1 INTRODUCTION

The Riley Group, Inc. (RGI) has performed this Phase I Environmental Site Assessment (ESA) for Crystal Cleaners located at 520 Griffin Avenue, King County, Washington (hereafter referred to as the Site, Figure 1). No historical addresses were identified for the Site during this Phase I ESA. The following historical addresses were identified for the Site: 400 and 420 Griffin Avenue.

The Site consists of a two tax parcels (2420069401 and 2420069149), and is 0.33 acre in size. The Site is occupied by Crystal Cleaners. The owner of the Site is identified as the Estate of Maxine E. DeLauro.

The Phase I ESA was performed on behalf of Ms. Angela Prince, Personal Representative of the Estate of Maxine E. DeLauro (hereafter referred to as the Client), who authorized the Phase I ESA on July 22, 2013.

1.1 PURPOSE

This Phase I ESA was performed to identify recognized environmental conditions (RECs) and business environmental risks (BERs) associated with the Site in accordance with the scope of work and procedures included in the American Society for Testing and Materials Standard Practice E1527-05 (ASTM E1527-05) and the Code of Federal Regulations Title 40 Part 312 (40 CFR 312).

RECs and BERs, as defined by ASTM E1527-05, are described below:

The term "recognized environmental condition" means the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into buildings on the property or into the ground, groundwater, or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include de minimis conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis are not recognized environmental conditions.

The term "business environmental risk" refers to a risk that can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice.

Other definitions used herein, as defined by ASTM E1527-05, are provided in Appendix B for reference.

RGI understands that the Client has requested that this Phase I ESA be conducted to evaluate risks associated with the ownership and/or resale of the Site. This Phase I ESA was performed in compliance with the all appropriate inquiry (AAI) codified in 40 CFR 312. Completion of this Phase I ESA may qualify the Client for Landowner Liability Protections (LLP) from the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), provided that continuing obligations for LLP status are fulfilled.

1.2 SCOPE OF WORK

RGI's scope of work for this Phase I ESA included the following tasks:

- A reconnaissance of the Site and a cursory reconnaissance of adjoining properties.
- Interviews with knowledgeable persons regarding the Site and/or adjoining properties.

- Comment on polychlorinated biphenyls (PCBs), underground storage tanks (USTs), and aboveground storage tanks (ASTs).
- Review of building department records, tax assessor records, city directories, historical topographic maps, aerial photographs, real estate and fire insurance plat maps, geologic maps, and water/resource protection well log records, where available and applicable.
- Submit to the Client and the owner of the Site the ASTM E1527-05 User Questionnaire.
- Review of state and federal databases of contaminated facilities or facilities that use hazardous materials within ASTM E1527-05 parameters for the Site and surrounding area.
- Review of Washington State Department of Ecology (Ecology) files for the Site and/or adjoining properties that are considered a potential threat to the soil and/or groundwater quality of the Site.
- Review of any previous environmental reports prepared by others for the Site and/or adjoining properties (as provided to RGI by the Client or obtained by RGI).
- Preparation of this final Phase I ESA presenting RGI's findings, conclusions, and recommendations.

1.3 NON-ASTM CONSIDERATIONS

In addition to providing environmental services under the scope of ASTM E1527-05 for performing a Phase I ESA, RGI performed an environmental data review and/or reconnaissance to comment on the following for the Site: available domestic well water quality, asbestos-containing materials (ACMs), lead-containing paint (LCP), mold growth, methane gas, and radon gas.

2 DESCRIPTION OF THE SITE

2.1 LOCATION

The Site is located on the United States Geologic Survey (USGS) Enumclaw, Washington, 7.5-Minute Topographic Map (Figure 1) at an elevation of approximately 747 feet above mean sea level.

The Site is located in the southeast quarter of Section 24 of Township 20 North, Range 6 East of the Willamette Meridian. The King County tax parcel numbers for the Site are 2420069401 and 2420069149.

2.2 CHARACTERISTICS

The Site and surrounding area slope slightly towards the south. Typical property use in the area is commercial.

2.3 GEOLOGY, SOILS, AND HYDROGEOLOGY

The National Cooperative Soil Survey maps the Site as Buckley silt loam (unit Bu). The Buckley silt loam unit is described as a silt loam from 0 to 10 inches below ground surface (bgs), very gravelly loam from 10 to 20 inches bgs, and gravelly sandy clay loam from 20 to 60 inches bgs. This unit is poorly drained and the minimum depth to groundwater is reportedly between 0 and 12 inches bgs.

Geologic Map of Washington – Southwest Quadrant (Walsh, Timothy J., et al, 1987) mapped the Site as lahars (map unit Qv1), which is described as unsorted to poorly sorted, generally

unstratified mixtures of cobbles and boulders supported by a matrix of sand or mud; this unit also contains lesser stratified fluvial deposits originating on quaternary stratovolcanoes.

Groundwater flow direction beneath the Site is unknown. However, based on a review of regional topography, the inferred groundwater flow direction is towards the south. Well logs for the surrounding area indicate that depth to groundwater is approximately 3 to 5 feet bgs.

2.4 CURRENT USE OF THE SITE

The Site is occupied by Crystal Cleaners, a dry-cleaning business (Photographs 1 and 2).

2.5 CURRENT USES OF ADJOINING PROPERTIES

Current uses of adjoining properties are summarized below:

North of the Site: Ron's Auto Repair, located across Griffin Way (Photograph 3).

East of the Site: Mexican restaurant (Photograph 4).

South of the Site: Pizza Hut (Photograph 5).

West of the Site: Commercial/retail building, electrical contractor, and auto sales facility (Photographs 6, 7, and 8).

The above adjoining properties are not likely to handle hazardous materials that could have an adverse effect on the Site, except for the following: Ron's Auto Repair (discussed in Section 6.1.2).

3 PROVIDED INFORMATION

Information provided by the Client or the owner of the Site is either described below or described elsewhere in this Phase I ESA (as indicated). Copies of the provided information are included in Appendix C.

3.1 TITLE REPORT

No title records were provided to RGI for the purposes of this Phase I ESA.

3.2 PREVIOUS ENVIRONMENTAL REPORTS

No previous environmental reports were provided to RGI for the purposes of this Phase I ESA.

3.3 ASTM E1527-05 USER QUESTIONNAIRE

Ms. Angela Prince completed an ASTM E1527-05 User Questionnaire on August 5, 2013. Ms. Prince was unaware of any environmental liens, hazardous materials, spills or other chemical releases, environmental cleanups, USTs, ASTs, sumps, oil/water separators, hydraulic hoists, disposal pits, drywells, groundwater wells, septic tanks, or other environmental conditions or limitations associated with the Site. Ms. Prince did not know the past uses of the Site and did not have contact information for any previous owners.

Mr. Jin Im, occupant of the Site, completed an ASTM E1527-05 User Questionnaire on August 13, 2013. Mr. Im was unaware of any environmental liens, hazardous materials, spills or other chemical releases, environmental cleanups, USTs, ASTs, sumps, oil-water separators, hydraulic hoists, disposal pits, drywells, groundwater wells, septic tanks, or other environmental conditions or limitations associated with the Site. Mr. Im noted that the Site had been a dry-cleaning facility for approximately 30 years. Mr. Im did not have contact information for any previous owners.

