Acronyms and Abbreviations

AAI – All Appropriate Inquiries

ALLSITES – Washington State Department of Ecology Facility/Site Identification System Listing

AST – Above-ground Storage Tank

ASTM – ASTM International

bgs – below ground surface

CERCLA – Comprehensive Environmental Response, Compensation and Liability Act

CREC – Controlled REC

Ecology – Washington State Department of Ecology

EPA – U.S. Environmental Protection Agency

ESA – Environmental Site Assessment

FINDS – Federal Records Facility Index System/Facility Registry System

HMIRS – Hazardous Materials Information Reporting System

HREC – Historical Recognized Environmental Condition

ICIS – Integrated Compliance Information System

LG – Licensed Geologist

MTCA – Model Toxics Control Act

NPDES – National Pollutant Discharge Elimination System

PCBs – polychlorinated biphenyls

PE – Professional Engineer

ppm – parts per million

RC – Restrictive Covenant

RCRA – Resource Conservation and Recovery Act

REC – Recognized Environmental Condition

USGS – United States Geological Survey

UST – Underground Storage Tank

EXECUTIVE SUMMARY

This report summarizes the results of the All Appropriate Inquiries (AAI) Phase I Environmental Site Assessment (ESA) of the property at 23428 Pacific Highway South in Kent, Washington, King County Tax Parcel 2500600480, identified by Sound Transit as Federal Way parcel FL-209. The subject property is currently owned by Juan Castaneda and Adriana Rojas. An automotive repair shop constructed in 1949 is currently located on the property, as well as an office building constructed in 1977; prior to 1949, the property was developed with a single-family residence. A MTCA cleanup site known as the Southgate Oil facility was previously located on the subject property. We understand that Sound Transit plans to acquire all of FL-209, with building impacts anticipated based on current plans for the FWLE alignment (HDR - Sound Transit, September 2016).

This assessment has revealed no evidence of RECs in connection with the subject property, with the exception of the following:

- **Property Specific Condition/MTCA Cleanup Site on Subject Property.** Documented petroleum contamination in soil associated with the former Southgate Oil MTCA cleanup site on the subject property, combined with auto repair activities on the subject property since the 1940s that may have used a septic system, and current suspect auto wrecking yard activities, represent a REC.
    - Numerous UST removals and a limited MTCA cleanup action occurred in portions of the subject property prior to 2002 (Southgate Oil, see Ecology files in Appendix C). As of 2002, concentrations of petroleum hydrocarbons exceeding MTCA Method A cleanup levels remained in soil in a localized area along the northern property boundary. Ecology issued a Further Action Required determination letter for the Southgate Oil facility in 2006, based on potential off-property migration of diesel contamination to the north. The risk of soil (and possibly soil vapor and groundwater) residual impacts of regulatory significance on the property from the Southgate Oil facility is high in our opinion and we recommend a Phase II ESA to assess residual impacts.
    - The risk of soil, soil vapor or groundwater impacts of regulatory significance from auto repair and suspect auto wrecking activities on the subject property is moderate to high and should be further evaluated through a full site reconnaissance to assess whether a Phase II ESA investigation is warranted. The limited Phase I ESA site reconnaissance could not assess current storage of oil or chemicals and wastes to rule out a material threat of a leak, spill or release that could affect the subject property.
    - Supplemental environmental investigation (Phase II ESA) is also recommended at the subject property if Sound Transit requires a remediation cost estimate or a cost estimate for contaminated/impacted soil and groundwater handling and disposal costs associated with future redevelopment by Sound Transit.
- **Property-Specific Condition/Residential Heating Oil Tank.** A former single-family residence on the subject property used oil heat, according to archived property tax records. No information was identified during the course of this Phase I ESA to indicate whether oil was stored in an AST or UST. For the purpose of the Phase I ESA conclusions at this time, we assume the residence used a heating

oil UST. Use of heating oil and a heating oil UST are considered a REC for the subject property. During the Phase I ESA we were unable to observe evidence of an unused heating oil UST on the property due to limitations of the site reconnaissance. The risk of soil, groundwater or soil vapor impacts of regulatory significance at the property from a possible past heating oil UST is low given that the property was redeveloped following removal of the residence. UST assessment and decommissioning in accordance with state and local regulations and best management practices will be necessary in the future if Sound Transit acquires the property and a UST is discovered. Options to manage future construction-related risks associated with a possible past heating oil UST and possible subsurface impacts from past releases of heating oil include: a subsurface exploration and sampling program to evaluate soil surrounding the UST, a contaminated soil and groundwater identification, handling and disposal plan for Sound Transit contractors, budgetary considerations for UST removal and handling/disposal costs for petroleum-impacted soil, and HAZWOPER requirements for workers.

- **Areawide Condition.** The subject property is within Ecology's mapped footprint of the Tacoma Smelter Plume (areawide contamination) where arsenic concentrations in surface/near surface soil are predicted to exceed the MTCA Method A cleanup level for unrestricted land use. Therefore, the Tacoma Smelter Plume is considered a REC for the subject property. The subject property falls within the area where surface soil concentrations of arsenic are expected to be in the range of 40 to 100 ppm; the MTCA Method A cleanup level for arsenic for unrestricted land use is equivalent to 20 ppm. The risk of soil impacts of regulatory significance on the property from this identified REC is moderate in our opinion; while the western property of the property was developed between the 1930s and 1970s has likely been paved for some time, the eastern portion of the property may not have had substantial regrading in recent years. The possibility of arsenic and lead in surface soil on the property may require consideration during property redevelopment. Specifically, soil characterization or waste profiling may be warranted in conjunction with any future construction that would result in moving soil from the property to an off-site location.
- **Off-site Condition/Suspect Sites Not Listed on Regulatory Databases:** The existing automotive repair shop on the adjacent property to the east (Auto Repair in Figure 2, identified as A To B Auto Rental & Towing in Table 3-2) has been used as an automotive repair shop and used car lot since at least the 1990s. The adjacent property to the south (Allison Marine in Figure 2) has been used for boat and automotive repair from the mid-2000s until the present. Automotive and boat repair activities at adjacent properties are collectively considered a REC to the subject property based on the potential for contaminant migration to the subject property from possible past leaks, spills or release of automotive-related fluids (e.g., fuels, lube oil, waste oil, degreasing solvents, paints, etc.) and boat repair-related chemicals. The adjacent property to the north (Kings Dry Cleaner in Figure 2) has been a dry cleaner back to the 1970s, which results in a risk for contaminant migration to the subject property based on proximity, and is therefore also a REC. We note that current or past practices related to use, storage and handling of petroleum and hazardous substances at these adjacent facilities could not be determined based on research performed for this Phase I ESA. The

risk of soil, groundwater or soil vapor impacts of regulatory significance at the subject property from the off-site potential sources is low to moderate, based on the close proximity and upgradient to crossgradient locations. If subsurface investigation completed at any off-site properties identified as potential sources of contamination, or in adjacent rights-of-way, indicates potential for contaminant migration to the subject property, then we recommend further evaluation by exploration and sampling at the subject property. Uncertainties associated with possible subsurface impacts from off-site sources also could be evaluated or reduced through waste characterization prior to construction and with requirements for contractors to prepare a contaminated soil and groundwater identification, handling and disposal plan, and to follow applicable HAZWOPER regulations.

- **Off-Site Condition/NFA MTCA Cleanup Site.** The former Shell Oil gas station located to the west and upgradient of the subject property is listed on regulatory databases and has a no further action determination as of 2014. Therefore, this condition meets the ASTM definition of HREC.

One *de minimis* condition was identified during our study: historic septic tank systems associated with former and existing buildings may be located on the subject property. Based on research for this Phase I ESA, sanitary sewer service to the subject property area began approximately during the 1960s or 1970s and existing subject property buildings were constructed between the 1940s and 1970s.

As of the publication of this report, right-of-entry to the subject property has not been provided by Sound Transit. Therefore, the Phase I ESA site reconnaissance was limited to viewing the property from adjacent public rights-of-way. This scope exception results in a significant data gap because we were unable to physically observe the entire property to identify potential RECs.

Our attempts to contact a Key Site Manager for an interview have been unsuccessful. This scope exception results in a potentially significant data gap because we were unable to confirm previous and current uses and conditions of the property to evaluate potential RECs.

At the request of Sound Transit, we did not request records of USTs or hazardous materials incident responses from South King County Fire and Rescue. This data gap is potentially significant if South King County Fire and Rescue has information regarding USTs or hazardous materials incident responses for the subject property.

This Executive Summary should be used only in the context of the full report for which it is intended.

1.0 Introduction

This Phase I Environmental Site Assessment (ESA) report presents the results of the All Appropriate Inquiries (AAI) evaluation of previous ownership and uses of the property at 23428 Pacific Highway South in Kent, Washington, King County Tax Parcel 2500600480 identified by Central Puget Sound Regional Transit Authority (Sound Transit) as Federal Way Link Extension (FWLE) Parcel FL-209 ("subject property"). The 0.64-acre parcel is developed with an office building and an automotive repair shop with tire service. The subject property is shown relative to surrounding physical features on the Vicinity Map, Figure 1. The layout of the subject property and surrounding properties is shown on the Site Plan, Figure 2.

Our study was completed at the request of Sound Transit. We understand that Sound Transit plans to acquire all of FL-209, with building impacts anticipated based on current plans for the FWLE alignment (HDR - Sound Transit, September 2016). The results of this Phase I ESA will be used by Sound Transit as part of their evaluation of potential environmental liabilities associated with ownership of the property and future design and construction of the FWLE. This report has been prepared for the exclusive use of Sound Transit, their agents and project design team. Because this environmental report is not intended for use by others, no one else should rely on this report without first conferring with GeoEngineers.

At the time of this submittal, Sound Transit is preparing the Final Environmental Impact Statement (FEIS) for the FWLE; the FEIS analyzes impacts of the preferred alternative documented in the Basis of Design Report (Sound Transit 2016a), and other alternatives under consideration. Throughout the report, references to "the FWLE", the "project", the "proposed project", "the alignment", or the "light rail corridor" refer to the preferred alternative identified by the Sound Transit Board in July 2015. The Sound Transit Board is expected to select the project to build after publication of the FEIS.

1.1 Project Description

The Sound Transit intends to extend light rail between the cities of SeaTac and Federal Way, through the Federal Way Link Extension Preferred Alternative route. The Sound Transit 2 (ST2) Plan, approved by voters in 2008, included environmental study and design of this extension. This 7.8-mile extension would extend light rail south from the Angle Lake Station terminus of the Central Link system at South 200th Street in SeaTac to the Federal Way Transit Center (FWTC) at South 317th Street. The FWLE would travel within the cities of SeaTac, Des Moines, Kent, and Federal Way in King County.

Link Light Rail is currently operating between University of Washington, Seattle and Sea-Tac International Airport. In 2008 the ST2 program was approved by voters. This package added nearly 36 new miles of service to the north, south, and east, to Sound Transit's (ST) initial light rail line, resulting in 55 miles of light rail open for revenue service by 2023. The ST2 program of projects includes construction of light rail from the Angle Lake Station, just south of SeaTac Airport, to Kent/Des Moines Station. ST2 funds were also programmed to provide environmental clearance and preliminary engineering design to downtown Federal Way.

In June 2016, the ST Board unanimously approved to move forward with a November 2016 ballot asking taxpayers to fund Sound Transit 3 (ST3) which was subsequently passed by the taxpayers. ST3 funds the remaining segments from Kent/Des Moines station to the FWTC. Revenue service to the FWTC Station is targeted to open by 2024.

1.2 Purpose and Scope

The purpose of this Phase I ESA is to identify recognized environmental conditions[1] (RECs) in connection with the subject property. Our scope of services is in general accordance with ASTM International (ASTM) Standard E 1527-13 for Phase I ESAs and the U.S. Environmental Protection Agency's (EPA's) Federal Standard 40 CFR Part 312 "Standards and Practices for All Appropriate Inquiries (AAI)," which are intended to permit a user to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner or bona fide prospective purchaser limitations on liability under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). The standard outlines the practice that constitutes "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined by 42 U.S.C. §9601. These services were completed by, or under the direction of, an environmental professional as described in 40 CFR Part 312.

1.2.1 Authorization

This report was prepared under the terms of the subcontract between HDR and GeoEngineers, Inc. (GeoEngineers) dated August 24, 2012, along with Amendments 1 through 6. The subcontract authorizes GeoEngineers to provide environmental services for the Sound Transit Federal Way Link Extension in accordance with Agreement No. RTA/AE 044-12 between HDR and Sound Transit.

1.3 Phase I ESA Scope of Services

Our specific scope of services for this Phase I ESA was as follows:

1. Review readily available geotechnical reports, environmental reports and/or other relevant documents pertaining to environmental conditions at the subject property.
2. Review the results of a federal, state, local and tribal environmental database search provided by an outside environmental data service for listings of properties with known or suspected environmental concerns on or near the subject property within the search distances specified by ASTM. Our database and file review search also included a review of EPA and Washington State Department of Ecology (Ecology) websites for readily available information (publications and reports) concerning areawide soil and groundwater contamination on or adjacent to the subject property.

[1] Recognized environmental conditions are defined in ASTM E 1527-13 as "the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property; (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. *De minimis* conditions are not recognized environmental conditions."

3. Review regulatory agency files regarding listed properties of potential environmental concern relative to the subject property.
4. Identify a key site manager with specific knowledge of past and present property use and request that the key site manager meet a GeoEngineers' representative on-site for an interview during the visual site reconnaissance and/or an interview by telephone if he or she is not available during the site reconnaissance. We also identified and interviewed others familiar with the use and history of the subject property, as available and appropriate, if current occupants were likely to use, store, treat, handle or dispose of hazardous substances now or in the past.
5. Interview current owners or occupants of neighboring properties as necessary to gather information or fill property use data gaps regarding the subject property.
6. Interview past owners and occupants of the subject property as necessary to gather information or fill property use data gaps regarding property use history.
7. Interview a representative of the local fire department, health department and/or Ecology as necessary to gather information or fill data gaps regarding the history of the subject property and surrounding properties relative to the likely presence of hazardous substances.
8. Review historical aerial photographs, fire insurance maps, building department records, city directories, title reports, and land use and tax assessor records, as available and appropriate, to identify past development history on and adjacent to the subject property relative to the possible use, generation, storage, release or disposal of hazardous substances. We attempted to identify uses of the subject property from the present back to the time that records show no apparent structures on the subject property, back to the time that the property was first used for residential, agricultural, commercial, industrial or governmental purposes, or back to 1940, whichever is earliest.
9. Review current United States Geological Survey (USGS) topographic maps to identify the physiographic setting of the subject property and provide a statement on the local geologic, soil and groundwater conditions based on our general experience and sources such as geologic maps and soil surveys.
10. Conduct a visual reconnaissance of the subject property and adjacent properties to identify visible evidence of RECs.
11. Identify the source(s) of potable water for the subject property and current heating and sewage disposal system(s) used at the subject property, if any, and their age if readily ascertainable.
12. Identify data gaps relative to the Phase I ESA study findings.

13. Provide a written summary of the Phase I ESA results and identified RECs[2], along with our opinion and recommendations regarding the potential for contamination by hazardous substances at the subject property and the significance of any data gaps identified.

1.4 Special Considerations

Our scope of services did not include an environmental compliance audit, wetlands evaluation or an evaluation for the presence of asbestos, lead-based paint, hazardous building materials, radon, lead in drinking water or biological pollutants (e.g. mold) in existing structures, debris or in indoor air. Soil, groundwater, vapor, surface water or indoor air sampling were not part of our Phase I ESA services.

As of the publication of this report, right-of-entry to the subject property has not been provided by Sound Transit. This scope exception results in a significant data gap because we were unable to physically observe the entire property to identify potential RECs.

[2] The following definitions are provided in ASTM E 1527-13: HREC: a past release that has been remediated to the satisfaction of the responsible regulatory agency; CREC: a past release that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in-place subject to the implementation of the required controls. A de minimis condition is not a REC.

2.0 User-Provided Information

We received responses to a user questionnaire, a copy of which is provided in Appendix A. According to the responses from the user-provided information (title records, environmental liens or activity and use limitations; specialized knowledge; commonly known or reasonably ascertainable information; valuation reduction for environmental issues; owner, property manager, and occupant information; reason for performing the Phase I ESA), the user did not provide any specific findings that would suggest a REC or potential REC relative to the subject property.

2.1 Environmental Liens or Property Use Restrictions

During the course of our research and based on a review of a recent title report (copy provided in Appendix A), we did not find evidence of recorded environmental liens or property use restrictions (as defined by the ASTM standard) associated with the subject property.

2.2 Summary of Previous Reports

Prior environmental reports for the subject property were provided by Ecology and are discussed in Section 3.3.1. Prior environmental reports for the subject property obtained from other public agency records (if any) are discussed in Section 3.3.

The prior environmental reports for the subject property identify subsurface materials as eight to 10 feet of sandy clay with gravel underlain by dense glacial till deposits to depths of 15 feet below ground surface (bgs). Groundwater reportedly was not observed at the subject property.

The depth to groundwater has been measured by others at depths ranging from approximately 9 to 39 feet bgs in monitoring wells at the former Shell Oil gas station located approximately 100 feet west of the subject property. The groundwater flow direction at the former Shell Oil gas station is toward the east, based on assessments performed by others.

3.0 Records Review

3.1 Location and Setting

General information, property use(s) and environmental setting of the subject property area are summarized in Table 3-1 below. The location is shown relative to surrounding physical features in Figure 1. The current layout of the subject property and surrounding property uses are shown in Figure 2. Photographs of the subject property are shown in Figure 3.

Table 3-1. Subject Property Information

Topographic Map	USGS, 7.5 minute Des Moines, Washington topographic quadrangle map dated 1976.
Quarter/Quarter, Section, Township and Range	NE/SE quarter of Section 16, Township 22, Range 4, Willamette Meridian.
Address	23428 Pacific Highway South, Kent, King County, Washington
General Location	Located approximately 830 south of the intersection of South Kent Des Moines Road and Pacific Highway South in Kent, Washington. The property is accessed from Pacific Highway South from the west and 30th Avenue South from the east.
Tax Parcel Number	2500600480
Approximate Area	0.64 acres
Existing Use(s)	Automotive service and repair
Geologic Setting	Vashon stade till (Qvt)
Nearest Surface Water Bodies	Massey Creek is located approximately 1,120 feet to the northwest
Approximate Surface Elevation	Approximately 400 feet (North American Vertical Datum of 1988 [NAVD 88], sea level)
Soil and Geologic Conditions	Sand and gravel glacial deposits
Depth to Groundwater	Groundwater was encountered approximately 78 feet bgs in a boring completed 40 feet to the east for FWLE.
Inferred Direction of Shallow Groundwater Flow	To the northeast and north, based on surface topography

Our knowledge of the general physiographic setting, geology and groundwater occurrence in the vicinity of the subject property is based on our review of the maps listed above, and our general experience in the area.

3.2 Environmental Database and On-Line Records Search

GeoEngineers reviewed the results of an October 20, 2016 search of pertinent environmental regulatory lists and databases for current or previous facilities listed at addresses located within ASTM-specified distances from the subject property. The information reviewed was provided by a subcontracted regulatory list search service, Environmental Data Resources, Inc. (EDR). The EDR report is presented in Appendix B. The report includes details regarding the listed facilities identified and maps showing the approximate locations of the listed facilities relative to the subject property.

GeoEngineers reviewed the search results for listings pertaining to the subject property. Adjacent and nearby listings within the ASTM-specified distances from the subject property were evaluated for potential impact to the subject property as explained below (Section 3.2.2). Sites included in EDR's "orphans list" (database entries that could not be mapped by EDR because of insufficient addresses) were checked for facilities possibly located within ASTM-specified distances from the subject property. Any adjacent and nearby properties identified on EDR's proprietary databases of historic dry cleaner or automotive service station sites are also discussed here or in Section 3.4.2. To supplement available database information where appropriate we also reviewed relevant and available on-line records from EPA and Ecology websites.

3.2.1 Database and Regulatory Findings for the Subject Property

The subject property address was identified on regulatory databases as the Southgate Oil MTCA cleanup site, see Table 3-2. The subject property address was not identified on EDR's proprietary databases of automotive service station sites.

3.2.2 Screening Criteria for other Listed Facilities

Screening criteria explained below were used to screen out the listed facilities that are not likely to pose potential RECs to the subject property and therefore do not require further review. Database-listed sites retained by applying the screening criteria were further evaluated through review of available regulatory agency on-line records and/or hard copy files.

All adjacent listed sites were retained for additional review except for adjacent sites that are listed only on the FINDS and ALLSITES databases. The nature of these databases does not indicate use, storage, handling or releases of petroleum or other hazardous substances and therefore sites only on these databases are not considered be potential RECs.

Non-adjacent sites included in the EDR report only by virtue of being listed in the RCRA, AST, HMIRS, FINDS, ALLSITES, ICIS and/or NPDES databases (see list of acronyms on page iv) were not further reviewed because these databases are not indicative of known or suspected releases at a site.

The following screening criteria were used to retain the remaining database-listed sites that pose a potential for known or suspect releases to impact the subject property based on the type of contaminant(s), media impacted (soil, groundwater, surface water or air), migration pathways, distance from the subject property or gradient:

- Subject property or adjacent properties listed on federal, state or local Clandestine Drug Labs (US CDL) and National Clandestine Laboratory Register (US HIST CDL).
- Listed on Confirmed and Suspected Contaminated Sites List (CSCSL) for metals only and within 50 feet.
- Listed UST sites within 100 feet.
- Listed on Leaking UST, CSCSL, Voluntary Cleanup Program (VCP), Independent Cleanup Report (ICR), Solid Waste Landfill, Leaking UST (LUST), and Institutional Control Registries (ICR) for petroleum only and within 200 feet, as well as service stations within 200 feet.
- Listed on Federal, State or Tribal Equivalent databases of CERCLIS, NPL, Hazardous Sites List (HSL) and CSCSL for halogenated solvents and within 2,000 feet, as well as dry cleaner sites within 2,000 feet.

Available regulatory agency on-line records and/or hard copy files were reviewed for sites meeting the screening criteria.

3.2.3 Database and Ecology On-line Records Findings

The following database-listed site(s) (Table 3-2) met the screening criteria described above.

Table 3-2. Database-Listed Facilities of Potential Concern for Contaminant Migration

Listed Business	Listed Address	Distance from Site and Location	Type of Database	Information from Database and On-Line Agency Records	Environmental Professional Opinion Based on Database Information
Southgate Oil	23428 Pacific Hwy S, Kent	Subject Property	UST, LUST, HWS, CSCSL, ICR	Eleven USTs of various sizes removed in the 1990s. Diesel confirmed in soil. Status noted as "cleanup started." Ecology issued a Further Action Required determination in 2009.	See Section 3.3.1.

Listed Business	Listed Address	Distance from Site and Location	Type of Database	Information from Database and On-Line Agency Records	Environmental Professional Opinion Based on Database Information
Kings/Aero/ Jet Dry Cleaners	23416/ 23418 Pacific Hwy S	North-adjacent (downgradient)	Hist Cleaner, RCRA NonGen/ NLR	Jet Dry Cleaners from 1977 through 1980, Aero Dry Cleaners from at least 1985 through 1991 and Kings Cleaners from 2001 through 2008. Kings Cleaners was not a generator of hazardous waste with no violations found. No reported releases.	See Section 3.3.1.
A To B Auto Rental & Towing (Identified as Auto Repair in Figure 2)	23410 30th Ave S, Kent	East-adjacent, approximately 60 feet east (crossgradient)	Hist Auto	A To B Auto Rental & Towing in 2010 and 2011	Based on close proximity, this site is considered a REC to the subject property.
Washington Auto Carriage	23444 30th Ave S, Kent	Approximately 80 feet southeast (downgradient)	Hist Auto	Washington Auto Carriage identified from 2005 until 2009.	Based on downgradient location and lack of reported releases, this site is not considered a REC to the subject property.
Midway Texaco, Texaco Starmart, Andersons Des Moines Texaco, DP Fuels Inc., Shell 120956, Midway Shell, Texaco Station #63-232-0503, Jacksons #651, Anderson Shell, Pacific Highway Shell	23419 Pacific Hwy S	Approximately 100 feet west (upgradient)	Hist Auto, Spills, HWS, RCRA, UST, CSCSL NFA, VCP	Gas station from at least the 1970s to 1990s. Three USTs removed in 2013. Petroleum releases to soil and groundwater. Status noted as NFA in March 2014.	This database listed site is referred to herein as Shell 120956. See Section 3.3.1.

Listed Business	Listed Address	Distance from Site and Location	Type of Database	Information from Database and On-Line Agency Records	Environmental Professional Opinion Based on Database Information
Lens Auto Repair	23453 30th Ave S, Kent.	Approximately 200 feet south (crossgradient).	Hist Auto	Lens Auto Repair identified in 2008 and 2009.	Based on distance, crossgradient location and lack of reported releases, this site is not considered a REC to the subject property.
Midway Crossing	23223 Pacific Hwy S (Correct address is 23319 Pacific Hwy S)	Approximately 300 feet northwest (downgradient)	UST, CSCSL NFA, VCP, Inst Control	At least one UST closed-in-place in the 1990s. Petroleum, non-halogenated and halogenated contaminants, metals, and polycyclic aromatic hydrocarbons reported in soil. Status noted as NFA in 2010. An environmental covenant is in place.	Based on distance, downgradient location and regulatory closure status, this database listed site is not considered a REC to the subject property.
Cotton Cleaners	23233 Pacific Hwy S, Kent	Approximately 480 feet northwest (downgradient)	Hist Cleaner	Cotton Cleaners identified from 1999 until 2012	Based on distance, downgradient location and lack of reported releases, this site is not considered a REC to the subject property.
The Drapery People	23639 S Pacific Hwy, Kent	Approximately 660 feet southwest (downgradient)	Hist Cleaner	Identified as a Curtain and Drapery Cleaners facility in 1980	Based on distance, downgradient location and lack of reported releases, this site is not considered a REC to the subject property.

Listed Business	Listed Address	Distance from Site and Location	Type of Database	Information from Database and On-Line Agency Records	Environmental Professional Opinion Based on Database Information
Midway Cleaners	23647 Pacific Hwy S, Kent	Approximately 760 feet southwest (downgradient)	Hist Dry Cleaner, Drycleaners, VCP, CSCSL, RCRA	Dry cleaner from at least 1977 through 2012. Halogenated organics confirmed in soil and suspected in groundwater.	See Section 3.3.1.
Seattle Municipal Landfill (Kent Highlands)	NE of Military Rd and Kent Des Moines Rd, Kent	Approximately 1,830 feet east (downgradient)	NPL, SEMS, ROD, CSCSL, HSL, Inst. Control	Halogenated organics confirmed in groundwater, not reported in soil. Site status is cleanup complete-active O&M/Monitoring. An Environmental Covenant is recorded for this site.	Based on distance, downgradient location, and cleanup status, this database listed site is not considered a REC to the subject property.
Midway Motors	22834 Pacific Highway South	Approximately 1,900 feet north (downgradient)	CSCSL, HSL, Hist Auto	Halogenated organics suspected in soil. Status noted as "awaiting cleanup."	Based on distance and downgradient location, this database listed site is not considered a REC to the subject property.

3.3 Regulatory Agency File and Records Review

3.3.1 Review of State Regulatory Agency Files

GeoEngineers requested reasonably ascertainable, pertinent records from Ecology and/or EPA for the sites identified in Table 3-2 where further information was required to form an opinion regarding RECs. Ecology files were reviewed on November 9, 2016; summaries are provided below.

Southgate Oil, 23428 Pacific Highway South (Subject Property)

Southgate Oil was a fuel distribution facility on the subject property for reportedly 75 years. Nine USTs, ranging from 275 to 10,000 gallons and containing gasoline, diesel fuel and heating oil, were removed from the site in October and November 2000. Fuel dispensers and fuel piping were also removed at that time. Groundwater was reportedly not observed within the UST excavations. Gasoline and benzene, ethylbenzene, toluene, and xylenes (BTEX) were either not

detected or detected at concentrations less than MTCA Method A cleanup levels in soil samples obtained from several UST excavations. Concentrations of diesel were greater than MTCA Method A cleanup levels in excavation soil samples obtained after removing Tanks 8 and 9 (diesel fuel and gasoline, respectively). Tanks 8 and 9 were located south of the buildings in the western portion of the site. The available information does not indicate if the contaminated soil in the UST excavations was removed. Concentrations of diesel in soil samples obtained after removal of two fuel pump islands in the approximate center of the site, and two soil stockpiles of excavated soil also exceeded cleanup levels. The available information also indicates that 550 cubic yards of stockpiled soil was undergoing bioremediation on-site for six months. No information in Ecology's files addresses post-remediation stockpile testing or final disposition stockpiled soil.

Two heating oil USTs (20,000 and 25,000 gallons), and associated fuel dispensers, were removed from the eastern portion of the property in February 2002. The USTs and fuel dispenser equipment was transported off-site for disposal or recycling. Approximately 1,200 gallons of liquid were pumped from the USTs and disposed of at a local disposal and treatment facility. Soil samples from overburden soil stockpiles were analyzed for diesel. Diesel-range hydrocarbons were detected at concentrations less than MTCA Method A cleanup levels in samples tested from the soil stockpiles. Diesel-range hydrocarbons in soil samples from the 20,000-gallon UST excavation were detected at concentrations exceeding MTCA Method A cleanup levels. Remedial excavation followed by confirmation soil sampling of the base and sidewalls of the excavation in 2002 indicated that soil with diesel-range hydrocarbons remained in the north sidewall of the excavation, at the northern property line. The remedial excavation terminated at the northern property line. The zone of contaminated soil left in place was approximately 25 feet long and 10 feet deep. A 10 millimeter plastic liner was placed in the excavation vertically along the northern excavation limits, extending approximately to 14 feet bgs. Indications of hydrocarbon contamination were not reported in soil samples from the 25,000-gallon UST excavation. Diesel-range hydrocarbons were not detected in confirmation soil samples obtained from the sidewalls and base of this excavation.

A total of 748 tons of diesel-range hydrocarbon contaminated soil from the site was reportedly transported to Fife Sand and Gravel for disposal. The 2002 UST removal excavations were reportedly backfilled with non-contaminated overburden and imported soil. Groundwater was reportedly not encountered within the 2002 UST excavations.

On June 9, 2006 Ecology issued a Further Action Required determination letter for the Southgate Oil facility indicating that Further Action is required because of potential off property migration of diesel north of the property. In addition, Ecology noted that cleanup stopped at the property boundary, a Restrictive Covenant may be needed for residual contamination off property limits, and there has been a lack of active cleanup activity in the previous 12 months.

