, the above-referenced scope of services: | None. |
| Weather-related property restrictions: | None. |
| Property/facility access restrictions: | None. |

Data gaps identified during this Phase I ESA are discussed in Section 8.1.

2.0 SITE DESCRIPTION AND SETTING

The subject property is undeveloped land that generally slopes gently downward to the northeast, with steeper north and northeast facing slopes descending into a natural ravine at the northern subject property boundary. Ground cover generally consists of grasses and weeds with intermittent small bushes in the center of the subject property. Trees are generally confined to the edges of the subject property and, while varied, skew towards a mixture of deciduous species. Scattered and overgrown piles of construction debris consisting primarily of waste concrete were observed throughout the subject property. The surrounding area land use is currently zoned as Community Commercial Mixed-Use (CCX; City of Tacoma, accessed January 8, 2021), consisting of residential, commercial, and light industrial land uses.

Historically, Pacific Avenue had been constructed parallel to a natural ravine that extended roughly a half mile or more from approximately East 37th Street to Interstate 5 (I-5). Beginning around the early 1960s, demolition and grading activities associated with the I-5 and Interstate 705 (I-705) extension projects were generating massive quantities of construction-related debris. The 35th Street Landfill, which includes the subject property, was created as a portion of the landfill extent to accommodate these and other large construction projects within the City of Tacoma (GeoEngineers 2007). The bulk of the fill material was placed during construction of the I-5/I-705 extension between 1960 and 1965 and a large part of this early material was fill dirt (LAI 2008c).

The Dickson Company purchased an adjacent property south of the 35th Street Landfill in 1973 with the intent to dispose of inert construction debris consisting primarily of reinforced concrete and soil (GeoEngineers 2007). In 1987, the City of Tacoma instructed the Dickson Company to cease dumping after it was discovered that debris had been placed on City owned property (GeoEngineers 2007).

Between 1985 and 1990, the subject property and greater landfill area was used by the City to dispose of vector waste from catch basin cleanings and street sweeping material (LAI 2008c). Environmental concerns were raised in the late 1980s and early 1990s and the landfill was shut down in 1992. In 1991, the City re-graded the site to improve slope stability (LAI 2008c). At the close of the landfill, an estimated 5 to 8 acres had been brought to grade with the surrounding properties and fill depths extended to around 100 feet below ground surface (bgs) near the northern end of the ravine (LAI 2008c).

The subject property is currently inhabited by a homeless camp with a population of about 10 to 20 people living in tents and temporary wooden structures. Scattered piles of municipal solid waste are located throughout the subject property. Evidence of trash or wood burning is also present at the subject property.

2.1 Subject Property Description

The subject property is characterized by the following features:

| | |
|---|---|
| Property description (acreage, structures, roads, and other improvements): | The subject property is approximately 2.41 acres in total size and consists of six parcels. An asphalt roadway extends east approximately 200 feet (ft) onto the subject property from the gated entrance at South Division Lane and Pacific Avenue. Ground cover generally consists of grasses and weeds with intermittent small bushes in the center of the subject property. Trees are generally confined to the edges of the subject property and skew toward a mixture of deciduous species. |
| Property access: | Access to the subject property is gated at the intersection of South Division Lane and Pacific Avenue and is generally blocked by concrete barriers at the parking lot adjacent to the intersection of South 35th Street and Pacific Avenue. Trails are present onto the subject property from the northern and southern property boundaries, and at the gap between the gate and fence along Pacific Avenue. |
| Estimated percentage of property covered by buildings and/or pavement: | Pavement: Less than 5 percent; limited asphalt paving near South Division Lane. |
| Property operations: | The subject property is currently undeveloped (vacant) land. |
| Type of sewage disposal system provider: | Subject property is not serviced by a public sanitation sewer provider. |
| Potable water source/provider: | Subject property is not serviced by a public water provider or well. |
| Electric utility: | Subject property is not serviced by a public electricity provider. |
| Natural gas utility: | Subject property is currently not serviced by a natural gas provider. |
| Heat source for buildings: | None. |
| Stormwater management facilities: | Stormwater at the subject property infiltrates into site soils or sheet flows off the subject property towards the natural ravine area to the northeast. |

The subject and adjacent properties are shown on Figure 2 and selected site photographs are provided in Appendix A.

2.2 Adjacent Properties

The subject property is located adjacent to the following properties.

| | |
|---------------|---|
| North: | The subject property is bordered to the north by downgradient undeveloped (vacant) land. |
| East: | The subject property is bordered by single-family residential homes to the east. |
| South: | The subject property is bordered to the south by undeveloped (vacant) land. |
| West: | The subject property is directly bordered by Pacific Avenue along the southwest and single-family residential homes. Across Pacific Avenue roadway are small commercial properties. |

2.3 Site Geology and Hydrogeology

The subject property topography, geology, hydrogeology, and surface water are described below.

| | |
|---|--|
| Topography: | Site topography is generally sloped with a gently decreasing grade to the northeast, which descends into steeper slopes to the north and northeast at the northern subject property boundary. A drainage feature is present at the southeastern property corner. Elevations onsite range between approximately 310 ft to 280 ft above mean sea level. Existing surface features at the subject property are not natural and have most recently been adjusted in 1991 during re-grading efforts for slope stability (LAI 2008c). |
| Geology: | <p>Regional geologic mapping was obtained from the Geologic Map of the Tacoma Quadrangle, Pierce and King Counties, Washington (Minard 1985). The local geology can be summarized as Pleistocene-age glacial till (Qgt) which typically consists of an unsorted, glacially transported and deposited mixture of sub-rounded to well-rounded clasts in a massive, silt- or sand-rich matrix. Geotechnical soil boring logs for the site adjacent to the southern subject property boundary, found on the Washington State Department of Ecology's Washington State Well Report Viewer (Ecology; accessed January 7, 2021), suggest that native soils at the subject property may be present at 70 ft to 100 ft bgs and consist primarily of sand with gravel.</p> <p>The natural ravine that had previously bisected the site was filled with fill materials derived, primarily, from the I-5, I-705, and Highway 7 extensions; City of Tacoma Public Utilities construction projects; and various large private construction projects (LAI 2008c). Subject property soils may consist of more than 100 ft of glacial silts, sands, gravels, and cobbles mixed with waste asphalt, concrete, masonry, and other construction debris.</p> <p>The generic mapped geology is not consistent with the historical use of the subject property as a landfill.</p> |
| Hydrogeology: | <p>Site groundwater is expected to accumulate on the original ground surface soil horizon or relatively lower permeability layers below this surface to form isolated areas of perched groundwater and flow along the pre-existing grade northeast towards the Thea Foss Waterway, and subsequently to Commencement Bay (LAI 2008c). This presumption is supported by descriptions of weeping surface water at the base of the fill, north of the 34th Street Bridge (GeoEngineers 2007).</p> <p>Isolated areas of perched groundwater may be present within the glacially derived fill material.</p> |
| Floodplain and Surface Water Features: | Based on Environmental Data Resources Inc.'s (EDR's) Radius Map Report (Appendix B), the subject property is not located within any flood zones, as defined by the Federal Emergency Management Agency. Natural surface water features are generally absent in the vicinity of the site. |