4 RECONNAISSANCE

RGI's Ms. Ada Hamilton (Environmental Professional) performed reconnaissance of the Site on August 13, 2013. Features of the Site and surrounding area observed during reconnaissance are illustrated on the attached Figure 2. Photographs of the Site and adjoining properties are provided in Appendix A. RGI was accompanied by Mr. Jin Im during reconnaissance and had access to all areas of the Site. Weather conditions during reconnaissance were generally sunny with good visibility.

4.1 OPERATIONS/PROCESSES

The Site is occupied by Crystal Cleaners, a dry-cleaning business. Mr. Jin Im and his family have operated the dry-cleaning business for the past 17 years (since 1996). The dry-cleaning machine is a Union L840 U2000, which is a closed-loop dry-cleaning machine that is situated within a steel secondary containment pan. The machine has a capacity of 40 pounds, and uses DF-2000, a hydrocarbon-based solvent manufactured by ExxonMobil Chemical.

Mr. Im indicated that the machine utilizing the hydrocarbon-based solvent was installed by the manufacturer in 2003, replacing the previous machine, which used perchlorethylene (PCE). Mr. Im stated that there have been no leaks that have occurred from the machine.

Washing machines and a steam pressing machine are also located in the building. There is a boiler room located in the southeast portion of the building.

Mr. Im indicated that the facility generates approximately 5 gallons of solvent waste every 3 to 4 months, which is removed by Chem-Safe Environmental, Inc. The waste is stored in a 10-gallon drum until it is picked up by Chem-Safe Environmental, Inc.

4.2 BUILDING INFORMATION

The Site includes a one-story, slab-on-grade, wood-framed, approximately 2,250-square-foot building, which was constructed in 1969 (Photograph 1). The building is currently heated by natural gas, which is provided to the Site by the City of Enumclaw's Natural Gas Utility. A representative of the City of Enumclaw indicated that natural gas was connected to the Site in 1969. Sewer and water service is provided by City of Enumclaw.

4.3 OBSERVATIONS

Feature	Present on the Site (Yes/No)	Notes
Drinking water wells	No	
Irrigation wells	No	
Groundwater monitoring wells	Yes	A 2-inch-diameter groundwater (resource protection) well, depth unknown (further discussed in Sections 4.3.1 and 6.5).
Sumps	No	
Stormwater catch basins	Yes	No petroleum sheen or adverse odors noted.
Dry wells	No	
Oil-water separators	No	
Hoists	No	
Septic systems	No	
Suspect concrete/asphalt patches	No	

Floor drains	Yes	No petroleum sheen or adverse odors noted.
Natural gas meter	Yes	Installed in 1969.
Standing surface water	No	
Ponds, lakes, swamps, lagoons	No	
Rivers, streams, springs	No	
Fill or disturbed soils	No	
Chemical storage	Yes	One 55-gallon drum of dry-cleaning solvent, less than 5 gallon containers of detergent and fabric softener.
Pesticide/herbicide storage/use	No	
Drums	Yes	One 55-gallon drum of dry-cleaning solvent.
Waste disposal	Yes	One 10-gallon drum of solvent waste/filters.
Air emissions	Yes	Dryer emissions.
Odors	No	
Staining	No	
Stressed vegetation	No	

4.3.1 EXTERIOR OBSERVATIONS

RGI's exterior observation findings are summarized below:

- The exterior areas of the Site primarily consisted of a gravel parking lot on the western portion of the Site and asphalt paving east of the building.
- Two stormwater catch basins were observed on the Site.
- A monitoring well was observed south of the building, in an un-landscaped vegetated area. The well was not properly capped.
- Some cracking was observed in the asphalt east of the building.

In summary, based on our exterior observations during reconnaissance, no staining, adverse odors, stressed vegetation, or any other indications of improper storage or release of hazardous substances or petroleum products was observed on the Site.

No suspect environmental conditions were observed on the adjoining properties (as viewed from the Site).

4.3.2 INTERIOR OBSERVATIONS

RGI's interior observation findings are summarized below:

- Vinyl floor tiles were cracked in one area. The floor below the dry-cleaning machine is concrete, and appeared to be in good physical conditions with no visible deterioration or cracking.
- A floor drain was observed in the building, which discharges to the sanitary sewer system. No obvious indications of improper disposal of chemicals or wastes down the drain were observed.
- Less than 5-gallon containers of detergent, stain remover, and fabric softeners were stored on shelving. No obvious indications of contamination (staining, sheen, odor) were observed in their vicinity.

In summary, based on our interior observations during reconnaissance, no staining, adverse odors, or any other indications of improper storage or release of hazardous substances or petroleum products was observed inside the inspected areas of the building.

4.4 POLYCHLORINATED BIPHENYLS (PCBs)

The Environmental Protection Agency (EPA) considers PCBs to be a possible human carcinogen. The Toxic Substance Control Act of 1976 (15 USC § 2601) prohibited any manufacturing of PCBs in the United States after January 1, 1979.

PCBs have historically been used in the manufacture of electrical or other hydraulic equipment (for example, transformers, elevators, trash compactors, hoists), building materials (caulking, insulation), and building fixtures (for example, light ballasts, light bulbs, thermostats). Under 40 CFR 761.3, the mineral oil contained in untested transformers is assumed to be "PCB-contaminated" (50 to 499 parts per million PCB). The continued use of this equipment is authorized by the EPA.

No transformers or other indications of PCB-containing equipment or suspect electrical or hydraulic equipment were observed on the Site.

4.5 UNDERGROUND AND ABOVEGROUND STORAGE TANKS (UST/AST)

RGI's UST and AST survey included reconnaissance of the Site to identify indications of existing or former USTs or ASTs, such as vent pipes, fill ports, concrete pads, or asphalt patches (see Section 6.2 for a discussion of municipal records). No indications of existing or former USTs or ASTs were observed.

4.6 ASBESTOS-CONTAINING MATERIAL (ACM)

Washington State Department of Labor and Industries (L&I) mandates that, prior to impacting a building material for maintenance, renovation, demolition, an owner or owner's agent must perform, or cause to be performed, a "good faith" survey to determine whether the materials to be worked on or removed are ACM. Building materials should be considered suspect ACM until sampling and analysis confirm otherwise.

ACMs may have been utilized during the construction of the building. RGI observed several suspect materials throughout the building. These materials included, but are not necessarily limited to: wallboard systems, vinyl flooring, mastics, acoustic ceiling tile, and roofing materials. Additional suspect ACMs may be present in inaccessible areas of the building. Building materials and finishes appeared to be in good condition without visible damage or deterioration. Sampling of building materials was not included in this scope of work.

4.7 LEAD-CONTAINING PAINT (LCP)

Lead was typically used as an additive in paint to improve durability and coverage prior to being banned for residential applications in 1976 by the Consumer Product Safety Commission. Any building built prior to 1978 is considered suspect to have LCP.

Considering the construction date of the building (pre-1978), the painted surfaces may contain lead. The majority of the painted surfaces were observed to be in good condition with no evidence of deterioration, flaking, or peeling. Sampling was not included in this scope of work.

4.8 MOLD

RGI's mold survey consisted of a visual and olfactory reconnaissance of easily accessible, interior building surfaces for mold growth. Mold growth was not observed in the building. No moderate or severe water damage and/or staining were observed.

4.9 METHANE GAS

Methane gas is typically associated with landfills and abandoned coal mines. No landfills or abandoned coal mines were identified; therefore, methane gas is not considered a risk.