Documented petroleum releases to soil associated with the subject property former Southgate Oil facility represent a REC.

Kings/Aero/Jet Dry Cleaners, 23416/23418 Pacific Highway South, North-Adjacent (Downgradient)

Ecology's files for this facility are related only to the facility's RCRA reporting. The RCRA files indicate the business was a small quantity generator of dangerous/hazardous waste between 1995 and 1998; no violations are noted in the file. Ecology's RCRA files for the facility do not list the specific type or quantity of waste generated and the files do not include the waste disposal methods; however, given that the facility followed the RCRA reporting procedures and notifications to Ecology, there is low risk that hazardous waste were disposed on site during the years they reported waste generation to Ecology. This facility may have operated for several years before the RCRA regulations that established requirements for hazardous waste generation, storage, handling, transport and disposal. Waste disposal practices before the regulations were established are unknown.

Based on close proximity and years of operation as explained in Section 3.4.2, this database listed site is considered a REC to the subject property.

Shell 120956, 23419 Pacific Highway South, Approximately 100 Feet West (Upgradient)

Based on a property history summary in the No Further Action letter dated March 14, 2014 in the Ecology file, a gasoline service station was built at this location in 1965. At least two generations of USTs operated on the property. Removal records of the first generation USTs were not available. The second generation USTs and dispenser islands were reportedly installed in 1984. Gasoline and BETX contamination was first observed in 1990 during subsurface exploration and soil and groundwater sampling. A groundwater recovery and treatment system and soil vapor extraction (SVE) system operated at the site from 1994 until 1997. In 1998, eight soil borings on the property were treated with Oxygen Release Compound (ORC). In 2013, the gasoline station was decommissioned and the three 10,000-gallon gasoline USTs and product dispensers and piping were removed. Confirmation samples obtained from the UST excavation were analyzed for gasoline-range hydrocarbons and BTEX. One confirmation soil sample had concentrations of gasoline-range hydrocarbons exceeding the MTCA Method A cleanup level.

Groundwater monitoring occurred at the site from 1991 to 2012. Concentrations of gasoline-range hydrocarbons exceeding the MTCA Method A cleanup level were detected during groundwater sampling events for several years, starting in the early 1990s. Petroleum constituents in groundwater have met MTCA Method A cleanup levels for at least four quarters. In 2014 Ecology issued a NFA determination. The groundwater flow direction is reportedly toward the east.

Based on close proximity, documented petroleum releases to soil and groundwater, and additional information in Ecology files which indicates groundwater flow at this site is toward the subject property, this database listed site is considered an HREC to the subject property.

Midway Cleaners, 23647 Pacific Highway South, Approximately 760 Feet Southwest (Downgradient)

Based on a 2015 subsurface investigation at the site, tetrachloroethylene (PCE) is present in shallow and deep groundwater zones. The direction of shallow perched groundwater flow at this site is toward the west-southwest, and the direction of deep perched groundwater flow is toward the west-northwest.

PCE was detected in groundwater samples obtained from two on-site wells at concentrations exceeding the MTCA Method A cleanup level. PCE was detected in a groundwater sample obtained on the west-adjacent Highline Community College property at concentrations less than the MTCA Method A cleanup level. Groundwater with PCE concentration greater than MTCA Method A cleanup level was interpreted to be contained within the Midway Cleaners property. PCE concentrations exceeded the MTCA Method B residential screening level for indoor air, but did not exceed the MTCA Method B commercial screening level for indoor air. A soil vapor extraction (SVE) system was operating at the site at the time of the subsurface investigation. The SVE system reportedly was removing approximately 1 pound of PCE from the subsurface per month.

Ecology's RCRA files for this facility indicate the business was a medium and large quantity generator of dangerous/hazardous waste between 2004 and 2013; no violations are noted in the file.

Based on distance, downgradient location, and because the contamination is not reported to have migrated off- site, this database listed site is not considered a REC to the subject property.

3.3.2 Review of Local Regulatory Agency Files

We requested pertinent information (building permits, fire department records and hazardous materials responses) for the subject property from the City of Kent and King County Health Department (KCHD). At the request of Sound Transit, we did not request records of USTs or hazardous materials incident responses from Puget Sound Regional Fire Authority.

Records provided by City of Kent on February 7 and 10, 2017 consisted of permits, permit applications, and City/Fire Department inspection records related to UST installations (5,000-gallon gasoline tank in 1974; unspecified 1,000 and 25,000-gallon tanks in 1990), fuel piping, tank relining, and dispensing system upgrades (1987, 1990, 1992), UST removals (1,000, 8,000 and 10,000-gallon diesel tanks, 10,000 and 5,000-gallon gasoline tanks in 2000; 20,000 and 25,000-gallon heating oil tanks in 2001), fuel tanker truck inspections (1971), and oil furnace

installation (1977) associated with the former Southgate Oil facility. The 5,000, 10,000, 20,000 and 25,000-gallon USTs were located east of the existing auto repair building in Figure 2. Additional City inspection records pertained to the existing outdoor tire storage area associated with the tire sales business. Copies of relevant records are included in Appendix C.

As discussed in Section 3.4.1, we also reviewed a Building Permit Report by EDR dated October 21, 2016 (Appendix C) for recent permits associated with the subject property. On January 30, 2017, KCHD responded they do not have any relevant records for the subject property.

3.3.3 Areawide Contamination

One areawide contamination concern is documented for the subject property vicinity: the Tacoma Smelter Plume. Air pollution from 100 years of operation of the Asarco Smelter in Ruston (near Tacoma) affected surface soil over more than 1,000 square miles of the Puget Sound basin. Residual arsenic, lead and other heavy metals have been documented in surface and near surface soil.

Maps from Ecology's Tacoma Smelter Plume website (http://www.ecy.wa.gov/programs/tcp/sites_brochure/tacoma_smelter/2011/ts-hp.htm) show the subject property located within the footprint of the Tacoma Smelter Plume. Ecology has developed predicted arsenic concentration maps based on their studies and soil sampling. The subject property falls within the area where surface soil concentrations of arsenic are expected to be in the range of 40 to 100 ppm; the MTCA Method A cleanup level for arsenic for unrestricted land use is equivalent to 20 ppm. Ecology soil sample data (Ecology, 2002) do not show any specific soil sample at the subject property or anywhere within ½ mile of the property.

3.4 Historical Resources

Our understanding of the history of the subject property is based on a review of the information from the historical resources listed in Table 3-3. Selected historical research documents are included in Appendix C.

Table 3-3. Historical Resources Reviewed

Description	Provider or Interviewee	Dates of Coverage or Dates of Knowledge of the Property	Date Reviewed or Contacted	Note Here if No Coverage
Historical Aerial Photographs[1]	USGS photographs provided by EDR	1943, 1957, 1968, 1977, 1980, 1986, 1991, 2006 and 2013	October 27, 2016	--
Historical Aerial Photographs[1]	King County iMAP	1936, 1998, 2000, 2002, 2005, 2007, 2009, 2013 and 2015	October 25, 2016	--

Description	Provider or Interviewee	Dates of Coverage or Dates of Knowledge of the Property	Date Reviewed or Contacted	Note Here if No Coverage
Historical Aerial Photographs[1]	Quantum Spatial	1960	February 23, 2017	--
Historical Fire Insurance Maps	EDR search of Sanborn maps	None	October 13, 2016	Sanborn maps do not cover the subject property vicinity.
Historical City Atlases	Kroll Atlases in Puget Sound Regional Archives collection	Circa 1974	December 28, 2016	--
Historical Topographic Maps[1]	EDR search of USGS topographic maps	1894-1895, 1949, 1961, 1968, 1973, 1975, 1978, 1981, 1983, 1991 and 2014	October 27, 2016	--
City Directory Search	EDR	Approximate 5-year intervals, 1977 through 2013	October 27, 2016	--
Archived Tax Assessor Property Record Cards (PRCs)	Puget Sound Regional Archives	1930s through 1970s and 1990s to recent	January 4, 2017	--
Current County Assessor Records	King County iMAP	Recent	October 25, 2016	--
Building Permits	EDR building permit report	1990s to recent	October 27, 2016	Building permit information does not indicate anything indicative of a REC or potential REC.

Description	Provider or Interviewee	Dates of Coverage or Dates of Knowledge of the Property	Date Reviewed or Contacted	Note Here if No Coverage
USTs, ASTs, Building Permits, Fill and Grade Permits, Hazardous Materials Permits, and Building Demolition Permits	City of Kent	1970s to recent	February 7 and 10, 2017	See Section 3.3.2.
Hazardous Materials, Septic System, Drainage and Water Quality, Environmental Enforcement Activities, Brownfields, UST, Solid Waste, and Permitting Records	KCHD	1990s to recent	January 30, 2017	See Section 3.3.2.

Notes:

[1] The scale of the maps/photographs reviewed allowed for an interpretation of general property development/configuration, such as identifying most structures, roadways and clearings. However, the scale of the maps/photographs did not allow for identification of specific property features, such as fuel pumps, wells or chemical storage areas on the subject property, if any.

3.4.1 Historical Property Ownership and Use Summary

The earliest identified development on the subject property was a single-family residence with oil heat and a septic tank, constructed in 1931. The single-family residence was demolished by 2002.

According to tax assessor records, the existing automotive repair shop building was constructed in 1949. Information from Ecology files (Section 3.3.1) suggests that this auto repair shop building was associated with the large fuel distribution facility (Southgate Oil) that operated on the property reportedly for 75 years. Tax assessor records indicate that one 20,000-gallon tank, one 675-gallon tank, two 275-gallon tanks, and one 3,000-gallon fuel oil tank were associated with the automotive repair shop building in the 1940s. A 20,000-gallon heating oil tank was

identified in City of Kent records; the 675, 275, and 3,000-gallon tanks were not identified in the records. The existing office building currently used in connection with the automotive repair shop was constructed in 1977; the original source of heat is not indicated in archived tax assessor records. Tax assessor records indicate that one 25,000-gallon tank and one 1,000-gallon tank were located on the property in the 1970s. The above referenced fuel tanks have presumably been removed from the subject property (See Section 3.3.1).

Space heaters are used in the existing buildings according to current tax assessor records. Potable water and sanitary sewer services are currently provided by the local water district and the local public sewer utility, respectively.

The city directories list Southgate Oil Company at the subject property from 1992 until 2013. Llantera El Paisano (automotive repair) is also listed at the subject property in 2013. The city directories do not list uses of the subject property prior to 1992.

Juan Castaneda and Adriana Rojas have owned the property since 2008, according to the title report. Previous owners appear to be Midway Investments & Properties LLC and private individuals back to the 1920s.

3.4.2 Adjacent Properties

Development in the area began in approximately the 1930s and generally consisted of residential and commercial-type land uses. Commercial uses of adjacent properties developed over time from about the 1950s on.

North. A single family residence with stove heat was located to the north from 1929 until 1959. The north-adjacent retail building was built in 1962. A dry cleaner operated on the property to the north from at least 1977 to 2008 under various names as indicated in Section 3.2.3.

East. The east-adjacent automobile sales and service building was originally built as a fire station with electric heat in 1950. The fire station later had an oil heating system in the early 1970s according to archived tax assessor records. The site has been used as an automotive repair shop and used car lot since at least the 1990s.

South. The south-adjacent retail and office buildings were built between 1935 and 1985 and used forced air heat and natural gas heating systems according to archived tax assessor files. A single family residence with oil heat was located on the site from the early 1920s until the mid-1970s.

West. The existing vacant lot to the west was formerly a gasoline service station that was built in 1965 and then demolished in 2013.

4.0 Site Reconnaissance

4.1 Subject Property Observations

The scope of the Phase I ESA site reconnaissance was limited to portions of the subject property accessible and visible from public rights-of-way. At the request of Sound Transit, we did not enter the subject property. This scope deviation significantly limited the ability to visually assess the property for RECs.

Chelsey Gohr, a GeoEngineers geologist, performed a visual reconnaissance of visible exterior areas of the subject property on January 3, 2017. Table 4-1 below summarizes conditions observed during the site reconnaissance. Noted features of interest are shown in Figure 2. Representative photographs of the subject property are presented in Figure 3. The subject property is developed with an office building and an automotive repair shop with tire service.

Table 4-1. Summary of Site Reconnaissance Observations

Features	Observed			Comment, Location and/or Description
	Yes	No	Unknown	
Current Uses and Existing Structures	X			Office building, automotive repair shop, food truck, and asphalt paved parking lot in western portion of property. Suspect auto wrecking yard on gravel surfaced area in eastern portion of property.
Evidence of Past Uses and Former Structures		X		
Heating/Cooling System	X			Electric cooling unit noted.
Floor Drains, Sumps or Drywells		X		
Aboveground Storage Tanks (ASTs)		X		
Underground Storage Tanks (USTs) or Evidence of USTs		X		
Drums or Other Containers	X			Propane tanks on south side of office building.

Features	Observed			Comment, Location and/or Description
	Yes	No	Unknown	
Identified Hazardous Substances and Petroleum Products (other than drums noted above or *de minimis* quantities of cleaning products)		X		
Unidentified Substances or Containers	X			Steel boxes and random plastic and metal containers, most overflowing with debris, many without lids or visible labels.
Evidence of Leaks, Spills or Releases Surrounding ASTs, USTs and/or Chemical Storage Areas		X		
Stained or Corroded Floors, Walls or Drains (other than the above or apparent water stains or minor oil stains on pavement from parked vehicles)	X			Heavy oil staining observed on asphalt parking lot.
Hydraulic Hoists		X		
Oil/Water Separators		X		
Electric or Hydraulic Equipment Containing PCBs[1]		X		Below-grade power vault observed at or near southwest corner of property. Labels indicating a transformer is within the vault were not observed.
Discolored, Stained, or Stressed Soil or Vegetation Potentially from Hazardous Substances	X			Blackened and dead grass on eastern portion of property.
Solid Waste[2]	X			Litter and loose garbage observed in eastern portion of property near 30th Avenue South.
On-site Septic or Sewage Disposal System		X		
Potable Water Supply	X			Municipal water connection. Potable water service is provided by Highline Water District.
Standing Water or Other Pooled Liquids		X		

Features	Observed			Comment, Location and/or Description
	Yes	No	Unknown	
Catch Basins, Stormwater Drainage, or other Wastewater Discharges[3]		X		Stormwater drainage presumably enters the municipal system.
Pits/Ponds/Lagoons		X		
Strong, Pungent or Noxious Odors		X		
Water Wells (agricultural, domestic, monitoring)		X		
Other Conditions of Environmental Concern		X		
Pipes of Unknown Origin or Use		X		
Sanitary Sewer Connection[4]		X		Sanitary sewer service is provided by Midway Sewer District.
Hazardous Waste Disposal Areas		X		

Notes:

1 Other electrical or hydraulic equipment containing PCBs were not observed, unless noted otherwise.

2 Trash, construction debris, demolition debris or other unidentified solid wastes disposed into or on the ground were not observed, unless noted otherwise.

3 Wastewater, stormwater or other discharges into a ditch, underground injection system, abandoned well or other well were not observed, unless noted otherwise.

4 On-site septic systems or cesspools not observed unless noted otherwise.

Based on observations of oil staining on the asphalt-paved parking lot and black stained/stressed vegetation observed in the eastern portion of the property, the current auto repair with suspect auto wrecking activities on the site represent a REC.

4.2 Adjacent Property and Vicinity Observations

We viewed properties located adjacent to and surrounding the subject property on January 3, 2017 from accessible public rights-of-way. We did not enter adjacent properties or buildings except where general public access was available.

The subject property generally is situated in an area that is developed for commercial uses. Table 4-2 outlines adjacent land uses and pertinent observations with respect to conditions that could pose a REC on the subject property. There was no evidence that past uses of adjacent properties or the surrounding area were any different from current uses except as noted in Table 4-2. Figure 2 shows adjacent property uses and locations in relation to the subject property.

Table 4-2. Adjoining Streets and Adjacent Properties Observations

Direction	Adjoining Street	Position Relative to Subject Property[1]	Adjacent Property and Use	Comments
North	None	Downgradient	Retail Building	--
South	None	Upgradient	Allison Marine/Parking and Storage	--
East	30th Avenue South	Downgradient	Offices and Auto/Marine Repair Garage. Automobile Repair/Sales and Parking Lot east of 30th Avenue South	--
West	Pacific Highway South	Crossgradient	Vacant Lot (Former Shell Oil Gas Station) west of Pacific Highway South	--

Note:

[1] The inferred shallow groundwater flow direction in the vicinity of the subject property is toward the northeast and north, as described in Section 3.1.

5.0 Interviews

We attempted to conduct an interview(s) with the individual(s) listed in Table 5-1.

Table 5-1. Persons Interviewed

Description	Provider or Interviewee	Dates of Coverage or Dates of Knowledge of the Property	Date Reviewed or Contacted	Comment
Owner ("Key Site Manager")	Juan Castaneda and Adriana Rojas	Have owned the property since 2008	Two attempts in January 2017	See Section 5.1

5.1 Interview with the Key Site Manager/Owner

Two attempts were made in January 2017 to contact the property owner for a telephone interview; we were unable to reach the property owner to conduct an interview. This data gap is potentially significant if the property owner has information regarding past and current uses and conditions of the property pertaining to potential RECs.

5.2 Interview with Occupants and Others

At the request of Sound Transit we did not interview tenants of the on-site businesses and we did not interview prior owners/occupants of the subject property or owners of adjacent properties.

5.3 Interviews with Local Government Officials

Interviews with local government officials consisted of records requests to the City of Kent and King County Health Department (KCHD). Findings are presented in Section 3.3.2.

6.0 Evaluation

6.1 Findings and Opinion

- The earliest identified development on the subject property was a single-family residence with oil heat and a septic tank, constructed in 1931 and demolished by 2002. The available historic resources do not specify if the heating oil was stored in an UST or AST. The previous use of heating oil is considered a REC for the subject property.
- The existing automotive repair shop building has been in use on the subject property since the late 1940s and the former Southgate Oil facility operated on the subject property reportedly for 75 years. The automotive repair shop, suspect auto wrecking activities observed during a recent site reconnaissance, and documented petroleum releases at the former Southgate Oil facility are considered a REC to the subject property. Ecology issued a Further Action Required determination letter for the Southgate Oil facility in 2006.
- The subject property is within the mapped area of the Tacoma Smelter Plume (areawide contamination) where arsenic concentrations in surface/near surface soil are predicted to exceed the MTCA Method A cleanup level for unrestricted land use. Therefore, the Tacoma Smelter Plume is considered a REC for the subject property.
- The east-adjacent A to B Auto Rental & Towing facility (Auto Repair in Figure 2) and the south-adjacent Allison Marine boat and automotive repair facility are considered RECs to the subject property based on the potential for contaminant migration to the subject property from possible past leaks, spills or release of automotive-related fluids (e.g., fuels, lube oil, waste oil and degreasing solvents) and boat manufacturing-related chemicals (solvents, metals, petroleum products, hazardous manufacturing chemicals).
- The north-adjacent Former Kings Dry Cleaner (Figure 2) operated from at least 1977 until 2008. This facility may have operated for several years before the RCRA regulations that established requirements for hazardous waste generation, storage, handling, transport and disposal. The potential for dry cleaner releases to have occurred and impacted the subject property results in a REC.
- The database-listed former Shell 120956 site (Former Shell Oil Gas Station in Figure 2) is considered an HREC to the subject property based on the potential for contaminant migration to the subject property.

No other sites included on regulatory databases are likely to pose a potential risk for contaminant migration to the subject property and thus are not considered RECs, CRECs, or HRECs to the subject property.

One *de minimis* condition was identified during our study that does not meet the ASTM definition of REC: a septic tank was associated with the former single family residence on the property. The

available historical resources do not indicate whether the septic tank was removed when the single family residence was demolished.

6.2 Data Gaps

As of the publication of this report, right-of-entry to the subject property has not been provided by Sound Transit. Therefore, the Phase I ESA site reconnaissance was limited to viewing the property from adjacent public rights-of-way. This scope exception results in a significant data gap because we were unable to physically observe the entire property to identify potential RECs.

Our attempts to contact a Key Site Manager for an interview have been unsuccessful. This scope exception results in a potentially significant data gap because we were unable to confirm previous and current uses and conditions of the property to evaluate potential RECs.

At the request of Sound Transit, we did not request records of USTs or hazardous materials incident responses from Puget Sound Regional Fire Authority. This data gap is potentially significant if Puget Sound Regional Fire Authority has information regarding USTs or hazardous materials incident responses for the subject property.

6.3 Conclusions and Recommendations

GeoEngineers has performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E 1527-13 of the property at 23428 Pacific Highway South in Kent, Washington, King County Tax Parcel 2500600480 identified by Sound Transit as FWLE Parcel FL-209. Any exceptions to, or deletions from, this practice are described in Section 1.4 of this report.

This assessment has revealed no evidence of RECs in connection with the subject property, with the exception of the following:

- Property Specific Condition/MTCA Cleanup Site on Subject Property. Documented petroleum contamination in soil associated with the former Southgate Oil MTCA cleanup site on the subject property, combined with auto repair activities on the subject property since the 1940s that may have used a septic system, and current suspect auto wrecking yard activities, represent a REC.
    - Numerous UST removals and a limited MTCA cleanup action occurred in portions of the subject property prior to 2002 (Southgate Oil, see Ecology files in Appendix C). As of 2002, concentrations of petroleum hydrocarbons exceeding MTCA Method A cleanup levels remained in soil in a localized area along the northern property boundary. Ecology issued a Further Action Required determination letter for the Southgate Oil facility in 2006, based on potential off-property migration of diesel contamination to the north. The risk of soil (and possibly soil vapor and groundwater) residual impacts of regulatory significance on the property from the Southgate Oil facility is high in our opinion and we recommend a Phase II ESA to assess residual impacts.
    - The risk of soil, soil vapor or groundwater impacts of regulatory significance from auto repair and suspect auto wrecking activities on the subject property is moderate to high and should be further evaluated through a full site reconnaissance to assess whether a Phase II ESA

investigation is warranted. The limited Phase I ESA site reconnaissance could not assess current storage of oil or chemicals and wastes to rule out a material threat of a leak, spill or release that could affect the subject property.

  - Supplemental environmental investigation (Phase II ESA) is also recommended at the subject property if Sound Transit requires a remediation cost estimate or a cost estimate for contaminated/impacted soil and groundwater handling and disposal costs associated with future redevelopment by Sound Transit.

- **Property-Specific Condition/Residential Heating Oil Tank.** A former single-family residence on the subject property used oil heat, according to archived property tax records. No information was identified during the course of this Phase I ESA to indicate whether oil was stored in an AST or UST. For the purpose of the Phase I ESA conclusions at this time, we assume the residence used a heating oil UST. Use of heating oil and a heating oil UST are considered a REC for the subject property. During the Phase I ESA we were unable to observe evidence of an unused heating oil UST on the property due to limitations of the site reconnaissance. The risk of soil, groundwater or soil vapor impacts of regulatory significance at the property from a possible past heating oil UST is low given that the property was redeveloped following removal of the residence. UST assessment and decommissioning in accordance with state and local regulations and best management practices will be necessary in the future if Sound Transit acquires the property and a UST is discovered. Options to manage future construction-related risks associated with a possible past heating oil UST and possible subsurface impacts from past releases of heating oil include: a subsurface exploration and sampling program to evaluate soil surrounding the UST, a contaminated soil and groundwater identification, handling and disposal plan for Sound Transit contractors, budgetary considerations for UST removal and handling/disposal costs for petroleum-impacted soil, and HAZWOPER requirements for workers.
- **Areawide Condition.** The subject property is within Ecology's mapped footprint of the Tacoma Smelter Plume (areawide contamination) where arsenic concentrations in surface/near surface soil are predicted to exceed the MTCA Method A cleanup level for unrestricted land use. Therefore, the Tacoma Smelter Plume is considered a REC for the subject property. The subject property falls within the area where surface soil concentrations of arsenic are expected to be in the range of 40 to 100 ppm; the MTCA Method A cleanup level for arsenic for unrestricted land use is equivalent to 20 ppm. The risk of soil impacts of regulatory significance on the property from this identified REC is moderate in our opinion; while the western property of the property was developed between the 1930s and 1970s has likely been paved for some time, the eastern portion of the property may not have had substantial regrading in recent years. The possibility of arsenic and lead in surface soil on the property may require consideration during property redevelopment. Specifically, soil characterization or waste profiling may be warranted in conjunction with any future construction that would result in moving soil from the property to an off-site location.
- **Off-site Condition/Suspect Sites Not Listed on Regulatory Databases:** The existing automotive repair shop on the adjacent property to the east (Auto Repair in Figure 2, identified as A To B Auto Rental & Towing in Table 3-2) has been used as an automotive repair shop and used car lot since at

least the 1990s. The adjacent property to the south (Allison Marine in Figure 2) has been used for boat and automotive repair from the mid-2000s until the present. Automotive and boat repair activities at adjacent properties are collectively considered a REC to the subject property based on the potential for contaminant migration to the subject property from possible past leaks, spills or release of automotive-related fluids (e.g., fuels, lube oil, waste oil, degreasing solvents, paints, etc.) and boat repair-related chemicals. The adjacent property to the north (Kings Dry Cleaner in Figure 2) has been a dry cleaner back to the 1970s, which results in a risk for contaminant migration to the subject property based on proximity, and is therefore also a REC. We note that current or past practices related to use, storage and handling of petroleum and hazardous substances at these adjacent facilities could not be determined based on research performed for this Phase I ESA. The risk of soil, groundwater or soil vapor impacts of regulatory significance at the subject property from the off-site potential sources is low to moderate, based on the close proximity and upgradient to crossgradient locations. If subsurface investigation completed at any off-site properties identified as potential sources of contamination, or in adjacent rights-of-way, indicates potential for contaminant migration to the subject property, then we recommend further evaluation by exploration and sampling at the subject property. Uncertainties associated with possible subsurface impacts from off-site sources also could be evaluated or reduced through waste characterization prior to construction and with requirements for contractors to prepare a contaminated soil and groundwater identification, handling and disposal plan, and to follow applicable HAZWOPER regulations.

- **Off-Site Condition/NFA MTCA Cleanup Site.** The former Shell Oil gas station located to the west and upgradient of the subject property is listed on regulatory databases and has a no further action determination as of 2014. Therefore, this condition meets the ASTM definition of HREC.

One *de minimis* condition was identified during our study: historic septic tank systems associated with former and existing buildings may be located on the subject property. Based on research for this Phase I ESA, sanitary sewer service to the subject property area began approximately during the 1960s or 1970s and existing subject property buildings were constructed between the 1940s and 1970s.

As of the publication of this report, right-of-entry to the subject property has not been provided by Sound Transit. Therefore, the Phase I ESA site reconnaissance was limited to viewing the property from adjacent public rights-of-way. This scope exception results in a significant data gap because we were unable to physically observe the entire property to identify potential RECs.

Our attempts to contact a Key Site Manager for an interview have been unsuccessful. This scope exception results in a potentially significant data gap because we were unable to confirm previous and current uses and conditions of the property to evaluate potential RECs.

At the request of Sound Transit, we did not request records of USTs or hazardous materials incident responses from South King County Fire and Rescue. This data gap is potentially significant if South King County Fire and Rescue has information regarding USTs or hazardous materials incident responses for the subject property.

6.4 Limitations and Guidelines for Use

These Limitations provide information to help you manage your risks with respect to the use of this report. Some clients, design professionals and contractors may not recognize that the geoscience practices (geotechnical engineering, geology and environmental science) are far less exact than other engineering and natural science disciplines. This lack of understanding can create unrealistic expectations that could lead to disappointments, claims and disputes. GeoEngineers includes these explanatory "limitations" provisions in our reports to help reduce such risks. Please confer with GeoEngineers if you are unclear how these "Limitations and Guidelines for Use" apply to your project or site.

6.4.1 Standard Limitations

This Phase I ESA has been prepared for use by Sound Transit. GeoEngineers has performed this Phase I ESA of the property at 23428 Pacific Highway South in Kent, Washington, King County Tax Parcel 2500600480 identified by Sound Transit as East Link Parcel FL-209, in general accordance with the scope and limitations of the subcontract between HDR and GeoEngineers dated August 24, 2012, along with Amendments 1 through 6 and Agreement No. RTA/AE 044-12 between HDR and Sound Transit , ASTM International (ASTM) E 1527-13, Standard Practice for Phase I ESAs and EPA's Federal Standard 40 CFR Part 312 "Standards and Practices for All Appropriate Inquiries (AAI)." This report has been prepared for the exclusive use of Sound Transit and their agents. This report is not intended for use by others, and the information contained herein is not applicable to other properties. No other party may rely on the product of our services unless we agree in advance to such reliance in writing. This is to provide our firm with reasonable protection against open-ended liability claims by third parties with whom there would otherwise be no contractual limits to their actions. Within the limitations of scope, schedule and budget, our services have been executed in accordance with our Agreement with the Client and generally accepted environmental practices in this area at the time this report was prepared.

Within the limitations of scope, schedule and budget, our services have been executed in accordance with the generally accepted environmental science practices for Phase I ESAs in this area at the time this report was prepared. No warranty or other conditions, express or implied, should be understood.

Any electronic form, facsimile or hard copy of the original document (email, text, table, and/or figure), if provided, and any attachments are only a copy of the original document. The original document is stored by GeoEngineers, Inc. and will serve as the official document of record.

6.4.2 Special Limitations

GeoEngineers structures our services to meet the specific needs of our clients. For example, an environmental site assessment study conducted for a property owner or lessee may not fulfill the needs of a prospective purchaser of the same property. Because each environmental study is unique, each environmental report is unique, prepared solely for the specific client and project property. This report should not be applied for any purpose or project except the one originally contemplated.

GeoEngineers considered a number of unique, project-specific factors when establishing the scope of services for this project and report. Unless GeoEngineers specifically indicates otherwise, do not rely on this report if it was:

- not prepared for you,
- not prepared for your project,
- not prepared for the specific property explored, or
- completed before important project changes were made.

If important changes are made to the project or subject property after the date of this report, GeoEngineers should be retained to review our interpretations and recommendations and to provide written modifications or confirmation, as appropriate.

GeoEngineers makes no warranties or guarantees regarding the accuracy or completeness of information provided or compiled by others. The information presented in this report is based on the above-described research and a single recent site visit. GeoEngineers has relied upon information provided by others in our description of historical conditions and in our review of regulatory databases and files. The available data do not provide definitive information with regard to all past uses, operations or incidents at the subject property or adjacent properties.

