### **Monthly Progress Report for the Former Shell Tank Farm Cleanup Project**

- A. A list of on-site activities that have taken place during the month.
- The contractor (Clearcreek Contractors) continued dewatering and soil excavation efforts.
  - Overburden and contaminated soils have been trucked off site for disposal.
  - The Port continues to work with the contractor to manage the construction including processing the required project deliverables, Change Order Proposals and Requests for Information documents.
- B. Detailed description of any deviations from required tasks not otherwise documented in project plans or amendment requests.
- There are no deviations.
- C. Description of all deviations from the Cleanup Action Plan and Schedule during the current month and any planned deviations in the upcoming month.
- There are no identified or planned deviations.
- D. For any deviations in schedule, a plan for recovering lost time and maintaining compliance with the schedule.
- N/A (see above)
- E. All raw data (including laboratory analyses) received by the Port during the past month and an identification of the source of the sample.
- Multiple base and sidewall samples have been collected. These data will be reported to Ecology in the final cleanup report.

- F. A list of deliverables for the upcoming month if different from the schedule.
- Monthly progress report.
  - In the next month the Port anticipates completing the following:
    - Planning meetings with the contractor and the construction management team.
    - Continued review of project submittals.
    - Continued implementation of the remedial excavation plan.
    - Collection and analysis of soil samples collected at the base of the excavated test pits.
  - Heavy site construction is now anticipated to extend through January 2015.