5 INTERVIEWS

RGI interviewed knowledgeable parties regarding the Site and its setting. Our interview findings are summarized below. Findings from the interview process may also be incorporated in other sections of this Phase I ESA.

5.1 CURRENT OWNER

RGI interviewed Ms. Angela Prince, representative of the owner of the Site, on August 14, 2013, and the pertinent results from the interview are summarized below:

- Ms. Prince indicated that the Site has most likely consisted of a dry-cleaning facility since the building was constructed in 1969.
- Ms. Prince indicated that her parents purchased the property in 1974, and operated the dry-cleaning operation from 1974 through 1977. The business was operated by Carl and Doris Brown from 1977 through 1982, and by Cheol Kyu and Jong Eun Cho from 1982 through 1985, and by Sang Kwang Kim from 1985 through 1996. The present occupants, Mr. and Mrs. Im, have operated the business since 1996. The Site has operated under the name Crystal Cleaners since at least 1972.
- Ms. Prince indicated that Mr. and Mrs. Im were required by their lease to properly dispose of chemicals through a pickup service (such as Chem-Safe Environmental, Inc) and maintain records of the disposal.
- Ms. Prince indicated that she was not aware of the date that the monitoring well was installed, and did not have any analytical data pertaining to its installation.
- Ms. Prince did not have knowledge of any oil-burning heat sources, USTs, ASTs, septic systems, groundwater monitoring wells, drinking water wells, sumps, oil-water separators, vaults, hoists, agricultural uses, or pesticide usage with regards to the Site.
- Ms. Prince was not aware of any previous environmental reports, investigations, cleanups, or contamination in association with the Site.

Any other information provided to RGI by Ms. Prince has been incorporated elsewhere in this Phase I ESA.

5.2 PREVIOUS OWNER(S)

Contact information for the previous owners of the Site was not provided to RGI.

5.3 OCCUPANT

RGI interviewed Mr. Jin Im, occupant of the Site for the past 17 years, on August 13, 2013, and the pertinent results from the interview are summarized below:

- Mr. Im indicated he was aware of the monitoring well, which he indicated was installed approximately 5 years ago. Mr. Im did not know its purpose, and was not aware of any data obtained from the well.
- Mr. Im indicated that the current hydrocarbon-based dry-cleaning machine had been installed in 2003, replacing the previous dry-cleaning machine.
- Mr. Im did not know what the former use of the Site was prior to the construction of the existing building.

- Mr. Im did not have knowledge of any oil-burning heat sources, USTs, ASTs, septic systems, drinking water wells, sumps, oil-water separators, vaults, hoists, hazardous materials, agricultural uses, or pesticide usage with regards to the Site.
- Mr. Im was not aware of any previous environmental reports, investigations, cleanups, or contamination in association with the Site.

Any other information provided to RGI by Mr. Im has been incorporated elsewhere in this Phase I ESA.

6 GOVERNMENTAL REGULATORY AND MUNICIPAL RECORDS REVIEW

RGI's federal, state, and local governmental regulatory and municipal records review and discussion of findings are presented below.

6.1 FEDERAL AND STATE REGULATORY RECORDS

RGI reviewed federal and state records in a search for properties with existing and/or potential environmental liabilities. Environmental Data Resources, Inc. (EDR) of Milford, Connecticut performed the records search on July 26, 2013. All records reviewed used search radii in accordance with ASTM E1527-05.

A complete copy of The EDR Radius Map™ Report and other records obtained from regulatory or municipal offices for this project are included in Appendix D of the PDF version of this Phase I ESA. However, due to the length of the database report, the bound version of this Phase I ESA includes the portion of the database report for properties located within 1/4 mile of the Site.

6.1.1 THE SITE

According to EDR, the address 420 Griffin Avenue is listed on the Leaking UST (LUST) database, with a facility name of Crystal Cleaners. However, the EDR listing gives an alternate name of Ernie's BP Enumclaw. RGI conducted additional searches of Ecology's online database, and determined that the LUST facility identification number is associated with Ernie's BP Enumclaw facility, which is located at the northwest corner of Griffin Avenue and Roosevelt. Ernie's BP Enumclaw facility and Crystal Cleaners have both used the address of 420 Griffin Avenue, which may have lead to the association of Ernie's BP Enumclaw facility with the Site in the EDR report. RGI requested records from Ecology, and Ecology did not have any LUST files referring to Crystal Cleaners. A representative from Ecology confirmed that the listing is in error, and indicated the name Crystal Cleaners would be removed from the association with Ernie's BP Enumclaw facility in Ecology's database.

Based on the assumption that the LUST listing is erroneously associated with the Site, this database listing is not considered a risk to the soil or groundwater quality of the Site at this time.

The Site is also listed on the FINDS, ALLSITES, Resource Conservation and Recovery Act Non-Generator (RCRA-NonGen), inactive drycleaners, and historic drycleaners databases. Contaminants of concern associated with historical dry cleaners include Stoddard solvent and perchloroethylene (PCE). Based on the duration of operations as a drycleaner, and the shallow depth of groundwater in the area, the Site's history as a drycleaners is considered a REC.

6.1.2 ADJOINING PROPERTIES

Ron's Auto Repair (aka Don's Chevron / Jerry's Chevron) is located across Griffin Avenue to the north. The property is listed on Ecology's Confirmed and Suspected Contaminated Sites List No Further Action (CSCSL-NFA), UST, Leaking UST (LUST), Voluntary Cleanup Program (VCP), and Independent Cleanup Report (ICR) databases and the EPA's Resource Conservation

and Recovery Act Non Generator (RCRA-NonGen) database. RGI requested and reviewed records from Ecology.

Available data indicates that four USTs containing gasoline and diesel were removed in 2009, and the media affected was soil. A UST Closure Report by Robinson and Noble was completed in June 2009, which indicated soil was contaminated with gasoline- and oil-range hydrocarbons. Ecology issued an NFA letter on November 23, 2011 that the property meets MTCA Method A cleanup levels. Due to the distance of contamination from the Site, the inferred groundwater flow direction relative to the Site, and the property status, Don's Chevron is not considered a risk to the soil or groundwater quality of the Site at this time.

6.1.3 OTHER PROPERTIES

Other properties within 1 mile of the Site were listed on various environmental regulatory databases. However, due to the nature of the database listings, media affected, property status, distance from the Site, and/or inferred groundwater flow direction relative to the Site, these other properties are not considered a risk to the soil and/or groundwater quality of the Site at this time.

6.2 UNDERGROUND AND ABOVEGROUND STORAGE TANKS (USTs/ASTs) RECORDS

RGI contacted the City of Enumclaw Fire Department and City of Enumclaw Permit Services regarding records of USTs and ASTs associated with the Site. No records were found that document the existing or former presence of any USTs or ASTs on the Site.

RGI also reviewed Ecology's online UST database regarding any regulated USTs located on the Site. The Site was not listed.

6.3 ENVIRONMENTAL COMPLAINTS AND HAZARDOUS MATERIAL RESPONSES

RGI contacted the Public Disclosure Coordinator for Ecology to determine whether any Environmental Report Tracking System (ERTS) listings exist for the Site. The ERTS database tracks all environmental reports and complaints made to Ecology since 1990, including clandestine drug labs and hazardous material responses. No ERTS listings were identified for the Site.