No ESA can wholly eliminate uncertainty regarding the potential for recognized environmental conditions (RECs) in connection with a property. Performance of an ESA study is intended to reduce, but not eliminate, uncertainty regarding the potential for RECs in connection with a property. There is always a potential that areas with contamination that were not identified during this Phase I ESA exist at the subject property or in the study area. Further evaluation of such potential would require additional research, subsurface exploration, sampling and/or testing.

Some substances may be present in the vicinity of the subject property in quantities or under conditions that may have led, or may lead, to contamination of the subject property, but are not included in current local, state or federal regulatory definitions of hazardous substances or do not otherwise present current potential liability. GeoEngineers cannot be responsible if the standards for appropriate inquiry, or regulatory definitions of hazardous substance, change or if more stringent environmental standards are developed in the future.

This environmental report is based on conditions that existed at the time the study was performed. The findings and conclusions of this report may be affected by the passage of time (for example, a Phase I ESA report is typically applicable for 180 days), by events such as a change in property use or occupancy, or by natural events, such as floods, earthquakes, slope instability or groundwater fluctuations. If more than six months have passed since issuance of our report or work product, or if any of the described events may have occurred, please contact GeoEngineers before applying this report so that we may evaluate whether changed conditions affect the continued reliability or applicability of our conclusions and recommendations.

The equipment, techniques and personnel used to perform an environmental study differ significantly from those used to perform a geotechnical or geologic study and vice versa. For that reason, a geotechnical engineering or geologic report does not usually relate any environmental findings, conclusions or recommendations; e.g., about the likelihood of encountering underground storage tanks or regulated contaminants. Similarly, environmental reports are not used to address geotechnical or geologic concerns regarding a specific project.

GeoEngineers' Scope of Work specifically excludes the investigation, detection, prevention or assessment of the presence of Biological Pollutants. Accordingly, this report does not include any interpretations, recommendations, findings, or conclusions regarding the detecting, assessing, preventing or abating of Biological Pollutants and no conclusions or inferences should be drawn regarding Biological Pollutants, as they may relate to this project. The term "Biological Pollutants" includes, but is not limited to, molds, fungi, spores, bacteria, and viruses, and/or any of their byproducts. If Client desires these specialized services, they should be obtained from a consultant who offers services in this specialized field.

We appreciate the opportunity to be of service to Sound Transit. Please call if you require more information or have questions regarding this report.

APPENDIX A
USER PROVIDED INFORMATION AND COMPLETED USER QUESTIONNAIRE

AE 0044-12 WP 3.S
PHASE I ENVIRONMENTAL SITE ASSESSMENT
23428 PACIFIC HIGHWAY SOUTH, KENT, WASHINGTON,
FL-209, KING COUNTY TAX PARCEL 2500600480
PHASE I ESA USER QUESTIONNAIRE

To enable us to complete the Phase I ESA and for the user of this report to be potentially eligible for one or more of the federal landowner liability protections, please complete the questionnaire below and provide the additional information requested.

1. Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal and state or local law?

   ☐ YES ☒ NO ☐ DON'T KNOW Explain: _____

2. Are you aware of any Activity and Use Limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the Site and/or have been filed or recorded in a registry under federal, tribal, state or local law?

   ☐ YES ☒ NO ☐ DON'T KNOW Explain: _____

3. As the user of this Phase I ESA do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

   ☐ YES ☒ NO ☐ DON'T KNOW Explain: _____

4. Does the purchase price being paid for this property reasonable reflect the fair market value of the property?

   ☐ YES ☐ NO ☒ DON'T KNOW Explain: Purchase price not determined.

   If you conclude that there is a difference between the purchase price and fair market value and you answered NO above, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

   ☐ YES ☐ NO ☐ DON'T KNOW Explain: _____

5. Are you aware of commonly known or reasonably ascertainable information about the property that would help us identify conditions indicative or releases or threatened releases? For example,

   Do you know the past uses of the property?

   a. ☐ YES ☒ NO ☐ DON'T KNOW Explain: _____

   Do you know of specific chemicals that are present or once were present on the property?

   b. ☐ YES ☒ NO ☐ DON'T KNOW Explain: _____

   Do you know of spills or other chemical releases that have taken place at or near the property?

   c. ☐ YES ☒ NO ☐ DON'T KNOW Explain: _____

   Do you know of any environmental cleanups that have taken place at or near the property?

   d. ☐ YES ☒ NO ☐ DON'T KNOW Explain: _____

6. Based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?

☐ YES ☐ NO ☒ DON'T KNOW Explain: _____

LIST OF REQUESTED INFORMATION, IF AVAILABLE

- Names and phone numbers of key individuals with knowledge of Site use history.
- A map showing the boundaries of the subject Site.
- Tax ID numbers for parcels included within the Site.
- Copies of any past environmental Site assessment and/or audit reports or risk assessment studies.
- Environmental permits.
- Registrations for underground and above-ground storage tanks (if any).
- Material data safety sheets for hazardous substances used or stored on Site (if any).
- Community right-to-know plans pertaining to the Site.
- Safety plans pertaining to on-site facilities.
- Reports regarding geotechnical and/or hydrogeologic conditions.
- Notices or other correspondence from any government agency relating to past or current violations of environmental laws with respect to the property or relating to environmental liens encumbering the property.
- Recorded Activity Use Limitations (AULs).
- Title Report.

ALTA COMMITMENT FOR TITLE INSURANCE

Commitment Number:

0079490-06
[ROW#FL-209]

Issued By agent:

CHICAGO TITLE
COMPANY OF WASHINGTON

CHICAGO TITLE INSURANCE COMPANY, a Nebraska corporation ("Company"), for a valuable consideration, commits to issue its policy or policies of title insurance, as identified in Schedule A, in favor of the Proposed Insured named in Schedule A, as owner or mortgagee of the estate or interest in the land described or referred to in Schedule A, upon payment of the premiums and charges and compliance with the Requirements; all subject to the provisions of Schedules A and B and to the Conditions of this Commitment.

This Commitment shall be effective only when the identity of the Proposed Insured and the amount of the policy or policies committed for have been inserted in Schedule A by the Company.

All liability and obligation under this Commitment shall cease and terminate six (6) months after the Effective Date or when the policy or policies committed for shall issue, whichever first occurs, provided that the failure to issue the policy or policies is not the fault of the Company.

The Company will provide a sample of the policy form upon request.

This Commitment shall not be valid or binding until countersigned by a validating officer or authorized signatory.

IN WITNESS WHEREOF, CHICAGO TITLE INSURANCE COMPANY has caused its corporate name and seal to be affixed by its duly authorized officers on the date shown in Schedule A.

Chicago Title Insurance Company

SCHEDULE A

ORDER NO. 0079490-06

1. Effective Date: September 1, 2016 at 08:00 AM
2. Policy or (Policies) to be issued:

   a. ALTA Owner's Policy 2006

Proposed Insured:	Central Puget Sound Regional Transit Authority, a regional transit authority	
Policy Amount:	To Be Determined	
Premium:		To Be Determined
Tax:		To Be Determined
Rate:	Standard	
Total:		To Be Determined

3. The estate or interest in the land described or referred to in this Commitment is:

   Fee Simple

4. Title to the estate or interest in the land is at the Effective Date vested in:

   Juan M. Castaneda and Adriana Rojas, husband and wife

5. The land referred to in this Commitment is described as follows:

EXHIBIT "A"

Legal Description

Lot 8, Block 5, Federal Highway Addition to King County, Washington, according to the plat thereof recorded in Volume 30 of Plats, Page(s) 1 and 2, in King County, Washington;
Except the following described tract:

Beginning at the Southeasterly corner of Lot 8, Block 5, of said Addition;
Thence West, along the Southerly boundary of said Lot, a distance of 120 feet;
Thence Northerly, parallel to the Easterly boundary of said Lot, a distance of 50 feet;
Thence Easterly, parallel to the Southerly line of said Lot, to the Easterly boundary of said Lot;
Thence Southerly, along the Easterly line thereof, to the Point of Beginning.

The use of this Form is restricted to ALTA licensees and ALTA members in good standing as of the date of use.
All other uses are prohibited. Reprinted under license from the American Land Title Association.

SCHEDULE B

Schedule B of the policy or policies to be issued will contain exceptions to the following matters unless the same are disposed of to the satisfaction of the Company:

GENERAL EXCEPTIONS

A. Rights or claims of parties in possession, or claiming possession, not shown by the Public Records.

B. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land.

C. Easements, prescriptive rights, rights-of-way, liens or encumbrances, or claims thereof, not shown by the Public Records.

D. Any lien, or right to a lien, for contributions to employee benefit funds, or for state workers' compensation, or for services, labor, or material heretofore or hereafter furnished, all as imposed by law, and not shown by the Public Records.

E. Taxes or special assessments which are not yet payable or which are not shown as existing liens by the Public Records.

F. Any lien for service, installation, connection, maintenance, tap, capacity, or construction or similar charges for sewer, water, electricity, natural gas or other utilities, or for garbage collection and disposal not shown by the Public Records.

G. Unpatented mining claims, and all rights relating thereto.

H. Reservations and exceptions in United States Patents or in Acts authorizing the issuance thereof.

I. Indian tribal codes or regulations, Indian treaty or aboriginal rights, including easements or equitable servitudes.

J. Water rights, claims or title to water.

K. Defects, liens, encumbrances, adverse claims or other matters, if any, created, first appearing in the Public Records, or attaching subsequent to the effective date hereof but prior to the date the proposed Insured acquires of record for value the estate or interest or mortgage thereon covered by this Commitment.

Copyright American Land Title Association. All rights reserved.

The use of this Form is restricted to ALTA licensees and ALTA members in good standing as of the date of use.
All other uses are prohibited. Reprinted under license from the American Land Title Association.

SCHEDULE B
(continued)

SPECIAL EXCEPTIONS

1. Side Sewer Easement and the terms and conditions thereof:

   Recording Date: May 14, 1976
   Recording No.: 7605140519
   Width: 5 feet
   Affects: An undisclosed portion of said Land along the line as constructed

   Said easement contains a provision for bearing a proportionate or equal cost of maintenance, repair or reconstruction of said side sewer by the common users.

2. Easement(s) for the purpose(s) shown below and rights incidental thereto, as granted in a document:

   Granted to: City of Kent, a municipal corporation
   Purpose: Constructing, operating, maintaining, improving, altering, reconstructing and repairing a public right of way
   Recording Date: January 6, 2005
   Recording No.: 20050106002176
   Affects: A Southwesterly portion of said premises as described and delineated in document

3. Exceptions and reservations contained in deed whereby the grantor excepts and reserves all oil, gases, coal, ores, minerals, fossils, etc., and the right of entry for opening, developing and working the same and providing that such rights shall not be exercised until provision has been made for full payment of all damages sustained by reason of such entry

   Grantor: State of Washington
   Recording No.: 1382010

   Right of the State of Washington or its successors, subject to payment of compensation, to acquire rights of way for private railroads, skid roads, flumes, canals, water courses or other easements for transporting and moving timber, stone, minerals and other products from this and other land, as reserved in above-referenced deed.

4. Rights of the public to make necessary slopes for cuts or fills upon the Land in the reasonable original grading of streets, avenues, alleys and roads, as disclosed in the plat of Federal Highway Addition to King County, Washington.

5. Any rights, interests, or claims which may exist or arise by reason of the following matters disclosed by survey,

   Recording Date: May 15, 1990
   Recording No.: 9005159027
   Matters shown: Discrepancy between the location of board fence and the Southerly property boundary of said premises

Copyright American Land Title Association. All rights reserved.

The use of this Form is restricted to ALTA licensees and ALTA members in good standing as of the date of use.
All other uses are prohibited. Reprinted under license from the American Land Title Association.

SCHEDULE B
(continued)

6. Liability for Sewer Treatment Capacity Charges, if any, affecting certain areas of King, Pierce and Snohomish Counties. Said charges could apply to property connecting to the metropolitan sewerage facilities or reconnecting or changing its use and/or structure after February 1, 1990.
Please contact the King County Wastewater Treatment Division, Capacity Charge Program, for further information at 206-296-1450 or Fax No. 206-263-6823 or email at CapChargeEscrow@kingcounty.gov.

   * A map showing sewer service area boundaries and incorporated areas can be found at:
   http://your.kingcounty.gov/ftp/gis/Web/VMC/utilities/servarea_cities.pdf

   Unrecorded Sewer Capacity Charges are not a lien on title to the Land.

   NOTE: This exception will not appear in the policy to be issued.

7. Payment of the real estate excise tax, if required.

   The Land is situated within the boundaries of local taxing authority of City of Kent.

   Present rate of real estate excise tax as of the date herein is 1.78 percent.

   Any conveyance document must be accompanied by the official Washington State Excise Tax Affidavit. The applicable excise tax must be paid and the affidavit approved at the time of the recording of the conveyance documents. (NOTE: Real Estate Excise Tax Affidavits must be printed as legal size forms).

   An additional $5.00 Electronic Technology Fee must be included in all excise tax payments.

   If the transaction is exempt, an additional $5.00 Affidavit Processing Fee is required.

8. General and special taxes and charges, payable February 15, delinquent if first half unpaid on May 1, second half delinquent if unpaid on November 1 of the tax year (amounts do not include interest and penalties):

Year:	2016
Tax Account No.:	250060-0480-07
Levy Code:	1468
Assessed Value-Land:	$470,900.00
Assessed Value-Improvements:	$20,400.00
General and Special Taxes:	
Billed:	$6,280.33
Paid:	$3,140.17
Unpaid:	$3,140.16

Copyright American Land Title Association. All rights reserved.

The use of this Form is restricted to ALTA licensees and ALTA members in good standing as of the date of use.
All other uses are prohibited. Reprinted under license from the American Land Title Association.

SCHEDULE B
(continued)

9. A deed of trust to secure an indebtedness in the amount shown below,

Amount:	$385,000.00
Dated:	November 1, 2005
Trustor/Grantor:	Michael J. Guerzon and Jessamine Guerzon, husband and wife
Trustee:	Pacific Northwest Title Company of Washington
Beneficiary:	The Di Giovanni Family Trust dated June 23, 1992, Marsilio Di Giovanni, Trustee
Recording Date:	October 24, 2005
Recording No.:	20051024001643

10. Assignment of Leases and Rents

Assigned to:	The Di Giovanni Family Trust, dated June 23, 1992
Assigned by:	Michael Guerzon and Jessamine Guerzon, husband and wife
Recording Date:	October 24, 2005
Recording No.:	20051024001644

11. A deed of trust to secure an indebtedness in the amount shown below,

Amount:	$550,000.00
Dated:	November 21, 2008
Trustor/Grantor:	Juan M. Castaneda and Adriana Rojas, husband and wife

12. Any unrecorded leaseholds, right of vendors and holders of security interests on personal property installed upon the Land and rights of tenants to remove trade fixtures at the expiration of the terms.

END OF EXCEPTIONS

NOTES

The following matters will not be listed as Special Exceptions in Schedule B of the policy. There will be no coverage for loss arising by reason of the matters listed below because these matters are either excepted or excluded from coverage or are not matters covered under the insuring provisions of the policy.

Note A: **Note: Your application for title insurance was placed by reference to only a street address or tax identification number. Based on our records, we believe that the legal description in this report covers the parcel(s) of Land that you requested. If the legal description is incorrect, the seller/borrower must notify the Company and/or the settlement company in order to prevent errors and to be certain that the correct parcel(s) of Land will appear on any documents to be recorded in connection with this transaction and on the policy of title insurance.**

SCHEDULE B
(continued)

Note B: Note: FOR INFORMATIONAL PURPOSES ONLY:

The following may be used as an abbreviated legal description on the documents to be recorded, per Amended RCW 65.04.045. Said abbreviated legal description is not a substitute for a complete legal description within the body of the document:

Portion of Lot 8, Block 5, Volume 30 of Plats, Pages 1-2.
Tax Account No.: 250060-0480-07

Note C: Note: Any map furnished with this Commitment is for convenience in locating the land indicated herein with reference to streets and other land. No liability is assumed by reason of reliance thereon.

CONDITIONS

1. The term mortgage, when used herein, shall include deed of trust, trust deed, or other security instrument.
2. If the proposed Insured has or acquired actual knowledge of any defect, lien, encumbrance, adverse claim or other matter affecting the estate or interest or mortgage thereon covered by this Commitment other than those shown in Schedule B hereof, and shall fail to disclose such knowledge to the Company in writing, the Company shall be relieved from liability for any loss or damage resulting from any act of reliance hereon to the extent the Company is prejudiced by failure to so disclose such knowledge. If the proposed Insured shall disclose such knowledge to the Company, or if the Company otherwise acquires actual knowledge of any such defect, lien, encumbrance, adverse claim or other matter, the Company at its option may amend Schedule B of this Commitment accordingly, but such amendment shall not relieve the Company from liability previously incurred pursuant to paragraph 3 of these Conditions.
3. Liability of the Company under this Commitment shall be only to the named proposed Insured and such parties included under the definition of Insured in the form of policy or policies committed for and only for actual loss incurred in reliance hereon in undertaking in good faith (a) to comply with the requirements hereof, or (b) to eliminate exceptions shown in Schedule B, or (c) to acquire or create the estate or interest or mortgage thereon covered by this Commitment. In no event shall such liability exceed the amount stated in Schedule A for the policy or policies committed for and such liability is subject to the insuring provisions and Conditions and the Exclusions from Coverage of the form of policy or policies committed for in favor of the proposed Insured which are hereby incorporated by reference and are made a part of this Commitment except as expressly modified herein.
4. This Commitment is a contract to issue one or more title insurance policies and is not an abstract of title or a report of the condition of title. Any action or actions or rights of action that the proposed Insured may have or may bring against the Company arising out of the status of the title to the estate or interest or the status of the mortgage thereon covered by this Commitment must be based on and are subject to the provisions of this Commitment.
5. *The policy to be issued contains an arbitration clause. All arbitrable matters when the Amount of Insurance is $2,000,000 or less shall be arbitrated at the option of either the Company or the Insured as the exclusive remedy of the parties. You may review a copy of the arbitration rules at http://www.alta.org.*

RECORDING REQUIREMENTS

Effective January 1, 1997, document format and content requirements have been imposed by Washington Law. Failure to comply with the following requirements may result in rejection of the document by the county recorder or imposition of a $50.00 surcharge.

First page or cover sheet:

3" top margin containing nothing except the return address.

1" side and bottom margins containing no markings or seals.

Title(s) of documents.

Recording no. of any assigned, released or referenced document(s).

Grantors names (and page no. where additional names can be found).

Grantees names (and page no. where additional names can be found).

Abbreviated legal description (Lot, Block, Plat Name or Section, Township, Range and Quarter, Quarter Section for unplatted). Said abbreviated legal description is not a substitute for a complete legal description which must also appear in the body of the document.

Assessor's tax parcel number(s).

Return address (in top 3" margin).

**A cover sheet can be attached containing the above format and data if the first page does not contain all required data.

Additional Pages:

1" top, side and bottom margins containing no markings or seals.

All Pages:

No stapled or taped attachments. Each attachment must be a separate page. All notary and other pressure seals must be smudged for visibility. Font size of 8 points or larger.

FIDELITY NATIONAL FINANCIAL, INC.
PRIVACY NOTICE
Effective: April 1, 2016

Order No.: 0079490-06

At Fidelity National Financial, Inc. and its majority-owned subsidiary companies (collectively, "FNF", "our" or "we"), we value the privacy of our customers. This Privacy Notice explains how we collect, use, and protect your information and explains the choices you have regarding that information. A summary of our privacy practices is below. We also encourage you to read the complete Privacy Notice following the summary.

Types of Information Collected. You may provide us with certain personal information, like your contact information, social security number (SSN), driver's license, other government ID numbers, and/or financial information. We may also receive information from your Internet browser, computer and/or mobile device.	**How Information is Collected.** We may collect personal information directly from you from applications, forms, or communications we receive from you, or from other sources on your behalf, in connection with our provision of products or services to you. We may also collect browsing information from your Internet browser, computer, mobile device or similar equipment. This browsing information is generic and reveals nothing personal about the user.
Use of Your Information. We may use your information to provide products and services to you (or someone on your behalf), to improve our products and services, and to communicate with you about our products and services. We do not give or sell your personal information to parties outside of FNF for their use to market their products or services to you.	**Security Of Your Information.** We utilize a combination of security technologies, procedures and safeguards to help protect your information from unauthorized access, use and/or disclosure. We communicate to our employees about the need to protect personal information.
Choices With Your Information. Your decision to submit personal information is entirely up to you. You can opt-out of certain disclosures or use of your information or choose to not provide any personal information to us.	**When We Share Information.** We may disclose your information to third parties providing you products and services on our behalf, law enforcement agencies or governmental authorities, as required by law, and to parties with whom you authorize us to share your information.
Information From Children. We do not knowingly collect information from children under the age of thirteen (13), and our websites are not intended to attract children.	**Privacy Outside the Website.** We are not responsible for the privacy practices of third parties, even if our website links to those parties' websites.
Access and Correction. If you desire to see the information collected about you and/or correct any inaccuracies, please contact us in the manner specified in this Privacy Notice.	**Do Not Track Disclosures.** We do not recognize "do not track" requests from Internet browsers and similar devices.
The California Online Privacy Protection Act. Certain FNF websites collect information on behalf of mortgage loan servicers. The mortgage loan servicer is responsible for taking action or making changes to any consumer information submitted through those websites.	**International Use.** By providing us with your information, you consent to the transfer, processing and storage of such information outside your country of residence, as well as the fact that we will handle such information consistent with this Privacy Notice.
Your Consent To This Privacy Notice. By submitting information to us and using our websites, you are accepting and agreeing to the terms of this Privacy Notice.	**Contact FNF.** If you have questions or wish to contact us regarding this Privacy Notice, please use the contact information provided at the end of this Privacy Notice.

FIDELITY NATIONAL FINANCIAL, INC.
PRIVACY NOTICE

FNF respects and is committed to protecting your privacy. We pledge to take reasonable steps to protect your Personal Information (as defined herein) and to ensure your information is used in compliance with this Privacy Notice.

This Privacy Notice is only in effect for information collected and/or owned by or on behalf of FNF, including collection through any FNF website or online services offered by FNF (collectively, the "Website"), as well as any information collected offline (e.g., paper documents). The provision of this Privacy Notice to you does not create any express or implied relationship, nor create any express or implied duty or other obligation, between FNF and you.

Types of Information Collected
We may collect two (2) types of information: Personal Information and Browsing Information.

Personal Information. The types of personal information FNF collects may include, but are not limited to:

- contact information (*e.g.*, name, address, phone number, email address);
- social security number (SSN), driver's license, and other government ID numbers; and
- financial account or loan information.

Browsing Information. The types of browsing information FNF collects may include, but are not limited to:

- Internet Protocol (or IP) address or device ID/UDID, protocol and sequence information;
- browser language;
- browser type;
- domain name system requests;
- browsing history;
- number of clicks;
- hypertext transfer protocol headers; and
- application client and server banners.

How Information is Collected
In the course of our business, we may collect *Personal Information* about you from the following sources:

- applications or other forms we receive from you or your authorized representative, whether electronic or paper;
- communications to us from you or others;
- information about your transactions with, or services performed by, us, our affiliates or others; and
- information from consumer or other reporting agencies and public records that we either obtain directly from those entities, or from our affiliates or others.

We may collect *Browsing Information* from you as follows:

- Browser Log Files. Our servers automatically log, collect and record certain Browsing Information about each visitor to the Website. The Browsing Information includes only generic information and reveals nothing personal about the user.
- Cookies. From time to time, FNF may send a "cookie" to your computer when you visit the Website. A cookie is a small piece of data that is sent to your Internet browser from a web server and stored on your computer's hard drive. When you visit the Website again, the cookie allows the Website to recognize your computer, with the goal of providing an optimized user experience. Cookies may store user preferences and other information. You can choose not to accept cookies by changing the settings of your Internet browser. If you choose not to accept cookies, then some functions of the Website may not work as intended.

Use of Collected Information
Information collected by FNF is used for three (3) main purposes:

- To provide products and services to you, or to one or more third party service providers who are performing services on your behalf or in connection with a transaction involving you;
- To improve our products and services; and
- To communicate with you and to inform you about FNF's products and services.

When We Share Information
We may share your Personal Information (excluding information we receive from consumer or other credit reporting agencies) and Browsing Information with certain individuals and companies, as permitted by law, without first obtaining your authorization. Such disclosures may include, without limitation, the following:

- to agents, representatives, or others to provide you with services or products you have requested, and to enable us to detect or prevent criminal activity, fraud, or material misrepresentation or nondisclosure;
- to third-party contractors or service providers who provide services or perform other functions on our behalf;
- to law enforcement or other governmental authority in connection with an investigation, or civil or criminal subpoenas or court orders; and/or
- to other parties authorized to receive the information in connection with services provided to you or a transaction involving you.

We may disclose Personal Information and/or Browsing Information when required by law or in the good-faith belief that such disclosure is necessary to:

- comply with a legal process or applicable laws;
- enforce this Privacy Notice;
- investigate or respond to claims that any information provided by you violates the rights of a third party; or
- protect the rights, property or personal safety of FNF, its users or the public.

We make efforts to ensure third party contractors and service providers who provide services or perform functions on our behalf protect your information. We limit use of your information to the purposes for which the information was provided. We do not give or sell your information to third parties for their own direct marketing use.

We reserve the right to transfer your Personal Information, Browsing Information, as well as any other information, in connection with the sale or other disposition of all or part of the FNF business and/or assets, or in the event of our bankruptcy, reorganization, insolvency, receivership or an assignment for the benefit of creditors. You expressly agree and consent to the use and/or transfer of this information in connection with any of the above described proceedings. We cannot and will not be responsible for any breach of security by any third party or for any actions of any third party that receives any of the information that is disclosed to us.

Choices With Your Information
Whether you submit your information to FNF is entirely up to you. If you decide not to submit your information, FNF may not be able to provide certain products or services to you. You may choose to prevent FNF from using your information under certain circumstances ("opt out"). You may opt out of receiving communications from us about our products and/or services.

Security And Retention Of Information
FNF is committed to protecting the information you share with us and utilizes a combination of security technologies, procedures and safeguards to help protect it from unauthorized access, use and/or disclosure. FNF trains its employees on privacy practices and on FNF's privacy and information security policies. FNF works hard to retain information related to you only as long as reasonably necessary for business and/or legal purposes.

Information From Children
The Website is meant for adults. The Website is not intended or designed to attract children under the age of thirteen (13). We do not collect Personal Information from any person that we know to be under the age of thirteen (13) without permission from a parent or guardian.

Access and Correction
To access your Personal Information in the possession of FNF and correct inaccuracies, please contact us by email at privacy@fnf.com or by mail at:

Fidelity National Financial, Inc.
601 Riverside Avenue
Jacksonville, Florida 32204
Attn: Chief Privacy Officer

Your Consent To This Privacy Notice
By submitting Personal Information and/or Browsing Information to FNF, you consent to the collection and use of information by FNF in compliance with this Privacy Notice. We reserve the right to make changes to this Privacy Notice. If we change this Privacy Notice, we will post the revised version on the Website.

Privacy Outside the Website
The Website may contain links to other websites, including links to websites of third party service providers. FNF is not and cannot be responsible for the privacy practices or the content of any of those other websites.

International Users
Because FNF's headquarters is located in the United States, we may transfer your Personal Information and/or Browsing Information to the United States. By using our website and providing us with your Personal Information and/or Browsing Information, you understand and consent to the transfer, processing and storage of such information outside your country of residence, as well as the fact that we will handle such information consistent with this Privacy Notice.

Do Not Track Disclosures
Currently, our policy is that we do not recognize "do not track" requests from Internet browsers and similar devices.

The California Online Privacy Protection Act
For some websites which FNF or one of its companies owns, such as the Customer CareNet ("CCN"), FNF is acting as a third party service provider to a mortgage loan servicer. In those instances, we may collect certain information on behalf of that mortgage loan servicer, including:

- first and last name;
- property address;
- user name and password;
- loan number;
- social security number - masked upon entry;
- email address;
- security questions and answers; and
- IP address.

The information you submit is then transferred to your mortgage loan servicer by way of CCN. **The mortgage loan servicer is responsible for taking action or making changes to any consumer information submitted through this website. For example, if you believe that your payment or user information is incorrect, you must contact your mortgage loan servicer.**

CCN does not share consumer information with third parties, other than those with which the mortgage loan servicer has contracted to interface with the CCN application. All sections of this Privacy Notice apply to your interaction with CCN, except for the sections titled Choices with Your Information, and Access and Correction. If you have questions regarding the choices you have with regard to your personal information or how to access or correct your personal information, contact your mortgage loan servicer.

Contact FNF
Please send questions and/or comments related to this Privacy Notice by email at privacy@fnf.com or by mail at:

SOUTHGATE OIL

EASEMENT FOR A SEWER

THIS AGREEMENT, made this 29th day of April, 19 76, between John E. Matejka and Debra L. Matejka, his wife and Charles Williams and Barbara Ann Williams, his wife,

OWNERS OF: Lot 8, Blk 5, Federal Hwy Add, according to plat thereof recorded in Vol 30 of Plats, pg 1, records of King Co., Wash., less the S 50' of the E 120' - Known as Parcel "A"

AND: Ray Bruty and Lee N. Bruty, his wife

OWNERS OF: The S 50' of the E 120' of Lot 8, Blk 5, Federal Hwy Add't, according to plat thereof recorded in Vol 30 of Plats, page 1, records of King County, Washington Known as Parcel "B" respectively

7605140519

WITNESSETH: That for and in consideration of the mutual covenants herein expressed, it is hereby agreed between the above parties that:

1st - A side sewer shall be constructed as follows: Within the North 5 feet of the South 50 feet of Lot 8

2nd - There shall be an easement 5 feet wide for sewer along the line as constructed for the use of said properties.
TOGETHER WITH a temporary construction easement described as: Not Applicable

3rd - The cost of construction of said sewer shall be borne by the owners of the said properties as follows: Parcel "A" and Parcel "B" to share and share alike the costs

4th - The cost of maintenance, repair or reconstruction of that portion of the sewer used in common shall be borne in equal shares, except that the owners of any lower parcel shall not be responsible for the part of the sewer above their connection; and when necessary to repair, clean or reconstruct the sewer, the parties to this agreement shall have a right of entry for that purpose.

5th - This agreement shall be a covenant running with the land and shall be binding upon all parties and their heirs and assigns forever.

IN WITNESS WHEREOF we hereunto set our hands and seals the day and year first above written.

