

Georgia-Pacific West Cleanup Site - Lignin Operable Unit

Cleanup and legal documents ready for public review

Ecology invites you to review the cleanup action plan and two associated legal documents for the Lignin Operable Unit at the Georgia-Pacific West cleanup site (GP West). The Lignin Operable Unit is located on the Bellingham waterfront within the Chlor-Alkali Area of the GP West site.

Ecology and the Port of Bellingham (Port) have prioritized cleanup of the Lignin Operable Unit to enable purchase by Mercy Housing Northwest (Mercy) for redevelopment as affordable housing. The Port will clean up the Lignin Operable Unit under a legal agreement (Consent Decree Amendment) with Ecology. After the cleanup, Mercy will purchase a portion of the property from the Port and redevelop it under a legal agreement (Prospective Purchaser Consent Decree) with Ecology.

For more information, see reverse side →