RGI also contacted the King County Public Health regarding any clandestine drug labs or hazardous material responses associated with the Site. No records were found.

6.4 DRINKING WATER WELLS AND SEPTIC SYSTEMS RECORDS

RGI contacted the King County Public Health regarding any existing or former septic systems or drinking water wells located on the Site. No records were found. Drinking water at the Site is currently a municipal source provided by the City of Enumclaw.

6.5 WELL AND SOIL BORING LOGS

RGI reviewed Ecology's Well Log Viewer online database. The database provides logs for wells and soil borings. No boring or well logs were found for the Site (other well logs are discussed in Section 2.3).

6.6 WELLHEAD PROTECTION ZONES REVIEW

Ecology's Facility/Site Atlas online database indicates that the Site is located within a five- and ten-year wellhead protection zone. The contamination susceptibility of the wellhead protection zone is reportedly "high."

6.7 UNDERGROUND INJECTION CONTROL (UIC)

RGI reviewed Ecology's UIC database for the Site. The Site was not listed.

6.8 RADON ZONES

The EPA has set an “action level” for indoor radon levels at 4.0 picoCuries per liter (pCi/L) and above. The EPA has designated three radon zones (Zone 1, 2, and 3) indicating highest to lowest average indoor radon screening levels.

The EPA radon zone designation for the Site (King County) is Zone 3, indicating the average radon level is less than 2.0 pCi/L. Based on the average radon concentration, the risk to the Site is considered low.

6.9 AREA-WIDE CONTAMINATION CONCERNS

No area-wide contamination issues have been identified for the Site.

7 HISTORICAL REVIEW

RGI's historical review of the Site and adjoining properties was based on an evaluation of the following:

- Historical aerial photographs dated 1941, 1944, 1954, 1961, 1970, 1985, 1995, and 2001.
- Sanborn Fire Insurance Maps (Sanborns) dated 1914, 1927, and 1943
- King County tax assessor current and historical records.
- City of Enumclaw Permit Services records.
- Polk City Directories (Polks) dated 1956, 1957, 1962, 1967, 1972, 1977, 1981, 1986, 1991, and 1998.
- Cole City Directories (Coles) dated 2003 and 2008.
- Kroll Real Estate Plat Maps (Krolls) dated 1969 and 1997.
- Interviews with knowledgeable persons (see Section 5 for details).

The current and historical addresses, as applicable, identified during this Phase I ESA were used during the historical records search.

Select historical documentation is provided in Appendices E and F. RGI's historical research findings are discussed below.

7.1 THE SITE

The Site is shown as being occupied by a structure labeled “Hen House” on the 1914 and 1927 Sanborns. This structure is not shown on the 1943 Sanborn, however, a residence is shown in the southeast corner of the Site. Aerial photos indicate this residence was on the Site through at least 1965. Tax assessor records indicate that the building was constructed in 1969. Historical city directories listed Crystal Cleaners at the Site from at least 1972.

According to an interview with Ms. Angela Prince, representative of the owner of the Site, her parents purchased the Site in 1974, and operated the dry-cleaning business from 1974 through 1977. The business was operated by Carl and Doris Brown from 1977 through 1982, and by Cheol Kyu and Jong Eun Cho from 1982 through 1985, and by Sang Kwang Kim from 1985 through 1996. The present occupants, Mr. and Mrs. Im, have operated the business since 1996. The Site has operated under the name Crystal Cleaners since at least 1972.

Based on the duration of operations as a drycleaner, and the shallow depth of groundwater in the area, the Site's history as a drycleaners is considered a REC.

7.2 ADJOINING PROPERTIES

The historical uses of adjoining properties are summarized below.

7.2.1 NORTH OF THE SITE

The first known development to the north-adjoining property located across Griffin Avenue was a single-family residence, which occupied the property from at least 1914 through at least 1943. The property was occupied by a gas station from 1966 through 2009. USTs were removed from the property in 2009, and associated contaminated soil was removed from the property. Ecology issued a determination of No Further Action in 2011. Due to the distance of contamination from the Site, the inferred groundwater flow direction relative to the Site, and the property status, this property is not considered a risk to the soil or groundwater quality of the Site at this time.

7.2.2 EAST OF THE SITE

The east-adjoining property is shown as being occupied by a single-family residence on the 1943 Sanborn. The existing restaurant building was constructed in 1960, and has been occupied by a restaurant since that time. An additional building was constructed east of the restaurant in 1994, which is currently occupied by an ice cream shop.

7.2.3 SOUTH OF THE SITE

The south-adjoining property was occupied by a single-family residence from at least 1914 through at least 1965. Tax records indicate the existing Pizza Hut restaurant was constructed in 1979.

7.2.4 WEST OF THE SITE

The first known developments to the west-adjoining properties were single-family residences, which occupied the properties from at least 1914 through at least 1943. The existing auto-showroom was constructed in 1963 on the southwest-adjoining property. Historical city directories and aerial photographs indicate a motel/restaurant occupied the northwest-adjoining property from approximately 1965 through at least 2005. The existing commercial building was constructed in 2009, and was noted to be occupied by a wine shop, teriyaki restaurant, and cell phone retail store during reconnaissance.

8 DATA GAPS

8.1 DATA FAILURE

Data failure occurs when the information obtained from a review of the standard historical sources that are considered reasonably ascertainable, still do not meet the objectives stated in ASTM E1527-05 Sections 8.3.1 through 8.3.2.2.

Data failure was encountered while conducting historical research for this Phase I ESA. The following data failure occurred:

- There are several time periods for which data could not be obtained at 5-year intervals (as stated in ASTM E1527-05 Section 8.3.2.1). Nonetheless, RGI does not consider this data failure as significant.

8.2 SIGNIFICANT DATA GAPS

Significant data gaps are data gaps that impact the conclusion of this Phase I ESA.

Significant data gaps were not encountered during this Phase I ESA.

9 CONCLUSIONS AND RECOMMENDATIONS

RGI has performed a Phase I ESA in conformance with the scope and limitations of ASTM E1527-05 and 40 CFR 312 for the Crystal Cleaners located at 520 Griffin Avenue, King County, Washington. Any exceptions to or deletions from ASTM E1527-05 are described in Section 8.

Based on our Phase I ESA findings, no evidence of RECs or BERs according to ASTM E1527-05 were identified in connection with the Site or its setting, except the following:

- **Dry-Cleaner Use:** The Site has been used as a dry cleaner from 1969 through the present. Potential environmental issues associated with long-term and historical dry-cleaning operations include the use of Stoddard solvent and perchloroethylene (PCE). Based on the duration of operations as a dry cleaner, and the shallow depth of groundwater in the area, the Site's history as a dry cleaner is considered a REC.

RGI recommends a Phase II Subsurface Investigation to determine if potential contaminants from dry-cleaning operations are impacting the quality of soil and groundwater at the Site

10 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

Any questions regarding the work within this Phase I ESA, the presentation of the information, or the interpretation of the data are welcome and should be referred to the undersigned.

Sincerely,

THE RILEY GROUP, INC.

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in 40 CFR §312.10. We have the specific qualifications, based on education, training, and experience, to assess a property of the nature, history, and setting of the Site. We have developed and performed AAI in conformance with the standards and practices set forth in 40 CFR 312.