Charles Williams Jr. — Debra L Matejka

NOTARY PUBLIC, in and for the State of Washington, residing at TACOMA
My appointment expires 12-09-08

The rights granted in this easement shall necessarily include the right to construct, operate, maintain, improve, alter, reconstruct and repair public and/or private utilities. Grantee shall at all times exercise its rights under this easement in accordance with the requirements of all applicable statutes, orders, rules and regulations of any public authority having jurisdiction. Grantee accepts the easement area in its present physical condition, AS IS. Grantee does hereby release, indemnify and promise to defend and save harmless Grantor from and against any and all liability, loss, damage, expense actions and claims, including costs and reasonable attorney's fees incurred by Grantor in connection therewith, arising directly or indirectly on account of or out of the exercise by Grantee, its servants, agents, employees and contractors of the rights granted in this easement.

This easement shall be a covenant running with the land forever and shall bind Grantor's successors and assigns and all future owners of the real property parcels affected by this easement.

DEED OF TRUST

==========

THIS DEED OF TRUST, made this 1st day of November, 2005, between

1ST AM (5)
193351

Grantor/Borrower:
Michael J. Guerzon and Jessamine Guerzon, husband and wife,
whose address is 27713 10th Avenue S., Des Moines, WA 98198

Grantee/Beneficiary:
The Di Giovanni Family Trust dated June 23, 1992, Marsilio Di Giovanni, Trustee,
whose address is 17015 53rd Avenue S., Seattle, WA 98188

Trustee: Pacific Northwest Title Company of Washington, whose address is 215 Columbia Street, Seattle, WA 98104

Abbreviated Legal Description:

Portion of Lot 8, Block 5, Federal Highway Addition to King County, Washington, according to the plat thereof recorded in Volume 30 of Plats, pages 1 and 2, records of King County, Washington.

Full legal description is attached as Exhibit "A."

Assessor's Tax Parcel No.: 250060-0480-07

WITNESSETH: Grantor hereby bargains, sells and conveys to Trustee in Trust, with power of sale, the real property in King County, Washington described above,

which property is not used principally for agricultural or farming purposes, together with all the tenements, hereditaments, and appurtenances now or hereafter thereunto belonging or in any wise appertaining, and the rents, issues and profits thereof.

This deed is for the purpose of securing performance of each agreement of grantor herein contained, and payment of the sum of Three Hundred Eighty-Five Thousand and no/100ths ($385,000.00) DOLLARS with interest, in accordance with the terms of a promissory note of even date, payable to beneficiary or order, and made by Grantor, and all renewals, modifications and extensions thereof, and also such further sums as may be advanced or loaned by Beneficiary to Grantor, or any of their successors or assigns, together with interest thereon at such rate as shall be agreed upon. To protect the security of this Deed of Trust, Grantor covenants and agrees:

This instrument filed for record by
First American Title Insurance Company
as an accommodation only, it has not
been examined as to its execution or
as to its effect upon the title.

1. To keep the property in good condition and repair; to permit no waste thereof; to complete any building, structure or improvement being built or about to be built thereon; to restore promptly any building, structure or improvement thereon which may be damaged or destroyed; and to comply with all laws, ordinances, regulations, covenants, conditions and restrictions affecting the property.

2. To pay before delinquent all lawful taxes and assessments upon the property; to keep the property free and clear of all other charges, liens or encumbrances impairing the security of this Deed of Trust.

3. To keep all buildings now or hereafter erected on the property described herein continuously insured against loss by fire or other hazards in an amount not less than the total debt secured by this Deed of Trust. All policies shall be held by the Beneficiary, and be in such companies as the Beneficiary may approve and have loss payable first to the Beneficiary, as its interest may appear, and then to the Grantor. The amount collected under any insurance policy may be applied upon any indebtedness hereby secured in such order as the Beneficiary shall determine. Such application by the Beneficiary shall not cause discontinuance of any proceedings to foreclose this Deed of Trust. In the event of foreclosure, all rights of the Grantor in insurance policies then in force shall pass to the purchaser at the foreclosure sale.

4. To defend any action or proceeding purporting to affect the security hereof or the rights or powers of Beneficiary or Trustee, and to pay all costs and expenses, including cost of the title search and attorney's fees in a reasonable amount, in any such action or proceeding, and in any suit brought by Beneficiary to foreclose this Deed of Trust.

5. To pay all costs, fees and expenses in connection with this Deed of Trust, including the expenses of the Trustee incurred in enforcing the obligation secured hereby and Trustee's and attorney's fees actually incurred, as provided by statute.

6. Should Grantor fail to pay when due any taxes, assessments, insurance premiums, liens, encumbrances or other charges against the property hereinabove described, Beneficiary may pay the same, and the amount so paid, with interest at the rate set forth in the note secured hereby, shall be added to and become a part of the debt secured in this Deed of Trust.

IT MUTUALLY AGREED THAT:

1. In the event any portion of the property is taken or damaged in an eminent domain proceeding, the entire amount of the award or such portion as may be necessary to fully satisfy the obligation secured hereby, shall be paid to Beneficiary to be applied to said obligation.

2. By accepting payment of any sum secured hereby after its due date, Beneficiary does not waive its right to require prompt payment when due of all other sums so secured or to declare default for failure to so pay.

3. The Trustee shall reconvey all or any part of the property covered by this Deed of Trust to the person entitled thereto on written request of the Grantor and the Beneficiary, or upon satisfaction of the obligation secured and written request for reconveyance made by the Beneficiary or the person entitled thereto.

4. Upon default by Grantor in the payment of any indebtedness secured hereby or in the performance of any agreement contained herein, all sums secured hereby shall immediately become due and payable at the option of the Beneficiary. In such event and upon written request of Beneficiary, Trustee shall sell the trust property, in accordance with the Deed of Trust Act of the State of Washington, at public auction to the highest bidder. Any person except Trustee may bid at Trustee's sale. Trustee shall apply the proceeds of the sale as follows: (1) to the expense of the sale, including a reasonable Trustee's fee and attorney's fee; (2) to the obligation secured by this Deed of Trust; (3) the surplus, if any, shall be distributed to the persons entitled thereto.

5. Trustee shall deliver to the purchaser at the sale its deed, without warranty, which shall convey to the purchaser the interest in the property which Grantor had or had the power to convey at the time of his execution of this Deed of Trust, and such as he may have acquired thereafter, Trustee's deed shall recite the facts showing that the sale was conducted in compliance with all the requirements of law and of this Deed of Trust, which recital shall be prima facie evidence of such compliance and conclusive evidence thereof in favor of bona fide purchaser and encumbrancers for value.

6. The power of sale conferred by this Deed of Trust and by the Deed of Trust Act of the State of Washington is not an exclusive remedy; Beneficiary may cause this Deed of Trust to be foreclosed as a mortgage.

7. In the event of the death, incapacity, disability or resignation of Trustee, Beneficiary may appoint in writing a successor trustee, and upon the recording of such appointment in the mortgage records of the county in which this Deed of Trust is recorded, the successor trustee shall be vested with all powers of the original trustee. The trustee is not obligated to notify any party hereto of pending sale under any other Deed of Trust or of any action or proceeding in which Grantor, Trustee or Beneficiary shall be a party unless such action or proceeding is brought by the Trustee.

8. This Deed of Trust applies to, inures to the benefit of, and is binding not only on the parties hereto, but on their heirs, devisees, legatees, administrators, executors and assigns. The term Beneficiary shall mean the holder and owner of the note secured hereby, whether or not named as Beneficiary herein.

9. DUE ON SALE. At the option of the beneficiary, all amounts owed on the note secured by this Deed of Trust shall be due and payable upon the transfer of any interest in the secured property without the prior written consent of the beneficiary.

ORAL AGREEMENTS OR ORAL CONTRACTS TO LEND MONEY, EXTEND CREDIT OR FOREBEAR FROM ENFORCING REPAYMENT OF A DEBT ARE NOT ENFORCEABLE UNDER WASHINGTON STATE LAW.

ASSIGNMENT OF LEASES AND RENTS

==========

1ST AM 193351

THE GRANTOR: **Michael Guerzon and Jessamine Guerzon, husband and wife ,**

THE GRANTEE: **Midway Investments and Properties, LLC,**
a Washington limited liability company,

Abbreviated Legal Description:

Portion of Lot 8, Block 5, Federal Highway Addition to King County, Washington, according to the plat thereof recorded in Volume 30 of Plats, pages 1 and 2, records of King County, Washington.

Full legal description is attached as Exhibit "A."

Assessor's Tax Parcel No.: 250060-0480-07

This instrument filed for record by First American Title Insurance Company as an accommodation only, it has not been examined as to its execution or as to its effect upon the title.

ASSIGNMENT OF LEASES AND RENTS

THIS AGREEMENT, made this **1st of November, 2005**, by **Michael Guerzon and Jessamine Guerzon** (h&w) (borrower), a (husband and wife person), hereafter called "Grantor" whose signatures appear at the conclusion of this Assignment of Leases and Rents, hereinafter called "Assignment", and **The Di Giovanni Family Trust, Dated June 23, 1992, Marsilio Di Giovanni, Trustee,** hereafter called "Beneficiary",

THE GRANTOR and THE BENEFICIARY have entered into this Agreement wherein the Grantor has signed a Note, dated November 1, 2005 and further has signed a Deed of Trust, of even date, in favor of the Beneficiary, on the property commonly known as 23428 Pacific Highway south, Kent WA. which is more particularly described therein, and herein after referred to as the "Real Estate", this Assignment is an integral part of the Deed of Trust.

NOW, THEREFORE, in consideration of the terms and conditions of the Note and the Deed of Trust, securing said Note, and as additional security for the Grantor's performance of the terms and conditions contained in said Note and Deed of Trust, the Grantor and the Beneficiary specifically agree as follows:

1. The Grantor has set over and assigned, and by these presents does set over and assign, to the Beneficiary, as assignee, all of the Grantor's rights, titles and interests, in and to and under any leases or rental agreements, now existing or hereafter made, or affecting the Real Estate or any part thereof, or any building, or buildings, on any part thereof, with the furniture, furnishings and equipment used in connection therewith or any part thereof, now or hereafter to become due under leases or agreements now existing or hereafter made for the use, occupancy or enjoyment of the Real Estate, or any part thereof, of any building or buildings thereon.

2. The Grantor reserves the right, prior to any default in the payment or performance of any obligation secured thereby, to collect and retain such rents as they become due and payable but not otherwise. Upon any such default, the Beneficiary as assignee, may at any time, without notice and without regard to the adequacy of the security for the obligation secured thereby, go upon and take possession of the Real Estate and the personal property located thereon, or any part thereof, and the Grantor shall peaceably surrender such possession to the Beneficiary on demand and the Beneficiary may rent, lease or operate all or any part of said property, and may sue for or otherwise collect the rents or other monies hereby assigned, or any part thereof, and apply the same, as all reasonable costs and expenses of such renting or leasing operations, or collections, including reasonable attorney's fees on any items or indebtedness secured thereby or on the performance of any obligation or obligations so secured and in such proportions as the Beneficiary, in its uncontrolled discretion, may determine.

Initial _____

No action taken pursuant to any provision hereof shall be deemed to cure or waive any such default or invalidate any act done by reason of such default or to preclude the Beneficiary from the exercise of any remedy otherwise given for such default.

IT SHALL BE AGREED that the Grantor shall be regarded to be in "default" only in the event the Grantor has failed to make any payment required under the terms of the Note and Deed of Trust within Fifteen (15) days after the Due Date or has breached a condition or failed to perform the covenants of the Note and Deed of Trust or any of the underlying encumbrance described therein, and such breach or failure to perform has continued for said Fifteen (15) days and the Beneficiary has given the Grantor notice thereof by mailing such notice by certified mail to the Grantor's last known address, giving the Grantor Twenty (20) days in which to make the required payments, fulfill such condition or perform such promise.

3. Rents collected pursuant to the terms of this assignment shall be first applied to the payment of interest, then to principal and reserves as called for in the underlying encumbrances against the Real Estate.

4. Nothing herein contained shall be construed as obligating the Beneficiary to perform any of the Grantor's covenants under any lease or rental agreement.

5. The Grantor shall execute and deliver to the Beneficiary upon demand any further or supplemental assignments necessary to effectuate the intentions of this assignment.

6. Nothing contained in this agreement shall be deemed to be an election of the Beneficiary to exercise any rights or remedies in accordance with the terms of the Note and Deed of Trust.

7. In addition to, and not in limitation of, other remedies to the Beneficiary, should a receiver be appointed by a court, said receiver shall have the unqualified right to collect rents and maintain the Real Estate at any time the Grantor is in default under the provisions of the Note and Deed of Trust.

8. If any provisions of this assignment shall be determined to be inconsistent with the rights of the Beneficiary under the provisions of the Note and Deed of Trust to elect and declare all of the Grantor's payments and improvements forfeited to the Beneficiary and to reenter possession, such inconsistent provision or provisions shall be of no force and effect, and the Beneficiary shall retain all of his rights as provided in said Note and Deed of Trust.

9. It is further understood that this assignment shall not operate to make the Beneficiary responsible or liable for any dangerous or defective condition of the premises, or for the

Initial _____

management, upkeep, repair or control of said premises resulting in loss of injury or death of any tenant, licensee, employee or stranger.

10. Unless some other meaning and intent is apparent from the context, the plurals shall include the singular and vice versa, and masculine, feminine and neuter words shall be used interchangeably.

The Real Estate herein referred to is legally described as follows in Exhibit A.

IN WITNESS WHEREOF the parties hereto have signed this instrument this 19 day of October, 2005

Michael Guerzon

Jessamine Guerzon.

The amount collected under any insurance policy may be applied upon any indebtedness hereby secured in such order as the Beneficiary shall determine. Such application by the Beneficiary shall not cause discontinuance of any proceedings to foreclose this Deed of Trust. In the event of foreclosure, all rights of the Grantor in insurance policies then in force shall pass to the purchaser at the foreclosure sale.

4. To defend any action or proceeding purporting to affect the security hereof or the rights or powers of Beneficiary or Trustee, and to pay all costs and expenses, including cost of the title search and attorney's fees in a reasonable amount, in any such action or proceeding, and in any suit brought by Beneficiary to foreclose this Deed of Trust.

5. To pay all costs, fees and expenses in connection with this Deed of Trust, including the expenses of the Trustee incurred in enforcing the obligation secured hereby and Trustee's and attorney's fees actually incurred, as provided by statute.

6. Should Grantor fail to pay when due any taxes, assessments, insurance premiums, liens, encumbrances or other charges against the property hereinabove described, Beneficiary may pay the same, and the amount so paid, with interest at the rate set forth in the note secured hereby, shall be added to and become a part of the debt secured in this Deed of Trust.

IT MUTUALLY AGREED THAT:

1. In the event any portion of the property is taken or damaged in an eminent domain proceeding, the entire amount of the award or such portion as may be necessary to fully satisfy the obligation secured hereby, shall be paid to Beneficiary to be applied to said obligation.

2. By accepting payment of any sum secured hereby after its due date, Beneficiary does not waive its right to require prompt payment when due of all other sums so secured or to declare default for failure to so pay.

3. The Trustee shall reconvey all or any part of the property covered by this Deed of Trust to the person entitled thereto on written request of the Grantor and the Beneficiary, or upon satisfaction of the obligation secured and written request for reconveyance made by the Beneficiary or the person entitled thereto.

4. Upon default by Grantor in the payment of any indebtedness secured hereby or in the performance of any agreement contained herein, all sums secured hereby shall immediately become due and payable at the option of the Beneficiary. In such event and upon written request of Beneficiary, Trustee shall sell the trust property, in accordance with the Deed of Trust Act of the State of Washington, at public auction to the highest bidder. Any person except Trustee may bid at Trustee's sale. Trustee shall apply the proceeds of the sale as follows: (1) to the expense of the sale, including a reasonable Trustee's fee and attorney's fee; (2) to the obligation secured by this Deed of Trust; (3) the surplus, if any, shall be distributed to the persons entitled thereto.

5. Trustee shall deliver to the purchaser at the sale its deed, without warranty, which shall convey to the purchaser the interest in the property which Grantor had or had the power to convey at the time of his execution of this Deed of Trust, and such as he may have acquired thereafter, Trustee's deed shall recite the facts showing that the sale was conducted in compliance with all the requirements of law and of this Deed of Trust, which recital shall be prima facie evidence of such compliance and conclusive evidence thereof in favor of bona fide purchaser and encumbrancers for value.

6. The power of sale conferred by this Deed of Trust and by the Deed of Trust Act of the State of Washington is not an exclusive remedy; Beneficiary may cause this Deed of Trust to be foreclosed as a mortgage.

7. In the event of the death, incapacity, disability or resignation of Trustee, Beneficiary may appoint in writing a successor trustee, and upon the recording of such appointment in the mortgage records of the county in which this Deed of Trust is recorded, the successor trustee shall be vested with all powers of the original trustee. The trustee is not obligated to notify any party hereto of pending sale under any other Deed of Trust or of any action or proceeding in which Grantor, Trustee or Beneficiary shall be a party unless such action or proceeding is brought by the Trustee.

8. This Deed of Trust applied to inures to the benefit of, and is binding not only on the parties hereto, but on their heirs, devisees, legatees, administrators, executors and assigns. The term Beneficiary shall mean the holder and owner of the note secured hereby, whether or not named as Beneficiary herein.

ADDITIONAL TERMS AND CONDITIONS:

1. This is a wrap-around Deed of Trust, securing a Note for $550,000.00, subordinate to that certain Deed of Trust dated November 1, 2005, recorded October 24, 2005, under Auditor's File No. 20051024001643 ("first Deed of Trust"), granted by the Beneficiary herein. The Deed of Trust secures Beneficiary's obligation to The Di Giovanni Family Trust dated June 23, 1992, Marsilio Di Giovanni, Trustee, in the principal sum of $385,000.00.

2. Provided that Grantor is not in default under the terms of this Deed of Trust or of the Note it secures, Beneficiary agrees to make payments on its obligation to according to its terms. If Beneficiary defaults on its payments, the Grantor shall have the right to make those payments necessary to remove such default, and any payments so made shall be applied to the payments next falling due the Beneficiary under the note this Deed of Trust secures.

3. REQUEST FOR NOTICE OF DEFAULT AND FORECLOSURE UNDER SUPERIOR MORTGAGES OR DEEDS OF TRUST: Grantor requests the holder of any mortgage, deed of trust or other encumbrance with a lien which has priority over this Deed of Trust to give Notice to Grantor, at Grantor's address set forth on page one of this Deed of Trust of any default under the superior encumbrance and of any sale or other foreclosure action. Grantor and Beneficiary agree to send promptly to the other, copies of any notice of default or otherwise received by them from the holder of the first and second Deed of Trust.

ORAL AGREEMENTS OR ORAL CONTRACTS TO LEND MONEY, EXTEND CREDIT OR FOREBEAR FROM ENFORCING REPAYMENT OF A DEBT ARE NOT ENFORCEABLE UNDER WASHINGTON STATE LAW.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 03/07/2016 has revealed that there are 2 NPL sites within approximately 1 mile of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
SEATTLE MUNICIPAL LA	***NE OF MILITARY RD AN***	***E 1/2 - 1 (0.742 mi.)***	***96***	***362***
MIDWAY LANDFILL	***24800 PACIFIC HWY S.***	***S 1/2 - 1 (0.749 mi.)***	***97***	***370***

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 03/07/2016 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/21/2016 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 06/21/2016 has revealed that there is 1 RCRA-CESQG site within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

WA CSCSL: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Ecology's Confirmed & Suspected Contaminated Sites List.

A review of the WA CSCSL list, as provided by EDR, and dated 07/18/2016 has revealed that there are 19 WA CSCSL sites within approximately 1 mile of the target property.

State and tribal leaking storage tank lists

WA LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the Department of Ecology's Leaking Underground Storage Tanks Site List.

A review of the WA LUST list, as provided by EDR, has revealed that there are 4 WA LUST sites within

approximately 0.5 miles of the target property.

WA CSCSL NFA: The data set contains information about sites previously on the Confirmed and Suspected Contaminated Sites list that have received a No Further Action (NFA) determination. Because it is necessary to maintain historical records of sites that have been investigated and cleaned up, sites are not deleted from the database when cleanup activities are completed. Instead a No Further Action code is entered based upon the type of NFA determination the site received.

A review of the WA CSCSL NFA list, as provided by EDR, and dated 07/18/2016 has revealed that there

are 7 WA CSCSL NFA sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/21/2016 has revealed that there are 5 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 13 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EXECUTIVE SUMMARY

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 3 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Registry ID: 110006460267

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

SHELL 120956 (Continued) **1016215826**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource

KINGS DRY CLEANERS (Continued) **1000878476**

Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Handler Activities Summary:

U.S. importer of hazardous waste:	No
Mixed waste (haz. and radioactive):	No
Recycler of hazardous waste:	No
Transporter of hazardous waste:	No
Treater, storer or disposer of HW:	No
Underground injection activity:	No
On-site burner exemption:	No

MURRAYS COLLISION CENTER (Continued) **1000354128**

Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

. Waste code: WSQG
. Waste name: A placeholder to allow BR submission to validate. In WA State, Conditionally Exempt Small Quantity Generators (Called SQG in WA) are not required to report waste streams, so no valid State or Fed codes are available for reporting to BR.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of

(Continued) **1000435893**

events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Historical Generators:
Date form received by agency: 01/27/2010
Site name: SHELL 120943
Classification: Conditionally Exempt Small Quantity Generator

. Waste code: WSQG
. Waste name: A placeholder to allow BR submission to validate. In WA State, Conditionally Exempt Small Quantity Generators (Called SQG in WA) are not required to report waste streams, so no valid State or Fed codes are available for reporting to BR.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a

VALLEY I5 (Continued) **1001806036**

means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major

HIGHLINE COMMUNITY COLLEGE (Continued) **1001819162**

redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource

KENT NATIONAL GUARD BUREAU (Continued) **1000241885**

Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

SEATTLE MUNICIPAL LANDFILL (KENT HIGHLANDS) (Continued) **1000421972**

Summary Details:

Conditions at proposal June 24, 1988): Seattle Municipal Landfill Kent Highlands) is in Kent, King County, Washington, approximately 14 miles south of Seattle. From June 1968 to December 1986, Seattle filled about 60 acres of a 90-acre ravine on a hillside above the Green River. Seattle leased the site from Kentview Properties, Inc., and operated it under a Nonconforming Permit from the Seattle-King County Department of Public Health. In addition to municipal wastes from Kent and Seattle, the landfill accepted sand-blasting grit, some industrial sludges, and other industrial wastes, according to Health Department records. In 1984, a consultant to the county detected inc, copper, barium, and manganesein on-site monitoring wells. Over 18,000 people obtain drinking water from public wells within 3 miles of the site, the nearest within 1 mile. Leachate seeps on the east side of the landfill mix with run-off from the landfill, which is routed through drainage lines to settling ponds that eventually discharge to the Green River. The river is used for spawning and rearing salmon. In 1985, a consultant to Seattle detected 1,2-dichloroethane and tetrachloroethylene in the air at the edge of the site. An estimated 12,700 people live within 1 mile of the site. Seattle is currently closing the landfill and developing plans to meet all local, State, and Federal requirements. Under a Consent Agreement signed with the State in May 1987, Seattle is conducting a remedial investigation/feasibility study RI/FS) to determine the type and extent of contamination at the site and identify alternatives for remedial action. The work is scheduled to be completed in April 1989. Status August 30, 1990): The original RI has been completed. Additional data needs resulted in a Phase II RI, which is scheduled to be completed in June 1991. The FS is scheduled to be completed in December 1991. Aninterim system has been installed in an effort to prevent landfill gas from concentrating on-site or migrating off-site.

Summary Details:

Conditions at proposal October 15, l984): Midway Landfill covers 60 acres in Kent, King County, Washington. From January l966 to October l983, this landfill, which is on privately owned land, was operated by the City of

MIDWAY LANDFILL (Continued) **1000421903**

Seattle. It was therepository of nonputrescible wastes and some industrial sludges from the Seattle area. The landfill is unlined and is in an old gravel quarry. Data collected by the Seattle-King County Health Department and the State from on-site monitoring wells indicate that an aquifer is contaminated with lead, toluene, xylene, arsenic, and other compounds. More than l0,000 draw their drinking water from the aquifer within 3 miles of the site. The City of Seattle is preparing a planfor closing the landfill in accordance with all solid waste disposal requirements of the Resource Conservation and Recovery Act. The plan calls for drilling several monitoring wells to define the direction of ground water flow relative to several major municipal wells nearby. Soil samples will also be taken. Status June 10, l986): The City of Seattle has installed the new monitoring wells. Anomalies found during the drilling indicate a need for some additional wells.Under a cooperative agreement with EPA, the Washington Department of Ecology is reviewing the city s work. The State is directing a remedial investigation/feasibility study to determine the type and extent of contamination at the site and identify alternatives for remedial action. Combustible gas has been found in the soils under residential and commercial areas adjacent to the site, requiring temporary relocation of 11 families. In January l986, the city began operating a gasextraction system on-site in an effort to control off-site migration of methane. The city and State are developing an additional off-site extraction well system to remove methane trapped in the ground off-site. A special gas sampling programwas initiated to deal with the gas problem.

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Classification: Large Quantity Generator

Violation Status: No violations found

ROD:
Full-text of USEPA Record of Decision(s) is available from EDR.

FINDS:

Registry ID: 110005333638

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This

DES MOINES CITY (Continued) **1007069715**

information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 03/07/2016
Date Data Arrived at EDR: 04/05/2016

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/07/2016

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 03/07/2016

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/13/2015

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

State and tribal Brownfields sites

BROWNFIELDS: Brownfields Sites Listing
A listing of brownfields sites included in the Confirmed & Suspected Sites Listing. Brownfields are abandoned, idle or underused commercial or industrial properties, where the expansion or redevelopment is hindered by real or perceived contamination. Brownfields vary in size, location, age, and past use -- they can be anything from a five-hundred acre automobile assembly plant to a small, abandoned corner gas station.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines
An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

TACOMA/PIERCE COUNTY:

Closed Landfill Survey

Following numerous requests for information about closed dumpsites and landfills in Pierce County, the Tacoma-Pierce County Health Department decided to conduct a study on the matter. The aim of the study was to evaluate public health risks associated with the closed dumpsites and landfills, and to determine the need, if any, for further investigations of a more detailed nature. The sites represent all of the known dumpsites and landfills closed after 1950.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

This map includes information copyrighted by PennWell Corporation. This information is provided on a best effort basis and PennWell Corporation does not guarantee its accuracy nor warrant its fitness for any particular purpose. Such information has been reprinted with the permission of PennWell.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Daycare Center Listing
Source: Department of Social & Health Services
Telephone: 253-383-1735

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Ecology
Telephone: 360-407-6121

☑ **Building** (Describe the scope of work): 1ST Decommissioning Project -

No. of bedrooms:_____ No. of stories existing? _____ No. of stories proposed?_____

Does this building contain hazardous materials over the exempt quantities specified in UBC Table 3-D or 3-E? ☐ Yes ☐ No

Does this building have fire sprinklers throughout? ☐ Yes ☐ No

☐ **Mechanical** ***All mechanical equipment to be listed below. Equipment not specifically listed will not be included on permit.***

Quantity	Make or Brand	Model No.	CFM	Max. Output Btu/h

Number of new or relocated gas piping outlets:

☐ **Plumbing** (indicate the number of each fixture type in the space provided)

Bathtub	Drinking Fountain	Hose Bibb	Service sink	Water Heater
Bidet	Floor Drain	Kitchen Sink	Shower	Water Softener
Clotheswasher	Floor Sink	Laundry Tray	Toilet	
Dishwasher	Hand Sink	Rain Leader	Urinal	TOTAL FIXTURES
Repair:		Water Service		

Lender/Bond Issuer_____

Address:_____ City/State/Zip_____

The **projected review date** is our estimate of when we can conduct the initial plan review, assuming that the application and plans are clear, accurate and complete. The date is based on our experience with similar projects, current workloads and available plan review resources. If plan review reveals that corrections or additional information is needed, processing time will be extended proportionately. **Application expires 180 days after submittal date.** We will telephone the contact person named for any additional information needed to process this application.