3.0 HISTORICAL INFORMATION

The following historical resources were reviewed to help identify prior uses of the subject and adjacent properties that could potentially result in environmental impact to the subject property:

- Aerial photographs (Environmental Data Resources, Inc. [EDR] 1941, 1944, 1957, 1968, 1971, 1980, 1990, 2006, 2009, 2013, and 2017)
- Topographic maps (EDR 1897, 1900, 1941, 1944, 1949, 1961, 1968, 1973, 1981, 1994, 1997 and 2014)
- Sanborn fire insurance maps (EDR 1896, 1912, 1950, 1963, and 1969)
- City directories (EDR 1921, 1926, 1931, 1936, 1942, 1947, 1953, 1958, 1963, 1965, 1970, 1974, 1978, 1983, 1988, 1993, 1994, 1999, 2004, 2009, 2010, 2014, and 2017).

A summary of the development history of the subject and adjacent properties derived from review of the historical aerial photographs, topographic maps, Sanborn fire insurance maps, and city directories is provided in Section 3.1; copies of the historical aerial photographs, topographic maps, city directories, and Sanborn fire insurance maps from EDR are provided in Appendices C, D, E, and F, respectively.

3.1 History of Subject and Adjacent Properties

The table below summarizes the development history of the subject and adjacent properties derived from LAI's review of the available historical resources. Only significant changes to the subject or surrounding properties are noted in the table. Unless stated otherwise, if an area is not listed, no significant changes were apparent in comparison with sources for the preceding entry.

| Year | Aerial Photograph | Topographic Map | Sanborn Map | City Directory | Subject Property | Adjacent Properties |
|-----------|-------------------|-----------------|-------------|----------------|--|---|
| 1897-1941 | | X | X | X | Subject property appeared to be undeveloped land within a north-south oriented natural ravine. Topographic lines depict a grade change of at least 100 ft, between 300 ft and 200 ft above mean sea level. | A north-south oriented roadway to the west of the subject property was likely the Pacific Avenue analog for this time period, taking on the name by at least 1912. A north-south oriented railway had been constructed along the modern-day Highway 7 to the east of the subject property. Areas of the topographic map in the vicinity of the subject property were gridded for roadways approximately perpendicular to the ravine. Notes on the 1912 Sanborn Map describe the 34th Street Bridge as being "about 150 ft above bottom of gulch." |

| Year | Aerial Photograph | Topographic Map | Sanborn Map | City Directory | Subject Property | Adjacent Properties |
|-----------|-------------------|-----------------|-------------|----------------|--|--|
| 1941-1961 | X | X | X | X | Aerial photography showed the subject property was heavily wooded, presumed undeveloped, with deep shadows running through the center of the site in the approximate location of the natural ravine on a north-south orientation. | By 1941, roadways in the vicinity of the subject property were generally in their modern-day configurations. Residential and commercial structures along the eastern and western property boundaries were also generally in their modern-day locations. Shadows hinted at the 34th Street Bridge north of the site and a possible sewer pipeline or lesser bridge structure along the southern property boundary. By 1957, some grubbing and fill activity had begun east of Pacific Avenue and 38th Street. By 1961, construction of I-5 had progressed from 56th Street to 38th Street and had made the eastwards turn towards the Port of Tacoma and City of Fife. Service stations are identified on the 1950 Sanborn Map at the southwest corners of the intersections of 35th Street and Pacific Avenue and 34th Street and Pacific Avenue. |
| 1968-1990 | X | X | X | X | By 1968, the ravine at the center of the subject property had been at least partially filled. The subject property appeared to be becoming more vegetated between 1968 and 1980. Aerial photography shows activity had occurred on the subject property after 1980. The subject property appeared to be stripped of vegetation or had continued to be filled, and apparent debris were present at the northeastern property corner. | By 1968, construction of the I-5, I-705, and Highway 7 extension projects appeared to have been generally completed to the north and east of the subject property. The ravine appeared to have been generally filled, with shadows between South Division Lane and East Division Lane suggesting a downgradient slope to the north extending beneath the 34th Street bridge. By 1969, the Sanborn Map shows the service station at the southwest corner of the intersection of 35th Street and Pacific Avenue was reduced in size to just the lubricating services. The surrounding properties remained generally unchanged in 1990. Backfill or grubbing operations appeared to have been conducted adjacent to the south side of the 34th Street Bridge. |
| 1990-2017 | X | X | | X | The subject property entered a phase of vegetation regrowth but remained generally unchanged in use. | The surrounding properties entered a phase of vegetation regrowth but remained generally unchanged in use. |

Based on the historical records reviewed, the subject property had remained generally undeveloped until sometime after 1961. By 1968, massive quantities of fill material (i.e., construction debris) were

placed to raise the grade of the ravine to that of the surrounding properties. Development of the surrounding properties was generally residential, with some mixed commercial along Pacific Avenue.

Based on LAI's review of historical records, one REC was identified for the subject property.

- The presence of documented filling activities is a REC for the subject property.