Ada Hamilton
Project Manager

Paul D. Riley, LG, LHG
Principal/Senior Reviewer

Distribution: Ms. Angela Prince, (one bound copy and PDF)

11 RELIANCE

No reports or other information regarding the Site or its setting were provided to RGI other than those resources specifically mentioned herein. Reports relied upon by RGI are listed in Section 13 of this Phase I ESA.

This Phase I ESA should be considered effective on August 29, 2013. Based on the requirements of ASTM E1527-05, components of the Phase I ESA, including the reconnaissance, interviews, environmental database reviews, and environmental professional's declaration, will remain in effect until February 23, 2013 for use by the Client only. If this Phase I ESA is transferred to any other user, additional information will be required from that user in order to maintain the viability of this Phase I ESA. No other party may rely on this Phase I ESA without specific written agreement. Remaining elements of the Phase I ESA remain effective until August 29, 2014.

12 ASSUMPTIONS AND LIMITATIONS

Assumptions and limitations for this Phase I ESA are provided below and are intended to help manage any risks associated with the use of this Phase I ESA.

12.1 ASSUMPTIONS

RGI has made the following significant assumptions while performing this Phase I ESA.

Groundwater

Detailed information regarding groundwater flow depth and direction beneath the Site was not available. Based on a review of available well logs and regional topography for the vicinity, RGI assumes that groundwater beneath the Site is as described in Section 2.3. If information regarding groundwater that contradicts this assumption becomes available, the conclusions of this Phase I ESA may be impacted.

Historical Information

In evaluating the Site, RGI has relied upon information from individuals and agencies noted in the Phase I ESA. RGI assumes that the information provided by these third-party sources is accurate, and has no reason to suspect otherwise. RGI makes no warranty or guarantee regarding the accuracy and completeness of these resources.

12.2 LIMITATIONS

This Phase I ESA is intended for specific application to the Site, for the exclusive use of the Client and its authorized representatives. This Phase I ESA was prepared in a manner consistent with the level of skill and care ordinarily exercised by members of the profession currently practicing in the same locality and time, and under similar conditions. This Phase I ESA is based upon information obtained by RGI personnel and upon the condition of the Site and surrounding properties on the date of reconnaissance, supplemented by reasonably ascertainable information and data obtained by RGI. No other warranty or guarantee is implied or intended.

Content of Interviews

RGI accepts no responsibility for any deficiency, misstatements, or inaccuracies contained in this Phase I ESA as a result of misstatements, omissions, and misrepresentations or fraudulent acts of interviewees. In addition, potentially important interviewees are often unavailable or cannot be located within a reasonable project time frame.

Conflict of Interest

RGI has no present or contemplated future ownership interest or financial interest in the real estate that is the subject of this Phase I ESA. RGI has no personal interest with the subject matter of this Phase I ESA or the parties involved, which would prevent an independent analysis of the environmental conditions of the Site.

Uncertainty

No Phase I ESA can eliminate all uncertainty regarding potential RECs for the Site. This Phase I ESA is intended to identify potential RECs under the scope of work defined in Section 1 at the time this Phase I ESA was performed.

Changes in Site Conditions

Certain changes in the condition of the Site, including natural events (such as floods, earthquakes, and landslides), passage of time, changes in property use, and changes in

occupancy, may affect the conclusions of this Phase I ESA. RGI is available to prepare a proposal to evaluate any changes, if needed.

Environmental Regulations

The conclusions of this Phase I ESA are based on local, state, and federal regulations in effect at the time the Phase I ESA was completed. Changes to applicable local, state, or federal regulations following completion of the Phase I ESA may impact its conclusions. RGI is available to prepare a proposal to evaluate any changes, if needed.

Hazardous Materials

This Phase I ESA is not intended to serve as a hazardous materials, ACM, or LCP survey. Observations regarding the presence or likely presence of hazardous materials are included only to the extent required to satisfy the requirements of ASTM E1527-05 and/or the scope of work defined in Section 1 of this Phase I ESA.

Other Non-Scope Considerations

This Phase I ESA is not intended to address any concerns related to biological agents (such as, viruses, bacteria, and fungi), endangered species, indoor air quality, wetlands, or any other items not specifically identified in this Phase I ESA.

14 QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS

14.1 ADA HAMILTON, PROJECT MANAGER, SENIOR GEOLOGIST

Education

B.A. Geology, Carleton College, Northfield, Minnesota, 1998

Special Training, Licenses, and Certifications

40-Hour Hazardous Waste Operations and Emergency Response (HAZWOPER)

Professional Experience

Ms. Hamilton is a senior level geologist with over 11 years of experience in consulting for municipalities and private landowners throughout the Pacific Northwest. Ms. Hamilton's experience includes conducting numerous Phase I and Phase II ESAs, as well as managing remediation projects and consulting on environmental permit compliance. Ms. Hamilton has been the on-site geologist conducting feasibility studies and installing remediation systems. She has conducted groundwater studies, prepared stormwater management plans, and completed spill prevention control and countermeasure (SPCC) plans.

Representative Project Experience

Phase I Environmental Site Assessments: Conducted Phase I ESAs for a confidential client owning gas stations throughout Washington and Oregon.

Phase II Environmental Site Assessments: Conducted subsurface investigations, collecting soil, sediment, surface water, and groundwater samples for various properties throughout the Puget Sound area.

Aquifer Characterization: Conducted pump tests on shallow aquifers to determine hydraulic conductivity, transmissivity, and groundwater velocity. Installation of monitoring wells to determine hydraulic gradient. Aquifer characterizations were completed for the design and feasibility of soil and groundwater remediation.

Environmental Remediation: On-site geologist, conducted a series of vapor extraction and air sparging pilot tests. Continuing work included drilling of several monitoring wells, installation of the remedial system, and equipment operations and maintenance. Additionally, assisted in Hydrogen Release Compound (HRC) injection into contaminated groundwater, and followed up with quarterly groundwater sampling.

Site Assessment for Environmental Protection Agency, Region 10: Served as a Superfund Technical Assessment and Response Team (START) member for sites throughout Region 10 (Washington, Oregon, Idaho, and Alaska), conducting research and subsurface investigations to assess threats to human health and the environment.

14.2 PAUL D. RILEY, LG, LHG, PRINCIPAL GEOLOGIST

Education

M.S., Geological/Geophysical Sciences, Western Washington University, 1991

B.S., Geological Sciences, Michigan State University, 1988

Licensed Well Driller, Washington State

Washington State Registered Geologist (License No. 1264)

Washington State Registered Hydrogeologist (License No. 1264)

Continuing Education

Groundwater Remediation and Design, GNAW, 1994

Risk-Based Corrective Action, AST Seminar, 1996

Wetlands Delineation Workshop, Richard Chinn, 1999

Professional Skills

Principal, The Riley Group, Inc. (formerly Riley Environmental, LLC), Seattle, Washington. March 1996 to present.

Mr. Riley, the founding principal of RGI has professionally practiced as an environmental geologist and hydrogeologist in the Pacific Northwest since 1991. Mr. Riley has performed numerous Phase I and Phase II ESAs, risk-based site closures, aquifer pump tests, in-situ remediation system pilot studies, remediation system design, and remediation system installation and operations and maintenance for over 1,000 sites located in the Pacific Northwest.