Applicant: ☐ OWNER ☒ OWNER'S AGENT ☒ CONTRACTOR ☐ CONTRACTOR'S AGENT

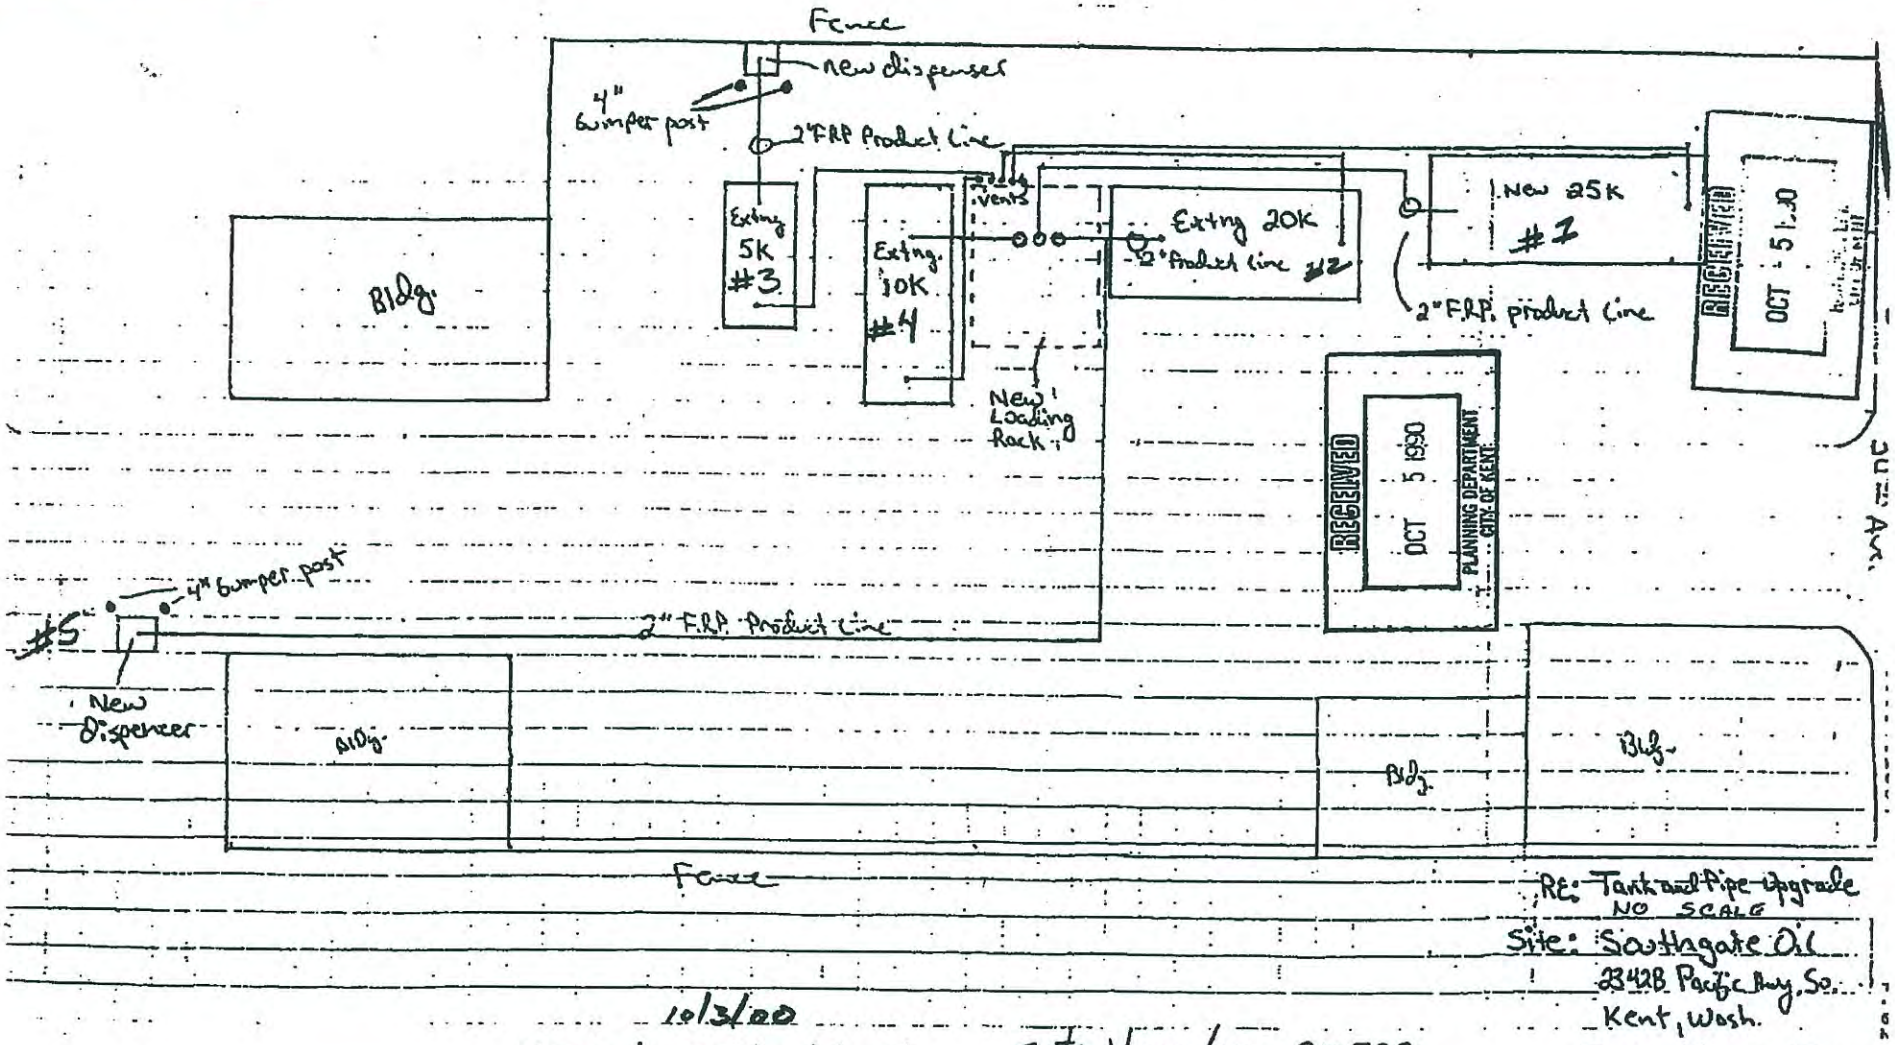

I certify that I have read this application and declare under penalty of perjury that the information contained herein is correct and complete. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter upon the above mentioned property for inspection purposes. I am either the owner of the property described on this permit application, the Washington State registered contractor responsible for the work, or I represent the owner or contractor, as signified above and am acting with the owner's/contractors full knowledge or consent.

SUBJECT: SOUTHGATE OIL, 23428 PAC HWY S - PIPING

Dear Sir,

The Kent Fire Marshal's office has reviewed your proposal to replace product piping and install a 20 x 20 slab/island.

The purpose of plan review is to verify code compliance to the extent possible and reasonable given the information provided on the plans and the City's resources and capabilities. The City's approval, should it be granted, does not constitute a guarantee of code compliance; does not authorize any work in violation of any applicable codes and does not relieve the owner of responsibility for complying with permanent codes.

The 1991 Uniform Fire Code as amended by the State Building Code will be used to verify compliance. Specifically, Uniform Fire Code article 79, division IX. We have noted the following:

1. Location of dispensing device is to be a minimum of 10 feet from property line per Uniform Fire Code 79.903(g). Relocate or provide details as needed.

2. Provide details on height of island curb per UFC 79.903 (g).

3. Provide details showing piping and swing joint at tank per UFC 79.911.

4. Show location of "emergency pump shut off" switch and signage per UFC 79.903 (i).

5. Show any and all alteration to existing tank.

6. Approval is subject to a test per UFC 79.911 (b) 5 and manufacturers installation instructions.

Dispensers, fire extinguishers and leak detection not included in this proposal and is not approved. No dispensing from this island will be allowed until an additional permit has been applied for, obtained and verified as being complete.

Until items 1-5 have been satisfied, we are unable to proceed. If you have any further questions please contact me at 859-3360.

Yours in fire and life safety,

Michael C. Evans
Assistant Fire Marshal

SUBJECT: SOUTHGATE OIL - 23428 PAC HWY S

Dear Sir,

The Kent Fire Marshal's office has reviewed your re-submittal #R551. Items 1, 2 and 4 have not been satisfactorily addressed.

1. Provide sectional view, site plan showing dispenser location or other information to verify that there is at least 10 feet between dispenser and property line per UFC 79.903 (g). New drawings as required.

2. The 9 inch forms as shown in "island/dispenser detail" incorrectly states 4 "minimum". Change drawing to reflect minimum 6 foot height per UFC 79.903 (g).

3. Satisfied.

4. Provide new drawing indicating location of "Emergency Pump Shut-Off" and a drawing of and/or wordage for signage. See UFC 79.903 (i).

5. Satisfied.

6. Will be satisfied by a field test per UFC 79.911 (b) 5.

Until items 1, 2 and 4 have been satisfied we are unable to proceed. No dispensing from this island will be allowed until an additional building permit has been applied for or the current one is withdrawn and scope changed and new permit has been applied for. If you have any further questions please contact me at 859-3360.

Yours in fire and life safety,

Michael C. Evans
Assistant Fire Marshal

RE: Fire Prevention Survey

Dear Mr. Williams:

An inspection of the above named premises has revealed conditions in violation of Kent City Ordinance #2023, adopting the Uniform Fire Code, 1976 Edition. These conditions or corrective measures are outlined below:

1. A Kent Fire Department Permit is required for Storage, Handling and Use of Flammable Liquids. Please sign and return the enclosed application form to this office.

2. Your fire extinguishers are due for their annual maintenance check. Please contact your fire extinguisher company to have this service performed.

Sincerely yours,

Henry O. Opel, Fire Marshal
Kent Fire Department
Fire Prevention Bureau

ss

You will be contacted in approximately twenty (20) days to verify correction of these violation(s). If you have any questions, call 872-3360.

KENT FIRE DEPARTMENT
NOTICE TO CORRECT LIFE AND/OR FIRE HAZARDS

NOTICE NO. 1 DATE 9-7-77

NAME SOUTHGATE FUEL COMPANY (Occupancy) Charles Williams (Person Receiving Notice)

ADDRESS 23428 Pacific Highway South (Of Occupancy) 16-22-4 (Inspection Zone)

On August 10, 1977, a Fire Prevention Survey was conducted at this address. Certain life and/or fire hazards were determined to exist at that time. A copy of the survey form, listing life and/or fire hazards was transmitted to you on that date. A reinspection of this address reveals that certain items, as referenced below, have not been corrected.

OK 9/23/77 SS 1. A Kent Fire Department Permit is required for Storage, Handling, and Use of Flammable Liquids. Please sign and return the enclosed application form to this office as soon as possible. #769

OK 9/23/77 SS Your fire extinguishers are due for their annual maintenance check. Please contact your fire extinguisher company to have this service performed.

This notice serves as an order to correct the foregoing items on or before September 26, 1977. A reinspection will be conducted on this date.

ENVIRONMENTAL REVIEW REPORT

Decision Document

BULK DIESEL TERMINAL UST DECOMMISSIONING
ENV-2001-61 KIVA #2013688

Responsible official Kim Marousek Staff Contact Jenifer Naas

I. PROPOSAL

The applicant proposes the removal of two diesel oil tanks located at the site of a former bulk diesel terminal closed in early 2000 Two underground storage tanks (UST), 10,000 and 8,000 gallons, respectively, were removed and decommissioned in 2000 An estimated 300 cubic yards of soil contaminated with diesel residue was removed from the site at the time Approximately 200 additional cubic yards will be removed as a part of this project. The applicant is working closely with the Washington Department of Ecology in the clean up of this site The site is located at 23428 Pacific Highway S and is zoned GC, General Commercial

II BACKGROUND INFORMATION

Compliance with Kent's Comprehensive Plan (Ordinance 3222), the Washington State Growth Management Act (GMA), The Local Project Review Act (ESHB 1724 and ESB 6094), Kent's Construction Standards (Ordinance 3117) and Concurrency Management (Chapter 12 11, Kent City Code), will require concurrent improvements or the execution of binding agreements by the applicant with Kent to mitigate identified environmental impacts These improvements and/or agreements may include improvements to roadways, intersections and intersection traffic signals, stormwater detention, treatment and conveyance, utilities, sanitary sewerage and domestic water systems Compliance with Kent's Construction Standards may require the deeding/dedication of right-of-way for identified improvements Compliance with Title 11 03, and with Sections 15 08 220 to 15 08 224, and to Section 15 08 240 of the Kent City Code may require the conveyance of Sensitive Area Tracts to the City of Kent, in order to preserve trees, or to regulate the location and density of development based upon known physical constraints such as steep and/or unstable slopes or proximity to lakes, or to maintain or enhance water quality Compliance with the provisions of Chapter 6 12 of the Kent City Code may require provisions for mass transit adjacent to the site

In addition to the above, Kent follows revisions to the Washington State Environmental Policy Act, Chapter 197-11 WAC (effective November 10, 1997), which implements ESHB 1724 and ESB 6094.

Any conditions applied to the following a Mitigated Determination of Non-Significance, which are intended to mitigate impacts from the project herein being reviewed, are applied because identified impacts cannot adequately be addressed by existing identified City Codes and Ordinances

III. ENVIRONMENTAL ELEMENTS

A. Earth

The site is flat and has been developed for the bulk diesel terminal, called Southgate Oil since the early 1970's Approximately 300 cubic yards of soil was removed from the site as a part of the two USTs removed in 2000 Approximately 200 yards is expected to be removed as a part of this project

B. Air

Temporary dust and exhaust generated by heavy machinery during construction activities will potentially impact local air quality Subsequent impacts to air quality include increased automobile and truck emissions Impacts to air quality will be addressed by limiting hours of construction and using standard soil cover measures such as straw or seed for disturbed areas.

C. Environmental Health

The site has submitted UST removal and 30-day notification applications to the Washington State Department of Ecology (Ecology Identifier 84946863) Contaminated soil will be removed in accordance with the Department of Ecology's standards for UST removal and hazardous waste clean up

D. Land and Shoreline Use

The proposed development property is zoned General Commercial, GC. The Comprehensive plan designates this area as Commercial (C) The site is currently developed with several buildings used for the bulk diesel terminal (closed in 2000) South and north of the property is zoned GC and both are developed with retail establishments The property is bounded by Pacific Highway S to the west and 30th Avenue S to the east.

IV. SUMMARY AND RECOMMENDATION

A. It is appropriate, as per WAC 197-11-660 and RCW 43 21C.060 that the City of Kent establish conditions to mitigate any identified impacts associated with this proposal Supporting documents for the following conditions and mitigating measures include

1. City of Kent Comprehensive Plan as prepared and adopted pursuant to the State Growth Management Act
2. The State Shoreline Master Program and the Kent Shoreline Master Program.
3. Kent City Code Section 7 07 Surface Water and Drainage code
4. City of Kent Transportation Master Plan, Green River Valley Transportation action plan and six-year transportation improvement plan
5. Kent City Code Section 7 09 Wastewater facilities master plan
6 City of Kent Comprehensive water plan and conservation element.
7 Kent City Code Sections 6 02 010 and 6 02 020 construction standards
8 Kent City Code Section 6 07 street use permit requirements.
9 Kent City Code Section 14 09 flood hazard protection
10 Kent City Code Section 12 04 Subdivision Code
11. Kent City Code Section 12 05 Mobile Home Parks and 12 06 Recreation Vehicle Parks
12 Kent City Code Section 8 05 Noise Control
13. City of Kent Uniform Building and Fire Codes

14 Kent Zoning Code
15. Kent City Code Section 7 13 water shortage and emergency regulations and Water Conservation Ordinance 2227
16 Kent City Code Sections 6 02 and 6 03 required public improvements.
17 Kent City Code Section 7 05 Storm and surface water drainage utility
18 City of Kent comprehensive sewer plan
19 City of Kent Fire Master Plan
20 City of Kent Wetland Management Ordinance 3109

B. It is recommended that a Mitigated Determination of Nonsignificance (MDNS) be issued for this project with the following conditions

1. The Applicant/Owner shall submit a copy of Site Assessment Report for tank excavation and removal, as required by the Washington State Department of Ecology Leaking Underground Storage Tank Program, to the City of Kent Department of Public Works Tank removal and site remediation shall comply with all applicable requirements of the Washington State Department of Ecology

2 The Applicant/Owner shall incorporate Regulatory and Source Best Management Practices (BMPs) wherever required by the Washington State Department of Ecology Stormwater Management Manual for the Puget Sound Basin in the plans for the excavation, tank removal, backfill, and site cleanup to prevent or minimize water pollution during and after.

Permits:

105.6.42 Storage of scrap tires and tire byproducts.

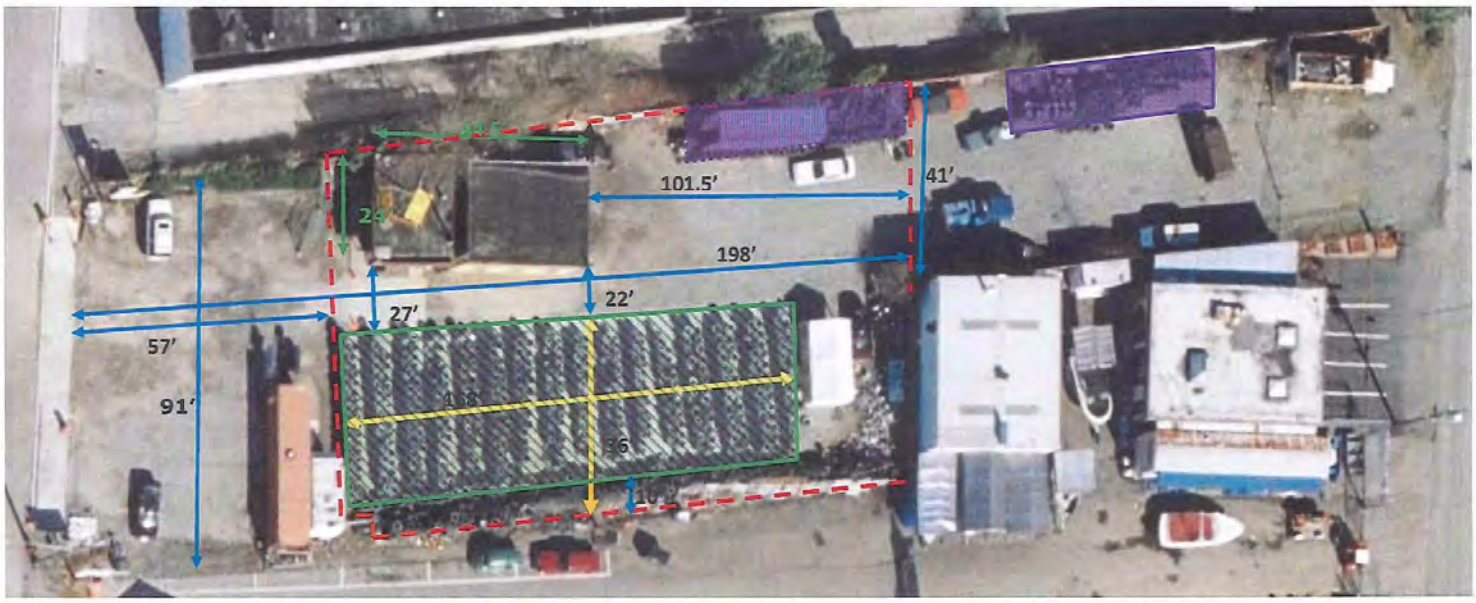

An operational permit is required to establish, conduct or maintain storage of scrap tires and tire byproducts that exceeds 2,500 cubic feet (71 m3) of total volume of scrap tires and for indoor storage of tires and tire byproducts.

- Open burning is prohibited in tire storage yards. (2504.1)
- Cutting, welding or heating devices shall not be operated in tire storage yards.(2504.2)
- Smoking is prohibited in tire storage yards, except in designated areas.(2504.3)
- Tire storage piles shall not be located beneath electrical power lines having a voltage in excess of 750 volts or that supply power to fire emergency systems.(2504.4)
- The owner or individual in charge of the tire storage yard shall be required to prepare and submit to the fire code official a fire safety plan for review and approval. The fire safety plan shall include provisions for fire department vehicle access. At least one copy of the fire safety plan shall be prominently posted and maintained at the storage yard.(2504.5)
- The telephone number of the fire department and location of the nearest telephone shall be posted conspicuously in attended locations.(2504.6)
- Tire storage shall be restricted to individual piles not exceeding 5,000 square feet of continuous area. Piles shall not exceed 50,000 cubic feet in volume or 10 feet in height.(2505.1)
- Individual tire storage piles shall be separated from other piles of salvage by a clear space of at least 40 feet.(2505.2)
- Tire storage piles shall be separated by a clear space of at least 40 feet from piles of other stored product.(2505.3)
- Tire storage piles shall be located at least 50 feet from lot lines and buildings.(2505.4)
- Storage yards shall be maintained free from combustible ground vegetation for a distance of 40 feet from the stored material to grass and weeds; and for a distance of 100 feet (30 480 mm) from the stored product to brush and forested areas.(2505.5)

COPY RECIEVED - 4-13-10 Juan Mcastenede

El Paisano - 23428 Paciific Hwy S. – Owner – Juan Castaneda, PH# 206-878-1005

(FUFC#2070057 - Inspection Date April 13, 2010)

- Current Tire Storage 4,365 Square Feet, approximately 4' high equaling 17,472 cubic feet.

- Interior lot dimensions – Note 10' to south lot line, at least 10' clearance to buildings.

- Pile dimensions prior to 10' set back now in place after compliance.

- Fenced in area.

- Building Dimensions.

- Tire piles no longer there as of date of inspection.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

EDR BUILDING PERMIT REPORT

About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

ASTM and EPA Requirements

ASTM E 1527-13 lists building department records as a "standard historical source," as detailed in § 8.3.4.7: "Building Department Records - The term building department records means those records of the local government in which the property is located indicating permission of the local government to construct, alter, or demolish improvements on the property." ASTM also states that "Uses in the area surrounding the property shall be identified in the report, but this task is required only to the extent that this information is revealed in the course of researching the property itself."

EPA's Standards and Practices for All Appropriate Inquires (AAI) states: "§312.24: Reviews of historical sources of information. (a) Historical documents and records must be reviewed for the purposes of achieving the objectives and performance factors of §312.20(e) and (f). Historical documents and records may include, but are not limited to, aerial photographs, fire insurance maps, building department records, chain of title documents, and land use records."

Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

For more information about the EDR Building Permit Report, please contact your EDR Account Executive at (800) 352-0050.

EDR® Environmental Data Resources Inc

BUILD FAX PROPERTY HISTORY

EXECUTIVE SUMMARY: SEARCH DOCUMENTATION

A search of building department records was conducted by Environmental Data Resources, Inc (EDR) on behalf of Geo Engineers, Inc. on Oct 21, 2016.

TARGET PROPERTY

23428 PACIFIC HWY S
Kent, WA 98032

SEARCH METHODS

EDR searches available lists for both the Target Property and Surrounding Properties.

RESEARCH SUMMARY

Building permits identified: **YES**

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

GLOSSARY

General Building Department concepts

- **ICC:** The International Code Council. The governing body for the building/development codes used by all jurisdictions who've adopted the ICC guidelines. MOST of the US has done this. Canada, Mexico, and other countries use ICC codes books and guides as well. There are a few states who have added guidelines to the ICC codes to better fit their needs. For example, California has added seismic retrofit requirements for most commercial structures.
- **Building Department (Permitting Authority, Building Codes, Inspections Department, Building and Inspections):** This is the department in a jurisdiction where an owner or contractor goes to obtain permits and inspections for building, tearing down, remodeling, adding to, re-roofing, moving or otherwise making changes to any structure, Residential or Commercial.
- **Jurisdiction:** This is the geographic area representing the properties over which a Permitting Authority has responsibility.
- **GC:** General Contractor. Usually the primary contractor hired for any Residential or Commercial construction work.
- **Sub:** Subordinate contracting companies or subcontractors. Usually a "trades" contractor working for the GC. These contractors generally have an area of expertise in which they are licensed like Plumbing, Electrical, Heating and Air systems, Gas Systems, Pools etc. (called "trades").
- **Journeymen:** Sub contractors who have their own personal licenses in one or more trades and work for different contracting companies, wherever they are needed or there is work.
- **HVAC (Mechanical, Heating & Air companies):** HVAC = Heating, Ventilation, and Air Conditioning.
- **ELEC (Electrical, TempPole, TPole, TPower, Temporary Power, Panel, AMP Change, Power Release):** Electrical permits can be pulled for many reasons. The most common reason is to increase the AMPs of power in an electrical power panel. This requires a permit in almost every jurisdiction. Other commons reason for Electrical permits is to insert a temporary power pole at a new construction site. Construction requires electricity, and in a new development, power has yet to be run to the lot. The temporary power pole is usually the very first permit pulled for new development. The power is released to the home owner when construction is complete and this sometimes takes the form of a Power Release permit or inspection.
- **"Pull" a permit:** To obtain and pay for a building permit.
- **CBO:** Chief Building Official
- **Planning Department:** The department in the development process where the building /structural plans are reviewed for their completeness and compliance with building codes
- **Zoning Department:** The department in the development process where the site plans are reviewed for their compliance with the regulations associated with the zoning district in which they are situated.
- **Zoning District:** A pre-determined geographic boundary within a jurisdiction where certain types of structures are permitted / prohibited. Examples are Residential structure, Commercial/Retail structures, Industrial/Manufacturing structures etc. Each zoning district has regulations associated with it like the sizes of the lots, the density of the structures on the lots, the number of parking spaces required for certain types of structures on the lots etc.
- **PIN (TMS, GIS ID, Parcel#):** Property Identification Number and Tax Map System number.
- **State Card (Business license):** A license card issued to a contractor to conduct business.
- **Building Inspector (Inspector):** The inspector is a building department employee that inspects building construction for compliance to codes.
- **C.O.:** Certificate of Occupancy. This is the end of the construction process and designates that the owners now have permission to occupy a structure after its building is complete. Sometimes also referred to as a Certificate of Compliance.

GLOSSARY

Permit Content Definitions

- Permit Number: The alphanumerical designation assigned to a permit for tracking within the building department system. Sometimes the permit number gives clues to its role, e.g. a "PL" prefix may designate a plumbing permit.
- Description: A field on the permit form that allows the building department to give a brief description of the work being done. More often than not, this is the most important field for EP's to find clues to the prior use(s) of the property.
- Permit Type: Generally a brief designation of the type of job being done. For example BLDG-RES, BLDG-COM, ELEC, MECH etc.

Sample Building Permit Data

Date: Nov 09, 2000
Permit Type: Bldg -
New Permit Number: 101000000405
Status: Valuation: $1,000,000.00
Contractor Company: OWNER-BUILDER
Contractor Name:

Description: New one store retail (SAV-ON) with drive-thru pharmacy. Certificate of Occupancy.

Nnamdi Madakor, VCP Coordinator
Department of Ecology
P.O. Box 47600
Olympia, WA. 98504-6006

Ref: Letter dated April 10, 2006 and June 9, 2006 in regard to Southgate Oil property.

Dear Mr. Madakor:

I am writing this letter since we have not been able to make contact by phone,

When I first received your letter of April 10, 2006 I did not understand what it was about so I tried to contact the Department of Ecology for an explanation. I let a message for Carrie McDougal with the Toxics Cleanup Program. Since I did not receive a reply, I was under the impression that whatever was the problem and/or misunderstanding it had been resolved.. Then I received your letter of June 9, 2006 which was even more puzzling. I tried to contact you by phone but unfortunately we kept on missing each other.

First of all I don't understand why your letter was addressed to me personally since I never owned the property. The property was owned by Midway Investment and Property LLC (i.e. Midway). Midway did not purchase the property. It came into Title by the fact that Southgate Oil defaulted on a loan.

Midway did not pollute the soil but it voluntarily agreed to clean it so that it could be used for other businesses. The clean up cost turned out to be much more than originally predicted. The work was done by Sound Environmental Strategies with attorney John R. Spencer representing Midway. A No Further Action was issued by the State of Washington Department of Ecology on February 10. 2003.

I faxed your letters to attorney John Spencer , but I understand that he is out of town for about two weeks.

Sincerely

M. Di Giovanni

d/mid/doe_ltr1.doc

6/21
I had a discussion with Client on 6/20. He was satisfied that Ecology does not plan on coming after him for additional site cleanup.

Re: Further Action Determination under WAC 173-340-515(5) for the following Hazardous Waste Site:

- Site Name: SOUTHGATE OIL
- Site Address: 23428 PACIFIC HWY S KENT WA
- Facility/Site No.: 84946863
- VCP No.: NW0982

Dear: MR DIGIOVANNI

Thank you for submitting your independent remedial action report for the SOUTHGATE OIL facility (Site) for review by the State of Washington Department of Ecology (Ecology) under the Voluntary Cleanup Program (VCP). Ecology appreciates your initiative in pursuing this administrative option for cleaning up hazardous waste sites under the Model Toxics Control Act (MTCA), Chapter 70.105D RCW.

This letter constitutes an advisory opinion regarding whether further remedial action is necessary at the Site to meet the substantive requirements of MTCA and its implementing regulations, Chapter 70.105D RCW and Chapter 173-340 WAC. Ecology is providing this advisory opinion under the specific authority of RCW 70.105D.030(1)(i) and WAC 173-340-515(5).

This opinion does not resolve a person's liability to the state under MTCA or protect a person from contribution claims by third parties for matters addressed by the opinion. The state does not have the authority to settle with any person potentially liable under MTCA except in accordance with RCW 70.105D.040(4). The opinion is advisory only and not binding on Ecology.

Ecology's Toxics Cleanup Program has reviewed the following information regarding the Site:

1. April 10, 2006 Notification of Pending Inactive Determination Status for the following Hazardous Waste Site enrolled in the Voluntary Cleanup Program by Ecology

2. June 9, 2006 Determination Status for the following Hazardous Waste Site enrolled in the Voluntary Cleanup Program by Ecology

The documents listed above will be kept in the Central Files of the Northwest Regional Office of Ecology (NWRO) for review by appointment only. Appointments can be made by calling the NWRO resource contact at (425) 649-7190.

The Site is defined by the extent of contamination caused by the following release(s):

- TPH diesel in the Soil;

The Site is more particularly described in Enclosure A to this letter, which includes a detailed Site diagram. The description of the Site is based solely on the information contained in the documents listed above.

Based on a review of the independent remedial action report and supporting documentation listed above, **Ecology has determined that the independent remedial action(s) performed at the Site are not sufficient to meet the substantive requirements contained in MTCA and its implementing regulations, Chapter 70.105D RCW and Chapter 173-340 WAC, for characterizing and addressing any of the contamination at the Site.** Therefore, pursuant to WAC 173-340-515(5), Ecology is issuing this opinion that **further remedial action is necessary** at the Site under MTCA.

Further Action is required at this site for the following reasons:

- Potential Off property migration of TPH diesel north of the site. Cleanup stopped at the property boundary
- Restrictive Covenant may be needed for residual contamination off property limits
- Lack of active cleanup activity in the past 12 months.

Ecology's Interim NFA of 2/10/03 issued to this site is hereby rescinded.

Please note that this opinion is based solely on the information contained in the documents listed above. Therefore, if any of the information contained in those documents is materially false or misleading, then this opinion will automatically be rendered null and void.

The state, Ecology, and its officers and employees make no guarantees or assurances by providing this opinion, and no cause of action against the state, Ecology, its officers or employees may arise from any act or omission in providing this opinion.

Again, Ecology appreciates your initiative in conducting independent remedial action and requesting technical consultation under the VCP. As the cleanup of the Site progresses, you may request additional consultative services under the VCP, including assistance in identifying

applicable regulatory requirements and opinions regarding whether remedial actions proposed for or performed at the Site meet those requirements.

If you have any questions you may reach me at (360) 407-7244.

Sincerely

Nnamdi Madakor, VCP Coordinator

- Site Name: SOUTHGATE OIL
- Site Address: 23428 PACIFIC HWY S KENT WA
- Facility/Site No.: 84946863
- VCP No.: NW0982

Dear: MR DIGIOVANNI

This is a follow-up to the Notification of Pending Inactive Determination letter (Notification letter) we sent to you on April 10, 2006. The Notification letter requested a site status update from you within 30 days of the date of the letter. Because we did not receive the update by May 10, 2006, **we are removing your site from the Voluntary Cleanup Program (VCP).**

The status of this site has been updated in Department of Ecology's database of contaminated sites. Once you are ready to pursue cleanup activities, you are welcome to reapply to the VCP. If you have any questions you may reach me at (360) 407-7244.

Sincerely

- Site Address: 23428 PACIFIC HWY S KENT WA
- Facility/Site No.: 84946863
- VCP No.: NW0982

Dear: MR DIGIOVANNI

Our records indicate that you applied for the Voluntary Cleanup Program (VCP) on 10/11/02. The Department of Ecology (Ecology) appreciates your initiative in pursuing this administrative option for cleaning up hazardous waste sites under the Model Toxics Control Act (MTCA), Chapter 70.105D RCW.