3.2 Prior Site Investigations

Previous investigations of the subject property were conducted by the City of Tacoma and the Tacoma-Pierce County Health Department (TPCHD) from approximately 1990 to 2006. These investigations included soil, groundwater seep, and air sampling. These investigations confirmed that much of the near-surface fill consists of soil mixed with inert material such as waste concrete, asphalt, and brick. Data results also identified minor arsenic and total petroleum hydrocarbon (TPH) impacts to soil and the presence of low levels of methane (LAI 2008a).

The landfill site, which includes the parcels comprising the subject property, was included on the Washington State Department of Ecology's (Ecology's) Confirmed and Suspected Contaminated Sites List (CSCSL) after an initial investigation by the TPCHD in August 2005. LAI submitted a Voluntary Cleanup Program (VCP) application to Ecology on behalf of the City on February 27, 2008 to conduct independent remedial actions under Ecology supervision. LAI subsequently submitted an independent remedial action report on March 11, 2008 (LAI 2008a) and requested a no further action (NFA) determination for the landfill site based on previously collected data. After reviewing the data, Ecology issued a further action determination on April 19, 2008 (Ecology 2008b) requiring additional remedial actions to characterize the site. Based on previous investigations and site history, Ecology defined the primary contaminants of concern (COCs) at the site as TPH and carcinogenic polycyclic aromatic hydrocarbons (cPAHs) in soil (Ecology 2008b). These contaminants are consistent with the type of constituents related to vector waste (i.e., material from street catch basins) and street sweeping material. Methane was also detected in soil gas and was likely generated from decomposition of organic debris (e.g., leaves, branches, yard waste, etc.) disposed along with soil and inert material.

In 2008, LAI provided a remedial investigation work plan (LAI 2008b) and the subsequently completed a remedial investigation (RI), feasibility study (FS), and presented a cleanup action plan (CAP) in response to the Ecology's further action determination (LAI 2008c). The RI/FS/CAP report was prepared in accordance with MTCA (WAC 173-340) under the VCP. The RI/FS/CAP was conducted to document current site soil, groundwater, surface water, and air conditions and to identify a final cleanup action that would be protective of human health and the environment and consistent with future development plans. The results of the RI/FS/CAP and subsequent agency review letters are summarized in detail in Section 3.2.1 below.

3.2.1 Remedial Investigation, Feasibility Study, Cleanup Action Plan

The results of the RI are as follows:

- Based on the RI sampling data set, the only constituent that exceeded cleanup levels was cPAHs in soil. CPAHs were detected above the cleanup level from between 4 and 20 ft bgs in eight of eleven samples. Three of the eight exceedances were from samples below the point of compliance (i.e., below 15 ft). Overall, cPAH impacts to the site, while above the cleanup standard, are considered low to moderate. CPAHs are relatively common constituents in urban environments and would be expected in vector waste and street sweepings. The occurrence of cPAHs at the site is consistent with the historical use of this site as an area where these materials were placed.
- Based on the historical data set, some arsenic concentrations were detected above the MTCA soil cleanup level. However, the RI data set did not indicate an exceedance of arsenic in soil. For the purposes of site characterization, the RI data set is considered higher quality and therefore more representative.
- Impacts to groundwater are not a concern at the site. Groundwater was not encountered in fill soil. The groundwater seep sample collected at the toe of the fill slope did not have detected constituents above cleanup levels. Evaluation of TPH-related constituents and arsenic indicate soil concentrations are below levels that would impact groundwater through the soil to groundwater pathway.
- Methane being generated at the site is likely from decaying organic matter within the fill material. The source of the organic matter was not identified in site explorations and is assumed to be distributed throughout the fill. Methane concentrations in RI wells is generally low but variable. Concentrations were detected above the lower explosive limit (LEL) during at least one sampling event in three locations. These data indicate the potential for methane to accumulate in onsite structures without appropriate mitigation. Previous investigations suggest that methane concentrations are declining over time and are not present offsite.

The results of the FS and CAP are presented below:

- Potential cleanup actions were divided into active and passive actions. Cleanup actions were evaluated based on effectiveness, implementability, and cost. Applicable actions were combined into proposed cleanup action alternatives.
- Potentially viable active cleanup actions identified for the site were:
 - excavation and offsite disposal, soil stabilization or encapsulation, and containment.
- Potentially viable passive cleanup actions identified for the site were:
 - soil gas venting and monitoring, institutional controls, education, fencing or other access constraints.
- The recommended cleanup action alternative consisted of the following combination of active and passive cleanup actions:
 - *In-situ* containment of impacted soil left in place
 - Venting and monitoring of soil gas for methane

-
- Deed restrictions in the form of an environmental covenant
 - Preparation of an operation and maintenance manual for the site for compliance monitoring
 - Preparation of a health and safety plan.

The RI/FS/CAP report was reviewed by TPCHD and Ecology, and both agencies provided formal letter responses. The TPCHD letter states: *the recommendation of the installation of a soil gas venting system with follow-up monitoring is adequate with the condition (noted in the report) that the technology would be flexible to allow for the inclusion of active pumping if deemed necessary based upon future monitoring* (TPCHD 2008). Ecology issued an opinion letter which states: *Ecology has determined that, upon completion of your proposed cleanup, no further remedial action will likely be necessary to clean up contamination at the Site* (Ecology 2008a).

Based on LAI's review of available records related to prior subsurface environmental investigations, several RECs were identified for the subject property including:

- The presence of prior filling activities, which included placement of recycled construction debris, organic materials, vector waste (i.e., material from street catch basins), and street sweeping material within the fill is a REC for the subject property.
- The known presence of cPAHs, arsenic, and TPH-impacted soil is a REC for the subject property.
- The presence and degradation of organic debris (i.e., leaves, branches, yard waste, etc.) within the fill material are the suspected source of elevated methane gas levels. The known presence of elevated methane in soil gas is a REC for the subject property.