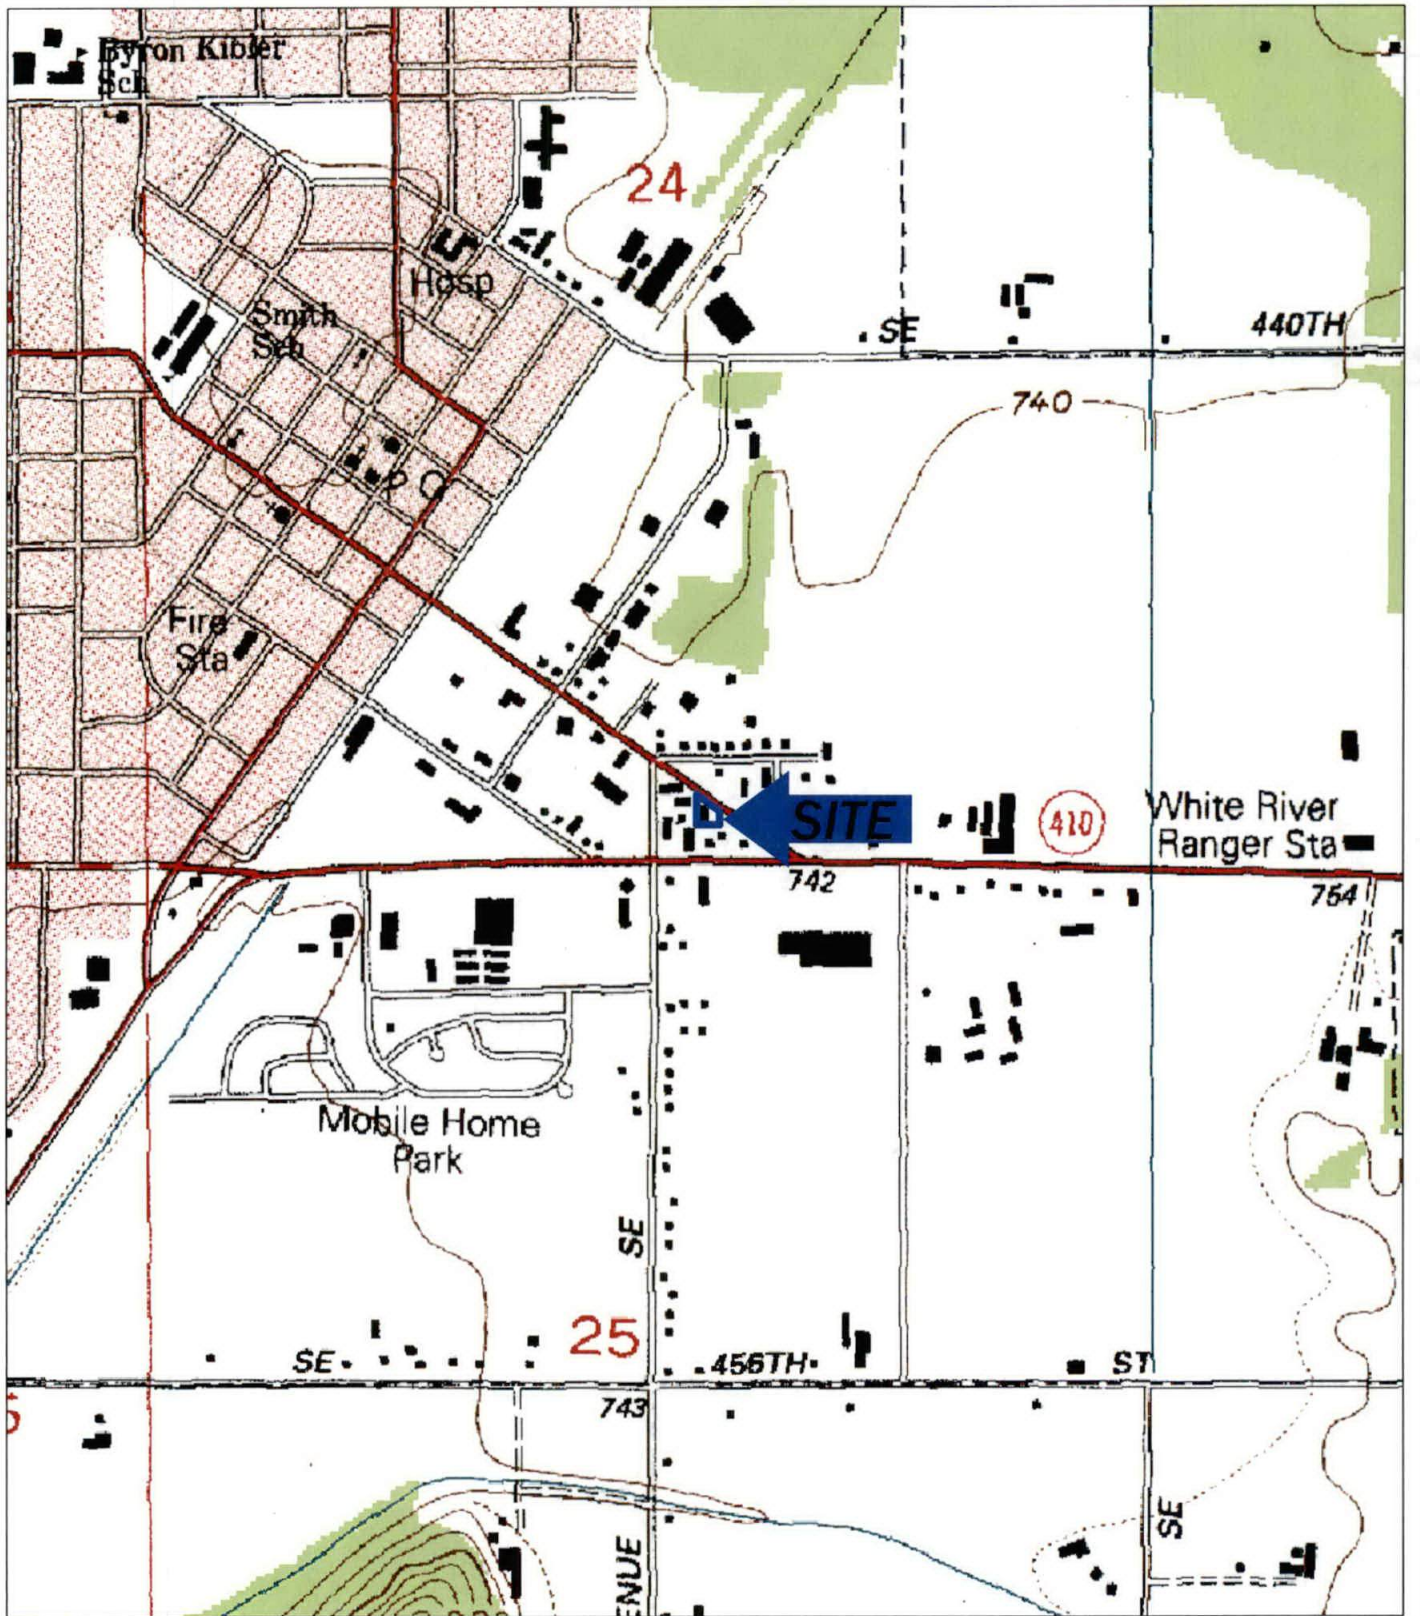

Mr. Riley is responsible for all operations of RGI. Responsibilities include administrative and technical operations and business development. Mr. Riley manages Phase I and Phase II ESAs, risk-based closures, remediation system implementation (design, installation, and operation and maintenance), geotechnical engineering projects for commercial and mixed-use construction, and wetland delineation and mitigation projects with RGI's diverse technical staff serving a local and national clientele base.