The following details site activity since the date of application:

- Interim NFA for soil only on 2/10/03

The VCP is staffed to provide assistance to applicants who are actively pursuing site cleanup. Our records indicate that we have not received information regarding your progress on this site's clean up in the past twelve months. If you are still actively cleaning this site you have 30 days to provide a work summary, report, or other documentation that demonstrates you have taken cleanup actions during this past 12 months.

If no cleanup activities have occurred during the past year, or we do not hear from you by (May 10, 2006), this site will be removed from the VCP due to inactivity. The status of this site will be updated in Ecology's database of contaminated sites.

Due to significant interest in the Voluntary Cleanup Program we are not able to keep inactive sites in the program. If this site is deemed inactive, we encourage you to reapply to the VCP when you are ready to actively continue site cleanup. Your commitment to site cleanup is greatly appreciated. If you have any questions you may reach me at 360-407-7244.

Sincerely

Nnamdi Madakor, VCP Coordinator

STATE OF WASHINGTON
DEPARTMENT OF ECOLOGY
Northwest Regional Office • 3190 160th Avenue SE • Bellevue, Washington 98008-5452 • (425) 649-7000

February 10, 2003

Mr. Marsilio DiGiovanni
Midway I & P LLC
17015 53rd Avenue South
Seattle, WA 98188

Dear Mr. DiGiovanni:

Thank you for submitting the results of your independent remedial action for review by the State of Washington Department of Ecology (Ecology). Ecology appreciates your initiative in pursuing this administrative option under the Model Toxics Control Act (MTCA).

Ecology's Toxics Cleanup Program has reviewed the following information regarding the Former Southgate Oil, 23428 Pacific Highway South, Kent:

1. Progress Site Assessment, prepared by Nowicki & Associates, Inc. / May 3, 2001.

2. Underground Storage Tank Decommissioning and Soil Remediation Project, prepared by Sound Environmental Strategies, Corp. / February 25, 2002.

The reports listed above will be kept in the Central Files of the Northwest Regional Office (NWRO) of Ecology for review by appointment only. Appointments can be made by calling Sally Perkins at the NWRO at (425) 649-7190.

Based upon the information in the report(s), Ecology has determined that, at this time, the releases of diesel-range hydrocarbons into the soil within the property boundary no longer poses a threat to human health or the environment.

Therefore, Ecology is issuing this determination that no further remedial action is necessary at this site under MTCA, chapter 70.105D RCW. However, please note that because your actions were not conducted under a consent decree with Ecology, this letter is written pursuant to RCW 70.105D030(1)(i) and does not constitute a settlement under RCW 70.105D.040(4) and is not binding to Ecology.

Ecology's "No Further Action" determination is made only with respect to the release identified in the reports listed in the reports above. This "No Further Action" determination applies to soil only within the property boundary of the Former Southgate Oil, 23428 Pacific Highway South, Kent. Diesel-range petroleum hydrocarbon soils exist along the northern property boundary of the subject property off-site beneath a paved alley.

Ecology will update its database to reflect this "No Further Action" determination for soil only within the property boundary of the Former Southgate Oil, 23428 Pacific Highway South, Kent. Your site will continue to appear in future publications of the Confirmed and Suspected Contaminated Sites Report (previously known as the Affected Media and Contaminants Report) and the Leaking Underground Storage Tank List.

The state, Ecology, and its officers and employees are immune from all liability and no cause of action of any nature may arise from any act or omission in providing this determination.

If you have questions, please contact Carrie McDougal at (425) 649-7254.

Sincerely,

Carrie McDougal

APPENDIX B - DISPOSAL RECEIPTS
APPENDIX C - GLOBAL ENVIRONMENTAL UST CLOSURE AND REMEDIATION REPORTS

1.0 INTRODUCTION

1.1 DOCUMENT PURPOSE

Sound Environmental Strategies, Corp. (SES), has prepared this underground storage tank (UST) assessment and independent cleanup report describing environmental activities conducted on behalf of Mr. Marsilio Di Giovanni, property owner for property located at 23428 Pacific Highway, Kent, Washington (Site).

Tank closure and site assessment activities were completed in accordance with the following documents published by the Washington State Department of Ecology (Ecology):

- Guidance for Site Checks and Site Assessments for Underground Storage Tanks (Ecology, February 1991);
- Guidance for Remediation of Releases from Underground Storage Tanks (Ecology, July, 1991); and,
- The Model Toxics Control Act Cleanup Regulation, Chapter 173-340 WAC (Ecology, February 2001).

SES was hired by the property owner to decommission by removal 1 - 20,000 gallon heating oil UST (UST 1) and 1 - 25,000 gallon heating oil UST (UST 2). During the UST closure activities hydrocarbon contaminated soil was identified in one of the two UST excavations. Subsequent remedial activities were completed on behalf of the property owner to address a release associated with UST 1 that had resulted in impacts to subsurface soil. This report describes subsurface investigation results, site activities and observations during UST closure and site remedial activities. This report is divided into three main sections supported by tables, figures and photographs.

SES services performed for this project, including this report, were conducted in accordance with generally accepted professional practices ordinarily exercised by other members of the environmental consulting profession, for the nature and conditions of the work completed in the same or similar localities, at the time the work was performed. These services were conducted subject to project-specific time limits and financial, physical and any other constraints applicable to this project. It is intended for the use of the client, Marsi DiGiovanni, for specific application to the referenced property. This report is not meant to represent a legal opinion. No other warranty, express or implied, is made.

1.2 SITE LOCATION AND DESCRIPTION

The Property is located at 23428 Pacific Highway S., Kent, Washington two blocks south of the Pacific Highway and Kent DeMoines Highway intersection.

1.3 PREVIOUS ON SITE ENVIRONMENTAL ACTIVITIES

Previous underground storage tank closure and environmental remediation efforts have been successfully completed at the site. In an effort to put all previous work into a single report and provide more comprehensive documentation, SES has included all available environmental reports previously completed (Appendix C). Previous environmental work conducted at the site included:

- Global Environmental, Initial Site Assessment
- Global Environmental, Progress Site Assessment 12/01/00
- Global Environmental, Progress Site Assessment 03/22/01
- Global Environmental, Progress Site Assessment 05/03/01

2.0 PRE-EXCAVATION ACTIVITIES

2.1 ANTICIPATED SITE CONDITIONS

After reviewing the previous UST Closure and environmental remediation reports prepared by Global Environmental, previous sampling activities completed on site identified gasoline and diesel-range hydrocarbons as the only constituents of concern. Based on work conducted by others, the only petroleum-contaminated soil that was anticipated was in the general vicinity of the western end of UST 1. Global encountered diesel-range hydrocarbons in soil (3100 mg/kg) near this UST. This soil was not removed by Global due its proximity to UST 1.

Further, no groundwater impacts were anticipated based on previous investigations and remediation efforts. No groundwater has been observed in any excavations at the site. The depth to groundwater at the site is approximately 50 to 75 feet below ground surface based on conversations with the Kent Fire Department, Mr. Jon Napier.

2.2 HEALTH AND SAFETY

A site-specific Health and Safety Plan was prepared in accordance with Chapter 296-62 of the Washington Administrative Code (WAC) and 29 CFR 1910.120 (Code of Federal Regulations). The HASP identified potential physical and chemical hazards and specified personal protection and safety monitoring requirements. Site health and safety meetings were conducted during fieldwork at the beginning of each workday to review aspects of the HASP, and to provide an opportunity for SES site workers and contractor personnel to discuss health and safety issues or concerns. On-site SES personnel associated with the field activities were required to be familiar with and comply with provisions put forth in the HASP. Subcontractors on-site were required to have their own HASP that identified potential physical and chemical hazards associated with their own work activities.

During intrusive field activities, the on-site SES site manager performed air monitoring using an organic vapor monitor (Mini Ray 5 Gas Analyzer [PID]). The PID was properly calibrated to 100 parts per million (ppm) isobutylene daily. Organic vapors and particulates were not recorded above normal background levels, as described in the HASP, during remedial activities at the Site. No other incidences, releases, or worker injuries were recorded during the project.

2.3 UTILITY LOCATION

Prior to implementing remedial procedures at the Site the public underground utilities alert network was notified of intrusive activities. The service contacted appropriate agencies or companies with underground utilities in the area. These agencies then marked the location of their utilities along the right-of-ways and easements of the property.

3.0 UST CLOSURE

SES utilized a vacuum pump truck to remove all liquid from each of the USTs. The liquid was disposed of at a local disposal and treatment facility. A total of 1200 gallons of liquid was removed and disposed. Once emptied, the USTs were triple rinsed with water and inerted with carbon dioxide (dry ice). An oxygen detector was used to monitor the oxygen content until oxygen levels were reduced to 10% and removal could continue.

3.1 PRODUCT DISTRIBUTION ASSEMBLY

The product distribution assembly was decommissioned by removing the backflow devices and allowing any residual product to drain back into the USTs. Water was pumped through the piping system and also drained in to the USTs. Following the draining and cleaning of the system, the assembly was dismantled and transported to Schnitger Steel, a local steel recycling facility.

3.1 UST NUMBER 1 - 20,000 GALLON HEATING OIL UST

The 20,000 gallon UST 1 was excavated using two Hitachi PC 200 excavators following the removal of the concrete driveway. Snell Crane Service used a 65-ton crane to remove the UST from the excavation. Following the removal of the UST from the excavation, the UST was inspected and showed no obvious sign of leakage. Further inspection of the UST identified that it had been lined inside with fiberglass and had a tar coating on its exterior. Two six-inch vertical piping structures were removed from the UST during the excavation process. The UST was of steel construction, measured forty feet in length by ten feet in diameter and weighed 42,000 pounds. The UST was transported by trailer to Fife Sand & Gravel for disposal.

During the excavation of UST 1, hydrocarbon odor was observed on the western end of the excavation area. This coincides with the previous finding by Global. Soil samples were collected in accordance with WAC 173-360 Washington State UST Site Assessment Requirements. The overburden to approximately 8 feet below ground surface was stockpiled and sampled in an on site laboratory by Environmental Services Network (ESN). Samples results were reported below the 2001 MTCA cleanup level for diesel-range hydrocarbons of 2000 mg/kg in all samples of stockpiled material. The excavation sidewall and bottom samples were also analyzed on site by ESN. The results of the excavation sample analysis identified diesel range hydrocarbons at depths between 8 and 25 feet below ground surface exceeding 2000 mg/kg in samples S14 (2500 mg/kg), S16 (3200 mg/kg), and S20 (6500 mg/kg) primarily on the western end of the UST excavation (Figure 3). This was consistent with the previous observations made by Global Environmental. No ground water was observed during the UST decommissioning event.

3.2 UST NUMBER 2 - 25,000 GALLON HEATING OIL UST

The 25,000 gallon UST 2 was excavated using two Hitachi PC 200 excavators following the removal of the concrete driveway and Fuel Distribution Assembly. Snell Crane Service used a 65- ton crane to remove the UST from the excavation. Following the removal of the UST from the excavation, the UST was inspected and showed no obvious sign of leakage. According to the property owner, Mr. Marsilio DiGiovanni, The UST was installed in 1996. The UST was of steel construction, double-walled and the exterior was wrapped in fiberglass. The UST measured twenty eight feet in length, by twelve feet in diameter and weighed 24,000 pounds. The UST was transported by trailer to Fife Sand & Gravel for disposal.

During the excavation of the UST, no obvious indication of hydrocarbon contamination was observed in the excavation area. Soil samples were collected in accordance with WAC 173-360 Washington State UST Site Assessment Requirements. The samples were analyzed in an on site laboratory by Environmental Services Network (ESN) (Table 3). All sample analytical results were reported below 2001 MTCA cleanup levels.

The excavated soil was stockpiled at the site. Analyses confirmed that the soil removed from the excavation was below 2000 mg/kg diesel-range hydrocarbons. No ground water was observed during the UST decommissioning event.

4.0 SUPPLEMENTAL SOIL REMEDIATION ACTIVITIES

4.1 EXCAVATION ACTIVITIES

SES removed by excavation, soil containing diesel-range hydrocarbons above the Washington Department of Ecology (Ecology) Model Toxics Control Act (MTCA) Method A Diesel-Range Hydrocarbon Soil Cleanup Criteria (2000 mg/Kg) from the western half of the UST 1 excavation (Figure 3). The excavation was guided by analyses from an on site laboratory and other field parameters, including:

- Olfactory Observations
- Visual Observations
- Field Analytical Observations
    - Photoionization Detector (PID)
    - Sheen Test
    - Shaker Test

During the excavation of contaminated soil, the excavation was divided into 10-foot by 10-foot grids. Each grid extended 8 to 25 feet below ground surface. The approximate volume of soil per grid was 40 to 45 cubic yards. Soil above 8 feet in depth was consistently below 2,000 mg/kg diesel-range hydrocarbons. The soil above 8 feet was excavated and stockpiled separately (Figure 3). Using these methods, soil was identified and excavated until no indication of contaminated soil remained in the excavation along the southern, eastern and western excavation limits (Figure 3).

The excavation along the northern side was stopped at the northern property boundary. Field analytical evidence and corroborating laboratory analysis (Table 4) from samples collected along the northern property boundary show levels exceeding 2,000 mg/kg, the MTCA Method A Soil Cleanup Criteria for diesel-range hydrocarbons (Figure 2).

A total of 748 tons of soil greater than 2,000 mg/kg diesel-range hydrocarbons was excavated, loaded directly into dump truck when possible and transported to Fife Sand and Gravel, a state licensed disposal facility.

4.2 WASTE SAMPLING

During the excavation activities, soil samples were collected from areas throughout the excavation to verify that the soil being excavated was above 2,000 mg/kg diesel-range hydrocarbons (Table 4). Soil samples were also collected from soil placed into dump trucks prior to leaving the site for verification purposes (Table 4). These soil samples confirmed the presence of diesel-range hydrocarbons in the excavated soil above the 2001 MTCA Method A Soil Cleanup Criteria and validated the field parameters used to guide the soil excavation efforts.

4.3 CONFIRMATION SAMPLING

Following excavation activities, confirmation soil sampling was completed along the perimeter and the bottom of both UST excavations (Figure 3). Samples were also collected from stockpiled "clean" soil that accumulated during the excavation process.

Soil samples were collected from each sidewall and from the UST 1 excavation bottom (Table 5). Laboratory analysis of samples collected from UST 1 excavation from the southern, eastern, and western sidewalls as well as the samples collected from the excavation bottom were below 2,000 mg/kg diesel-range hydrocarbons (Table 5). Soil samples collected in native material along the northwestern sidewall at varying elevations ranged from 1900 to 4800 mg/kg, Figure 2), which exceeds the MTCA Method A Soil Cleanup Criteria for diesel-range hydrocarbons (Table 5). A horizontal lens-shaped zone, approximately twenty five feet in length and ten feet in height (tapering vertically to both the west and east) (photograph 34) remains. The off site extent of the affected soil beyond the northern property boundary is unknown.

4.4 REMAINING SOIL CONTAMINATION

An unknown amount of diesel-range hydrocarbons in soil appears to have migrated off site beyond the northern property boundary. According to the property owner, this area once housed a pump station. In order to limit cross contamination from the contaminated soil along the northern property boundary, a 10 millimeter plastic liner was placed in the excavation vertically along the northern excavation limits (Photograph 19). The liner extended twelve inches into the native soils to approximately 14.0 feet below ground surface. This liner provides a marker for the boundary between clean backfilled soil and soil with greater than 2,000 mg/kg diesel-range hydrocarbons. It is not intended to be a permanent means for eliminating cross contamination.

4.5 WASTE DISPOSAL

The excavated soil containing diesel-range hydrocarbons greater than 2,000 mg/kg was transported to Fife Sand and Gravel, a local licensed petroleum hydrocarbon contaminated soil disposal facility. A total of 748 tons of hydrocarbon contaminated soil was excavated and transported to the disposal facility. Weight tickets are provided in Appendix B.

4.6 SITE RESTORATION

Excavated soil (overburden) removed during the excavation process was backfilled into the UST excavations following confirmation sampling. Backfill was also imported from Fife Sand and Gravel and placed in both UST excavations and compacted to surface grade following receipt of the confirmation sampling results. One and one quarter-inch crushed rock was placed on top of the former excavation area.

5.0 SUMMARY

UST 1 and UST 2 were effectively decommissioned according to Ecology UST regulations. Soil contaminated in excess of MTCA Method A Soil Cleanup Criteria for diesel-range hydrocarbons was encountered near the western end of UST 1 during decommissioning excavation activities. This material was found to extend to the north from a depth of approximately 8 feet below ground surface to 20 feet below ground surface. A total of 748.11 tons of this material was effectively excavated and disposed at a licensed off site disposal facility. However, diesel-range hydrocarbons in excess of MTCA Method A Soil Cleanup Criteria for diesel-range hydrocarbons (2,000 mg/kg) remain in the northern wall of the excavation along the northern property boundary.

rlm 6/16/06

A paved alley is present in this area. Diesel-range hydrocarbon concentrations in confirmation soil samples taken from the northern sidewall following excavation activities ranged in concentration from 1900 to 4800 mg/kg. Based on the soil sampling conducted and field indications, it appears that this zone of soil with diesel-range hydrocarbons above 2,000 mg/kg is in the shape of a lens. Exact dimensions of the remaining contaminated material are unknown but estimated at between 8 to 10 feet vertically and 15 to 25 feet horizontally (east to west, figure 3, Photograph 34) along the northern property boundary. The extent of the off site impacts extending beneath the alley are not known but presumed to exist.

No groundwater was encountered during the excavation activities. Confirmation sample analyses from the bottom of the excavation ranged from non-detect to 1800 mg/kg. Therefore, there is no evidence for groundwater impacts associated with the diesel release at this site. Based on earlier investigations, groundwater depths in the vicinity of the site are expected to be below 50 feet below ground surface.

The on site diesel-range hydrocarbon impacts associated with the release from the UST 1 fuel system have effectively been excavated and removed.

25,000-2	Feb 6, 02	Removed	25000	Heating Oil

Contamination Present at the Time of Closure

☑ Yes ☐ No ☐ Unknown
Check unknown if no obvious contamination was observed and sample results have not yet been received from analytical lab.

☐ Yes ☐ No
If contamination is present, has the release been reported to the appropriate regional office?

To receive this document in an alternative format, contact the TOXICS CLEANUP PROGRAM at 1-800-826-7716 (VOICE) OR (360) 407-6006 (TDD).

ECY 020-94 (Rev. 6-99)

Instructions

AFTER COMPLETING THIS FORM, RETURN TO:

TOXICS CLEANUP PROGRAM
DEPARTMENT OF ECOLOGY
P.O. BOX 47655
OLYMPIA, WA 98504-7655

Please Read Carefully

This form is to be completed by the tank owner and submitted to Ecology within 30 days of tank closure. Mark the appropriate box(es) for temporary tank closure, permanent tank closure, change-in-service, or site assessment.

Permanent Closure and Change-In-Service require a site assessment be performed.

Site and Owner Information

Fill in the site and owner information. Include the Ecology site number, if known; also, be sure to provide telephone numbers so that any problems can be resolved quickly. **The tank owner MUST sign this form.**

Tank Closure/Change-In-Service Company and Site Check/Site Assessor

List the closure company and fill in the site assessor information for permanent closure or change-in-service. Ask to see the closure company supervisor's IFCI Certification and make sure that the certified supervisor signs this form.

Please note: **Individuals performing services MUST be certified by the International Fire Code Institute (IFCI), or other nationally recognized association by which they demonstrate appropriate knowledge pertaining to USTs or have passed another qualifying exam approved by the Department.**

Tank Information and Contamination Present at Time of Closure

Please fill in the tank information requested using tank ID numbers previously reported to Ecology. In the column entitled "Closure Method," indicate what manner of closure was used, such as closure in place or removal. Check the appropriate box(es) indicating if contamination is present and has been reported. Contamination found or suspected at the site must be reported to the appropriate Ecology regional office within 24 hours [see below for telephone numbers]. **If contamination is confirmed, a site characterization report must be submitted to the regional office within 90 days; if contamination is not confirmed, then this form, a site assessment checklist, and a site assessment report must be submitted to the above address within 30 days.**

The following tanks are exempt from notification requirements:

- Farm or residential tanks, 1,100 gallons or less, used to store motor fuel for personal or farm use only. The fuel must not be for resale or used for business purposes.
- Tanks used for storing heating oil that is used on the premises where the tank is located.
- Tanks with a capacity of 110 gallons or less.
- Equipment or machinery tanks such as hydraulic lifts or electrical equipment tanks.
- Emergency overflow tanks, catch basins, or sumps.

For more information, call toll free in the state of Washington 1-800-826-7716 (Message).

UNDERGROUND STORAGE TANK
Site Check/Site Assessment Checklist

FOR OFFICE USE ONLY
Site #: _____
Owner #: _____

INSTRUCTIONS

When a release has not been confirmed and reported, this Site Check/Site Assessment Checklist must be completed and signed by a person certified by IFCI or a Washington registered professional engineer who is competent, by means of examination, experience, or education, to perform site assessments. **The results of the site check or site assessment must be included with this checklist.** This form must be submitted to Ecology at the address shown below within 30 days after completion of the site check/site assessment.

SITE INFORMATION: Include the Ecology site ID number if the tanks are registered with Ecology. This number may be found on the tank owner's invoice or tank permit.

TANK INFORMATION: Please list all tanks for which the site check or site assessment is being conducted. Use the owner's tank ID numbers if available, and indicate tank capacity and substance stored.

REASON FOR CONDUCTING SITE CHECK/SITE ASSESSMENT: Please check the appropriate item.

CHECKLIST: Please initial each item in the appropriate box.

SITE ASSESSOR INFORMATION: This information must be signed by the registered site assessor who is responsible for conducting the site check/site assessment.

Underground Storage Tank Section
Department of Ecology
PO Box 47655
Olympia WA 98504-7655

SITE INFORMATION

Site ID Number (Available from Ecology if the tanks are registered): 97588
Site/Business Name: DiGiovanni Property
Site Address: 23928 PAC. Hwy. (Street) Telephone: (___)___
Kent (City) WA (State) (Zip Code)

TANK INFORMATION

Tank ID No.	Tank Capacity	Substance Stored
20000-1	20000 gal	HEATING OIL
25000-2	25000 gal	HEATING OIL

REASON FOR CONDUCTING SITE CHECK/SITE ASSESSMENT

Check one:

_____ Investigate suspected release due to on-site environmental contamination.
_____ Investigate suspected release due to off-site environmental contamination.
_____ Extend temporary closure of UST system for more than 12 months.
_____ UST system undergoing change-in-service.
X UST system permanently closed with tank removed.
_____ Abandoned tank containing product.
_____ Required by Ecology or delegated agency for UST system closed before 12/22/88.
_____ Other (describe): _____

CHECKLIST

Each item of the following checklist shall be initialed by the person registered with the Department of Ecology whose signature appears below.	YES	NO
1. The location of the UST site is shown on a vicinity map.	✓	
2. A brief summary of information obtained during the site inspection is provided. (see Section 3.2 in site assessment guidance)	✓	
3. A summary of UST system data is provided. (see Section 3.1.)	✓	
4. The soils characteristics at the UST site are described. (see Section 5.2)	✓	
5. Is there any apparent groundwater in the tank excavation?		✓
6. A brief description of the surrounding land use is provided. (see Section 3.1)	✓	
7. Information has been provided indicating the number and types of samples collected, methods used to collect and analyze the samples, and the name and address of the laboratory used to perform the analyses.	✓	
8. A sketch or sketches showing the following items is provided:		
- location and ID number for all field samples collected	✓	
- groundwater samples distinguished from soil samples (if applicable)	—	
- samples collected from stockpiled excavated soil	✓	
- tank and piping locations and limits of excavation pit	✓	
- adjacent structures and streets	✓	
- approximate locations of any on-site and nearby utilities	✓	
9. If sampling procedures different from those specified in the guidance were used, has justification for using these alternative sampling procedures been provided? (see Section 3.4)	—	
10. A table is provided showing laboratory results for each sample collected including; sample ID number, constituents analyzed for and corresponding concentration, analytical method and detection limit for that method.	✓	
11. Any factors that may have compromised the quality of the data or validity of the results are described.		✓

12. The results of this site check/site assessment indicate that a confirmed release of a regulated substance has occurred.	✓

(253) 924-0323 FAX

This report is for the sole use of our Client. No additional distribution of this report is authorized without the express written consent of Nowicki & Associates, Inc.

Conclusions and recommendations prescribed by this analysis are predicated upon visual inspection, laboratory analysis, and the interview responses from involved parties. Interpretation of these elements has been performed within the generally accepted scope of a hazardous material investigation and the scope of work.

History

This site has a 75 year history as a fuel distribution site. Five tanks were listed as tanks for distribution. A 1000, 5,000 and 10,000 gallon tank was scheduled for removal. A 20,000 and 25,000 gallon tank are scheduled to remain and the site eventually put back in service after removal of unwanted tanks, remediation of impacted soil and restoration of the site.

Soil

Soil at the site is sandy clay or clay/sand with gravel, asphalt pavement or concrete cap. At approximately 8-10 feet below grade a sand/gravel hardpan is evident. None of the tank excavations penetrate below the hardpan.

Tank Removal

The initial three regulated tanks that were scheduled for removal have been removed. An additional 6 tanks not previously known to exist were discovered and removed.

This removal commenced on October 13 with the 1000-gallon diesel tank removed on October 17. Some historical research with the property's previous Owner uncovered the possibility of additional tanks and initial investigation uncovered four additional tanks in two locations. On November 7 two additional tanks were discovered. Three of the originally scheduled tank removals and six additional tank removals have now been completed.

Water

No apparent groundwater has been seen at the site.

Sampling

All characterization sampling results are not yet available. At this time it appears that a combination of overfilling and plumbing leaks resulted in petroleum impact to the soil in all tank excavations but the 1000 gallon diesel tank on the west side of the site across from the office.

Remediation

At this time there is an estimated 350 cubic yards of soil at the site awaiting remediation. Onsite remediation is planned.

Summary & Conclusions

Petroleum from leaks and overfilling has been in contract the soil at this site. No all laboratory analysis is available, but characterization is nearing completion. Impacted soil has generally been identified within the tank excavations only and impacted soil is awaiting remediation.

This report is for the sole use of our Client. No additional distribution of this report is authorized without the express written consent of Nowicki & Associates, Inc.

Conclusions and recommendations prescribed by this analysis are predicated upon visual inspection, laboratory analysis, and the interview responses from involved parties. Interpretation of these elements has been performed within the generally accepted scope of a hazardous material investigation and the scope of work.

History

This site has a 75 year history as a fuel distribution site. Five tanks were listed as tanks for distribution. A 1000, 5,000 and 10,000 gallon tank was scheduled for removal. A 20,000 and 25,000 gallon tank are scheduled to remain and the site eventually put back in service after removal of unwanted tanks, remediation of impacted soil and restoration of the site.

Soil

Soil at the site is sandy clay or clay/sand with gravel, asphalt pavement or concrete cap. At approximately 8-10 feet below grade a sand/gravel hardpan is evident. None of the tank excavations penetrate below the hardpan.

An estimated 350 cubic yards of soil impacted by gasoline and diesel was removed from the excavations of the 9 tanks removed at the site. An additional 200 cubic yards of diesel impacted soil has now been removed from the central pump island site and the north central pump island site. With an anticipated small amount of excavation these two excavations will be closed except for the north wall of the central pump island excavation (pump #2). Excavation of this material will necessitate the disturbance of the 20,000 gallon tank excavation and this is under evaluation at present.

Tank Removal

The initial three regulated tanks that were scheduled for removal have been removed. An additional 6 tanks not previously known to exist were discovered and removed for a total of 9 tanks removed.

This removal commenced on October 13 with the 1000-gallon diesel tank removed on October 17. Some historical research with the property's previous Owner uncovered the possibility of additional tanks and initial investigation uncovered four additional tanks in two locations. On November 7 two additional tanks were discovered. Three of the originally scheduled tank removals and six additional tank removals have now been completed.

On November 15 sampling and characterization of the pump island area in the middle of the property was begun. The pump on the west side of the center pump island #2 was confirmed to have leaked and by November 30, 2000 an estimated 160 cubic yards of diesel impacted soil was removed from this excavation. The north wall of the excavation is still impacted with miner impact to the bottom and south walls. Removal of additional material is planned for the bottom and south walls and the west wall will not be excavated due to the impact to the north end of the 20,000 gallon tank directly to the north.
North

The old pump island for large quantity fueling on the north side of the 5,000 and 10,000 gallon tank location was removed and diesel impacted soil confirmed under the this site. An estimated 40 cubic yards of diesel impacted soil was removed from this site with the north sidewall still impacted above the MTCA level of 200 ppm. An additional small quantity of impacted material is planned for removal from this area.

Water

No apparent groundwater has been seen at the site.

Sampling

Most characterization sampling results are not yet available. At this time it appears that a combination of overfilling and plumbing leaks resulted in petroleum impact to the soil in all tank excavations.

Remediation

At this time there is an estimated 550 cubic yards of soil at the site awaiting remediation. Remediation has begun with an estimated 100 yards in the process of being remediated. An additional 200 yards is stockpiled awaiting remediation and 200 yards of impacted soil stored in the central excavation awaiting excavation. It is anticipated that a small quantity of soil will be added to this.

Summary & Conclusions

Petroleum from leaks and overfilling has been in contact the soil at this site. Not all laboratory analysis is available, but characterization is nearing completion. Impacted soil has generally been identified within the tank excavations and the central pump islands. The east two tanks and distribution island were planned to remain ready for reuse. Impacted soil has been discovered next to the north end of the 20,000 gallon tank and likely intrudes into the excavation. This discovery and its impact to the remaining tank system are still being studied. Closure of the excavations and remediation of north and central portions of the site are presently underway with the above noted exception.