4.0 USER-PROVIDED INFORMATION

LAI requested that TCRA (User) provide information based on actual or specialized knowledge or experience regarding the subject property that is or could be relevant to RECs. Jason Mejia, a Contract and Program Auditor with TCRA, provided the following information:

| User-Provided Information | | |
|--|---|---|
| | User Response | User Comments |
| Is the <i>user</i> aware of any environmental cleanup liens against the subject property that are filed or recorded under federal, tribal, state, or local law? | Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> | |
| Is the <i>user</i> aware of any Activity and Use Limitations, such as engineering controls, land use restrictions, or institutional controls, that are in place at the subject property and/or have been filed or recorded in a registry under federal, tribal, state, or local law? | Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> | |
| Does the <i>user</i> have any specialized knowledge or experience related to the subject property or nearby properties? | Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> | |
| Does the purchase price being paid for the subject property reasonably reflect the fair market value of the subject property? | Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> | This property is being offered at no cost in return for an affordable housing benefit. |
| Does the <i>user</i> know the past uses of the subject property? | Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> | This property was used to dump construction debris for the construction of HWY 7 and other city construction projects. |
| Does the <i>user</i> know of specific chemicals that are present or once were present at the subject property? | Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> | A phase 1 was completed on the property in 2007. The chemicals found in the ground were methane, cPAHs, and motor oil petroleum hydrocarbons. |
| Does the <i>user</i> know of spills or other chemical releases that have taken place at the subject property? | Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> | |
| Does the <i>user</i> know of any environmental cleanups that have taken place at the subject property? | Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> | |
| Based on the <i>user's</i> knowledge and experience related to the subject property, are there any obvious indicators that point to the presence or likely presence of contamination at the subject property? | Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> | |

Based on review of the user-provided information, several RECs were identified including:

- The presence of prior filling activities, which included placement of recycled construction debris, organic materials, vector waste (i.e., material from street catch basins), and street sweeping material within the fill is a REC for the subject property.

- The known presence of cPAHs, arsenic, and TPH-impacted soil is a REC for the subject property.
- The presence and degradation of organic debris (i.e., leaves, branches, yard waste, etc.) within the fill material are the suspected source of elevated methane gas levels. The known presence of elevated methane in soil gas is a REC for the subject property.

These RECs are discussed in detail under Section 3 and Section 5 and summarized in Section 8.

5.0 AGENCY RECORDS REVIEW

LAI reviewed information from publicly available environmental databases. LAI also contacted the City of Tacoma (including the Fire/Emergency Response/Health District), the TPCHD, and Ecology regarding potential environmental concerns at the subject property. Information collected during the review of agency records is summarized below.

5.1 Environmental Database Report

EDR was subcontracted to conduct a search (as prescribed by ASTM) of publicly available federal, state, and local agency environmental databases. A regulatory agency database report was obtained from EDR, a complete copy of which is provided in Appendix B.

The search focused on information in the various lists maintained by the agencies of sites with known and potential environmental concerns that may present a threat to human health and the environment. EDR conducted its search of listed information using the location of the subject property, and identified sites listed in the databases that are located within a 1-mile radius of the subject property boundaries. Sites identified in the EDR report were evaluated as described in the database assessment criteria included in Appendix B.

Due to the nature of contaminant migration, only sites located within 0.25 miles and hydraulically upgradient of the subject property, or sites higher than or at equal elevation as the subject property that have activities that may affect the subsurface, were assumed to have the potential to environmentally impact the subject property. As noted in Section 2.3, the direction of groundwater flow is anticipated to be to the northeast based on topography. Therefore, sites to the southwest are considered upgradient of the subject property. Properties directly adjacent to the subject property are also considered to have the potential to impact the subject property due to their immediate proximity.

5.1.1 Subject Property

The subject property was listed in the following environmental databases:

- **ALLSITES:** Ecology's Facility/Site Identification System
- **ASBESTOS:** Labor and Industries' database of known asbestos sites
- **CSCSL:** Ecology's Confirmed and Suspected Contaminated Sites List
- **ECHO:** The EPA's Enforcement & Compliance History Information
- **EDR HIST AUTO:** EDR's unregulated directory of high-risk historical records pertaining to automotive facilities
- **FINDS:** The EPA's Facility Index System/Facility Registry System
- **LUST:** Ecology's Leaking Underground Storage Tank (LUST) database

- **RCRA NONGEN/NLR:** The EPA’s Resource Conservation and Recovery Act Non-Generator of Hazardous Waste/No Longer Regulated database
- **RGA HWS:** Ecology’s Recovered Government Archive State Hazardous Waste Facilities database
- **SWF/LF:** Ecology’s Solid Waste Facility database
- **UST:** Ecology’s Underground Storage Tank database
- **VCP:** Ecology’s Voluntary Cleanup Program Sites.

The following table presents a summary of database findings for the subject property.

| Regulatory Database | Facility Name, Address | Recognized Environmental Condition (Y/N) |
|---|---|--|
| ALLSITES, CSCSL, ECHO, FINDS, RCRA NONGEN/NLR, RGA HWS, VCP | 35th Street Landfill City Fill, 35th Street & A Street Ravine Dump South 35th Street and Pacific Avenue | Y |
| <p>The ALLSITES, CSCSL, ECHO, FINDS, and SWF/LF listings for 35th Street Landfill City Fill likely stem from the 1991 and subsequent site characterization efforts. Constituents of concern listed in the CSCSL report gathered by EDR consist of arsenic, metals, priority pollutants, petroleum products – unspecified, and polycyclic aromatic hydrocarbons.</p> <p>The RCRA NONGEN/NLR and RGA HWS listings likely stem from the 2008 remedial investigation and feasibility study by LAI, which identified fewer confirmed constituents of concern above cleanup levels. The subject property made an appearance on Ecology’s TOXICS database in 2008, presumably when it was first entered into their VCP. In 2011, Ecology terminated the VCP agreement.</p> | | |