Environmental Division Manager, Omega Environmental (formerly O'Sullivan Omega), Seattle, Washington. November 1992 to March 1996.

Mr. Riley was the environmental division manager for the Pacific Northwest for a national UST installation and removal contractor. Mr. Riley supervised a staff of geologists and environmental engineers performing UST site assessments, Phase I and Phase II ESAs, remediation projects, compliance groundwater monitoring projects, and ACM and LCP building surveys.

Appendix B

ASTM E1527-05 DEFINITIONS OF TERMS

activity and use limitations (AULs)

“[L]egal or physical restrictions or limitations on the use of, or access to [the Site] (1) to reduce or eliminate potential exposure to hazardous substances or petroleum products in the soil or ground water on [the Site] (2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment.”

actual knowledge

“[T]he knowledge actually possessed by an individual who is a real person, rather than an entity.”

adjoining properties

“Any real property or properties the border of which is contiguous or partially contiguous with that of [the Site], or that would be contiguous or partially contiguous with that of [the Site] but for a street, road, or other public thoroughfare separating them.”

all appropriate inquiry (AAI)

“[T]hat inquiry constituting ‘all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice’ as defined in CERCLA 42 USC §9601 (35) (B), that will qualify a party to a commercial real estate transaction for one threshold criteria for satisfying the LLPs to CERCLA liability...”

asbestos-containing material (ACM)

Any material or product that contains more than one percent asbestos.

business environmental risks (BERs)

Risks that can have an environmentally driven impact on the business associated with the current or planned use of the Site, not necessarily limited to those environmental issues required to be investigated by ASTM E1527-05 (often non-ASTM scope items).

data gap

“[A] lack of or inability to obtain information required by [ASTM E1527-05] despite good faith efforts by the environmental professional to gather such information. Data gaps may result from incompleteness in any of the activities required by [ASTM E1527-05],” including, but not limited to conducting reconnaissance (for example, an inability to perform a complete reconnaissance) and interviews (for example, an inability to interview owners or regulatory officials).

data failure

“[A] failure to achieve historical research objectives... despite good faith efforts.” A data failure is a type of data gap.

environmental professional

“[A] person meeting the education, training, and experience requirements as set forth in 40 CFR 312.10(b).”

good faith

“[T]he absence of any intention to seek an unfair advantage or to defraud another party; an honest and sincere intention to fulfill one’s obligations in the conduct or transaction concerned.”

hazardous substance

“A substance defined as a hazardous substance pursuant to CERCLA 42 USC §9601 (14), as interpreted by EPA regulations and the courts...”

historical recognized environmental condition (HREC)

“[A]n environmental condition that would have been considered a [REC] in the past, but which may or may not be considered a REC currently.” An HREC is most often associated with a past release of hazardous materials that occurred in connection with a property but has been remediated and accepted as remediated by a regulatory agency (for example, an NFA determination from Ecology).

landowner liability protections (LLPs)

“[L]andowner liability protections under CERCLA; these protections include the *bona fide* prospective purchaser liability protection, contiguous property owner liability protection, and innocent landowner defense from CERCLA liability.”

lead-based paint (LBP)

Paint with lead levels equal to or exceeding 1.0 milligram per square centimeter (mg/cm²) or 0.5 percent by weight.

lead-containing paint (LCP)

Paint containing any detectable levels of lead.

practically reviewable

“[I]nformation that is practically reviewable means that the information is provided by the source in a manner and in a form that, upon examination, yields information relevant to [the Site] without the need for extraordinary analysis of irrelevant data.”

reasonably ascertainable

“[I]nformation that is (1) publically available, (2) obtainable from its source within reasonable time and cost constraints, and (3) practically reviewable.”

recognized environmental conditions (RECs)

“[T]he presence or likely presence of any hazardous substances or petroleum products on [the Site] under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on [the Site] or into the ground, groundwater, or surface water of [the Site]. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include de minimis conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.”

significant data gap

A significant data gap affects the ability of an Environmental Professional to identify a REC, and therefore, effects the conclusions of a Phase I ESA.

underground storage tank (UST)

“[A]ny tank, including underground piping connected to the tank, that is or has been used to contain hazardous substances or petroleum products and the volume of which is 10 percent or more beneath the surface of the ground.”

user

“[T]he party seeking to use [ASTM E1527-05] to complete a [Phase I ESA] of [the Site]. A user may include, without limitation, a potential purchaser of [the Site], a potential tenant of [the Site].... The user has specific obligations for completing a successful application of [ASTM E1527-05]....”

Appendix C

The Riley Group Inc.

ASTM E1527-05 USER QUESTIONNAIRE

ASTM E1527-05 states that in order to qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments") the user must provide the following information (if available) to the Environmental Professional. Failure to provide this information could result in a determination that all appropriate inquiry is not complete. Please answer the following questions to the best of your knowledge. Please attach additional sheets/documentation, as necessary.

Address: 400/420/520 Griffin Avenue, Enumclaw, Washington

RGI Contact: Ada Hamilton

1) Are you aware of any environmental cleanup liens against the Site that are filed or recorded under federal, tribal, state, or local law?

2) Are you aware of any activity and use limitations such as, engineering controls, land use restrictions, or institutional controls in place at the Site and/or that have been recorded in a registry under federal, tribal, state, or local law?

3) As a user of this Phase I ESA do you have any specialized knowledge or experience related to the Site or nearby properties? For example, are you involved in a similar business as the current or former occupants of the property or an adjoining property and, therefore, have knowledge of the chemicals and processes used by this type of business?

4) Does the purchase price being paid for the Site reasonably reflect the fair market value of the Site? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the Site? *As the user, if you intend to address this issue separately from our Phase I ESA (for example, as part of a property appraisal) please indicate "N/A" here:*

5) Are you aware of commonly known or reasonably ascertainable information about the Site that would help the Environmental Professional to identify conditions indicative of releases or threatened releases? For example:

(a) Do you know the past uses of the Site? Please include approximate dates, if possible.

(b) Do you know of specific chemicals that are present or were once present at the Site?

(c) Do you know of spills or other chemical releases that have taken place at the Site?

(d) Do you know of any environmental cleanups that have taken place at the Site?

(e) Are you aware of any current or former: aboveground or underground storage tanks, sumps, oil-water separators, hydraulic hoists, disposal pits, drywells, other wells and/or septic tanks at the Site?

6) As a user of this Phase I ESA and based on your knowledge and experience related to the Site, are there any obvious indicators that point to the presence or likely presence of contamination at the Site? (Use separate sheet, if necessary.)

7) Do you have any contact information for past owners of the Site? (Use separate sheet, if necessary.)

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

TARGET PROPERTY INFORMATION

ADDRESS

400 AND 520 GRIFFIN AVENUE
ENUMCLAW, WA 98022

COORDINATES

Latitude (North): 47.2002000 - 47° 12' 0.72"
Longitude (West): 121.9831000 - 121° 58' 59.16"
Universal Transverse Mercator: Zone 10
UTM X (Meters): 577023.2
UTM Y (Meters): 5227695.0
Elevation: 746 ft. above sea level

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in *bold italics* are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 02/12/2013 has revealed that there is 1 RCRA-CESQG site within approximately 0.25 miles of the target property.