11:00 Met onsite with Mavi Rand & Pat. Previous sampling Lead Showed Impacted soil in 2,3,4 pump excavation & #1. Wanted to go over with Mavi & do lateral Boring at -8 feet (Unrestricted) by #2 pump. Very hard Digging. No Lessening of Impact at Least as high as sample. Likely impact in 20,000 tank excavation. Went over options & Recommended closing 2,3,4 except Wall & #1. Investigated new Closure Regs to be put in February. Close to closure Method A now. Mavi went along with this. Will not proceed with disturbance of 20000. This would likely prompt removal response of entire Remaining System.
Pump leak noted on prior Reports but more serious than usual. Pressure leak that may have been around since 1992 upgrade. #1 leak seems to be smaller & long term accumulation

Found impacted soil under pump 182 with 4 @ 200 ppm 10 days ago. GES appears to have completed excavation of impacted soil. All diesel, very low odor in 2, 3, 4 area. Old oil odor in 1 area but weak. North wall next to slab worrisome. Not much odor but looks impacted. #2 pump leaked heavily & even soaked into hardpan. From past experience at site samples may be OK but not a lot of data to go on. Will sample since digging at a good stopping point. Intruding on property lines & large tank. Sidewall soil is hard & stable. Has been pairing & grout to backfill 2, 3, 4 site especially. Rough estimate that 300 yds out on ground. Starting soil treatment. Can't treat much more due to space. Owner anxious to wrap up excavation & characterization.

15 X 16 X 19 = 168 cubic yd's (Removed)

10 X 20 X 8 ÷ 2 = 40 cu. yds (Removed)

27 - BTM CTR - 15, grey hard sand
28 - N SW - 8, grey hard sand
29 - S SW - 9, grey hard sand
30 - N SW - 7, grey hard sand

11/9/00
Southgate

Onsite to sample 2 gas Tank site in Front of South Garage. Walls & Bottom Likely Clean. Gas Tanks with Top Cover dirt well impacted from overfill or spill. Sampling Pump areas. Designate 1, 2, 3, 4 to keep them straight.

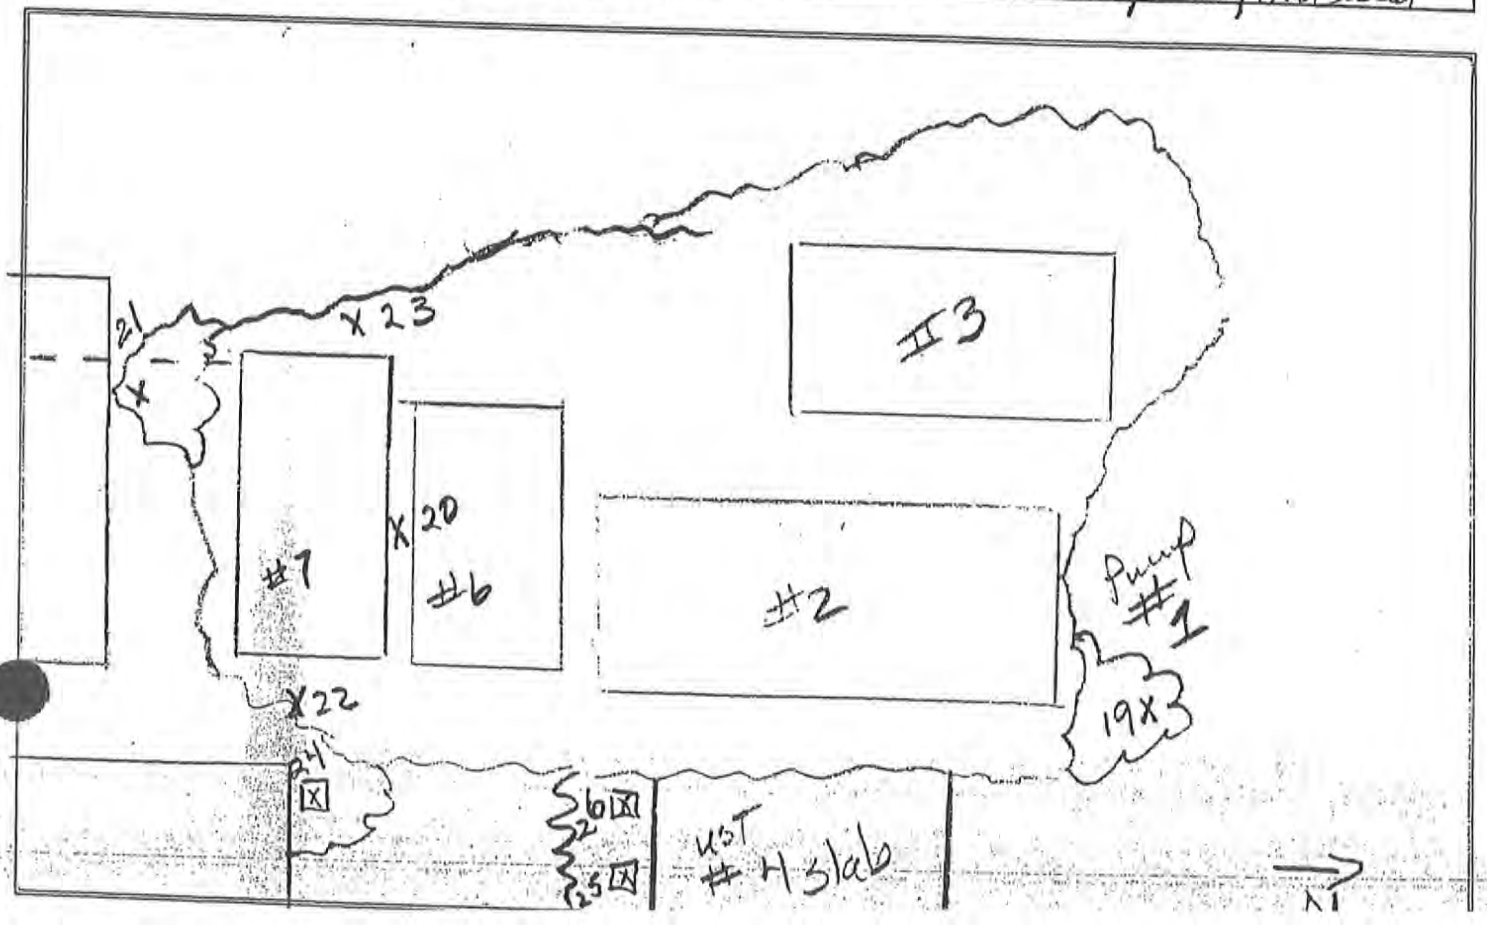

#1 - old site shows lots of spill on surface. Likely impacted

#2 - This site showed spill & goes throug Pea gravel in pipe trench to soil - likely further.

#3 - Not much impact - very little on top

#4 - Very small amount of Leakage through pea gravel Clay has good color with low odor.

19 - Old Island - Brown clay sand
- BTM CTR 3K Gray hard sand
21 - Removed stockpiled soil, strong odor Gray sand
22 - East SW. Gray hard sand
23 - East SW. gray hard sand
24 - Tan Clay sand
25 - #3 Pump - Pea Gravel
26 #2 Pump - Gray hard sand

Came by on way to other site to take pictures. Hole down 15' by pumps. No activity on North pump. Gray material on north wall worrisome. South Wall appears to be packing. East wall OK - still very dense hard layer below 6-8'. Tan Clay on top. Wall to west up to other excavation, impacted, & will go. Hopefully can get completed by Monday. Concerned about yardage. Estimated 350 yds. & should be done. This likely to go over. Will Calculate when I get back into office. Needs hole squared up for final Tally Next Monday

Called out to document Removal of Two Tanks by Brick Shop. Out of service & unknown. Likely out of use 40 years at least. Vents & pipes cut off below ground. Fill & access holes plugged. West Tank 45x96" heating oil for house rust tank-gasoline - 47x144. Spillage around HO - removed & Tank leaking from rust spots - soil Looks good. Some gray weak smelling soil under Gas Tank but HO Tank Good. Sampled around HO & one sidewall of Gas. No mixing of Gas & diesel. Gas not quite under foundation but need dirt to put in hole. Stockpile dirty. Randy to bring in 100 yds, clean for fill & use it against wall when tank pulled. Maybe Friday before he has dirt.

Tanks have lots of corrosion but not much leakage. Some overfilling - likely only original excavation.
soil dense Brown Tan sandy clay - not much clay

Southgate 70° Rain

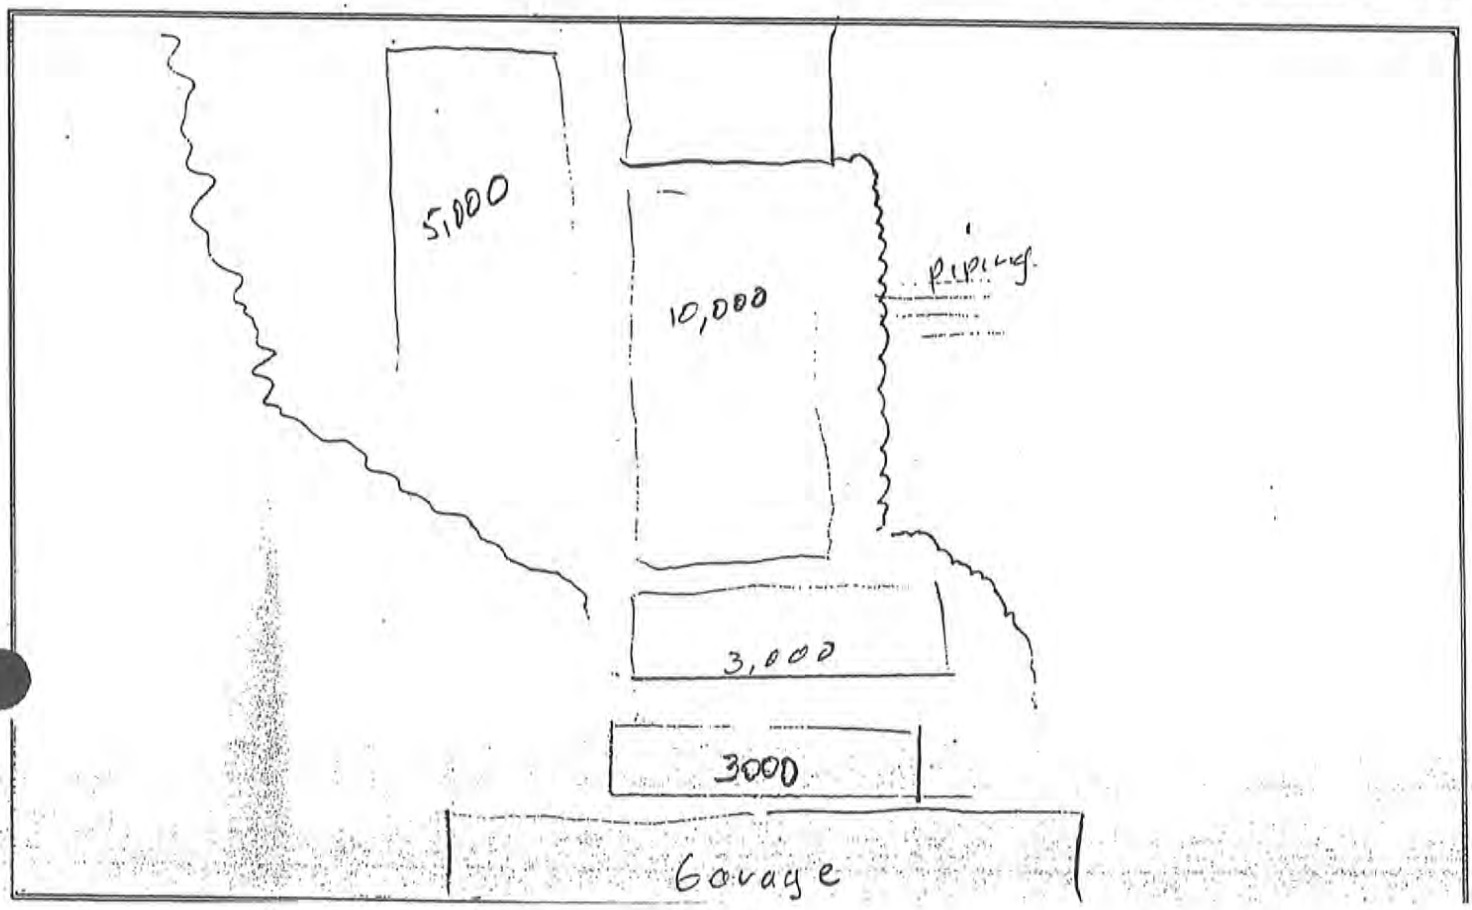

Onsite to meet Mike from Fire department. Will go on permit that 4 Tanks out. City may be interested in burning house.

Raining hard - plugged broken drains. Partial backfill. Can't Sample today - tank from yesterday - 3,000 Gallon.

Randy found Gas hot spot near plumbing on south side. He had waste drums pumped yesterday.

Side walls look good on new tank. will check Monday or Tuesday

3,000 appears to have been diesel, but a 5 & 10 K have had Gas & diesel. Impacted Soil mixed requiring 3 analyses on each Sample.

12:15 - Inspector scheduled 1:30 - 3:00.
12:30 - Check and Big tank 13%, 6,000 12%
Little one 12%
1:35 - No change - same readings - not many fumes 220 lbs split. More than enough. Rand went to get more.

2:30 Jon Fireman onsite - 13 13 & 12 on Tanks 5 10 1
Randy went to get IBC - 120 lbs more

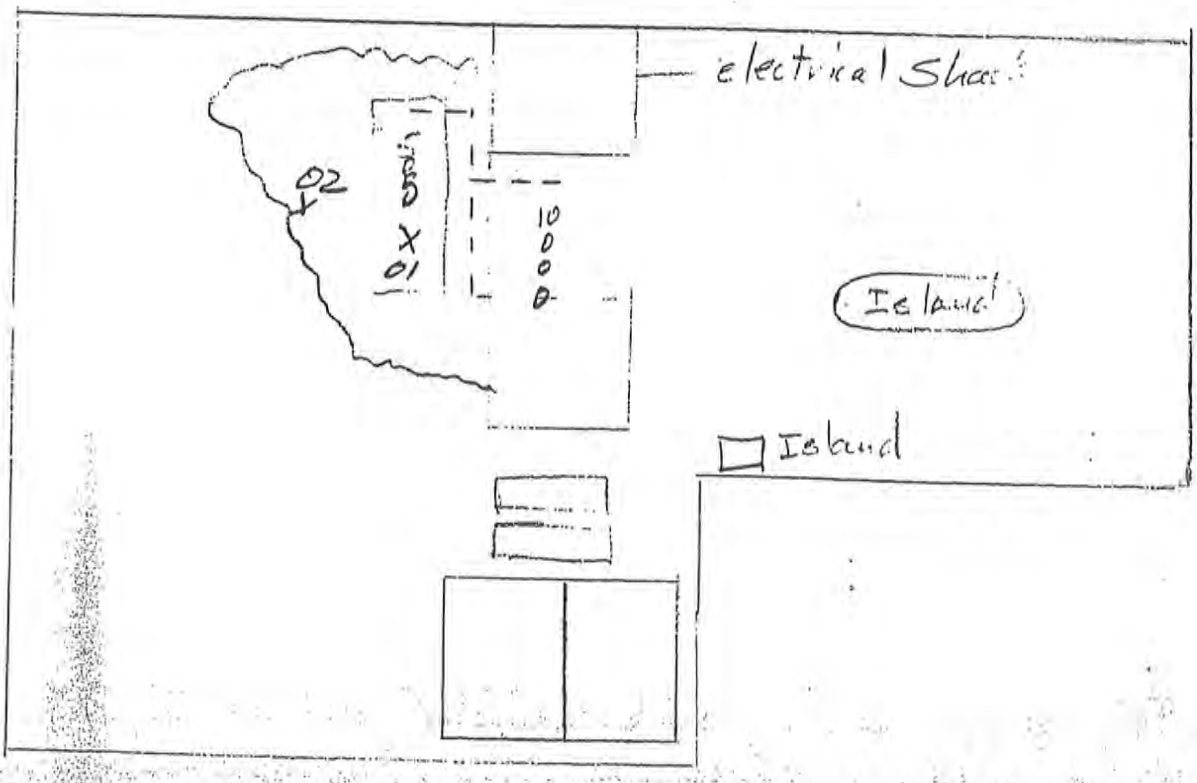

3:30 - Jon Took pictures & coming out.
3:50 - Sampled 6,000 - due to 13 ft. - Gray but no odor except gravel right around fill. Jon to return.
6:00 - Digging 10,000 - Jon FD came by - scheduled Ins for PM Tomorrow. 10,000 & 1,000 out tomorrow.
3 cans found at head of 10,000, 2 likely

South Gate oil
10/13/00
Overcast-Drizzle

Onsite 10:30- No one onsite but Loxley onsite. Came Back 11:30 after City of Kent after checking on permits. Don't need permits until going to be large project. Plan on Turning in Monday. Scope of work broadened & need to talk with Mark about how far to go. 5,000 has diesel contamination - not Bros. Lots. Can see where tanks lined but lots of Overfill. Took two samples. Plumbing all new but contamination likely dates from before Living.

01. Overfill - 5,800 - sand - gray
02. Corny sandy hard pan.

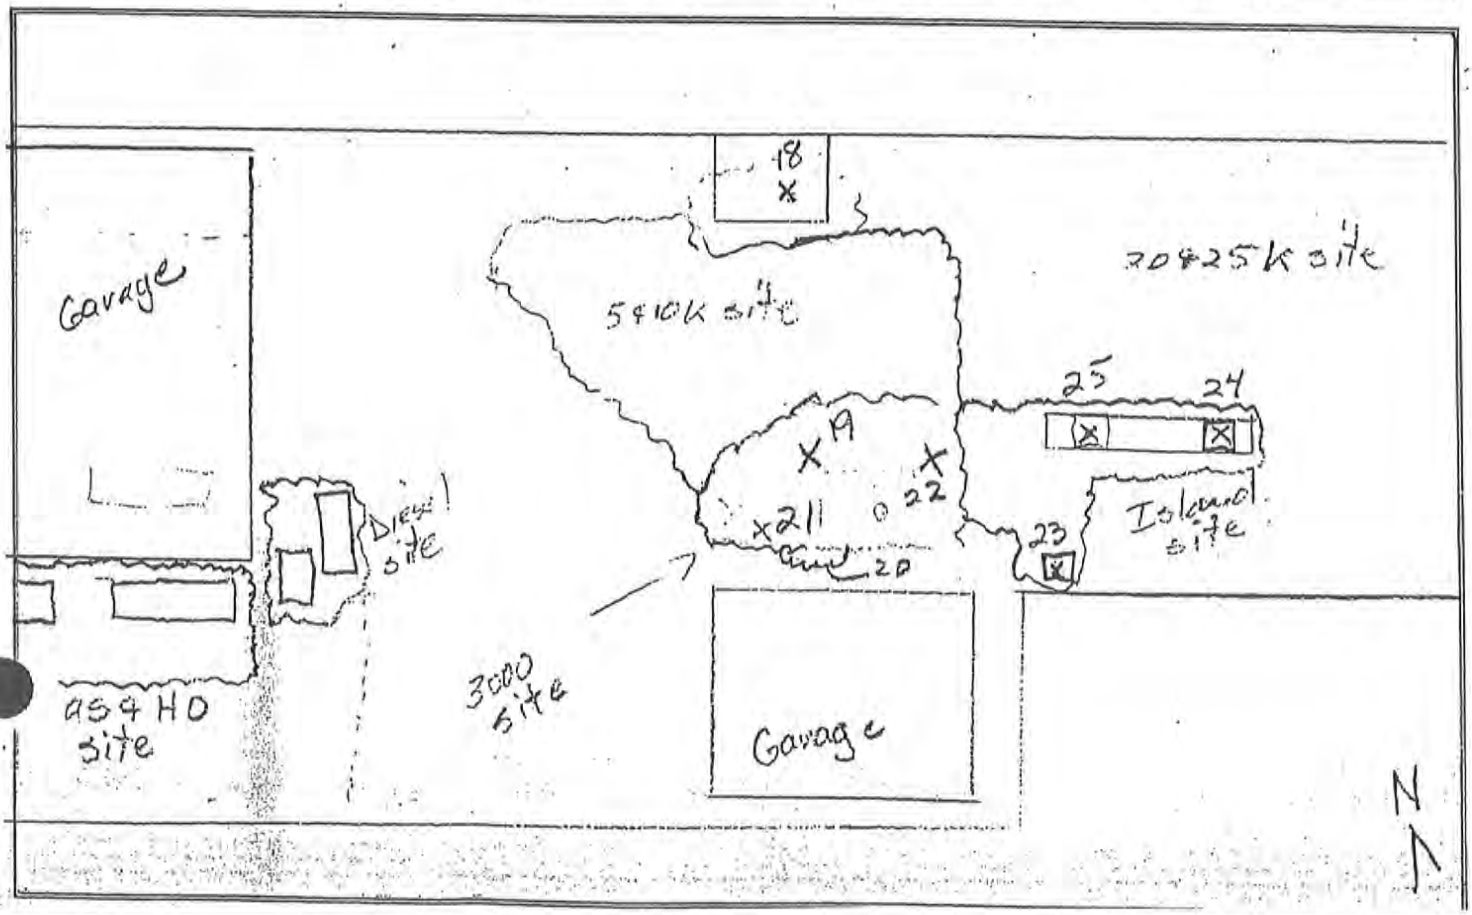

Two new Tanks discovered old Gas & diesel. Supposed to be two more by shop but likely under foundation. These are likely HO.

South Gate
11/8/00
Broken 60° rain early

Onsite @ 1:00 to Look over Garage excavation & final Sample 3000 Hole, Pump Islands, & old distribution Bldg & Take pictures. Removed 5 yds out of E garage excavation. Mild odor in Gray sand above hard pan. 75 year old material & odor may be nothing - won't know until Results back. Sampled 3000 excavation - Took out sand seem by garage - sampling should be OK. Stockpile sample had odor. Gas at this site. Tanks were empty but Gas smell from surface down. Abandoned for 20 yrs at least.
Old commercial fill by 10,000, 5000 has surface heavy oil smell. Not Deep - will see what samples say - That end of Lot has heavy oil from road & spills, down to 12" under asphalt.
Sampled New pump Islands. Corner Pump OK, Pipe OK, East pump OK, West pump Leaked diesal through Pea Gravel to hard Pan 25 yds estimated. Electrical under Island in Trench. Cut Off.

19 - old Island N - Old oil, Gray Brown	23 - 3000, E SW, -6, Gray Tan sand
20 - 3000 - BTM CTR - 12 - Gray sand to hard pan	24 - Pump by fence, Tan Clay sand - 2
21 - 3000 - Stockpile - smell - Impacted	25 - Mid Island E, Gravel soil, Gray
22 - 3000 - S SW - 7, Gray Brown	26 - Mid Island W, Gravel, odor

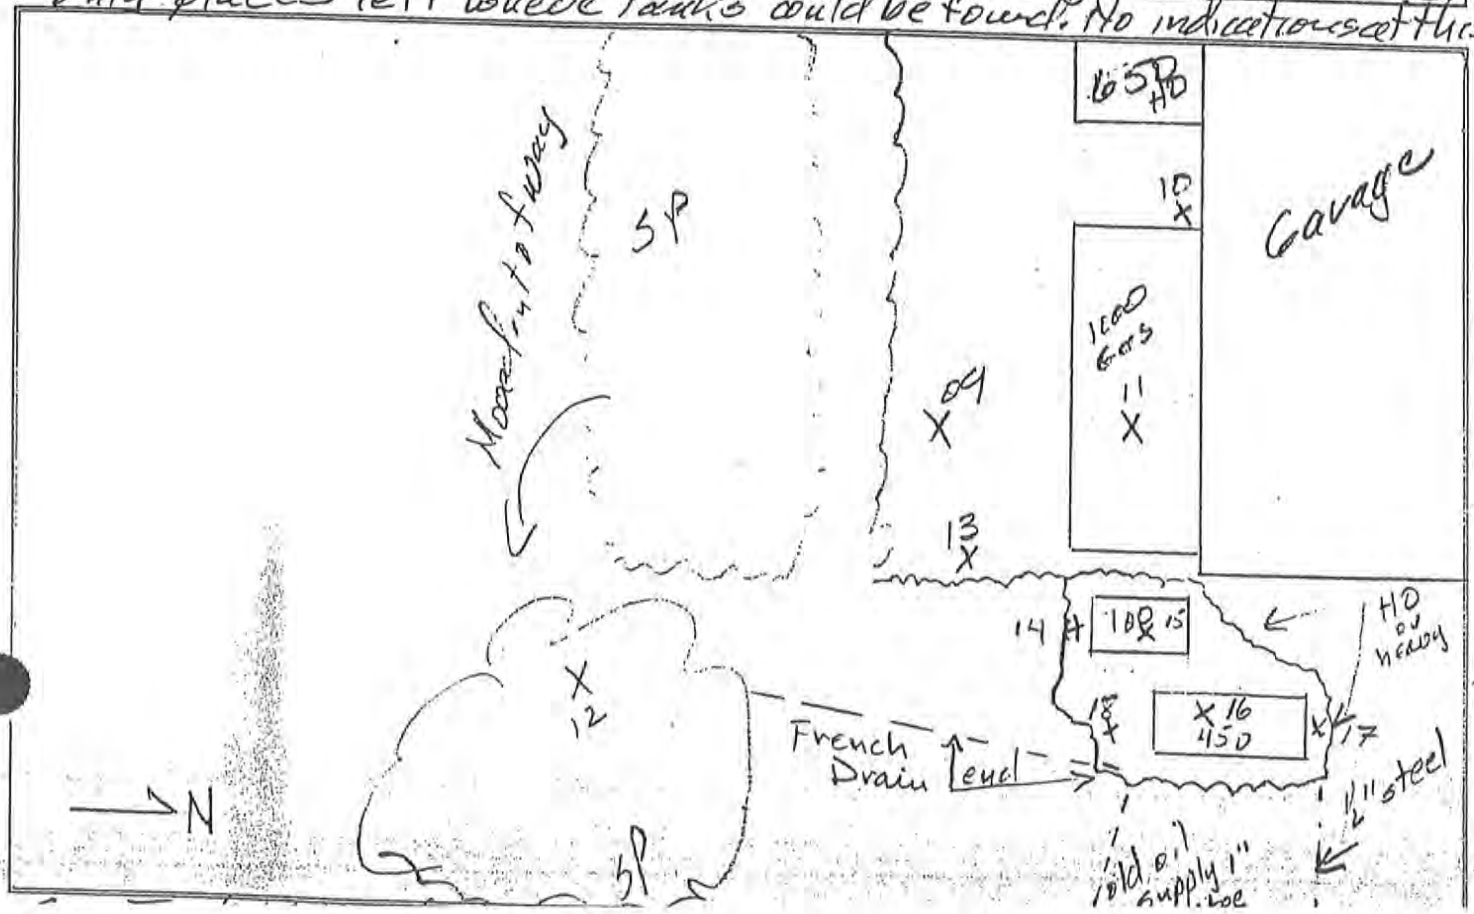

11/7/00 1:00 - 4:30
50° - Overcast

Southgate

storage Building & 5,000/10,000 Bldg down

Onsite to witness Gas Tank excavation. Delayed because dirt needed To backfill Gas Tank since it is so close to brick wall. Dirt delivery onsite as I drove in. Dumped in front hole - 145 yds brought in over afternoon. Excavation around Gas Tank started after stockpiled soil ready. Tank was revealed & removing samples Taken. While uncovering Tank another tank found just to east of corner of Garage. 50 yds impacted material removed from Gas site. Tank OK but over fill around Tank. Very old & Gray - went down 9-10 feet & stopped at hardpan. Odor but mild & may pass. Clean closure samples should be OK. Tank To east 100 gallon very thin Tank. Gas Tank Thick walled Tank & in good Condition. 650 To west earlier removed Thin ~~Tank~~ Tank but OK, lots of surface rust on 1000 & 650 but OK - Overfill & plumbing cause of Leaks. 100 Gallon empty with oil smell & water evidence inside. Some minor overfill & plumbing Leakage. Next to this tank another about 450 next to. Water inside & minor contamination. 25 yds added To stockpiles impacted. Excavations Together. Rudy & Mavi Talked over suspicions & piping & Trench dug across site & old plumbing only thing found. Front of Garage & south by back of house only places left where Tanks could be found. No indications of this Tank

Dear Mr. Simons:

Please find enclosed the analytical data report for the Southgate Oil Project in Kent, Washington. Soil samples were analyzed for Diesel and Oil by NWTPH-Dx/Dx Extended on November 29, 2000.

The results of these analyses are summarized in the attached table. All soil values are reported on a dry weight basis. Applicable detection limits and QA/QC data are included. An invoice for this analytical work has been sent to Randy Perkins.

TEG Northwest appreciates the opportunity to have provided analytical services to Nowicki and Associates for this project. If you have any further questions about the data report, please give me a call. It was a pleasure working with you on this project, and we are looking forward to the next opportunity to work together.

Sincerely,

Michael A. Korosec
President

This report is for the sole use of our Client. No additional distribution of this report is authorized without the express written consent of Nowicki & Associates, Inc.

Conclusions and recommendations prescribed by this analysis are predicated upon visual inspection, laboratory analysis, and the interview responses from involved parties. Interpretation of these elements has been performed within the generally accepted scope of a hazardous material investigation and the scope of work.

This report is an updated version of the earlier progress report including a section on the remediation that is in progress.

History

This site has a 75 year history as a fuel distribution site. Five tanks were listed as tanks for distribution. A 1000, 5,000 and 10,000 gallon tank was scheduled for removal. A 20,000 and 25,000 gallon tank are scheduled to remain and the site eventually put back in service after removal of unwanted tanks, remediation of impacted soil and restoration of the site.

Soil

Soil at the site is sandy clay or clay/sand with gravel, asphalt pavement or concrete cap. At approximately 8-10 feet below grade a sand/gravel hardpan is evident. None of the tank excavations penetrate below the hardpan.

An estimated 350 cubic yards of soil impacted by gasoline and diesel was removed from the excavations of the 9 tanks removed at the site. An additional 200 cubic yards of diesel impacted soil has now been removed from the central pump island site and the north central pump island site. With an anticipated small amount of excavation these two excavations will be closed except for the north wall of the central pump island excavation (pump #2). Excavation of this material will necessitate the disturbance of the 20,000 gallon tank excavation. This is still under evaluation at present.

Tank Removal

The initial three regulated tanks that were scheduled for removal have been removed. An additional 6 tanks not previously known to exist were discovered and removed for a total of 9 tanks removed.

This removal commenced on October 13 with the 1000-gallon diesel tank removed on October 17. Some historical research with the property's previous Owner uncovered the possibility of additional tanks and initial investigation uncovered four additional tanks in two locations. On November 7 two additional tanks were discovered. Three of the originally scheduled tank removals and 8 additional tank removals have now been completed.

On November 15 sampling and characterization of the pump island area in the middle of the property was begun. The pump on the west side of the center pump island #2 was confirmed to have leaked and by November 30, 2000 an estimated 160 cubic yards of diesel impacted soil was removed from this excavation. The north wall of the excavation is still impacted with (miner) impact to the bottom and south walls. Removal of additional material is planned for the bottom and south walls The north wall will not be excavated due to the impact to the north end of the 20,000 gallon tank.