5.1.2 Adjacent and Nearby Properties

The following table presents a summary of database findings for adjacent properties:

| Regulatory Database | Facility Name, Address | Recognized Environmental Condition (Y/N) |
|---|---|--|
| EDR HIST AUTO | Miniature Machine Works, 3419 Pacific Avenue | N |
| <p>The EDR HIST AUTO database is an unregulated collection of business directories maintained by EDR, which they categorize as “high risk historical records.” The database identifies an automobile repair shop at this address in 1947.</p> <p>The subject property has undergone extensive soil and groundwater testing for COCs and only cPAH contamination in soil is known to be present above MTCA Method A Cleanup Levels (LAI 2008c). Based on review of available subject property information, this adjacent property on the northwest corner of the subject property is not identified as a REC for the subject property.</p> | | |
| EDR HIST AUTO | DOTY SERV STA GAS, 3502 Pacific Avenue | N |
| <p>The EDR HIST AUTO database is an unregulated collection of business directories maintained by EDR, which they categorize as “high risk historical records.” The database identifies multiple gasoline and oil service station owners operating from this address from 1931 through 1970.</p> | | |

| | | |
|--|--|---|
| The subject property has undergone extensive soil and groundwater testing for COCs and only cPAH contamination in soil is known to be present above MTCA Method A Cleanup Levels (LAI 2008c). Based on review of available subject property information, this property is not considered a REC for the subject property. | | |
| ALLSITES, ASBESTOS, CSCSL NFA, ECHO, FINDS, LUST, RCRA NONGEN/NLR, UST, VCP | Puget Sound Hospital, Puget Sound Behavioral Health 215 S 36th Street | N |
| The ALLSITES, CSCSL NFA, ECHO, FINDS, LUST, UST, and VCP listings likely stem from the entry of the site into Ecology's HAZWASTE program on November 17, 1997, and TOXICS program by at least July 27, 1998. Available documentation shows that four tanks of unknown size were removed on December 10, 1999. The site appears to have received a no further action determination in regard to the leaking tank on February 21, 2001. The RCRA NONGEN/NLR listing likely stems from investigations into the hospital's waste stream on November 17, 1997, or December 30, 1998. The hospital is a verified non-generator of RCRA hazardous waste. The ASBESTOS listing likely stems from investigations throughout 2017. Asbestos is unlikely to migrate beyond this property. Due to this property receiving a no further action determination in regard to leaking USTs, and due to its approximate distance (637 ft) from the subject property, it is not considered a REC for the subject property. | | |

No other adjacent or nearby properties were identified that met the criteria for potential contaminant migration, as defined above.

5.2 City of Tacoma

A request for public records was submitted to the City of Tacoma for records pertaining to storage tanks, environmental concerns, construction and demolition permits, and existing site plans at the subject property. After a review of the records received on January 12, 2021, LAI concluded that no additional RECs were identified for the subject property within the provided document package.

5.3 Tacoma-Pierce County Health Department

A request for public records was submitted to the Tacoma-Pierce County Health Department for records pertaining to storage tanks, environmental concerns, and existing site plans at the subject property. After a review of the records received on January 7, 2021, LAI concluded that multiple RECs were identified for the subject property within the provided document package. Those RECs were discussed in detail in Section 3 and Section 5 and are again summarized in Section 8.

5.4 Washington State Department of Ecology

A request for public records was submitted to Ecology for records pertaining to storage tanks, environmental concerns, emergency responses, fires, and hazardous material incidents at the subject and adjacent properties. After a review of the records summary received on January 28, 2021, LAI concluded that multiple RECs were identified for the subject property within the provided document package. Those RECs were discussed in detail in Section 3 and Section 5 and are again summarized in Section 8.

6.0 INTERVIEWS

LAI interviewed Jennifer Hines, Assistant Division Manager, Public Works-Real Property Services with the City of Tacoma on December 23, 2020. Ms. Hines reported the following information:

- City of Tacoma purchased the subject property from the State of Washington in 1965.
- No buildings or site improvements are located at the subject property.
- The subject property was used as a construction landfill, and instances of disposal of asbestos-containing material or lead-based paint at the subject property are not known.
- No known instances of use, storage, or generation of hazardous substances or petroleum products are associated with the subject property.

Based on LAI's interview with Ms. Hines, one REC was identified for the subject property, as follows:

- The presence of documented filling activities is a REC for the subject property.

7.0 SITE RECONNAISSANCE

David Johnson, PE, of LAI conducted a site reconnaissance of the subject and adjacent properties on January 14, 2021 to visually assess current land use activities and environmental conditions.

Observations made during the site reconnaissance are discussed below, and selected site photographs are provided in Appendix A.

7.1 Subject Property

LAI used the following methodology to observe the subject property:

- Walked within the boundaries of the subject property
- Visually observed the perimeter/boundaries of the subject property
- Observed adjacent properties from within the boundaries of the subject property and from public rights-of-way.

7.1.1 General Environmental Conditions

The following table summarizes observations made during the site reconnaissance:

| Features/Conditions | Comments |
|---|---|
| Hazardous materials or petroleum products: | None observed. |
| Hazardous waste: | Observed evidence of wood or trash burning. |
| Solid waste: | Observed miscellaneous construction debris mixed into the surface soils and scattered throughout the subject property. Piles of debris consisting of food waste, clothing, and miscellaneous trash littered the site. |
| Wells: | Multiple monitoring well monuments were observed along the northern property boundary. |
| Wastewater: | None observed. |
| Drains, sumps, and drywells: | None observed. |
| Evidence of dumping or fill materials: | Observed miscellaneous construction debris mixed into the surface soils and scattered throughout the subject property. Piles of debris consisting of food waste, clothing, and miscellaneous trash littered the site. |
| Odors: | None observed. |
| Stains and/or corrosion: | None observed. |
| Pools of liquid: | None observed. |
| Polychlorinated biphenyl (PCB)-containing equipment: | None observed at the subject property. |
| Stormwater: | Drainage generally appears to be through infiltration into the ground. |

| | |
|---|---|
| Pits, ponds, or lagoons: | An isolated drainage feature approximately 10 ft deep exists along the southwest property corner. |
| Stained soil or pavement: | None observed. |
| Stressed vegetation: | None observed. |
| General exterior housekeeping/yardkeeping: | Subject property does not appear to be maintained. |

Subject and adjacent property features are shown on Figure 2.

7.1.2 Storage Tanks/Structures

LAI assessed the subject property for evidence of current or former underground storage tanks (USTs). No evidence of USTs was observed at the subject property. No aboveground storage tanks were observed at the subject property.