State- and tribal - equivalent NPL

WA HSL: The Hazardous Sites List is a subset of the CSCSL Report. It includes sites which have been assessed and ranked using the Washington Ranking Method (WARM).

A review of the WA HSL list, as provided by EDR, and dated 02/27/2013 has revealed that there are 4

State- and tribal - equivalent CERCLIS

WA CSCSL: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Ecology's Confirmed & Suspected Contaminated Sites List.

A review of the WA CSCSL list, as provided by EDR, and dated 04/24/2013 has revealed that there are 9 WA CSCSL sites within approximately 1 mile of the target property.

State and tribal landfill and/or solid waste disposal site lists

WA SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Department of Ecology's Solid Waste Facilities Handbook.

A review of the WA SWF/LF list, as provided by EDR, and dated 09/06/2012 has revealed that there is 1 WA SWF/LF site within approximately 0.5 miles of the target property.

State and tribal Brownfields sites

WA BROWNFIELDS: A listing of brownfields sites included in the Confirmed & Suspected Sites Listing. Brownfields are abandoned, idle or underused commercial or industrial properties, where the expansion or redevelopment is hindered by real or perceived contamination. Brownfields vary in size, location, age, and past use -- they can be anything from a five-hundred acre automobile assembly plant to a small, abandoned corner gas station.

A review of the WA BROWNFIELDS list, as provided by EDR, and dated 04/24/2013 has revealed that there are 2 WA BROWNFIELDS sites within approximately 0.5 miles of the target property.

WA CSCSL NFA: The data set contains information about sites previously on the Confirmed and Suspected Contaminated Sites list that have received a No Further Action (NFA) determination. Because it is necessary to maintain historical records of sites that have been investigated and cleaned up, sites are not deleted from the database when cleanup activities are completed. Instead a No Further Action code is entered based upon the type of NFA determination the site received.

A review of the WA CSCSL NFA list, as provided by EDR, and dated 04/24/2013 has revealed that there are 7 WA CSCSL NFA sites within approximately 0.5 miles of the target property.

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 02/12/2013 has revealed that there are 10 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 7 EDR US Hist Auto Stat sites within approximately 0.25 miles of the target property.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

ALLSITES:

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D035
Waste name: METHYL ETHYL KETONE

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: WP02
Waste name: Washington State Dangerous Persistent Waste containing Halogenated Organic Compounds (HOC) at a total concentration level of 0.01% to 1.0%.

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

corrective action activities required under RCRA.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

HAZARDOUS WASTE BIENNIAL REPORTER

PCS (Permit Compliance System) is a computerized management information system that contains data on National Pollutant Discharge Elimination System (NPDES) permit holding facilities. PCS tracks the permit, compliance, and enforcement status of NPDES facilities.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/26/2013	Source: EPA
Date Data Arrived at EDR: 05/09/2013	Telephone: N/A

Number of Days to Update: 62	Next Scheduled EDR Contact: 07/22/2013
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 04/26/2013	Source: EPA

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 02/04/2013	Source: EPA
Date Data Arrived at EDR: 03/01/2013	Telephone: 703-412-9810

	Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 02/12/2013
Date Data Arrived at EDR: 02/15/2013

Number of Days to Update: 42	Next Scheduled EDR Contact: 09/23/2013
	Data Release Frequency: Varies

LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 12/09/2005	Source: Department of the Navy
Date Data Arrived at EDR: 12/11/2006	Telephone: 843-820-7326
Date Made Active in Reports: 01/11/2007	Last EDR Contact: 05/20/2013
Number of Days to Update: 31	Next Scheduled EDR Contact: 09/02/2013
	Data Release Frequency: Varies

Federal ERNS list

ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 12/31/2012	Source: National Response Center, United States Coast Guard
Date Data Arrived at EDR: 01/17/2013	Telephone: 202-267-2180
Date Made Active in Reports: 02/15/2013	Last EDR Contact: 07/01/2013
Number of Days to Update: 29	Next Scheduled EDR Contact: 10/14/2013
	Data Release Frequency: Annually

State- and tribal - equivalent NPL

HSL: Hazardous Sites List

The Hazardous Sites List is a subset of the CSCSL Report. It includes sites which have been assessed and ranked using the Washington Ranking Method (WARM).

Date of Government Version: 02/27/2013	Source: Department of Ecology
Date Data Arrived at EDR: 03/14/2013	Telephone: 360-407-7200
Date Made Active in Reports: 04/08/2013	Last EDR Contact: 06/11/2013
Number of Days to Update: 25	Next Scheduled EDR Contact: 09/23/2013
	Data Release Frequency: Semi-Annually

State- and tribal - equivalent CERCLIS

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

CSCSL: Confirmed and Suspected Contaminated Sites List

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

Date of Government Version: 04/24/2013	Source: Department of Ecology
Date Data Arrived at EDR: 04/26/2013	Telephone: 360-407-7200

State and tribal Brownfields sites

BROWNFIELDS: Brownfields Sites Listing

A listing of brownfields sites included in the Confirmed & Suspected Sites Listing. Brownfields are abandoned, idle or underused commercial or industrial properties, where the expansion or redevelopment is hindered by real or perceived contamination. Brownfields vary in size, location, age, and past use – they can be anything from a five-hundred acre automobile assembly plant to a small, abandoned corner gas station.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

CSCSL NFA: Confirmed and Contaminated Sites - No Further Action

The data set contains information about sites previously on the Confirmed and Suspected Contaminated Sites list that have received a No Further Action (NFA) determination. Because it is necessary to maintain historical records of sites that have been investigated and cleaned up, sites are not deleted from the database when cleanup activities are completed. Instead, a No Further Action code is entered based upon the type of NFA determination the site received.

Date of Government Version: 04/24/2013	Source: Department of Ecology
Date Data Arrived at EDR: 04/26/2013	Telephone: 360-407-7170

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

TACOMA/PIERCE COUNTY:

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Closed Landfill Survey

Following numerous requests for information about closed dumpsites and landfills in Pierce County, the Tacoma-Pierce County Health Department decided to conduct a study on the matter. The aim of the study was to evaluate public health risks associated with the closed dumpsites and landfills, and to determine the need, if any, for further investigations of a more detailed nature. The sites represent all of the known dumpsites and landfills closed after 1950.

Date of Government Version: 09/01/2002
Date Data Arrived at EDR: 03/24/2003
Date Made Active in Reports: 05/14/2003

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 05/20/2013
Date Data Arrived at EDR: 05/21/2013
Date Made Active in Reports: 06/27/2013

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals;

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Daycare Center Listing

Source: Department of Social & Health Services

Telephone: 253-383-1735

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

Subject: RE: Records Request Enumclaw PDTS# 21456 FSID# 29544148/5136299/18379829

Hello Ada

I just checked with our staff here. It appears that the address for the site (420 Griffin) is attached to this UST site at (320 Griffin) we believe the address on the Crystal cleaners site is incorrect in our Facility Site database and should not have been connected to this UST site I sent to you at 320 Griffin. There are no tanks at the Crystal Cleaners site. I do not have any files for the Crystal Cleaners site it only has a Hazardous Waste Interaction. You should have received the hazardous waste file at our NW region. We will be correcting the address for the cleaners shortly, my apologies.

As far as the invoice I had you pay for the copies how would you like to work that out? Or was that file helpful? Let me know.

Thank you
Carol Dorn