The old pump island for large quantity fueling on the north side of the 5,000 and 10,000 gallon tank location was removed and diesel impacted soil confirmed under the this site. An estimated 40 cubic yards of diesel impacted soil was removed from this site with the north sidewall still impacted above the MTCA level of 200 ppm. An additional small quantity of impacted material is planned for removal from this area.

Water

No apparent groundwater has been seen at the site.

Sampling

Enclosed is a sample log and a summary of results from testing done on the soil at this site. All appropriate sampling protocols were followed and there is nothing to indicate that the quality of the data or the validity of the results were compromised. Samples were kept cool or refrigerated until delivery to TEG Laboratories, Inc., 7110 38th Drive SE, Lacey, WA 98503. Methods used were WTPH-D,G and BTEX where appropriate. Samples were generally taken as "worst case" within the vicinity sampled based on soil coloration, odor and field screening.

Remediation

350 cubic yards of impacted soil stockpiled out of the excavation has been has been undergoing bioremediation since the end of November 2000. Cooler temperature has hampered the remediation process over the winter slowing the progress of the soil. Field screening has been done three times since February 21, 2001. Thin layer chromotography was used the last three times. The last field screening on March 14, 2001 indicated some progress. Weather conditions are presently good and final sampling is anticipated within ten days. When sampling of the 350 cubic yards is complete this soil will be used as clean backfill at the site and the remaining 200 cubic yards brought out of the excavation for remediation. It is anticipated that a small quantity of soil will be added to this.

Summary & Conclusions

Petroleum from leaks and overfilling has been in contact the soil at this site. Characterization is nearing completion for the removal of the 8 tanks removed. Impacted soil has generally been identified to have originated from the tank excavations and the pump islands presently excavated. The east two tanks and distribution island were planned to remain ready for reuse. Impacted soil has been discovered next to the north end of the 20,000 gallon tank and likely intrudes into the excavation. This discovery and its impact to the remaining tank system are still being studied. Closure of the excavations and remediation of the north and central portions of the site are presently underway with the above noted exception. Remediation of 350 cubic yards of petroleum impacted soil presently stockpiled out of the excavation is nearing completion.

Site Check/Site Assessment Checklist

FOR OFFICE USE ONLY
Site #: _____
Owner #: _____

INSTRUCTIONS

When a release has not been confirmed and reported, this Site Check/Site Assessment Checklist must be completed and signed by a person certified by IFCI or a Washington registered professional engineer who is competent, by means of examination, experience, or education, to perform site assessments. The results of the site check or site assessment must be included with this checklist. This form must be submitted to Ecology at the address shown below within 30 days after completion of the site check/site assessment.

SITE INFORMATION: Include the Ecology site ID number if the tanks are registered with Ecology. This number may be found on the tank owner's invoice or tank permit.

TANK INFORMATION: Please list all tanks for which the site check or site assessment is being conducted. Use the owner's tank ID numbers if available, and indicate tank capacity and substance stored.

REASON FOR CONDUCTING SITE CHECK/SITE ASSESSMENT: Please check the appropriate item.

CHECKLIST: Please initial each item in the appropriate box.

SITE ASSESSOR INFORMATION: This information must be signed by the registered site assessor who is responsible for conducting the site check/site assessment.

Underground Storage Tank Section
Department of Ecology
PO Box 47655
Olympia WA 98504-7655

SITE INFORMATION

Site ID Number (Available from Ecology if the tanks are registered): 97688
Site/Business Name: Southgate Oil
Site Address: 23428 Pac Hwy S (Street) Telephone: (___) _____
Kent (City) WA (State) _____ (Zip Code)

TANK INFORMATION

Tank ID No.	Tank Capacity	Substance Stored
3,4,5,6,7,8,9,10,11	5,000,10,000,1000,3000	
	3000,650,1000,275,550	Gas, Diesel, HO

REASON FOR CONDUCTING SITE CHECK/SITE ASSESSMENT

Check one:

___ Investigate suspected release due to on-site environmental contamination.
___ Investigate suspected release due to off-site environmental contamination.
___ Extend temporary closure of UST system for more than 12 months.
✓ UST system undergoing change-in-service.
___ UST system permanently closed with tank removed.
___ Abandoned tank containing product.
___ Required by Ecology or delegated agency for UST system closed before 12/22/88.
✓ Other (describe): Remove un-needed & unknown Tanks

CHECKLIST

Each item of the following checklist shall be initialed by the person registered with the Department of Ecology whose signature appears below.	YES	NO
1. The location of the UST site is shown on a vicinity map.	RFS	
2. A brief summary of information obtained during the site inspection is provided. (see Section 3.2 in site assessment guidance)	RFS	
3. A summary of UST system data is provided. (see Section 3.1.)	RFS	
4. The soils characteristics at the UST site are described. (see Section 5.2)	RFS	
5. Is there any apparent groundwater in the tank excavation?	RFS	
6. A brief description of the surrounding land use is provided. (see Section 3.1)		RFS
7. Information has been provided indicating the number and types of samples collected, methods used to collect and analyze the samples, and the name and address of the laboratory used to perform the analyses.	RFS	
8. A sketch or sketches showing the following items is provided:		
- location and ID number for all field samples collected	RFS	
- groundwater samples distinguished from soil samples (if applicable)	RFS	
- samples collected from stockpiled excavated soil	RFS	
- tank and piping locations and limits of excavation pit	RFS	
- adjacent structures and streets	RFS	
- approximate locations of any on-site and nearby utilities	RFS	
9 ampling procedures different from those specified in the guidance were used, has justification for using these alternative sampling procedures been provided? (see Section 3.4)	RFS	
10. A table is provided showing laboratory results for each sample collected including; sample ID number, constituents analyzed for and corresponding concentration, analytical method and detection limit for that method.	RFS	
11. Any factors that may have compromised the quality of the data or validity of the results are described.	RFS	
12. *The results of this site check/site assessment indicate that a confirmed release of a regulated substance has occurred.*	RFS

clear - lt Northeast

Onsite to check above ground remediation pile. Checked a week ago with TLC Field Screening. 2 samples in 500 ppm range - none under 200. 4 Samples collected this trip & Checked 200 - 300. Indicates remediation coming down but not below 200. HCL's from 3 weeks ago in the 5000 range. Not a direct Crossover for methods. Concensus is that the soil not ready for final Sampling. Told Randy He should get excavator going & thoroughly mix. This could make soil ready in week to ten days. He did add nutrients & more pile appeared. Cary-Buell added nutrients & vague petroleum but hard to tell at low levels in soil now

Remediation

Met Randy Ousite. Moved Soil from side of Pile & spread Out. Took several odor tests. Strong remediation smell. one Sample had petroleum. Decided to Send in two samples. May be OK. Soil much better than 6 weeks ago.

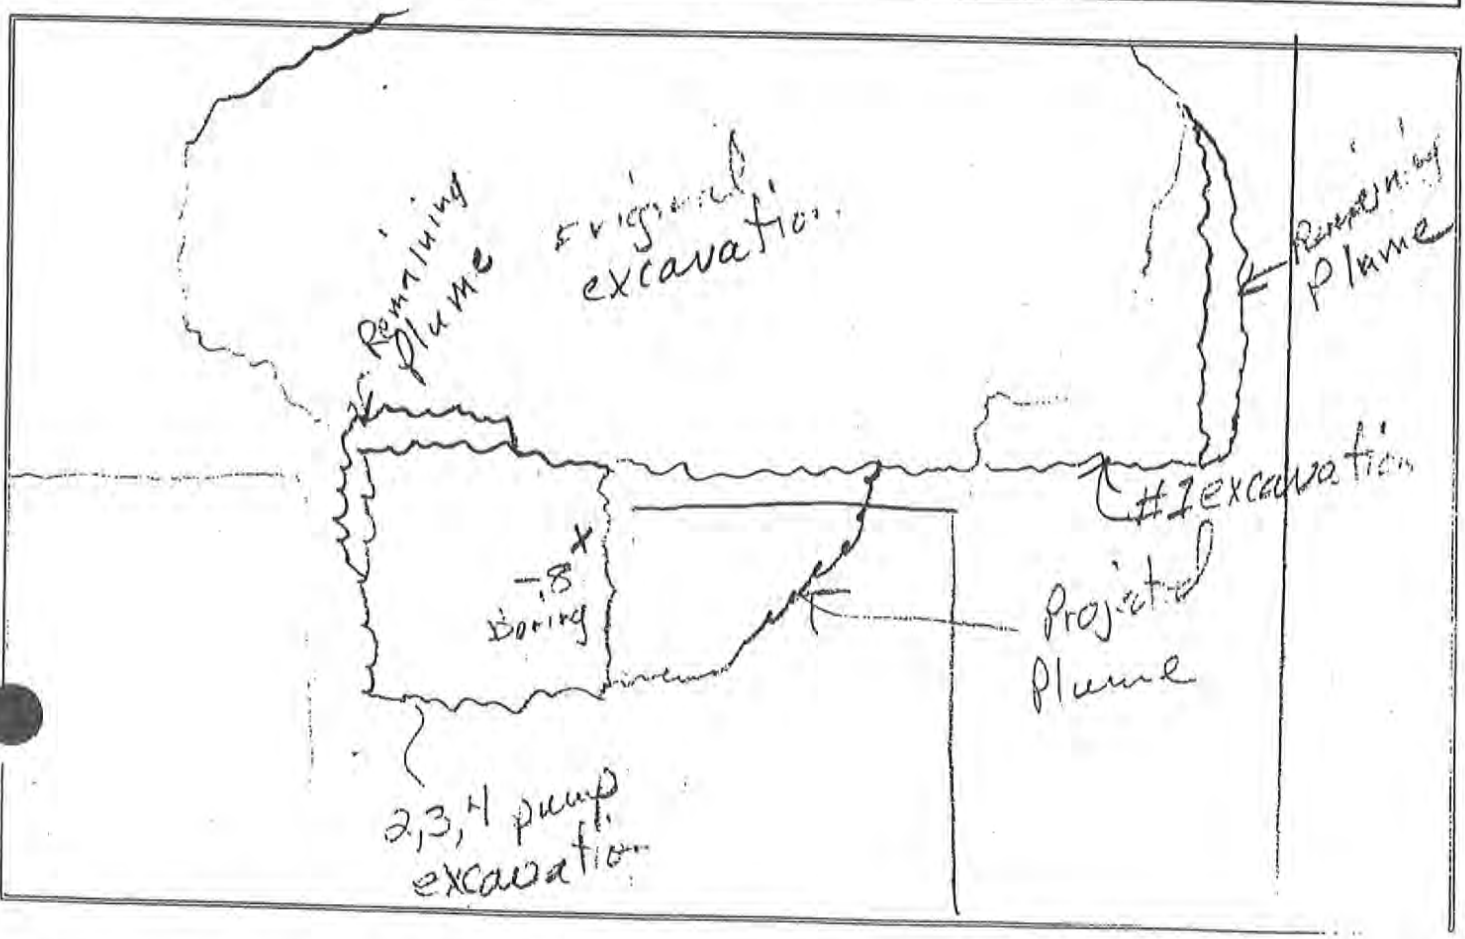

R-1 - Gray sandy soil - organic - < light petroleum 240
R-2 - Gray sandy soil - organic - " " 320

Checked cross section of pile. All smells similar. Only way to check now is send to lab.

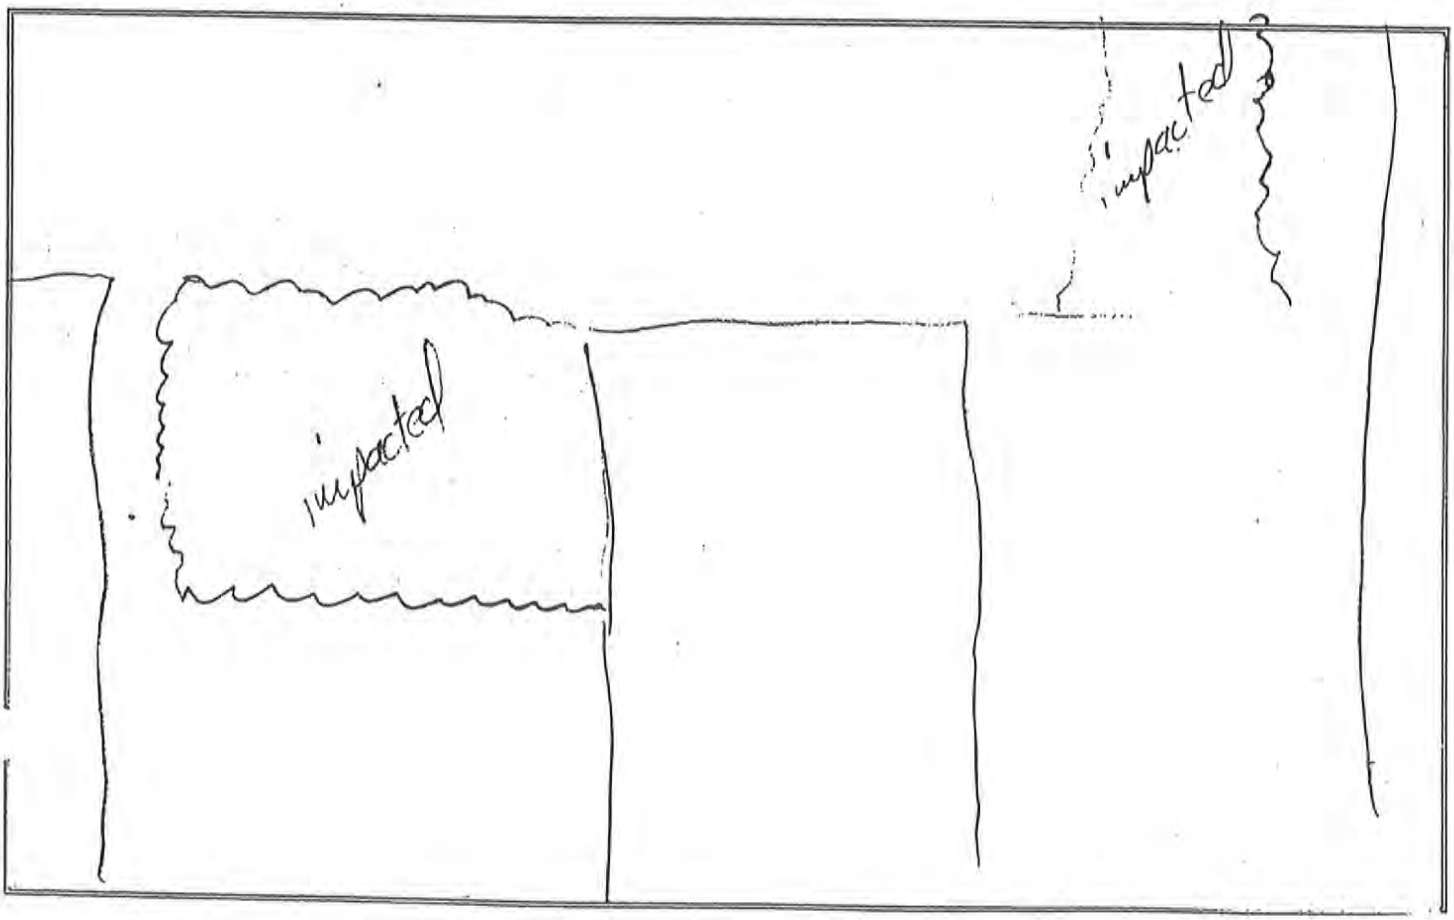

12/1/00
Clear/Broken
45°

11:00 Met onsite with Mavi Rand & Pat. Previous sampling Lead Shows Impacted soil in 2,3,4 pump excavation & #1. Wanted to go over with Mavi & do lateral Boring at -8 feet (Unestricted) by #2 pump. Very hard Digging. No Lessening of Impact at Least as high as sample. Likely impact in 20,000 Tank excavation. Went over options & Recommended closing 2,3,4 except Wall & #1. Investigated new Closure Regs to be put in February. Close to closure Method A now. Mavi went along with this. Will not proceed with disturbance of 20,000. This would likely prompt removal response of entire Remaining System.
Pump leak noted on prior Reports but more serious than usual. Pressure leak that may have been avoided since 1992 upgrade. #1 leak seems to be smaller & long term accumulation

10/21/00
Overcast 40°
12:30 & 6:00

Come by on way to other site to take pictures. hole down 15' by pumps. No activity on North pumps. Gray material on north wall worn some. South wall appears to be packing. East wall OK - cell very dense hard layer below 6-8'. Tan Clay on top. Wall to west up to other excavation, impacted I will go. Hopefully can get completed by Monday. Concerned about yardage. Estimated 350 yds. & should be done. This likely to go over. Will calculate when I get back up to office. Needs hole squared up for final Tally Next Monday

Found impacted soil under pump 192 with 4 @ 200 ppm 10 days ago. GES appears To have completed excavation of impacted soil. All diesel, very low odor in 2, 3, 4 area. Old oil odor in 1 area, but weak. North wall next to slab worrisome. Not much odor but looks impacted. #2 pump leaked heavily & even soaked into hard pan. From past experience at site samples may be OK but not a lot of data to go on. Will sample since digging at a good stopping point. Intruding on property lines & large tank. Sidewall soil is hard & stable, has been paving & grout to backfill 2, 3, 4 site especially. Rough estimate that 300 yds out on ground. Starting soil treatment. Can't treat much more due to space. Owner anxious to wrap up excavation & characterization.

15 X 16 X 19 = 168 cubic yds (Removed)

10 X 20 X 8 ÷ 2 = 40 cu. yds (Removed)

Dusite to sample 2 gas Tank site in Front of South Garage. Walls & Bottom Likely Clean. Gas Tanks with Top Cover dirt well impacted from overfill or spill. Sampling Pump areas. Designate 1, 2, 3, 4 to keep them straight.

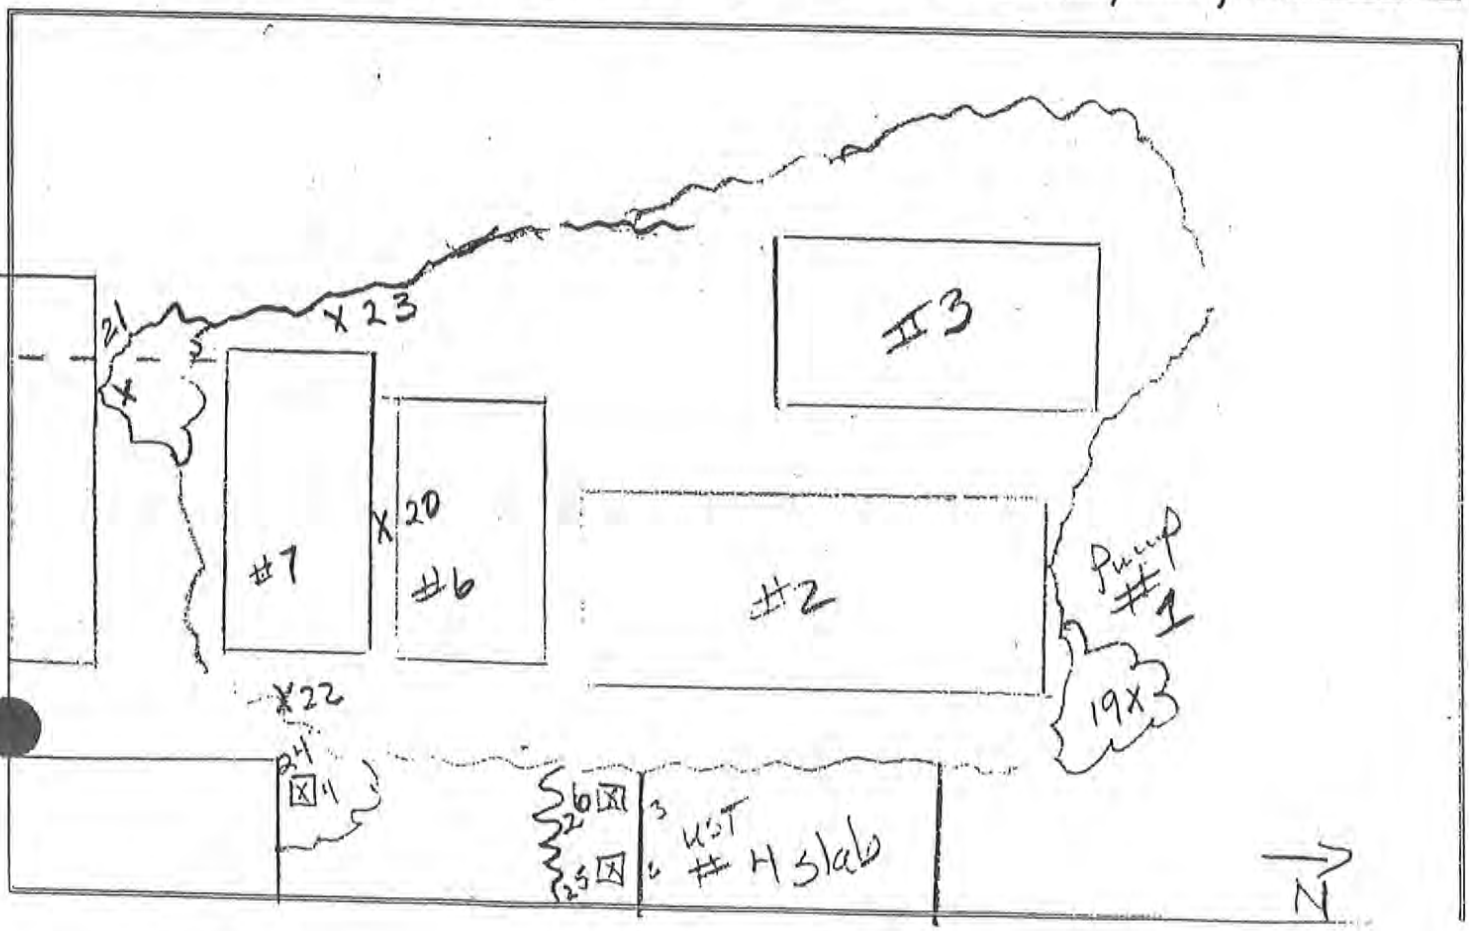

1 - old site shows lots of spill on surface. Likely impacted

2 - This site showed spill & goes throug Pea gravel in pipe trench to soil - likely further.

3 - Not much impact - very little on top

4 - Very small amount of Leakage through pea gravel Clay has good color with low odor.

19 - Old Island - Brown clay sand .2
20 - BTM CTR 3K Gray hard sand .1'
21 - Removed stockpiled soil, strong Gray sand odor
22 - East SW. Gray hard sand .4
23 - West SW. gray hard sand
24 - Tank Clay Sand #1
25 - #3 Pump - Pea Gravel
26 #2 Pump - Gray hard sand

Called out to document Removal of Two Tanks by Brick Shop. Out of service & unknown. Likely out of use 40 years at least. Vents & pipes cut off below ground. Fill & access holes plugged. West Tank 45"x96" heating oil for house. east tank-gasoline. 47x144. Spillage around HO - removed & Tank leaking from rust spots - soil Looks good. Some gray weak smelling soil under Gas Tank but HO Tank Good. Sampled 3 around HO & one sidewall of Gas. No mixing of Gas & diesel. Gas not quite under foundation but need dirt to put in hole. Stockpile dirty. Randy to bring in 100 yds. clean for fill & use it against wall when tank pulled. Maybe Friday before he has dirt.

Tanks have lots of corrosion but not much leakage. Some overfilling - likely only original excavation.
soil dense Brown Tan sandy clay - not much clay
06 - HO ~~BTEX~~ 1050 Tan 509 - Gas - SSW (09)
07 - HO ~~BTEX~~ 645-7
08 - HO NSW Tan - 5

Dear Mr. Simons:

Please find enclosed the analytical data report for the Southgate Oil Project in Kent, Washington. Soil samples were analyzed for Diesel and Oil by NWTPH-Dx/Dx Extended on November 29, 2000.

The results of these analyses are summarized in the attached table. All soil values are reported on a dry weight basis. Applicable detection limits and QA/QC data are included. An invoice for this analytical work has been sent to Randy Perkins.

TEG Northwest appreciates the opportunity to have provided analytical services to Nowicki and Associates for this project. If you have any further questions about the data report, please give me a call. It was a pleasure working with you on this project, and we are looking forward to the next opportunity to work together.

Sincerely,

Michael A Korosec

Federal Way, WA 98003

Dear Mr. Simons:

Please find enclosed the analytical data report for the Southgate Oil Project in Kent, Washington. Soil samples were analyzed for Gasoline by NWTPH-Gx and BTEX by Method 8021B on October 23 and November 3, 2000.

The results of these analyses are summarized in the attached table. All soil values are reported on a dry weight basis. Applicable detection limits and QA/QC data are included. An invoice for this analytical work will be sent to Randy Perkins.

TEG Northwest appreciates the opportunity to have provided analytical services to Nowicki and Associates for this project. If you have any further questions about the data report, please give me a call. It was a pleasure working with you on this project, and we are looking forward to the next opportunity to work together.

Sincerely,

Michael A Korosec

This report is for the sole use of our Client. No additional distribution of this report is authorized without the express written consent of Nowicki & Associates, Inc.

Conclusions and recommendations prescribed by this analysis are predicated upon visual inspection, laboratory analysis, and the interview responses from involved parties. Interpretation of these elements has been performed within the generally accepted scope of a hazardous material investigation and the scope of work.

This report is an updated version of the earlier progress report including a section on the remediation that is in progress.

History

This site has a 75 year history as a fuel distribution site. Five tanks were listed as tanks for distribution. A 1000, 5,000 and 10,000 gallon tank was scheduled for removal. A 20,000 and 25,000 gallon tank are scheduled to remain and the site eventually put back in service after removal of unwanted tanks, remediation of impacted soil and restoration of the site.

Soil

Soil at the site is sandy clay or clay/sand with gravel, asphalt pavement or concrete cap. At approximately 8-10 feet below grade a sand/gravel hardpan is evident. None of the tank excavations penetrate below the hardpan.

An estimated 350 cubic yards of soil impacted by gasoline and diesel was removed from the excavations of the 9 tanks removed at the site. An additional 200 cubic yards of diesel impacted soil has now been removed from the central pump island site and the north central pump island site. With an anticipated small amount of excavation these two excavations will be closed except for the north wall of the central pump island excavation (pump #2). Excavation of this material will necessitate the disturbance of the 20,000 gallon tank excavation. This is still under evaluation at present.

Tank Removal

The initial three regulated tanks that were scheduled for removal have been removed. An additional 6 tanks not previously known to exist were discovered and removed for a total of 9 tanks removed.

This removal commenced on October 13 with the 1000-gallon diesel tank removed on October 17. Some historical research with the property's previous Owner uncovered the possibility of additional tanks and initial investigation uncovered four additional tanks in two locations. On November 7 two additional tanks were discovered.. Three of the originally scheduled tank removals and 8 additional tank removals have now been completed. Tank #5 near the office that contained diesel had a suction pumping system with the pump mounted with the dispenser. The old distribution site with the 5000 (#3) and 10000 (#2) gallon tanks as well as the untouched #1 & #4 large tanks have pressure pumping systems. The 5000 gallon and 10000 gallon tanks that were removed had the primary pressure pumps mounted on one end of the tank in a large plastic sump. Secondary pumps were located at the pump island in the dispensers. There were signs of leakage around the pumps and wells of each of these tanks. Also overfilling had impacted the soil covering these tanks. A loose fitting under the #2 dispenser leaked diesel into the pipe trench and impacted the soil below the dispenser island and into the soil next to the #2 tank excavation.

On November 15 sampling and characterization of the pump island area in the middle of the property was begun. The pump on the west side of the center pump island #2 was confirmed to have leaked and by November 30, 2000 an estimated 160 cubic yards of diesel impacted soil was removed from this excavation. The north wall of the excavation is still impacted with miner

impact to the bottom and south walls. Removal of additional material is planned for the bottom and south walls. The north wall will not be excavated due to the impact to the north end of the 20,000 gallon tank.

The old pump island for large quantity fueling on the north side of the 5,000 and 10,000 gallon tank location was removed and diesel impacted soil confirmed under the this site. After initially exposing the top of these tanks leaks around the primary pumps mounted on the tanks and overfilling impacted the soil around these tanks and appears to have migrated under the old filling station. An estimated 40 cubic yards of diesel impacted soil was removed from under the old filling station. The north sidewall is still impacted above the MTCA level of 200 ppm. An additional small quantity of impacted material is planned for removal from this area.

Water

No apparent groundwater has been seen at the site.

Sampling

Enclosed is a sample log and a summary of results from testing done on the soil at this site. All appropriate sampling protocols were followed and there is nothing to indicate that the quality of the data or the validity of the results were compromised. Samples were kept cool or refrigerated until delivery to TEG Laboratories, Inc., 7110 38th Drive SE, Lacey, WA 98503. Methods used were WTPH-D,G and BTEX where appropriate. Samples were generally taken as "worst case" within the vicinity sampled based on soil coloration, odor and field screening.

Remediation

350 cubic yards of impacted soil stockpiled out of the excavation has been has been undergoing bioremediation since the end of November 2000. Cooler temperature has hampered the remediation process over the winter slowing the progress of the soil. Field screening has been done three times since February 21, 2001. Thin layer chromotography was used the last three times. The last field screening on March 14, 2001 indicated some progress. Weather conditions are presently good and final sampling is anticipated within ten days. When sampling of the 350 cubic yards is complete this soil will be used as clean backfill at the site and the remaining 200 cubic yards brought out of the excavation for remediation. It is anticipated that a small quantity of soil will be added to this.

Preliminary data has now returned that shows the remediation of the 350 cubic yards outside the excavation is complete. This will be formalized when final reports are available.

Summary & Conclusions

Petroleum from leaks and overfilling has been in contact the soil at this site. Characterization is nearing completion for the removal of the 8 tanks removed. Impacted soil has generally been

identified to have originated from the tank excavations and the pump islands presently excavated. The east two tanks and distribution island were planned to remain ready for reuse. Impacted soil has been discovered next to the north end of the 20,000 gallon tank and likely intrudes into the excavation. This discovery and its impact to the remaining tank system are still being studied. Closure of the excavations and remediation of the north and central portions of the site are presently underway with the above noted exception. Remediation of 350 cubic yards of petroleum impacted soil presently stockpiled out of the excavation is nearing completion.

• **Comments:**

Assessment Report to date. Remediation for excavated USTs nearly complete.

additional description of contamination around Tanks Requested. Basically not much Change from earlier Report.