7.1.3 *De Minimis* Conditions

ASTM defines *de minimis* conditions as those that “generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies” (i.e., minor soil staining). No *de minimis* conditions were observed associated with the subject property.

7.2 Surrounding Area

LAI observed the surrounding area from adjacent properties or from the public rights-of-way. The following was observed adjacent to the subject property:

- **North:** The adjacent property to the north is undeveloped land that descends moderately to the north. A gravel access roadway is gated near the northern boundary of the subject property and follows the descending grade to the underside of the 34th Street Bridge.
- **East:** The adjacent properties to the east consist of wood framed, residential buildings.
- **South:** The adjacent property to the south is undeveloped land.
- **West:** The adjacent properties to the west consist of a mixture of commercial and residential buildings.

The following RECs were identified for the subject property based on LAI’s observations during the site reconnaissance:

- The presence of documented construction debris scattered throughout the site is a REC for the subject property.

8.0 FINDINGS AND CONCLUSIONS

LAI has conducted a Phase I ESA in conformance with the scope and limitations of ASTM standard E 1527-13 for the subject property located east of South 35th Street and Pacific Avenue in Tacoma, Washington (Pierce County Parcel Nos. 2086130020, 2086130030, 2085140040, 2085140070, 2086140010, and 2086140020). The subject property is 2.41 acres in total area and is generally flat as a result of previous grading activity. A fill layer with depths of about 100 ft bgs was placed at the subject property as a result of landfill operations from the early 1960s through 1992. Between 1985 and 1990 street sweepings, vector truck waste, and catch basin debris were disposed in the landfill site, prompting multiple investigations into potential contamination of site groundwater, soil, and soil gas.

This assessment has revealed the following *recognized environmental conditions*:

- The presence of prior filling activities, which included placement of construction debris, organic materials, vector waste (i.e., material from street catch basins), and street sweeping material within the fill is a REC for the subject property.
- The known presence of cPAH-contaminated soil above MTCA Method A cleanup levels, and residual arsenic and TPH-impacted soil is a REC for the subject property.
- The presence and degradation of organic debris (i.e., leaves, branches, yard waste, etc.) within the fill are the suspected source of elevated methane gas levels. The known presence of elevated methane in soil gas is a REC for the subject property.

This assessment revealed no hRECs or cRECs in connection with the subject property.

8.1 Data Gaps

The data gaps identified during this assessment and their potential impact on its findings are as follows:

- Chain-of-Title Search: No chain-of-title was provided by the User of this Phase I ESA. Sufficient documentation of historical uses of the subject property was available from other sources. Therefore, this data gap is not considered significant to the findings of this Phase I ESA.

9.0 OPINION

Based on the findings of this Phase I ESA, three *recognized environmental conditions* were identified in relation to the known and potential environmental impacts resulting from historical documented fill placement and landfill operations from the early 1960s through 1992. Between 1985 and 1990, street sweepings, vector truck waste, and catch basin debris were disposed of at the landfill site, prompting multiple investigations into potential contamination of site groundwater, soil, and soil gas.

The identified *recognized environmental conditions* indicate the potential for concentrations of cPAHs in soil above Model Toxics Control Act Method A cleanup levels, residual petroleum hydrocarbons and arsenic impacted soil, and the elevated presence of methane gas to be present at the subject property.

The potential exists for soil contamination to be present beneath the subject property from the above-stated RECs that may impact potential redevelopment strategies. Further investigation should be conducted to further evaluate the need for contaminated media management in association with the planned elements of redevelopment of the subject property.

Further investigation should supplement the results of the RI/FS/CAP (LAI 2008c) previously prepared for the landfill site, which included a portion of the subject property. Most of the prior environmental investigation work was conducted on the northernmost parcels of the subject property (LAI 2008c); therefore, additional investigation should include the southern half of the subject property. In addition, the identified RECs (i.e., presence of fill material) pose geotechnical concerns with the subject property that will likely impact development. Further geotechnical evaluation of the subject property to support effective redevelopment strategies is also warranted.

10.0 USE OF THIS REPORT

This Phase I ESA was undertaken and this report prepared for the exclusive use of TCRA and its legal representatives (authorized users) for specific application to the subject property. It is intended to provide the authorized users with an understanding of the potential environmental liabilities associated with the property evaluated in this report. Reliance on this report by third parties or others who do not have a contractual relationship with LAI on this project is at the sole risk of the third parties or others.

This report is based on observations and information obtained during one visit to the subject property and is based solely on the condition of the property on that day, supplemented with information obtained by LAI and described herein. No subsurface investigations or sampling were conducted. In evaluating the site, LAI has relied in good faith on representations and information abstracted from sources noted in this report to the extent that they have not been contradicted by observations made during the site reconnaissance or data obtained from other sources. Accordingly, LAI accepts no responsibility for any deficiency, misstatements, omissions, or misrepresentations in the information provided to us.

Determining whether environmental conditions defined in this report indicate the presence of contamination at levels of concern is a matter of judgment. Liabilities associated with contaminated sites are defined in part by CERCLA. The findings and conclusions of this report are based on LAI's evaluation of information obtained and reviewed for this project and reflect LAI's professional judgment with respect to that information.

LAI has performed the services and made the findings in accordance with generally accepted practices for Phase I ESAs in effect in Washington at the time the services were performed. The scope of services for this Phase I ESA was defined in LAI's proposal, and unless specifically included in the scope of services and in this report, this Phase I ESA did not include services related to asbestos, radon, lead paint, lead in drinking water, wetlands, or indoor air quality issues (including the potential presence of mold or other biological contaminants).

This warranty stands in lieu of other warranties, express or implied. While this report can be used as a guide, it is neither a rejection nor an endorsement of the subject property. It must also be understood that changing circumstances in the environment and use of the subject property can alter the conclusions and findings contained in this report.

10.1 Environmental Professional Statement

LAI declares that, to the best of its professional knowledge and belief, the technical professionals that prepared this document meet the definition of Environmental Professional as defined in §312.10 of 40 Code of Federal Regulations (CFR) 312, and have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject

property. The LAI team has developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR 312 and ASTM E 1527-13.

Qualifications of the environmental professionals responsible for the site reconnaissance and generation of this report are provided in Appendix G.

**Database Assessment Criteria /
Environmental Data Resources
Radius Map™ Report with GeoCheck®**

APPENDIX B

DATABASE ASSESSMENT CRITERIA

The purpose of the regulatory agency environmental database review was to identify reported environmental issues for the subject property and other properties in the vicinity. The database search criteria included the approximate minimum search distances specified in ASTM International (ASTM) E 1527-13 and in the scope of work for this Phase I environmental site assessment. The descriptions of the databases searched and the associated search distances from the subject property are identified in the regulatory agency database search report.

The database search report lists a number of sites identified as “unmappable” (also known as orphan sites). The database search firm was unable to confirm the physical locations of these sites relative to the subject property or to assess whether they were located within the designated search radii. Landau Associates, Inc. (LAI) independently reviewed the locations of these “unmappable” sites, to the extent possible, using various maps and our knowledge of the subject property area. Any of the “unmappable” sites determined to be within the designated search radii were included in our evaluation of the various listed sites’ potential to result in a recognized environmental condition relative to the subject property.

LAI evaluated each reported site identified in the regulatory agency database search report with respect to the nature and extent of the release, the distance of the site from the subject property, local hydrogeologic conditions (such as stratigraphy of soils and expected soil permeability), and the topographic position of a reported release site with respect to known or expected local and/or regional groundwater flow direction. Due to the nature of contaminant migration in the subsurface, only sites located hydraulically upgradient of the subject property (with no hydraulic barriers, such as surface water bodies) are assumed to have the potential to environmentally impact the subject property. Properties that are crossgradient, but nearby, or downgradient, but adjacent to the subject property may also be considered to have the potential to impact the subsurface at the subject property due to their proximity. Based on these criteria, reported release sites located within ¼ mile upgradient, ½ mile crossgradient, or adjacent downgradient are considered to have a potential to have impacted the subject property, unless specific conditions were identified that would warrant modification of this assessment criteria. As allowed by the budget and time constraints of this project, sites identified as having the potential to impact the subject property were further assessed by reviewing the appropriate agency records and/or interviewing agency personnel.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

TARGET PROPERTY INFORMATION

ADDRESS

SOUTH 35TH STREET AND PACIFIC AVENUE
TACOMA, WA 98418

COORDINATES

Latitude (North): 47.2290660 - 47° 13' 44.63"
Longitude (West): 122.4327670 - 122° 25' 57.96"
Universal Transverse Mercator: Zone 10
UTM X (Meters): 542940.8
UTM Y (Meters): 5230557.5
Elevation: 185 ft. above sea level

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 06/15/2020 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

State- and tribal - equivalent NPL

HSL: The Hazardous Sites List is a subset of the CSCSL Report. It includes sites which have been assessed and ranked using the Washington Ranking Method (WARM).

A review of the HSL list, as provided by EDR, and dated 08/27/2020 has revealed that there are 23 HSL sites within approximately 1 mile of the target property.

State- and tribal - equivalent CERCLIS

CSCSL: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Ecology's Confirmed & Suspected Contaminated Sites List.

A review of the CSCSL list, as provided by EDR, and dated 07/13/2020 has revealed that there are 60 CSCSL sites within approximately 1 mile of the target property.

State and tribal leaking storage tank lists

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the Department of Ecology's Leaking Underground Storage Tanks Site List.

A review of the LUST list, as provided by EDR, has revealed that there are 8 LUST sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Ecology's Statewide UST Site/Tank Report.

A review of the UST list, as provided by EDR, and dated 08/10/2020 has revealed that there are 3 UST sites within approximately 0.25 miles of the target property.

| <u>Equal/Higher Elevation</u> | <u>Address</u> | <u>Direction / Distance</u> | <u>Map ID</u> | <u>Page</u> |

State and tribal voluntary cleanup sites

ICR: These are remedial action reports Ecology has received from either the owner or operator of the site. These actions have been conducted without department oversight or approval and are not under an order or decree.

A review of the ICR list, as provided by EDR, and dated 12/01/2002 has revealed that there are 5 ICR sites within approximately 0.5 miles of the target property.

CSCSL NFA: The data set contains information about sites previously on the Confirmed and Suspected Contaminated Sites list that have received a No Further Action (NFA) determination. Because it is necessary to maintain historical records of sites that have been investigated and cleaned up, sites are not deleted from the database when cleanup activities are completed. Instead a No Further Action code is entered based upon the type of NFA determination the site received.

A review of the CSCSL NFA list, as provided by EDR, and dated 07/13/2020 has revealed that there are 5 CSCSL NFA sites within approximately 0.5 miles of the target property.

Soil: Confirmed Above Cleanup Levels
 NFA Date: 05/24/2000
 Contaminant Name: Petroleum-Gasoline

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/15/2020 has revealed that there are 9 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 09/04/2020 has revealed that there is 1 FINDS site within approximately 0.001 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste.

EXECUTIVE SUMMARY

Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 2 EDR MGP sites within approximately 1 mile of the target property.

| TACOMA COAL GASIFICA | E 22ND AND A STS | N 1/2 - 1 (0.904 mi.) | X119 | 606 |

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 8 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110005383833

Click Here:

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110005331765

Click Here:

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Capacity Range: 20,000 to 29,999 Gallons
Tank Permit Expiration Date: 12/31/2020
Tank Upgrade Date: Not reported
Tank Spill Prevention: Double Walled Spill Bucket
Tank Overfill Prevention: Automatic Shutoff (fill pipe)
Tank Material: Fiberglass Reinforced Plastic
Tank Construction: Double Wall Tank
Tank Tightness Test: Not reported
Tank Corrosion Protection: Corrosion Resistant
Tank Manifold: Non-Manifolded Tank
Tank Release Detection: Interstitial Monitoring
Tank SFC Type: Sump
Pipe Material: Fiberglass
Pipe Construction: Double Wall Pipe
Pipe Primary Release Detection: Interstitial Monitoring (or Sump Sensor)
Pipe Second Release Detection: Automatic Line Leak Detector (ALLD)
Pipe Corrosion Protection: Corrosion Resistant
Pipe Pumping System: Pressurized System
Responsible Unit: Southwest
Dispencer/Pump SFC Type: Sump

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Click Here:

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.
 RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Federal Waste Generator Description: Large Quantity Generator
State District Owner: WA
Large Quantity Handler of Universal Waste: No
Recognized Trader Importer: No
Recognized Trader Exporter: No
Spent Lead Acid Battery Importer: No
Spent Lead Acid Battery Exporter: No
Current Record: No
Non Storage Recycler Activity: Not reported
Electronic Manifest Broker: Not reported

Receive Date: 1996-04-08 00:00:00.0
Handler Name: VERN'S TRANSMISSION SVC INC
Federal Waste Generator Description: Conditionally Exempt Small Quantity Generator
State District Owner: WA
Large Quantity Handler of Universal Waste: No
Recognized Trader Importer: No
Recognized Trader Exporter: No
Spent Lead Acid Battery Importer: No
Spent Lead Acid Battery Exporter: No
Current Record: No
Non Storage Recycler Activity: Not reported
Electronic Manifest Broker: Not reported

means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

corrective action activities required under RCRA. ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Hazardous Waste Summary:

Waste Code: D001
Waste Description: IGNITABLE WASTE

Waste Code: D002
Waste Description: CORROSIVE WASTE

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Federal Waste Generator Description: Conditionally Exempt Small Quantity Generator
State District Owner: WA
Large Quantity Handler of Universal Waste: No
Recognized Trader Importer: No
Recognized Trader Exporter: No
Spent Lead Acid Battery Importer: No
Spent Lead Acid Battery Exporter: No
Current Record: No
Non Storage Recycler Activity: Not reported
Electronic Manifest Broker: Not reported

Receive Date: 1997-03-05 00:00:00.0

Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click Here:

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance

information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 10/28/2020

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

CSCSL: Confirmed and Suspected Contaminated Sites List

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

PTAP: PTAP Site Listing

A list of sites accepted into the Petroleum Technical Assistance Program. The Petroleum Technical Assistance Program (PTAP) expands the state's ability to respond to the high customer demand to clean up petroleum contaminated sites. Under the PTAP, the Pollution Liability Insurance Agency (PLIA) may provide informal site-specific technical consultations and issue written opinion letters to persons conducting independent remedial actions at qualifying petroleum cleanup sites. PLIA may provide these services under the authority of RCW 70.149.040(9) and the Model Toxics Control Act (MTCA), Chapter 70.149 RCW and Chapter 173-340 WAC.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Data Release Frequency: Varies

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

TACOMA/PIERCE COUNTY:

LF TACOMA/PIERCE: Closed Landfill Survey

Following numerous requests for information about closed dumpsites and landfills in Pierce County, the Tacoma-Pierce County Health Department decided to conduct a study on the matter. The aim of the study was to evaluate public health risks associated with the closed dumpsites and landfills, and to determine the need, if any, for further investigations of a more detailed nature. The sites represent all of the known dumpsites and landfills closed after 1950.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Elevation: 185 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map: 6005109 TACOMA SOUTH, WA
Version Date: 2014

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

| | |
|---|-------------------------|
| <u>Flood Plain Panel at Target Property</u> | <u>FEMA Source Type</u> |
| 5301480025B | FEMA Q3 Flood data |
| <u>Additional Panels in search area:</u> | <u>FEMA Source Type</u> |
| 5301480035B | FEMA Q3 Flood data |

NATIONAL WETLAND INVENTORY

| | |
|------------------------------------|--|
| <u>NWI Quad at Target Property</u> | <u>NWI Electronic Data Coverage</u> |
| TACOMA SOUTH | YES - refer to the Overview Map and Detail Map |

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

| | |
|-----------------------------|---|
| Search Radius: | 1.25 miles |
| Location Relative to TP: | 1/2 - 1 Mile North |
| Site Name: | TACOMA SPUR |
| Site EPA ID Number: | WAD980835789 |
| Groundwater Flow Direction: | NE TOWARD THE CITY WATERWAY |
| Measured Depth to Water: | 20 feet |
| Hydraulic Connection: | The shallow aquifer is tidally influenced. An upward hydraulic gradient exists in both the shallow and deep aquifers. |
| Sole Source Aquifer: | A sole source aquifer is not present at or near the site |
| Data Quality: | Information based on site-specific subsurface investigations is documented in the CERCLIS investigation report(s) |

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

| Not Reported | | |

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Cenozoic
System: Quaternary
Series: Quaternary
Code: Q (*decoded above as Era, System & Series*)

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: ALDERWOOD

Soil Surface Texture: gravelly - sandy loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Moderately well drained. Soils have a layer of low hydraulic conductivity, wet state high in the profile. Depth to water table is 3 to 6 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: MODERATE

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

| Soil Layer Information | | | | | | | |
|------------------------|-----------|-----------|-----------------------|---|---|---------------------------|------------------------|
| Layer | Boundary | | Soil Texture Class | Classification | | Permeability Rate (in/hr) | Soil Reaction (pH) |
| | Upper | Lower | | AASHTO Group | Unified Soil | | |
| 1 | 0 inches | 7 inches | gravelly - sandy loam | Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand. | COARSE-GRAINED SOILS, Gravels, Gravels with fines, Silty Gravel | Max: 6.00 Min: 2.00 | Max: 6.50 Min: 5.10 |
| 2 | 7 inches | 35 inches | very gravelly - loam | Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand. | COARSE-GRAINED SOILS, Gravels, Gravels with fines, Silty Gravel | Max: 6.00 Min: 2.00 | Max: 6.50 Min: 5.10 |
| 3 | 35 inches | 39 inches | cemented | Not reported | Not reported | Max: 0.00 Min: 0.00 | Max: 0.00 Min: 0.00 |

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam
very gravelly - sandy loam

Surficial Soil Types: silt loam
very gravelly - sandy loam

Shallow Soil Types: very gravelly - loam

Deeper Soil Types: very gravelly - coarse sand stratified
very gravelly - loamy sand
very gravelly - sand

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.
